Fort Saskatchewan Record

VOL. 1, [illegible] 32 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, OCT. 5th, 1932 $1.50 PER YEAR IN ADVANCE

Much Business Done At School Board Meeting

Minutes of a regular meeting of the Fort Saskatchewan School Board held in the Council Chambers on Monday, 3rd. of October, 1932, at 7:30 p.m.

Present:—Mr. F. Atkinson, Chairman; Trustees:—Mr. R. Todd, Mr. A. R. Brown, and Dr. Calhoun.

The Principal, Mr. Anderson, was in attendance.

The minutes of the last meeting held were read and adopted on the motion of Mr. Brown.

A letter from the Hon. the Minister of Agriculture, Edmonton, regarding classifying the school property, was submitted, in which the Minister expresses his desire to arrange for supply of necessary trees etc., for planting round the grounds. The Board decided to avail itself of this offer early in the spring, and to go ahead and get the ground ready in the meantime.

It was reported that owing to the large number of pupils in Miss Dickson's room, the seating arrangements were unsatisfactory. It was moved by Dr. Calhoun and adopted, that the room be inspected by the Board, and the seats changed to the best advantage.

Requisitions for supplies for the current school year from each teacher were received and considered. It was moved by Dr. Calhoun and adopted; That the requisitions be approved, and that supplies be purchased thru Mr. F. W. Smith as satisfactory as possible.

The four rooms in Public School will be closed on October the 6th, and 7th, on account of the four teachers attending the District Convention on those dates.

Monday, October the 10th., being Thanksgiving day, the whole school will be closed.

The following accounts were passed for payment on the motion of Mr. Brown:—Mayor Co., $12.00 water cooler with bubbler attached; A. E. Greenwood, $67.75 repairing furnace room, glass etc.; Jones, Graham and O'Brien, $2.91 window cords; Board Certificate continuing school public liability policy $25.00; J. T. Lalonde stove-dock $5.00; R. Buchanan $10.00 work with team on grounds; Electric light $1.50.

The meeting adjourned on the motion of Mr. Todd.

COMING EVENTS

A general meeting of the St. George Tennis and Badminton Club will be held in the Rectory on Wednesday, October 12. All members are requested to attend.

The ladies aid of United Church will hold their meeting at the home of Mrs. J. D. McLean on Thursday, Oct. 6th at 2:30 o'clock.

The Fort Saskatchewan Tennis Club will hold a Dance on Friday, Oct. 21st. Dancing from 9 till 2 a.m. Magee's Orchestra.

Some months ago the University of Alberta received a sum of money under the Carnegie Trust to be used in promoting music, art appreciation and drama within the Province. The Women's Institute of Fort Saskatchewan has been fortunate in securing one of the addresses under this scheme. Professor James Adam of the University of Alberta will give an illustrated lecture on Canadian Art at the next regular meeting of the Institute, which will be held at 3 o'clock on Thursday, October 13th. in the Masonic Hall.
All members are especially urged to attend and bring as many friends as possible. Friends from the country will be particularly welcome.

Harvest Thanksgiving services will be held next Sunday, Oct. 9th, at Beaver Hills, 11 o'clock, Ypres Valley 7:30, and Partridge Hill at 3 o'clock.

Rev. A. D. Richard, B.A. of Edmonton will be the preacher for the day.

Partridge Hill News

This week will about see the finish of threshing in the district. The Lawrence, Wallis, G. Oshaldeston and J. Smith outfits expect to pull in today, Wednesday.

Mrs. Jos. Smith will be hostess to the W. M. S. and ladies aid at her home on Thursday, Oct. 6th.

Mrs. J. W. Attewell and Mrs. Wilmot Allen will be hostesses to the U. F. W. A. on Tuesday, Oct. 11th.

Next Sunday, Thanksgiving services will be observed here. Rev. A. D. Richards of Edmonton will be the speaker.

Your attention is drawn to the announcement in the 'Sonis', of the ladies aid fowl supper on Oct. 14. also the turkey and duck shoot at George Oshaldeston's on Thanksgiving day.

Accident Occurs At Bridge East of Town

What might have been a serious accident occurred Tuesday night on the William street bridge just east of Fort Saskatchewan, when a car driven by Mr. Cross of Washateneu, with a lady and two gentlemen passengers, landed on the bridge with a team driven by Wm. Moore a farmer living in this district, two other teams had to the wagon were being led behind. The lady is reported to have had her ankle hurt. One of the horses was badly injured and was attended to by Dr. Hanen, V.S.

Both vehicles were proceeding East. It appears that to avoid the car the latter swerved to the side, striking the bridge, had the hanger torn off and suffered other damages, but was able to proceed. Constable O'Connell was early on the scene and directed the traffic on the bridge.

Constable Wentzer arrived later from Edmonton and is investigating the matter.

TENNIS CLUB NEWS

At a meeting of the Fort Saskatchewan tennis club held last Friday evening in Dr. Calhoun's office, it was decided to hold a dance on Friday, Oct. 21st. The arrangements were left in the hands of the committee previously.

During the evening, at the dance the presentation of the singles tournament cups donated by the club will be presented to the winners.

A motion was passed whereby the Club would start at once to have a small dug, put in a pump and erect an overhead system to hold the water for the tennis court. As there is always a shortage of water for the courts and this year they were extremely soft, it was decided to put in a well so as to be sure of water supply next year.

When finished this will be quite an asset to the club.

The dance committee wishes every member to work and make this dance one of the best and largest held this season.

BORN—to Mr. and Mrs. R. Todd of Fort Saskatchewan in the General Hospital, Edmonton on Tuesday, Oct. 4th., a daughter.

CLEVER YOUNG PIANIST TO GIVE RECITAL

Miss Grace McDonald, well known Fort girl, who made her pianistic debut in Edmonton in the Masonic temple a year ago, will be heard again in a recital of the same nature in Edmonton on Monday evening, Oct. 17, under the patronage of the Edmonton Women's Musical Club. Miss McDonald will give the same program which she played recently in Toronto where she was greeted with favorable reports from the critics of that city. The numbers are represented by a Bach chorale and Scarlatti sonata, while the biggest number on the program will be Beethoven's Sonata, Op. 53. Chopin is chosen from the romantic period, while a quintet of compositions representative of the work of composers of France, Spain and Hungary will interpret the modern period.

19 Years Ago Today

Thursday, October 2nd. 1913

The town council held their regular meeting on September 18th. Present Mayor S. G. Jones, Councillors Carmadine, O'Brien, Gordon and Buhanland.

Neville White left Tuesday Morning for Chipman for a week's prairie chicken shooting.

Chas. Stewart and family left last Saturday afternoon for his homestead near Rodway, Centre.

Cecil Ward, R.N.W.M.P., left on Wednesday night for England on a three months's leave of absence.

James Foster, formerly of the Fort now of Lamont, has just received his cheque from the Department of Finances at Ottawa, for services rendered during the Fenian Raid of 1866. Congratulations Jim, the hundred will come in mighty handy this winter.

James Graham has the contract to break a strip thirty feet wide around Elk Island Park. Sixteen miles, thirty feet wide is more or less ground.

Mrs. Emery was hostess of an enjoyable little tea on Friday last in compliment to Mrs. Shera's guests, Mrs. Crawford and Mrs. Claxton.

The new Queen's hotel is now in operation.

Josephburg News

The annual Thanksgiving services will be held on Sunday, October 9th. The morning service will be held at 10:45 a.m. by Rev. Hoen of Bruderheim, and Rev. Hoene will hold the afternoon service at 2:30 p.m.

We are sorry to hear that Mr. William Unterschultz is in the Lamont hospital.

Esther Geistlinger, three year old daughter of Mr. and Mrs. Pete Geistlinger had the misfortune of being hurt by a horse, and had to have a fingered removed at the Lamont Hospital.

Mr. and Mrs. George F. Mohr spent several days at Vegreville with relatives.

Mr. Charles Thomas returned home on Sunday from Rochester.

Beaver Hills

The Beaver Hills Ladies Aid will hold a Thanksgiving Supper in the Beaver Hills Church on Wednesday, October 12th.

"SALADA" TEA

"Fresh from the Gardens"

The Sun Is Shining.

As the writer sits down before his typewriter to type out this article, bright sunshine, typical of these beautiful Indian summer days on the prairies, is streaming through the window, while there is that invigorating tang in the air which leads one to throw back their head and draw in a lungful. The sun is shining, and in these days when we are all too prone to dwell on the dark side of things, it is well to remember that the sun is still there, shining away as strong as ever, the only difficulty being the clouds that intervene to obscure our vision.

The sun still shines, not only in the natural meaning of the words in the physical world, but in the larger sense that is much of brightness and warmth in life itself. Admittedly there are still difficulties ahead for many people, there are very acute problems to be solved, not only by individuals, but by communities and governments. These difficulties must be overcome, and solutions for these problems found, but is there not a very large ray of sunshine indeed in the knowledge that never before in the history of mankind were so many people, including the humble brains in all countries, devoting their time, their intellects, their energies, to searching out and testing the efficiency of the remedies to be applied. The world knows there is something out of joint somewhere and there is surely comfort and satisfaction in the knowledge that people are not just letting things drift in the hope that something will turn up to bring about a betterment, but, on the contrary, are tackling the problems from all angles with a view to effecting that betterment, and by preventing a recurrence of present difficulties.

Some people, who talk as if they believed the sun had been finally and forever blotted out, keep on circulating pessimistic views to the effect that the moral character of people is breaking down, that they are losing their initiative, that, instead of retaining confidence in themselves and in their own achievements, they are willing to become the mere birelings of the state. In the prevailing atmosphere of gloom in which such people surround themselves, they are growing up a generation of loafers and cribbalis. Is this a true picture? If it is, how can one account for such a highly desirable state of things, as reported in the Toronto Globe, that during the recent Canadian National Exhibition at Toronto nearly a million and a half people passed through its gates, and in all that time did not see arrest on a major charge was made. As the Globe says this is a remarkable record.

The Globe says further that there were but two fires, and those of no great consequence, further evidence of the prevailing prosperity and excellence in what for the time-being was a great city exposed to the dangers besetting all densely populated urban areas. There is no evidence in those reports that Canadian people are losing their mental grip, inclined to disregard the law and to engage in reckless, irresponsible acts.

The sun is shining. The spirit of helpfulness which rose to great heights during the tragic years of the war still lives in the hearts and minds of our people. It was displayed last year when people in the older sections of Canada shipped trainloads of supplies to assist and comfort their fellow-citizens in the drought-afflicted areas of Saskatchewan. It is being displayed this year within the confines of that Province by a generous response of people who "know" in order that they may give to those who, again this year unfortunately, "sow not." It reminds one of the war days when Red Cross branches, Patriotic Fund committees, and other organizations with the object of raising supplies and money to assist the dependents of our rural district, to new road of the organization of voluntary rural relief committees in areas where there are crops.—Albeit not very profitable.—to assist the people in less favorable areas where, again this year, there are no crops.

The sun is shining in the hearts of those who are building up and supporting these voluntary relief committees, and the sun will be shining in the homes to which such aid is extended.

And the clouds are growing thinner and lifting. Every now and then a ray of sun flickers through because it has never ceased shining. The clouds will finally break and disappear, and the sun burst forth in all its splendour and life-giving warmth. Despite all our discouragements, let us keep our courage, just as we are, as a people, clinging steadfastly to our old-time concepts of honesty, morality, industry and respect for the laws and institutions of our country.

A Remarkable Forest

Trees Four Feet In Diameter Are Only Part High

What is believed to be the most remarkable forest in the world has been found on the west coast of Africa. Although the trunks of the trees are as much as four feet in diameter, they attain the height of only one foot. No tree bears more than two leaves. Through England, new are shipped direct from India and Ceylon to Montreal, Havre and Bordeaux. Experts say the change in time would of the proportion of better tea, and the handling of how is to get best results in using the hard Perth water in tea making.

Only has a back-to-the-farm trek.

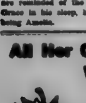
French Taking To Tea

Customs Reports Show Imports Doubled In Two Years

People of France, long noted for its wines, are taking to tea. Customs reports show that in the last two years imports of tea have doubled. Moreover, the known for the beverage, which formerly came through England, now are shipped direct from India and Ceylon to Marseilles, Havre and Bordeaux. Experts say the change in time would of the proportion of better tea, and the handling of how is to get best results in using the hard Perth water in tea making.

Only has a back-to-the-farm trek.

All Her Children Were Troubled With Diarrhoea



Mr. J. E. Baker, R.R. 1, Bladerby, B.C., writes:—"Last Summer all my children were troubled with diarrhoea, and were so bad I did not know what to do. A friend told me to give them Dr. Fowler's Extract of Wild Strawberry, so I got a bottle, and after a couple of doses you should have seen the change. The children were soon well again, and I am very thankful to your wonderful remedy. I find it is the only one that relieves so easily and quickly."

Wood Regains World's Speedboat Record

American Pilot Averaged over 124 Miles An Hour

Gar Wood regained the world's speedboat record by sending his "Miss America X," catapulting twice over a measured mile on the St Clair River at Algonac, Mich., at an average speed of 124.91 statute miles an hour.

The former record 119.75 miles an hour, was made on Loch Lomond, Scotland, July 18 last, by Kaye Don, British speedboat pilot, who tried unsuccessfully to wrest the Harmsworth trophy from Wood.

Wood, after the record-breaking run, said "Miss America's" four 12-cylinder engines had not been wide open in the effort and he thought the big, mahogany-hulled thunderbird could go faster. "How much faster, I can't say," he said. "The motors were making 2,500 revolutions per minute. Their limit, with safety, is 2,700 revolutions per minute."

Found Their Own Basket

Price Collected Did Not Suit Cuban Growers

When growers of onions in the vicinity of Roscoff Brittany, could not get the price decred for the yields of their small land tract, they formed a syndicate, chartered a small sailing vessel, loaded on it 60 tons of onions, and sailed for Scotland. Carrying long strings of the onions on their backs they went from door to door in Glasgow and other cities peddling their wares. When the cargo had been sold the growers figured up and found that the net profit was much larger than had they sold the vegetables at home.

Pension Rules the crusher and preserver of beautiful complexions. Tonic in effect and wonderfully stimulating. Safeguards and fortifies the most delicately-textured skins. Coats and relieves all skins flushed or irritated by weather conditions. Magical in results. Its gentle radiance and youthful freshness and daintiness is instantly created. Invaluable for softening the hands and making them flawlessly white Truly the perfect toilet requisite for the business and cares.

Edison In Canada

Harvest Of Discoveries Expect Given Unusual Impetus

There are 8,979 Edisons in Canada according to the census of 1921, and they are located as follows: Yukon, 29; Maritime Provinces, 1,670; Quebec, 1,180; Manitoba, 62; Alberta, three. There are 8,116 males and 2,863 females, says a report of the Dominion Bureau of Statistics.

It is impossible to say definitely whether the Edisons have increased or decreased during the past decade, but the impression is they are increasing.

Rebuked From Asylum

Man Who Read These Words Knew the Terrible Pain of Rheumatic Stiffness

Many who read these words know the terrible pain of rheumatic stiffness. Many do not realize, however, that there is one true remedy which will surely stop this drain. Dr. J. D. Kellogg's Asthma Remedy is a wonderful chest to this conveying element. It is also a wonderful relief to its credit. It is sold almost everywhere.

New Help For The Blind

An instrument recently perfected enables a blind person to read the ordinary type in books, magazines and newspapers. It is called a letter on a "reading panel" by the use of a light, lens, photo-electric cells, electromagnet and touch points.

An Oil Without Alcohol—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oils compose Dr. Thomas' Eclectric Oil, and there is no alcohol in it, so that its effects are lasting.

Relieve The Oil Strain

The discovery of a new process of extracting valuable minerals from worthless rock without the labor and expense of first pulverizing the entire mass, has been announced. The minerals are separated from the worthless rock by steam explosive shattering.

We can understand why some people do not care for opera, but why do they get provide because other people like it?

Dickens' Books Popular

Demand For Works Exceeds Supply Says London Librarian

The man who made Christmas Charles Dickens is as popular as ever among book-lovers. A London librarian, discussing what the public reads, has revealed that Dickens's works are demanded more frequently than they can be supplied. Scott, however, seems to be out of favor. Dickens also figures in a list of the thirteen books most widely read by girls over twelve in another big public library. It includes "David Copperfield" and "The Old Curiosity Shop." Boys also stick to the old favorites, but they actually prefer books in which the favor of adventure is stronger. "Robinson Crusoe," "King Solomon's Mines," "The Swiss Family Robinson," and "Treasure Island" are well up on the list. But, of course, certain of the classics are prescribed by teachers for home reading, and that may boost up the demand for them.

An efficacious household remedy Douglas' Egyptian Liniment. Brings immediate relief to sore back and muscular rheumatism. Also relieves inflammation, burns, sores, cuts and sprains.

An American hunter is to swim in shark-infested waters "to discover why sharks really attack human beings." How will he let his widow know what he discovered?

Achieved Her Ambition

Child Crippled With Infantile Paralysis Learned To Swim

An 11-year-old crippled girl returned to her home in Chicago from a camp this summer happy, for she had achieved the ambition of her short lifetime.

Carmelia Jaures, crippled with infantile paralysis since she was five, always had been afraid of the water. This year she learned to swim. She attended a camp near Burlington, Wisconsin, in the company of 300 other crippled children, all of Chicago.

Sleep is the great nourisher of infants, and without peaceful sleep the worst will not thrive. The easiest to get is the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-worn infant.

"Everlasting" cosmos, which after ripening turn green again if not picked and next year ripen to a better quality, have just been introduced from America into Spain.

For years Mother Graves' Worm Exterminator has ranked as a reliable worm preparation and it always maintains its reputation.

The "Land of the White Elephant" is Siam.

Wheat Exporting Countries Are Keenly Competing For World's Market Of 800 Million Bushels

The following article is by H. G. L. Strange, Director, Research Department, Searle Grain Co. Winnipeg, Manitoba.

"The world produces each year and consumes in round figures about 4,500 million bushels of wheat. These figures do not include China, which it has been roughly estimated produces and consumes about 600 million bushels. Therefore, the total amount of wheat produced and consumed by the entire world is probably in excess of 5,000 million bushels per annum.

Most of this wheat is consumed in the country in which it is produced some countries, however, produce less than they require and so have to import wheat, and vice versa. Some other countries produce more than they can consume and so they have wheat over and above their own part sale. The amount of wheat which is thus imported and exported, most of it across the sea—or which enters into international trade is between 750 and 800 million bushels each year. This is the market and the only market that is available for the wheat that Canada cannot consume at home and which she has to sell abroad.

Canada's average wheat production for the last ten years has been 290 million bushels per annum. Her exports during that period for the same ten years have averaged 281 million bushels per annum in the form of wheat and wheat flour, or about 70 per cent. of her total production of wheat. The amount she has exported as wheat has averaged 257 million bushels per annum, and as wheat flour 43 million bushels per annum.

The total world's export wheat market is slightly under 800 million bushels per annum. About 20 different European countries usually import this wheat. About one-fifth of this wheat is imported by countries outside of Europe.

Of the European importers Great Britain is the largest, averaging about 220 million bushels each year of wheat and wheat flour, but some of this is re-exported from the United Kingdom to other countries.

The wheat exporting countries, who are keenly competing for this world's market, consist of Canada, the Argentine, U.S.A., Australia, Russia, the Balkan States and Hungary, India, North Africa, Chile, and sometimes others, place them in the order of the quantities they export.

The average exports per annum for the last seven years for each country are shown herewith and the estimated export for the present year is shown in brackets:

Canada, 281 million (300); Argentina, 148 million (143); U.S.A., 135 million (130); Australia, 100 million (125); Russia, on average, last year 100 million, this year 75 million; other exporting countries, 36 million (75).

Those exporting countries that are able to offer sale a higher quality wheat than the average, or who produce the average quality and offer it for sale at less than the average price, will retain at least their proportion of the 800 million bushels world's wheat market."

Milk is the most complete food supplied by nature.

"Why are you so happy?"
"My mother-in-law insisted on coming with me and I have lost her. — Hammond, Hamburg.

United States Minting Mr. Ships Which Cost Millions

Six concrete ships which have been launched at the Mississippi River, New Orleans, are to be towed to the mouth of the Gatpava River in Mexico and used as a breakwater.

The ships, only one of which was ever used, were built by the United States shipping board during the world war at a cost of approximately $1,000,000 each. They are 300 feet in length and have a [illegible]

They were never placed in operation because it was found they were not suitable for commercial use. They carried 13 per cent. less cargo than steel ships of the same tonnage.

AN IMPORTANT COSMIC KNOCKOUT THAT FITS THE FIGURE —GIVES SLENDER APPEARANCE

Here's a frock that includes panties to match your slip. Think of the time you have so often wanted trying to buy a slip and panties that matched.

You can make this darling set in a single morning. It's simplicity itself. It's surprising how little it will cost you.

The slip, cut on princess lines—a fine model for the figure—is cut on the cross and hem with bias. The panties have a fitted yoke and circular legs, not too full. The edges are trimmed with narrow lace to match the lace on the slip.

It's very effective in pale pink crepe silk with nora lace.

Style No. 1431 is designed for sizes 12, 14, 16, 18 years, 36, and 38 inches bust.

Size 14 requires 2½ yards 39-inch for slip and panties with 2½ yards 9-inch lace and 3¼ yards 2-inch lace. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Works Years On Scales

Wonderful Pair Has Been Designed For Weighing Earth

After seven years of laborious work, Lt. F. S. Heyl has completed a wonderful pair of scales designed for weighing the earth.

You might expect the scales for this purpose would be of tremendous size. Actually they are quite tiny, and the most important part of them is a tungsten wire one-thousandth of an inch in diameter [illegible] so fine that it is kept in a temperature room, and protected from vibrations by treble walls.

We cannot, of course, weigh the earth as a whole. A [illegible] would first need some enormous instrument for measuring the gravitational pull exercised by comparatively small objects whose weight is known. The pull the earth exerts upon the moon and upon its other neighbors in space can be measured, and from these its weight may be calculated by comparison with the results obtained in the laboratory.

By means of his tiny scales, which he calls his "cosmic balance," Dr Heyl finds that the earth reaches the very respectable figure of six thousand trillion tons, or if you like to put it in figures, six followed by twenty-one noughts.

Greyhound Racing Old Sport

Was Practiced In Egypt Thousands Of Years Ago

Greyhound racing is one of the oldest sports in the world, although the pursuit of the electric hare is, of course, a recent innovation [illegible] a reminiscence in Hi-Hat.

The opening of a new training centre is really nothing what happened in Egypt nearly five thousand years ago. On ancient Egyptian monuments there is mention of racing dogs and the greyhounds once known as gazehound, since it hunted not by scent but by sight has retained its original shape throughout the ages. This is borne out by Egyptian mural decorations.

In Britain the greyhound has been known since the time of King Canute who, by statutes, confined its use to the nobility. Until comparatively recent times only landowners were permitted to keep greyhounds, and it was only when the game laws were relaxed that coursing became open to all.

With a powerful photo-electric instrument attached to a telescope, the brightness of a star can be measured to within one-half of one per cent. of its value

Production Of Gold In Canada Has Shown Remarkable Increase During Last Seventy-five Years

"Gold is where you find it" Canadians have been finding it in such interesting quantities in the last 75 years that the Dominion now ranks as the second greatest producer of the precious metal among the countries of the world.

A booklet prepared by A. M. A. Robinson and issued by the Department of Mines tells of the strides taken by this industry, one that did not feel the depression and never fails to find a market for its product.

In cold figures and prosaic observations that reflect nothing of the hysteric "gold rushes," the "heart-breaking travel of the pioneers of the Klondike or the hectic life of the mining camps, the record tells of the increase of Canada's output from 34,000 fine ounces valued at $702,000 in 1901 to 2,695,000 ounces valued at nearly $56,000,000 in 1921.

In 1900, after a steady increase from 1893, Canada stepped into second place among the world producers, supplanting the United States. In that year, Canada's output was 3,548,000 fine ounces with United States close third at 3,100,285.

South Africa, leader among world gold producing countries since 1895, has forged ahead with only slight occasional set-backs until the figure was 10,716,251 in 1920.

In 1921 Canada took a better grip on second place with 2,695,329 fine ounces. The United States produced 2,191,861 ounces and South Africa, still increasing its output, 10,874,148.

Gold is found in every province of Canada except Prince Edward Island, but the provinces of Ontario is now the heaviest producer. Of the 1921 production Ontario accounted for 78 per cent., principally from the mines of Porcupine and Kirkland Lake. Quebec produced 11 per cent. of the total, Manitoba 4 per cent., the Maritime 6 per cent., and the balance from Yukon territory, Nova Scotia and Alberta.

Beginning with 1901 as the two most important mineral products of the Dominion, gold took the lead in 1903 when the value of the yellow metal produced in this country exceeded the value of coal for the first time.

Under favorable conditions and improved methods have written the history of gold mining in Canada. Its rise and decline and second rise to even greater heights.

Do You Know?

This lady says her curtains look like new

A letter from a lady in Quebec tells about the wonderful success she had washing and restoring her old living room curtains. They were an ugly grey and dull looking they made the whole room look shabby. Yet they were perfectly good and I couldn't afford new ones. A neighbor told me about a new kind of Unis called Diamond Dyes made by the makers of Diamond Dyes. I know the splendid quality of Diamond Dyes have used them often for dyeing dark garments. My neighbor explained that Diamond Unis are for lighter shades and they need no boiling! I got a package of Ecru and gave my curtains a good rinse in the Unis solution. When my daughter came home she asked where I got my new curtains! They stood by the room for ages and fresh as when brand new but they cheer up the whole room."

WORLD HAPPENINGS BRIEFLY TOLD

The area of land under cultivation by Indians in Canada increased from 170,196 acres in 1916 to 227,226 acres last year.

The M.S. Lady Logan, the government vessel which has been in the far north, arrived in Churchill recently with a party of geologists.

Fines are being made for dyking and reclaiming 10,000 acres of rich silt land on Kootenay Flats, near Creston, B.C.

Japan's thirteenth "patriot plane" has been christened. It is a two-seater mounting 'plane, with 300 horsepower engine.

The first shipment of Canadian-grown tobacco to be made to the British colony of Sierra Leone left Montreal recently consigned to Freetown in West Africa.

Passengers carried by Imperial Airways between London and Paris reached the record figure of 4,726 for August, compared with 2,689 in August last year.

A non-stop flight of 4,304 miles is planned next spring by Capt. Stephan Darius and Stephen Giranus, Chicago transport pilots, from New York to Kovno, capital of their native Lithuania.

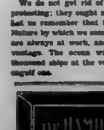
An indication that Mexico will return to the gold standard was given by a treasury department statement saying the president had ordered the purchase of national gold to be stored in the Bank of Mexico.

Aviation in all its forms is popular in Germany, particularly gliding; 317 gliding certificates were issued, and 341 airmen trained for their pilots' certificates to fly aeroplanes last year.

J. L. Wilson Gaudo, United Kingdom trade commissioner at Trinidad, has been transferred to Vancouver. A. B. Pollard, present incumbent of the Vancouver office, will take over Mr. Gaudo's duties at Trinidad.

Always At Work

We do not get rid of accidents by protesting; they ought not to happen. Let us remember that there here no Nature by which we sometimes suffer, are always at work, and for our advantage. The ocean waves carry a thousand ships at the very time they engulf one.



Plan To Establish Orchards

Dominion Undertakes Additional Fruit Growing Campaign

Hon. J. F. Bryant, K.C., who as Saskatchewan's Minister of Public Works is in charge of the Institutional Farms, has been promoting the campaign of fruit growing in the Province, issued this statement to the press in connection with the proposed fruit-growing campaign and the establishment of orchards on the Institutional Farms of the Provincial Government.

When Mr J E Park was dismissed as provincial gardener we had had in view the matter of promoting the growth of fruit in the Province of Saskatchewan through the Institutional Farms of the province, and we secured a man who is capable of carrying out this scheme. We were fortunate, indeed, in securing Mr Park in view of his long experience in connection with fruit growing work in Western Canada. He is a graduate of Manitoba Agricultural College where he specialized in horticulture with five years practical experience in charge of the fruit orchards at the Manitoba College Farm, and experimental work in fruit and during part of the time he was in charge of the fruit and diploma class of the Manitoba Agricultural College. This work was followed by six months training including paid breeding with special attention to fruit work at the plant breeding school of the University of Minnesota.

Following this Mr. Park put in five years as assistant superintendent in charge of horticultural work at the Experimental Farm at Rosthern where he was in charge of all experimental horticultural work and in addition with fruit growing in all its branches in the prairie provinces.

The centre of the Saskatchewan Government fruit-growing campaign will be the nurseries on the Fort Qu'Appelle Institutional Farms, at Regina, where a large acreage is available and where in the first instance some ten acres will be set aside for the "foundation stock trial ground" The area will be surrounded at once with a hedge planting with the trees planted at eighteen inches apart, as they are intended to form a wind break shelter belt. Spruce trees and willow cuttings will also be planted around the nursery in order to get a quick shelter belt. The willows will then be removed when the permanent ash, elm and spruce have grown up. A proper system of irrigation is being installed in connection with a fruit planting orchard at this station.

The orchard space will be divided into sections by rows of caragana planted every three hundred feet crosswise to the orchard. Dividing each section lengthwise from east to west will be rows of spruce trees planted four feet apart in the row. The rows of fruit trees will be planted one rod apart, so planted sixteen feet apart and at least eight feet 2 apart in the row. Between the two sixteen foot rows will be planted rows of small fruits to hold the snow. These will consist of black, white and red currants, which will grow from cuttings. Gooseberries which are grown by mounding up the gooseberry bush and cutting off the new cuttings from the live plant. In addition to this, raspberry suckers will be planted out. We expect to get the cuttings of gooseberries, currants and raspberries from the fall and other plant nurseries outside or best them in.

This is the general type of the plan for the orchards and similar orchards will be planted be laid out all the Institutional Farms at North Battleford and at the Institutional Farm in connection with the Good at Prince Albert. Five acre orchards will be laid out on the Institutional Farms in connection with the Mental Hospital, Weyburn, the Regina Gaol, and the Moosomin Gaol.

In the nursery grounds at Regina it is intended this fall to plant cots of plums, cherries and plum cherry hybrids, and apples and crabapple seeds in addition to this the seeds of hardy siberian crabapple and native plums will be planted for root stock on which to bud the plums, apples and crabapples with buds from the hardiest varieties. We are intending to get pits and buds of named varieties and plant them in order that fruit may be raised from the seedlings. We intend getting as many named varieties of apples, crabapples and plums as possible and from these will be used for seed stock and will be planted in the nursery in the fall. In this same way we get the buds which are used in grafting on native plums and hardy siberian Crabapple trees after the nursery is under way whenever we can find good hardy seed on these named varieties. We intend getting an experienced propagator appointed to this branch of work, so that we can be in order to get a good start with the propagation of the Dominion nursery at Regina which can be distributed to the other institutions where the propagation work being done only at Experimental Farms.

At each of the five Institutional Farms this fall we intend to plant seeds from named varieties and native plum and siberian crabapple for root stock. The seedlings from named varieties are going to be planted out and permitted to fruit as in this way we may get new and original stock for hardy purposes. All the seedlings of the apples, crabapples and all named varieties will be tested out for hardiness at the Experimental Farms, but all budded stock will come from Regina.

The planting of plum pits and apple seeds does not produce trees true to the stock from which they were taken, but the seedlings are most hardy for varieties. Every seedling apple, crabapple or plum is a new variety These coming from good varieties with hardy native blood in them will be more hardier as they are moved north by selection. The hardy varieties will stand the test where grown from seed, being raised for budding stock if they possess good fruit and in this way often the fruit line for many varieties may be moved two or three hundred miles north This has proven the case at the M. Orchen Experimental Farm which is the chief horticultural station of Western Canada. Here one breeding programmes and tests are devoted to horticultural experiments and three hundred kinds of plums are growing also the standard varieties of apples including the "Mollie" apple which is being perfected at that point Some extra hardy fruit tree will be a feature of the Dominion nursery plans and have produced wonderful results.

The pioneer in this work in the Morden district was the late Mr. Patterson, whose orchard was carried on experimental work and as a result of which to-day there are many as six hundred barrels of apples on his farm in one season. The many of the varieties produced in districts further south have become established and are a satisfaction in different parts of the province of Saskatchewan.

This work is being undertaken on the Institutional Farms of Saskatchewan in order to encourage the growth of fruit in the province Individual efforts have shown that it can be grown in practically any part of the province, owing to lack of knowledge on the subject very few have undertaken it. The institutional farms will demonstrate all the climatic belts in different soil belts, thus valuable experience can also be gained in each area for those who are interested in fruit growing in the immediate neighborhood. We purpose therefore by planting orchards at each of the Institutional Farms to supply the fruit necessary at these farms, particularly for the patients of the Mental Hospitals. It is planned to have the Institutional Farms as demonstration farms in order that the farmers from the surrounding country may come to see what can be done in the way of raising fruit in their neighborhood. It is also intended to carry on experimental work in the province to test out the varieties best suited for the different localities and also to try to develop hardier kinds than present varieties by experimental work and by depending on native plums and wild fruit roots.

This work will be carried on at practically no additional expense to the province as it is planned to get the work done by the regular staff of the Institutional Farms. The nursery trees and apple and crabapple seeds will be purchased from the Dominion nursery in Saskatchewan and Manitoba. We extend a public invitation to those who have carried on fruit growing in Saskatchewan with success to give us the benefit of their knowledge. Such plum pits, cherry pits, apple and crabapple seeds as they have been using for experimental Institutional Farms, and we should be pleased to receive scions of the variety of seed in different parts that they forward; and send the name of the variety if they can spare to Dr. J. W. McNeill, Mental Hospital, North Battleford; Dr. A. D. Campbell, Mental Hospital, Weyburn; Peter Forsythe, Warden, Provincial Gaol, Prince Albert J. E Park Provincial Landscape Gardener Parliament Buildings, Regina. Colonel Sharpe Warden Provincial Gaol, Moosomin. We would like the donors of these seeds and pits to forward them to the Institutional Farm nearest to the point where they reside.

The work in connection with the orchards will not occasion additional expense because all most of the Institutional Farms there are graduates of the Agricultural College to take charge and there is plenty of patient labor at the Mental Hospitals and jail labor at the jails.

The Saskatchewan Government has between four and five thousand acres of land in the Institutional Farms with experienced men in charge of each farm and we are prepared to try out anything in the fruit line for any of the nurseries or experimental farms when they have developed some new variety and desire to have it tested in different parts of the province Each Institutional Farm will be gradually established and our experimental work in connection to reciprocate by sending to the nurseries of the Experimental Farms any new varieties we may develop.

We believe that in starting these orchards and this experimental work and demonstration work that we are taking a forward step in fruit growing which will eventually result in the growth of fruit of different types on the farms in all parts of Saskatchewan. We are therefore asking the Experimental Farms to give us what surplus stock they have of different types, and to place us on the list for any surplus stock from year to year. We are also getting in touch with Dr. Patterson, Professor of Horticulture at the University of Saskatchewan who has a very large number of seedlings of different kinds on his farm and also who has one of the most extensive plum breeding programmes under way in Western Canada. Dr Paterson, however, has already noted a big demand for the planting out of the different types of seedlings in order to try them out for fruiting and we are inviting his co-operation and will endeavor to assist in his work by planting and recording the results of his experiments at our different Institutional Farms.

We are also intending to cultivate grapes as these have been grown with success in different parts of Manitoba and Saskatchewan This year a grape vine in the garden of the Government House, planted by the late Landscape Gardener, Mr Georgi Watt, here nearly twelve quarts of ripe grapes. These grapes were fine and good to eat in addition to being excellent for jam and for making wine. The seeds of all these grapes that ripened this year have been saved and are being planted in the nursery for the purpose of propagating this type of grape. From Regina the grapes in due course be distributed to the Institutional Farms.

THE CHRISTIAN IN THE FAMILY

Golden Text: "I will walk within my house with a perfect heart." Psalm 101:2.

Lesson: Genesis 50:17-21; Luke 2: 46-52; 10:38-42.

Devotional Reading: Psalm 101:1-7.

Explanations and Comments

The Development Of the Boy Jesus. Luke 2:40—As a Child Jesus grew, He grew strong and well, and the grace of God was upon Him. It is a beautiful description of the growth of the Christ had a human, progressive childhood.

Jesus' Unfilial Home With His Two Types Of Womanhood. Luke 10:38-42. Bethany was a frequent resort of Lazarus, Martha and Mary in their home at Bethany. On one occasion Mary sat at His feet and heard His word, while Martha was cumbered about much serving. Martha was worried and she felt that she was being unfairly treated in having all the work to do alone. Impatiently she said to Jesus, "Lord, dost Thou not care that my sister did leave me to serve alone? bid her therefore that she help me." But the impatience of her words Jesus answered her tenderly. "Martha, Martha," He said, "thou art anxious and troubled about many things: but one thing is needful." Mindful's transcription of the last clause reads, "one dish alone is necessary." Both sisters were wont to sit at the feet and listen to His words; both helped to prepare the meal, but Mary returned to Jesus when what was prepared was adequate as she thought. But Martha wished to serve a more pretentious meal—one of several dishes—in order better to honor the Lord. The whole point of Jesus' words to her then, was to warn Martha against herself. He did not wish his friend to hurt her into a drudge. He is about that she also sit at His feet and learn. "For Mary hath chosen the good part, which shall not be taken away from her." Not yours in fussing about, Martha, but hers is the good part of ministering, set to My words. Mary had chosen the better part of worship and understanding. It will not be taken from her now by my bidding but to help you, and it is of great importance to you that you have it."

RUNS UPSTAIRS AT 82

Daughter's Pride In Active Father

"I feel in duty bound," writes Mrs. A. J. W., "to express my gratitude for the marvellous results my father has obtained from Kruschen Salts. They should really be called Miracles! He is ninety two years old and is as a babe. He can walk and run up and down stairs His friends marvel why it is he is always alert, and never feels sick. He always tells them the secret is a cup of Kruschen daily does of Kruschen Salts every morning." We always recommend Kruschen Salts to all our friends. To my idea no family should be without it."

(Mrs.) A. J. W.

Most people grow old long before their time because they neglect one vital need of health—the need for internal cleanliness. Eventually they start the healthy Kruschen habit. Then they start getting rid every day of all waste matter from the system. New healthy blood goes coursing through the veins And almost immediately they feel young energetic and happy. In a word, they've got that famous "Kruschen Feeling"

Russians Cannot Send Food Through Malis

Attempts To Bolster Passive Discouraged By Soviets

Henceforth bread, flour, cereals, seed oils and other foodstuffs are to be barred from the mails, the postmaster-general has ordered.

It is hoped in this way to stop the voluntary and individual attempts to relieve famine which prevails in many provincial districts.

In the past half-year and more the shortage of food has become so serious that people opt for fruiting and are inviting his co-operation and will endeavor to assist in his work by planting and recording the results of his experiments at our different Institutional Farms.

We are also intending to cultivate grapes as these have been grown with success in different parts of Manitoba and Saskatchewan This year a grape vine in the garden of the Government House, planted by the late Landscape Gardener, Mr Georgi Watt, here nearly twelve quarts of ripe grapes. These grapes were fine and good to eat in addition to being excellent for jam and for making wine. The seeds of all these grapes that ripened this year have been saved and are being planted in the nursery for the purpose of propagating this type of grape. From Regina the grapes in due course be distributed to the Institutional Farms.

Did Not Heed Warning

Eight Calgary Residents Partially Blinded in Recent Holiday

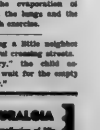
Eight Calgary citizens have received medical attention for varying degrees of blindness as result of watching the eclipse of the sun by the smoke glass route, and two of them used darkened glasses, it was shown in inquiries made to eye specialists.

One woman is almost totally blind in one eye while her other eye is slightly affected. Others suffered severe strain and were painfully blind.

Whether the affected persons will completely recover will not be known until treatment is further advanced. Practically all will be receiving attention for three or four months.

The average human body loses weight at the rate of one pound every eight hours by the evaporation of moisture through the lungs and the pores, and through exercise.

He was warning a little neighbor about being careful crossing streets. "Oh, don't worry," the child assured, "I always wait for the empty space to come by."



ELEVEN MEMBERS RESIGN FROM BRITISH CABINET

London, England. Denouncing the whole policy of the Imperial Economic Conference at Ottawa as "imperilling the unity of the Empire," three cabinet ministers and eight other ministers resigned from the national government.

"To bring these trade questions into the forefront of the political field is to invite disagreements between Empire governments which will hinder, sooner or later, business peace," declared the joint letter, in which two Liberal cabinet ministers and eight other Liberal ministers, not members of the cabinet, submitted their resignations.

Viscount Snowden of Ickornshaw, severing his years of close association with Prime Minister Ramsay MacDonald, was outspoken in denunciation of the proceedings at Ottawa and the agreements resulting, as he resigned from the cabinet in company with Sir Herbert Samuel, home secretary, and Sir Archibald Sinclair, secretary for Scotland.

"I am convinced," Lord Snowden wrote to the prime minister, "that the tariffs and imperialist policies which the Tories are carrying through are more dangerous in their permanent effect than the events of last year, which was temporary and yielded to drastic treatment

The places of two of the cabinet ministers resigning immediately filled as Prime Minister MacDonald sought to retain the non-party character of the government. But the resignations, in effect, meant the removal from the ministry of the entire block of free traders.

Replying to the declarations which accompanied the resignations, the prime minister declared the policies the National government was not yet completed; that it must be completed.

In a statement issued over his name and those of Rt. Hon. J. H. Thomas, dominions' secretary, and Lord Sankey, Lord High Chancellor, National Labor ites—Prime Minister MacDonald declared:

"We put our hands to a very big job 12 months ago. The same determination to safeguard all necessary partisan methods which we showed then we show still. The work is not finished and it cannot be finished until one way or another, there is a reparations and debts settlement, and we must go on till these things are done.

"We make the same appeal to the electors," the Prime Minister added, "as we did 12 months ago—that the nation support a strong government, and that purely party considerations would weaken our national influence in the world and would be a blow at the moments now at work towards world recovery."

King Pledges Party To Lower Barriers

Liberal Leader Claims High Tariffs Stifle Trade

Exeter, Ont. Declaring the development of Canadian industry and commerce had been thwarted and to a large measure paralyzed by the "excessively high tariffs, enacted by the present administration," Rt. Hon. W. L. Mackenzie King, leader of the Liberal party, pledged his party to continue to seek the promotion of trade by the lowering of tariff barriers.

Speaking on behalf of W. H. Golding, Liberal candidate in the South Huron by-election which wound up with polling on October 8, Mr. King strongly criticized what he termed attempts of government spokesmen to make the imperial economic conference the issue in the contest.

Veterans Want Five-Day Week

Toronto, Ont.—The Ontario command of the Canadian Legion in convention here prepared to forward to the Dominion command and to the Dominion Government a resolution favoring adoption of a five-day week and a six-hour working day.

Canada Unlikely To Enter Speedboat Race

World Re Difficult To Conform To Harmsworth Trophy Rules

Detroit.—W. D Bloomburn, chairman of the race committee of the Yachtsmen's Association of America, stated he doubted whether Canada could put an entry into next year's speedboat races for the Harmsworth trophy and the world's championship

Mr. Bloomburn quoted rules of the association to the effect competing boats must be designed by natives or naturalized subjects of the country from which they are entered and must be constructed wholly and in every respect in that country

Burt Hawker, of Gravenhurst, Ont. boat designer who drove Miss Betty Carstairs' entry in the Harmsworth in 1930, he said, had established at that time that he was an Englishman Hawker was mentioned in an announcement from Orillia, Ont., as the designer of a boat which an Orillia syndicate was considering entering in the 1930 race.

Construction of an engine of sufficient power to make its boat a contender for the Harmsworth cup, Canadian syndicate about $250,000, Mr Edenburn estimated.

Not Much Space Left

Small Area In Building Untitled For Grain Show

Regina, Sask. Two-thirds of the available space in the new building at the exhibition grounds to house the World's Grain Show of next year has already been filled for.

Officials of the exhibition stated that the latest application for space was that of the registrations. It was effect, meant the removal from the ministry of the entire block of free traders.

Replying to the declarations which accompanied the resignations, the prime minister declared the policies the National government was not yet completed; that it must be completed.

In a statement issued over his name and those of Rt. Hon. J. H. Thomas, dominions' secretary, and Lord Sankey, Lord High Chancellor, National Labor ites—Prime Minister MacDonald declared:

"We put our hands to a very big job 12 months ago. The same determination to safeguard all necessary partisan methods which we showed then we show still. The work is not finished and it cannot be finished until, one way or another, there is a reparations and debts settlement, and we must go on till these things are done.

"We make the same appeal to the electors," the Prime Minister added, "as we did 12 months ago—that the nation support a strong government, and that purely party considerations would weaken our national influence in the world and would be a blow at the moments now at work towards world recovery."

King Pledges Party To Lower Barriers

Liberal Leader Claims High Tariffs Stifle Trade

Exeter, Ont. Declaring the development of Canadian industry and commerce had been thwarted and to a large measure paralyzed by the "excessively high tariffs, enacted by the present administration," Rt. Hon. W. L. Mackenzie King, leader of the Liberal party, pledged his party to continue to seek the promotion of trade by the lowering of tariff barriers.

Speaking on behalf of W. H. Golding, Liberal candidate in the South Huron by-election which wound up with polling on October 8, Mr. King strongly criticized what he termed attempts of government spokesmen to make the imperial economic conference the issue in the contest.

Veterans Want Five-Day Week

Toronto, Ont.—The Ontario command of the Canadian Legion in convention here prepared to forward to the Dominion command and to the Dominion Government a resolution favoring adoption of a five-day week and a six-hour working day.

NEW PRESIDENT

J. W. ROSS

of Montreal, who has been elected president of the Montreal Chamber of Commerce, succeeding Col. W. L. McGregor of Windsor, Ontario.

New Moderator Elected

Dr. T. A. Moore Appointed Head Of United Church

Hamilton, Ont.—Rev. Dr T Albert Moore, Toronto, secretary to the general council of the United Church of Canada, was elected moderator of the church by the general council in session here.

The election was announced by Rev. Dr Richard Roberts, pastor of Sherbourne Street United Church, Toronto, and by Rev Dr W L. Armstrong, Trinity United Church, Toronto

Secretary to the general council of the church since the union, Rev. Dr. Moore was for many years previously an outstanding figure in the Methodist Church.

A native of Active, Ont., he began his career as a printer and publisher there. Turning to the ministry he was ordained in 1894 after completing his studies at Wesleyan College, Montreal.

Planes Damaged By Storms In North

Aviators Carrying Supplies To Outlying Arctic Have Hard Time

Churchill, Man.—Pierce gales which lashed the rock-bound shores of Hudson Bay, and heavy fogs which made visibility difficult and delayed grain boats bound for this port, played havoc with the three Canadian Airways planes operating here from Rankine Point to northern outposts, it was learned here.

Pilot Harry Dolphier, mentioned serious damage to the pontoons and another of the Junior planes may be out of commission for months.

During the past months motorfumes have dogged the footsteps of aviators Freighting in supplies to lonely settlements in the sub-Arctic here, and fears are now entertained that food supplies may be running low at some points.

Attempt Assassination Of Calcutta Editor

Two Men Commit Suicide After Plan Fails

Calcutta, India.—Two men committed suicide by poison after failing in an attempt to assassinate Sir Albert Alexander, editor of the Statesman, a daily newspaper.

Sir Alfred was shot in both shoulders as he was motoring in his car to his home, a large park-like area in the heart of Calcutta. A third member of the group that tried to kill him escaped. They used the automobile they used abandoned outside the city.

One of the bullets struck his chauffeur, who was seriously wounded, and another grazed the hand of Mrs. Rose Grosse, his secretary.

Proposed threats against the life of Sir Alfred have been made by extremists who objected to the policies of his newspaper. Last August an attempt was made to kill him, but he escaped uninjured.

Theosis Causes Anxiety

Tsitsihar, Manchuria. There is some anxiety here regarding the fate of 200 Japanese residents in the Manchuli district. Hailar districts owing to the uprising of Chinese railway guards who are reported to be planning to kill all the Japanese they encounter.

Laborers' Pay Raised

Winnipeg, Man.—City council has made its first upward pay revision. A motion to increase wages of common laborers from 40 to 42½ cents an hour was passed by council on a vote of nine to eight.

Hot Reports Denied

Moscow, Russia.—The Soviet government denied reports that 100 Soviet workers were killed in food riots at Sverdlovsk. No riots took place at all, it is said, and the reports were characterized as "mere Riga fabrications."

Student Flyer's Death Caused By Accident

Parachute Used By Winters Properly Packed Stated Instructor

North Battleford.—After brief deliberations, the jury inquiring into the death of Charles J Winters, Wilkie flying student, who crashed to his death when his parachute failed to open, returned a verdict of accidental death No riders were included in the verdict.

Chief evidence was heard from George Bennett, R.C.A.F. instructor who has been instructing flying club students in the art of parachuting

Bennett told the court he had made 1,000 jumps during his career and in only one instance had it been necessary to use the emergency chute. He had trained between 200 to 400 students, he stated He voiced the opinion that Winters had taken off the wing of the 'plane in a somersault and had become entangled in the harness, causing the chute to stay closed. He stated definately that the parachute was properly packed.

Pension Plan For Postmasters

Would Affect Only Those Receiving Under $2,600 Annually

Montreal, Que.—At the opening session of the first annual convention of the Canadian Postmasters' Association, Quebec branch, C. D Griffith, Estevan, Sask., outlined a superannuation plan for postmasters, which had been drawn up by a committee, of which he was a member, appointed from Hon. Arthur Sauvé, Postmaster-General The plan provided for contributions to annuity funds to be made half by the government and half by the postmasters. It would affect only those postmasters receiving under $2,000 annually, as those who receive more would come under the civil service pension scheme.

New Museum Opened

Hon. J. F. Bryant Officiates At Ceremony In Prince Albert

Prince Albert.—Hon. J. F. Bryant, Minister of Public Works, officially open the new Prince Albert historical museum in Bryant Park.

The building which will house the historical relics is one of the first structures to have been built here. It was erected by Rev. James Nisbet and members of his party, who landed here in 1866. For years it stood, gradually rotting away, until last year it was taken down and rebuilt in the park which was named after Mr. Bryant's father, a former resident here.

Honor Memory Of Parker

Belleville, Ont. The body of Sir Gilbert Parker, Canadian-born novelist and statesman, tonight rests by the side of that of Lady Parker, in a private mausoleum in Belleville cemetery, near East Camden, his birthplace. Representatives of every walk of life paid tribute to the memory of one of Canada's most brilliant sons at the funeral.

GLORIA'S DEBUT IN FILM DEBUT

Photographed in a little corner of England's Hollywood, just outside London, England, Gloria Swanson (extreme right) is shown casting a critical eye on a scene in which her husband, Michael Farmer, is acting with Genevieve Tobin before the movie camera. It was Farmer's first experience as an actor and he appears in the picture as Miss Tobin's husband.

HURRICANE LOSS AT PORTO RICO IS VERY HEAVY

San Juan, Porto Rico. More than 200 persons were killed and at least 1,000 were injured in the hurricane which swept across Porto Rico, Governor James Beverley estimated after receiving casualty reports from police authorities.

The governor told an emergency relief committee of San Juan citizens that the total dead and injured probably would be revised upward instead of downward when additional reports had been received.

The committee was organized pending a direct appeal to the United States Red Cross for badly needed assistance.

Starting shortly before midnight, a 130-mile wind lashed San Juan and the hinterland, wrecking buildings, ripping the roofs from houses, blowing down the walls, and ruining the valuable citrus fruit and coffee crops.

Loss in the fruit crop alone was estimated at $7,000,000. After a personal inspection of part of the area of devastation, Governor Beverley said the damage to the coffee crop would be even greater.

When the storm left Porto Rico and headed westward toward San Domingo, communications in the island had not been restored. It appeared probable that when all outlying points had been heard from the death toll would be considerably higher

Work of relief and repair got under way with such speed that it was impossible to determine how high the number of injured would be, but it was reported hundreds had been hurt. Thousands of persons were left homeless.

The storm put San Juan's water and light facilities out of commission A new transmission line must be built before power can be furnished for pumping water and mines from the reservoir Arrangements for a temporary water supply, imperative for reasons of sanitation, were being rushed.

New Train Schedule Eliminates Long Stop

C.N.R. Connection At Sanford Has No Need of Stop-Over At Winnipeg

Montreal, Que.—Eliminating the present 10-hour lay-over at Winnipeg, the new schedule of the Continental Limited between Montreal and Vancouver became effective with the departure of that train from Montreal and Toronto on the night of Friday, Sept. 30, it was announced by the Canadian National Railways.

The new schedule became effective westbound from Vancouver on Saturday, October 1, and eliminates a 10-hour lay-over at Winnipeg.

New Gold Find Reported

Engineers Consider Discovery In Beaver Lake District Important

The Pas, Man.—Discovery of gold concentrate an important new gold discovery is reported to have been made in the Beaver Lake district of northern Saskatchewan just over the Manitoba border, west of here.

Samples of quartz porphyry reaching here are said to be heavy in gold, and 40 men are already working in the neighborhood with prospects of continuing the work throughout the fall and winter.

Supports Provincial Tolls

Victoria, B.C. Nanaimo Conservative Association is the latest branch of government supporters to approve of Premier Tolmie's stand in favor of union government. Since the premier was criticised and asked to resign by a number of local Conservative bods s in Vancouver, several organizations in the province have rallied to his support.

Coal Production Down

Ottawa, Ont.—Coal production in Canada during August totalled 780,478 tons, a decline of 41.7 per cent. from the 1927-1981 average for the month, according to the Dominion Bureau of Statistics.

Dawning Of A New Era

Fifty Years Ago Editors Saw Possibilities Of Radio

When the lights of fifty-nine customers were turned on exactly half a century ago in a square mile of Pittsburg Nine Mile Bluffs, decayed into the swamps behind the tyrant. Yet from one speech in particular. At one time the country was strictly tied by the natural extinction of an Emperor in his thirty-fifth year, the soil is found that one speech of the Emperor of some particular nation. But how that the fiftieth anniversary of his greatest achievement has been celebrated it is evident that no new ones already than any of his contemporaries how electricity would transform society Trolley cars and conveyor instead of horses. Billion lamps in place of kerosene and gas, motors driving everything from sewing machine to battleships, energy on tap everywhere, like water a new epoch had indeed dawned when the switch was thrown in Pearl Street on September 4, 1882. —New York Times.

Feature At Chicago Fair

Women's Importance Will Be Fully Recognized At Exposition

Contributions of women to the social and economic life of the world during the last 100 years will be fully represented at the 1933 Century of Progress Exposition.

There will be no special women's building, because "woman's position in the economic and social world has become too important to be isolated in a special building," officials in charge of arrangements declare.

Plans are also being pushed for the International Congress of Women that will be held in connection with the exposition.

Figures Are Confirmed

Professor Fleurent Studied Height Of Ten Skiers in Embrun

Prof. Auguste Piccard and Max Cosyns, Belgium, confirmed the height of 16,201 metres (10 miles, 117 yards) in their world balloon ascension of last August 18, stated an official report by the Swiss Aero Club, received at Brussels, Belgium.

Though slightly below the height of 16,500 metres claimed by Professor Piccard, the official figures showed they ascended higher than any other human beings, and exceeded the record of slightly under 10 miles established year by the professor.

Trees To Farm

They were in the club and the conversation turned to forestmen.

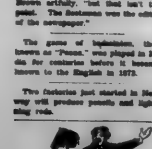
"Every acre unproductive," said Brown. "I've found it best to take these stories about forestmen with a pinch of salt. For instance, I once knew an Aberdonian who found a 20-carat gold ring in the street. The old blighter at once put a big display advertisement in a local newspaper. He stated that all the owner had to do was to pay for the advertisement."

"Well, that was certainly very dismal of him," put in Smith.

"Yes, I suppose it was," replied Brown artfully, "but that isn't the point." Bookmen was the editor of the newspaper."

The game of badminton, then known as "Poona," was played in India for centuries before it became known to the English in 1873.

Two factories just started in Norway will produce pencils and lighting rods.



"Now we are engaged, I must confess that I have an uncle in prison."

"That's all right. All my uncles ought to be in prison."—Voet Ilium, Stockholm.

Canadian Aviator To Fly To Moscow

Captain Lloyd Boyd, only Canadian to fly over the Atlantic Ocean in a non-stop flight, has announced his intention to take off from New York for Moscow as soon as the weather is right. By taking this line of flight Captain Boyd hopes to break the long distance non-stop record now held by John Russell Boardman and John Polando on their flight to Turkey. Above are pictures of Boyd and his 'plane.

Rose-Gold Dinner Service

Made in Sheffield As John II Created Sevres Ware

Would you like a gold dinner service or, rather, one that looks like gold? If so it will not be long before you can buy it at a cheaply on the Sunday market place.

Curiously enough, the new "gold" is made in Sheffield, the city of steel. The first rose-blue gold dinner service was made as the result of a joke. Messrs. W. Turner and Co., had been experimenting for some time with a new alloy of aluminium and bronze to which has all the appearance of good old gold.

"Why not make your new metal into the tableware?" someone facetiously suggested, and for a just the first marigold dinner service was made. To the delight of the firm it screened like the famous Sevres.

Pounds Mind the idea of eating off gold, and the new metal is easy to look after, since it is almost stainless.

The biggest demand, though, is likely to come from South America and other countries overseas, where there is a deep love of gold itself or of metal that looks like it.

Work Is Made Easy

Labor-Saving Devices

Labor-saving devices for poultry raisers are numerous. By pulling a rod all the windows on a thirty-foot section of a shed can be made to open or close at one time. Poultry food is set carried into the house. It is brought alongside by water-carry; then a small door in the wall is opened, a hopper drawn out, and the food slipped straight into it. It falls into a container inside the house. All the houses are supplied with fresh water, which is kept during the winter at a temperature of 45 by 50 by degrees Fahrenheit by electricity. From October to February, to increase egg production, the birds' feeding day is kept at 10 hours. Electric light is switched on and off by time-clocks, morning and evening. The poultry food is mixed on the premises in a giant blender. It is given to the birds in the form of an all-mash ration, of which they consume nearly 300 tons a week.

Sowing Wet Wheat

Grain Can Be Dried Without Damage To Quality

Artificial drying of wheat in Canada has now been practically perfected by the Dominion Research Council's Associate Committee on Grain Research. Losses of crop ranging from 30.5 to 53.3 per cent. and cash losses totalling millions of dollars were sustained by Canadian farmers in recent years through damaged or sprouting grain. The latter may now be dried without damage to its milling and, and baking quality through the efficiency of commercial driers. Experiments work is being extended to include processes for the drying of barley and other coarse grains.—Department of Agriculture, Ottawa.

Have Gold Salvaged

The Italian salvage ship "Artiglio II," has reported off Pitcairn Island, said, a fourth cargo of gold retrieved from the ancient liner "Egypt." The latest haul was the equivalent of $400,000. This makes the total salvaged $2,250,000 out of $2,500,000 in bullion in the Egypt's strong room when she sank in 1922.

Dogs Aid Smugglers

Show Extraordinary Cleverness In Evading Customs Officers

Spanish contraband have to have a clever enemy in the form of cleverly-trained dogs used to smuggle contraband ashore from boats, according to Colonel Soler Pardeno, of the Chief of Carabineers, in a statement made to a Madrid newspaper.

The Colonel says: "It is extraordinary the way these dogs work. When they are a customs officer they change their direction, and avoid him without making a sound. On reaching the shore they do not shake themselves, as dogs usually do but set off at full speed to their destination, therefore, how many of them are shot down."

The dogs carry the contraband in leather waterproof bags, fastened saddle-wise and strapped to their backs.

Thirty-Nine Countries Listed

Number Entered On Far Far World's Grain Show

Thirty-nine countries, provinces and states are listed at the present time as officially participating in the International Exhibition and Conference to be held in Regina, July 24 to August 5, 1933. Countries, provinces and states participating so at the present time are Belgium Czechoslovakia, Bathania, France, Germany, England, Scotland, Northern Ireland, Wales, Holland, Italy, the Netherlands, Poland, Spain, Switzerland, Jugo-Slavia, the Union of South Africa, Algeria, Tunis, India, Japan, the Philippines, Australia, New South Wales, New Zealand, Beam the Jewish Colonization Association for Palestine, the Argentine, Peru, Chili, several states of the American Union, the United States Federal Department of Agriculture, Guatemala, Mexico, the Northern Islands, Burma, the nine provinces of Canada and the Canadian Federal Department of Agriculture. All of these will participate either by way of sending official delegates or by entries in the competitive classes or by national exhibits.

Canada's Grain Elevators

Greatest Number Of Them Are In Country Districts

There is a total of 5,671 grain elevators with a capacity of 414,369,260 bushels in the prairie provinces and eastern divisions of Canada. Of this total 5,734 are country elevators with a capacity of 193,538,500 bushels. Manitoba has 139 elevators with a capacity of 49,761,500 bushels. Saskatchewan has 2,837 elevators with a capacity of 202,252,660 bushels. Alberta has 1,748 elevators with a capacity of 73,304,300 bushels.

Sheep Was Novelty

When an aeroplane, running low overhead, vied for attention with a trunk speeding through Red Wing, Minnesota, with its cut-out open, no one paid any attention to the noise. Two minutes later a sheep, being carried on a second truck, began to bleat. Traffic was tied up and business was at a standstill as clerks and office workers ran to the street or looked from windows to see the cause for the excitement.

Passing Of "Old Bay Store"

Historic Building In Winnipeg Is Demolished By Wreckers

Steeped in an atmosphere of pioneer days the "Old Bay Store," a direct lineal descendant of old Fort Garry, in Bonnycastle Nonsuch, the merry throng to Hudson Bay by canoe brigade, is being razed by wreckers. Today it is reminiscent of the founders of pioneer days.

The old landmark was built in 1881, all the materials of the first one having been brought from Europe by sailing vessel to Hudson Bay, thence by steamer to Victoria, Manitoba, and by ox-team to Winnipeg. It is constructed of stone taken from old Fort Garry and facing bricks used in its construction were imported from faraway St. Louis. They are said to have cost 75 cents each.

Removal of this historic building conjures up memories of the four Winnipeg forts Rouge and Gibraltar, Douglas and Garry. Conflicts between the rival fur-trading companies and Bay servants come to mind, ceding of government to the young confederation, the insurrection, led by the Metis, Louis Riel, and its collapse with the arrival of Col. Wolseley's troops.

Little now is left of the buildings around which the old Red River settlement was founded. Old Fort Garry, above the site of which northmen have been so busily engaged in the work of demolition, disappeared in 1911. Only the front gate, which stands in a little park nearby, remains of this historic group of buildings.

Loads in Highway Mileage

Saskatchewan Heads All Provinces With 185,000 Miles

Saskatchewan leads all the provinces of the Dominion in highway mileage, with 185,000 miles open for traffic on December 31, 1931, according to a report issued by the Dominion Bureau of Statistics.

Alberta comes next with 62,435 miles, and Ontario with 62,119 was in third position. Other provinces, with their mileages, were: Quebec, 35,782; British Columbia, 22,450, Nova Scotia, 14,719, New Brunswick, 11,580; Manitoba, 8,500; and Prince Edward Island, 2,650 miles. The total highway mileage in Canada is 372,024.

Judge Transfers Trial

Judge—"How fast were you going Smith?"

Smith—"Twenty."

Judge—"Thirty miles an hour?"

Smith—"Yessah. Ah was goin' mah den dat. Oh, yessah, Ah was goin' mah den 60 miles per hour. Ah was goin' 70 miles an hour. Oh, yessah, Ah was goin' 70 miles an hour, Judge."

Judge—"Just kind of a car were you driving?"

Smith—"A Ford, Model T."

Judge—"Preposterous, you could not go 70 miles an hour in a Model T Ford. That's impossible."

Smith—"Oh, no, suh, I'ains impossible atall. Ah had to hungry mules 70 miles an hour in dat car. Dis is a special kind of Ford, Judge. Dis cah has got a Ford body, a Packard chassy an' Pierce-Arrow glands."

Still Going Strong

Thousands of human generations all on notey as our eyes, have been swallowed up of Time, and there remains no wreck of them any more, and Ariven and Orion and Sirius are still shining in their courses, clear and young, as when the Shepherd first noted them.—Carlyle.

FANCIFUL FABLES

"Where is your pocket book?"

"What impudence, making a man at ten in the morning for a trifle like that!"—Lustige Bodies, Leipzig.

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of "The Rosary" "The Hound Of Heaven" Etc.

Hodder & Stoughton, Ltd., London.

CHAPTER XXXIII —Continued.

She found Blaise's cool, measured, elderly-brotherly kindness unendurable, and she exhausted herself hating continually against the rock of his determination, without producing any effect other than to make his manner even more austere, less friendly than it had been before.

Then when she recognized her total inability to move him to any sort of responsive emotion, and that her beauty which was undeniable—made no more impression upon him than if he had been blind, had removed to the old, pointedly familiar weapons of tears and fits of temper, in the course of which she would upbraid him bitterly, pouring forth streams of reproaches which more often than not culminated in an attack of hysterics.

All of which Blaise bore with a curious, stoical self-control. It seemed as though the Yorkarin temper had been exercised, as if that fierce storm of anger provoked by Madame de Vardgny's taunts, and which had so nearly resulted in a tragedy, had checked Blaise into realization of the terrible latent possibilities of the family failing and the absolute necessity for an iron self-government.

For weeks he supported Nesta's petty gibes and ebullitions of temper with illimitable patience, and it was only when, trading on his unaccustomed forbearance, she ventured too far, that she was brought very suddenly to understand that there was a limit beyond which she might not go.

"I knew why you no longer love me," she told him at last, on an occasion when she had been validly undeserving, by every feminine standard, of the wife of which she was mistress, to evoke from him some sign of an awakening "tenderness." "I know!"

She nodded her dark head significantly, while pin-points of jealous anger flickered in her long, dark eyes, black as midnight.

"Then, if you know," replied Turmarin patiently, "it is surely most foolish of you to keep asking me. I do not. Why can't you content yourself with things as they are, Nesta? We can only try to make the best of a bad job. You don't help me much in the matter."

"I don't want to help you," she retorted viciously. "I want you to love me. And you won't because of that rumbed-cat-looking, carroty-haired woman who is living with Lady Latimer. And she's in love with you, too! . . . . No! I won't be quiet! Oh?"—her voice rising hysterically—"You think I don't notice things, but I do. I do, I tell you!"

She sprang from the couch, where she had been idling luxuriously amid a heap of cushions, and eyed of the room in his ear.

"Do you hear me?" she cried violently, shaking him by the arm. "You think I'm a blind fool! But I'm not! I'm not! I've seen that Peterson woman look at you like a cat looking through the larder window—"

Suddenly she felt Blaise's hand clapped against her lips, stemming the torrent of vulgar recrimination and abuse that poured from them. He held it there quite gently, so as not to hurt her, but immovably, and she had perforce to hear what he wished to say in rebellious silence.

"Listen to me," he said quietly. "It is quite true, Nesta, you say—that I love Jean Peterson, and that she loves me. But we have given up our love, and with it our hope of happiness in this world, for you. In return, you will give up something for us. You will give up the infinite pleasure you appear to derive from vilifying and belittling a woman who is as much above you as the heavens are above the earth. That assumption of yours is as fine and pure as yours is mean and commonplace and jealous. You will never again speak of Miss Peterson except in language but respect, nor will you ever again refer to the love which you now know for a fact exists between us. That is the only way in which we can be friends. If you disobey my commands in either of these respects, I shall go away from home that same day. And you don't return."

He released her and had the satisfaction, for once, of perceiving that his words had struck home. What he had Presumably she came to the conclusion that, in the circumstances, discretion was the better part of valor, for she made no attempt to challenge his determination in the matter.

At the same time, unknown to him, she was preparing to pay for the silence enforced upon her at home. With a species of venom, absurdly childish in its manifestation, she set herself to the task of writing a constantly enlarging to her upon the subject of Blaise's perfections as a husband, and, with sufficiently imaginary descriptions of the attention he paid her and of his constant solicitude for her welfare, was securing her happiness at being his wife.

"I am so proud to have won so fine and splendid a husband," she would write, "although I should not feel the same, Miss Peterson, if you were me!"

Jean would make answer, outwardly unmoved.

"Indeed I should. You ought to be a very happy woman, Mrs. Turmarin."

The quiet composure which Jean invariably opposed to these goad-like attacks enraged Nesta intensely. Hitherto with all the petty jealousy of a small nature, she herself, had the attention been reversed, would have found the pain which kind of reserve insupportable, and it made her furious that her best thought-out and most spiteful missives failed to goad Jean into any expression of pain, anger or distress. The "cold Englishwoman's" armour of indifference and reserve seemed to be impervious to the nastiest wheat poison-tipped dart she loosed against her.

Nesta felt that, as the woman in possession, she was entitled to some satisfaction in life by reason of her inability to triumph openly over the other woman, by reason of her position as the wife of Blaise. Finally, at the end of her resources of innuendo and allusion, she tried the effect of open warfare.

It was a mistake that lasted long. Jean's one shaft, delivered with the utmost calm, blunt as midnight.

"Then, if you know," replied Turmarin patiently, "it is surely most foolish of you to keep asking me. I do not. Why can't you content yourself with things as they are, Nesta? We can only try to make the best of a bad job. You don't help me much in the matter."

"I don't want to help you," she retorted viciously. "I want you to love me. And you won't because of that rumbed-cat-looking, carroty-haired woman who is living with Lady Latimer. And she's in love with you, too! . . . . No! I won't be quiet! Oh?"—her voice rising hysterically—"You think I don't notice things, but I do. I do, I tell you!"

ALMOST FLAT ON HER BACK

Aching back! Will it never stop! She's nearly desperate. Lydia E. Pinkham's Vegetable Compound has relieved hundreds of backache victims for over 50 years.

W. N. U. 1000

She stood, with her hands clenched at her sides, her face distorted with passion, her eyes blazing, her whole attitude one of vulgar recrimination and abuse that poured from them. He held it there quite gently, so as not to hurt her, but immovably, and she had perforce to hear what he wished to say in rebellious silence.

"Listen to me," he said quietly. "It is quite true, Nesta, you say—that I love Jean Peterson, and that she loves me. But we have given up our love, and with it our hope of happiness in this world, for you. In return, you will give up something for us. You will give up the infinite pleasure you appear to derive from vilifying and belittling a woman who is as much above you as the heavens are above the earth. That assumption of yours is as fine and pure as yours is mean and commonplace and jealous. You will never again speak of Miss Peterson except in language but respect, nor will you ever again refer to the love which you now know for a fact exists between us. That is the only way in which we can be friends. If you disobey my commands in either of these respects, I shall go away from home that same day. And you don't return."

He released her and had the satisfaction, for once, of perceiving that his words had struck home. What he had Presumably she came to the conclusion that, in the circumstances, discretion was the better part of valor, for she made no attempt to challenge his determination in the matter.

At the same time, unknown to him, she was preparing to pay for the silence enforced upon her at home. With a species of venom, absurdly childish in its manifestation, she set herself to the task of writing a constantly enlarging to her upon the subject of Blaise's perfections as a husband, and, with sufficiently imaginary descriptions of the attention he paid her and of his constant solicitude for her welfare, was securing her happiness at being his wife.

"I am so proud to have won so fine and splendid a husband," she would write, "although I should not feel the same, Miss Peterson, if you were me!"

Jean would make answer, outwardly unmoved.

"Indeed I should. You ought to be a very happy woman, Mrs. Turmarin."

The quiet composure which Jean invariably opposed to these goad-like attacks enraged Nesta intensely. Hitherto with all the petty jealousy of a small nature, she herself, had the attention been reversed, would have found the pain which kind of reserve insupportable, and it made her furious that her best thought-out and most spiteful missives failed to goad Jean into any expression of pain, anger or distress. The "cold Englishwoman's" armour of indifference and reserve seemed to be impervious to the nastiest wheat poison-tipped dart she loosed against her.

Nesta felt that, as the woman in possession, she was entitled to some satisfaction in life by reason of her inability to triumph openly over the other woman, by reason of her position as the wife of Blaise. Finally, at the end of her resources of innuendo and allusion, she tried the effect of open warfare.

It was a mistake that lasted long. Jean's one shaft, delivered with the utmost calm, blunt as midnight.

"Then, if you know," replied Turmarin patiently, "it is surely most foolish of you to keep asking me. I do not. Why can't you content yourself with things as they are, Nesta? We can only try to make the best of a bad job. You don't help me much in the matter."

"I don't want to help you," she retorted viciously. "I want you to love me. And you won't because of that rumbed-cat-looking, carroty-haired woman who is living with Lady Latimer. And she's in love with you, too! . . . . No! I won't be quiet! Oh?"—her voice rising hysterically—"You think I don't notice things, but I do. I do, I tell you!"

MARGARET PEDLER

Author Of "The Rosary" "The Hound Of Heaven" Etc.

Hodder & Stoughton, Ltd., London.

CHAPTER XXXIII —Continued.

She found Blaise's cool, measured, elderly-brotherly kindness unendurable, and she exhausted herself hating continually against the rock of his determination, without producing any effect other than to make his manner even more austere, less friendly than it had been before.

Then when she recognized her total inability to move him to any sort of responsive emotion, and that her beauty which was undeniable—made no more impression upon him than if he had been blind, had removed to the old, pointedly familiar weapons of tears and fits of temper, in the course of which she would upbraid him bitterly, pouring forth streams of reproaches which more often than not culminated in an attack of hysterics.

All of which Blaise bore with a curious, stoical self-control. It seemed as though the Yorkarin temper had been exercised, as if that fierce storm of anger provoked by Madame de Vardgny's taunts, and which had so nearly resulted in a tragedy, had checked Blaise into realization of the terrible latent possibilities of the family failing and the absolute necessity for an iron self-government.

For weeks he supported Nesta's petty gibes and ebullitions of temper with illimitable patience, and it was only when, trading on his unaccustomed forbearance, she ventured too far, that she was brought very suddenly to understand that there was a limit beyond which she might not go.

"I knew why you no longer love me," she told him at last, on an occasion when she had been validly undeserving, by every feminine standard, of the wife of which she was mistress, to evoke from him some sign of an awakening "tenderness." "I know!"

She nodded her dark head significantly, while pin-points of jealous anger flickered in her long, dark eyes, black as midnight.

"Then, if you know," replied Turmarin patiently, "it is surely most foolish of you to keep asking me. I do not. Why can't you content yourself with things as they are, Nesta? We can only try to make the best of a bad job. You don't help me much in the matter."

"I don't want to help you," she retorted viciously. "I want you to love me. And you won't because of that rumbed-cat-looking, carroty-haired woman who is living with Lady Latimer. And she's in love with you, too! . . . . No! I won't be quiet! Oh?"—her voice rising hysterically—"You think I don't notice things, but I do. I do, I tell you!"

ALMOST FLAT ON HER BACK

Aching back! Will it never stop! She's nearly desperate. Lydia E. Pinkham's Vegetable Compound has relieved hundreds of backache victims for over 50 years.

W. N. U. 1000

She sprang from the couch, where she had been idling luxuriously amid a heap of cushions, and eyed of the room in his ear.

"Do you hear me?" she cried violently, shaking him by the arm. "You think I'm a blind fool! But I'm not! I'm not! I've seen that Peterson woman look at you like a cat looking through the larder window—"

Suddenly she felt Blaise's hand clapped against her lips, stemming the torrent of vulgar recrimination and abuse that poured from them. He held it there quite gently, so as not to hurt her, but immovably, and she had perforce to hear what he wished to say in rebellious silence.

"Listen to me," he said quietly. "It is quite true, Nesta, you say—that I love Jean Peterson, and that she loves me. But we have given up our love, and with it our hope of happiness in this world, for you. In return, you will give up something for us. You will give up the infinite pleasure you appear to derive from vilifying and belittling a woman who is as much above you as the heavens are above the earth. That assumption of yours is as fine and pure as yours is mean and commonplace and jealous. You will never again speak of Miss Peterson except in language but respect, nor will you ever again refer to the love which you now know for a fact exists between us. That is the only way in which we can be friends. If you disobey my commands in either of these respects, I shall go away from home that same day. And you don't return."

He released her and had the satisfaction, for once, of perceiving that his words had struck home. What he had Presumably she came to the conclusion that, in the circumstances, discretion was the better part of valor, for she made no attempt to challenge his determination in the matter.

At the same time, unknown to him, she was preparing to pay for the silence enforced upon her at home. With a species of venom, absurdly childish in its manifestation, she set herself to the task of writing a constantly enlarging to her upon the subject of Blaise's perfections as a husband, and, with sufficiently imaginary descriptions of the attention he paid her and of his constant solicitude for her welfare, was securing her happiness at being his wife.

"I am so proud to have won so fine and splendid a husband," she would write, "although I should not feel the same, Miss Peterson, if you were me!"

Jean would make answer, outwardly unmoved.

"Indeed I should. You ought to be a very happy woman, Mrs. Turmarin."

The quiet composure which Jean invariably opposed to these goad-like attacks enraged Nesta intensely. Hitherto with all the petty jealousy of a small nature, she herself, had the attention been reversed, would have found the pain which kind of reserve insupportable, and it made her furious that her best thought-out and most spiteful missives failed to goad Jean into any expression of pain, anger or distress. The "cold Englishwoman's" armour of indifference and reserve seemed to be impervious to the nastiest wheat poison-tipped dart she loosed against her.

Nesta felt that, as the woman in possession, she was entitled to some satisfaction in life by reason of her inability to triumph openly over the other woman, by reason of her position as the wife of Blaise. Finally, at the end of her resources of innuendo and allusion, she tried the effect of open warfare.

It was a mistake that lasted long. Jean's one shaft, delivered with the utmost calm, blunt as midnight.

ACHES and Pains easily relieved

Aspirin will relieve your suffering harmlessly and in a hurry. Swallow a tablet in a little water. The pain is gone!

It's so easy as that to be rid of the pain from an aching tooth; of headache from any cause; neuralgia due to rheumatism, lumbago; to colds or strains, are easily overcome. Those unexplained pains of women are soothed away in an instant.

The modern way to relieve pain is with Aspirin. That is the way that modern medical men approve. They know Aspirin is safe—can do no harm. It does not depress the heart.

You will always find Aspirin in any drugstore, and if you want the proven directions and relief from pain, will always get relief. You will avoid much of suffering if you just remember about Aspirin tablets. Be sure you get Aspirin and not a substitute. "Aspirin" is a trade-mark registered in Canada.

"I haven't been so happy for years"

"I've just thrown out all my dust cloths

—because I've found how to do the thing once, instead of many times.

"I use Appleford Wonder Paper now. You buy it in a neat package that doesn't take up any room in the cupboard. Twenty-five large sheets for a quarter. When you use it, you don't crumple a sheet into a ball and put it away whatever needs cleaning.

"I've never seen anything like Wonder Paper. It really does clean—and not a fibre at the end of it. It leaves no dust like cloth, and so easily. And you can use both sides.

"What I used to loathe about dusting was the bother of having to do it often. I always used to put it off, with all sorts of odd chores and the like—and it seemed to me I was constantly dusting. It worried me just to see those bits of fluff or rag or raffia. They seemed so unsanitary.

"The beauty of Wonder Paper is that you throw it away when you've finished with it.

"I can promise that you'll like Wonder Paper, it gives you time for things very much more attractive than dusting."

Special Offer

WONDER PAPER is made by makers of the famous PARA-DARI Silvery Wood Paper in the Green Box. Most grocery, hardware and department stores have *Appleford Wonder Paper* in stock. If yours hasn't, send us the coupon below and we'll give you a booklet entitled "Leftovers", containing one hundred recipes, as a bonus for your trouble.

KEEP YOUR WINDOWS WORKING

Don't be afraid of giving your show windows too much attention—they are pumping the very life blood of your whole business. Take an abstract example—let any man, woman or child be consciously or unconsciously in the market for a new watch, a birthday present, a pair of shoes, or anything in fact. Turn this buyer loose on a business street in your home town. Which store will get the business—which store will make the profit? Seventy-five times out of one hundred it is the merchant with the attractive store front—the inviting windows.

Look at this from the position of an ordinary buyer—isn't it natural to spend your money with the merchant whom you believe to be giving most in return? Don't you unconsciously stop to study attractive trade—pulling windows.

The local newspaper is a show window so give it your full attention.

Just Arrived

Much Business Done At Town Council Meeting

A regular meeting of the Council of the Town of Fort Saskatchewan, was held in the Council Chambers on Thursday the 6th. Instant at 7.30 p.m., with Mayor Montgomery, and Councillors Simmons, Gaul, and Fillmore present.

The minutes of the last meeting were read and adopted.

The following communications were received: From the Dept. of Municipal affairs regarding relief, of which the following is an extract:—

As a temporary measure, while it is necessary to grant Unemployment relief, the Government considers it advisable for municipalities participating in the distribution of Unemployment Relief, under Federal and Provincial arrangements, that "Residence" shall mean:—An applicant must have resided in the municipality and have been self-sustaining for a period of one year before the municipality is responsible for Unemployment Relief. This ruling to be effective as from the 1st of May 1921. This action is taken to prevent unemployed from moving to other parts of the Province, as cases are continually being reported where families are exhausting their available funds to provide transportation, and immediately applying for relief in a district where they have not established residence.

A list of goods which can be purchased by those receiving direct relief was also received from the Department, for the guidance of the merchants.

Letter of thanks and appreciation for the grant of $75.00, received from Mrs. A. H. Rogers, convener of the Cemetery committee of the Women's Institute.

Letter from the Canadian Legion signed by the President and Secretary to the effect that they have decided to operate the Memorial Hall for the coming winter months at least, and asking the Council to cancel their previous suggestions, was approved by the Town Council.

The Council decided to open up Tofield Street, as far as practicable at present, from Mr. Joseph Dexter's house to the railway track, as asked for in a letter received from that ratepayer.

The following accounts were passed for payment:—Calgary Power Co., Electric light for Streets and Fire Hall $122.39; Jones, Graham & O'Brien relief Sept. $30.00; Alberta Gov't Telephones $7.00; F. Elkerton work on streets $1.25; J. T. Lalonde $1.50; A. H. Carscadden, glass etc. for Town property $6.30; 2 meals for starving transients 80c; W. J. Foster $5.30; 32 yards of gravel delivered to go in part towards taxes

Several matters were left in abeyance because all the Councillors were not present.

NOW YOU TELL ONE!

The absent-minded professor called his biology class to order shortly after lunch hour. "Our special work this afternoon," he said, "will be cutting up and inspecting the inward workings of a frog. I have a frog in my pocket here to be used as a specimen."

He reached into his pocket and pulled out a paper sack, shook its contents out on the table, and out rolled a nice looking sandwich. The professor looked at it, perplexed scratched his head and muttered: "That's funny. I distinctly remember eating my lunch."

Mr. Justread—"What did you do to the meat? It has such a peculiar taste."

Mrs. Justread—"Oh, nothing. It did get a little burnt, but I fixed that—I applied Dixieneday right away."

By the end of October the Saskatchewan Wheat Pool will have shipped four million bushels of grain for export via Churchill, Canada's baby port.

Girls A. A. A. Elect New President: Miss Hickson

At a well attended meeting of the Girls' A. A. A. held on Tuesday, evening at the home of Miss Jessie Gaul, Miss A. Hickson was elected president to finish the term, taking Miss M Stevenson's place who left last June.

Miss Dora West of Calgary was a visitor at the Club meeting.

During the business, the question of supplying milk to the needy school children this winter as was done last year was brought up. It was finally decided to leave this matter over for a time

It was moved by the Club that they hold their annual Hallowe'en dance this year as in former years, on Monday, October 31st, in the memorial hall.

After the lengthy business session was finished, several bands of bridge was played the honors going to Miss A. Wood.

At midnight a tasty luncheon was served by Miss Rose Langhanese and Miss Jessie Gaul.

TEACHERS ELECT OFFICERS AT CONVENTION

At the Lamont Inspectorate Teachers Convention held in Edmonton at the Normal School, J. Sowchuk was elected president, succeeding S. Harshy last year's president who had resided over the convention.

Other officers elected were:—Hon. President Inspector C. H. Robinson; Vice-presidents, Miss Sutherland, Miss A. M. Dickson; Secretary-Treasurer, Miss F. Corford, and an executive committee consisting of Miss Weywerika, Miss Warr, Mrs. Parish, Groves, Miss Hemmerling and Miss

The Convention was well attended with 147 teachers being present.

NEW SERVICE RESTRICTS PAULPY RAILROAD LINES

An intensive check of rail conditions has been under way for months by means of the famous Sperry detector car. This car, which has conducted investigations in Saskatchewan and British Columbia, and is now in Manitoba, has as its purpose the detection of hidden defects in rails, broken, cracked welds, or other defects. It is propelled by a gasoline motor which, when not at work, can develop a speed of 40 miles per hour. When working it only runs about six miles an hour. There are several brushes that come into contact with the rails each side, clearing off all dust and grit; then a small roller each side of the car runs on the rail. These rollers are connected electrically with an instrument beside the driver, which makes a mark on a spool of paper that is gradually unwound—closely indenting each joint between the rails by a little square mark. If a rail in any way defective the indicator shows it at once, and a valve is automatically opened and a splash of white paint is dashed on the offending rail under the flange at the exact point of its defectiveness. Another engine runs a dynamo to supply current for this purpose. As the speed of the machine is being watched and re-wound automatically.

The operators have an accurate indication of every foot of rail. The section men easily notice the faulty rails and replace them. By the use of this wonderful car many accidents may be averted by keeping accurately the condition of the rails beforehand.

A coincidence in shipping grain is reported by the Alberta Pool Elevators of the Canadian Pacific Railway with regard to the number 314561. It appears that this car was received by W. H. Snell, of Barons, Alberta, twice during the current season. The percentage against this occurring runs into stupendous figures. In both cases Mr. Snell delivered grain on a grading basis.

These local news will be found on an inside page of the paper.

Josephburg News

On Sunday, Oct. 16th, Rev. Kerr of Vegreville will hold the morning service here. Sunday school will be as usual.

All are cordially invited to attend the Thanksgiving services held at the Moravian Church, South Side, Edmonton on Oct. 18th.

There will be no church on Oct. 23rd, as Rev. Wiesbrauch will be absent, there being Thanksgiving Sunday at Bruderheim.

Mr and Mrs. E. Manz, Miss Elsie Manz and Morris Manz of Mannville are visiting relatives over the holiday season.

Mr and Mrs. Albert Mohr were holidaying with Mr. and Mrs. Marvin Westover of Clyde over the week-end.

Mr Alfred Mohr of Three Hills was home over the week-end.

FOWL SUPPER

The Josephburg Ladies Aid will hold a "Fowl Supper" on Wednesday, Oct. 19th, in the Josephburg Reformed Church. Supper 5 to 8.

Admission 35c and 25c.

Taken from the Files
19 Years Ago Today
Thursday, Oct. 9, 1902

The local members of the Loyal Orange Lodge are building a hall on Belcher Avenue.

On Sunday evening, Sept. 28th, Ven. Archdeacon Gray of All Saints' Church, Edmonton took charge of the induction services by which Rev. T. M. Melrose was made Rector of St. George's Parish.

Two prisoners escaped from the R.N.W.M.P. Barracks here. O'Brien, confined here for the alleged attempted murder of Sellins, an Edmonton bartender, and Beattie, an alleged forger, escaped from the guard room Sunday night by cutting a hole in the roof.

Mr. A. M. Sutherland, druggist ran in full page two color advertisement in the paper this week. He was telling the people of the latest in Edison Phonographs. The machine with the large wooden horn is in, and plays the Blue Amberol Records. Ed. Note. This is quite a contrast to the new electric or battery models of today.

Messrs. W. Corbett and A. T. S. Tatum are at Beaver Lake on a goose hunt.

Miss Pearl Loretta Sullivan of Fort Saskatchewan and Mr. Donald McDougall of Edmonton were married by Rev. Father Hilaria.

W. J. Foster has made construction at the present time a dwelling house on the corner of Grimbach and Ingils Ave.

Fort Saskatchewan Badminton Club Hold General Meeting

The annual meeting of the Fort Saskatchewan Badminton Club was held Oct. 3rd, in the Badminton Hall and the following officers elected for the year ending September, 30, 1922.

President—Dr. T. W. E. Henry.
Vice-President, Mrs. H. Looker, and J. D. McLean.
Secretary W. T. Lane.
Treasurer A. H. Rogers.
Executive—Miss Dickson, S. Hornby, C. Shaw, F. W. Smith, Miss Trotter, Miss L. Bang.

Fees for the year have been reduced to $6.50. Members will kindly remit dues on or before October 15, and any new members wishing to enroll, please forward your application to the Secretary at once.

Rain and snow was fairly general in Alberta over the past week-end and what threshing there is to be done is delayed.

Heat has caused havoc among the crops of eastern Europe, but western Europe has a big crop, harvested under favorable conditions.

The Price Of Wheat.

Saskatchewan is the great wheat growing province of Canada. In normal years it produces more wheat than any state in the United States, and more than one-half of all the wheat grown in Canada, and Canada is one of the great wheat exporting countries of the world. Wheat is not only the primary industry of Saskatchewan, as it is be a somewhat lesser extent of Manitoba and Alberta; It is its very life blood upon which the existence of all other business and industry depends. It is, therefore, a vitally serious matter when the price the farmer can obtain for his wheat drops below the cost of producing it, and today yields him on those prairies only some 35 odd cents a bushel. Why is this?

Dr. J. T. M. Anderson, Premier of Saskatchewan, recently stated he could see but little hope for any great improvement in the price in view of the great surpluses and in view of the fact that Germany, France, Italy and even Spain is were growing sufficient for their own needs. He expressed the belief that the only remedy lay in a conference of leading wheat-growing countries of the world to arrange curtailment of production.

Mr. James O. Gardiner, leader of the opposition in the Saskatchewan Legislature, has, in speeches delivered by him, outlined the reason why these European countries which formerly were large importers of Canada's wheat, are now producing sufficient for their own needs. He has pointed out that it is not economically profitable for them to do so; quite the reverse is true France today is devoting lands to the growing of wheat which formerly grew grapes to be made into wine, and which it still devoted to vineyards would yield larger profits. Germany likewise is devoting large acreages to wheat growing that could be and formerly were put to much more profitable purposes. The same is true of Italy, Spain, and other European countries. And the question persists: Why?

The reason is: Fear. And it is the only reason. The nations of Europe are still suspicious of each other; each convinced that others have designs upon them and only await a favourable opportunity to wage war upon them. The world could disarm tomorrow if it were not for the prevailing fear in the minds, not of statesmen alone, but of all the people of Europe. They expect another war and are preparing for it; hence they will not disarm. but are strengthening their positions in every way they can.

And when war comes, as they are convinced it will come sooner or later, the resulting power of any country will depend upon the degree to which it can feed its own people. Germany learned that great lesson in 1914-18. The people of France are live withered grapes and wine, but not bread, hence, no former vineyards are ever given over to growing wheat and other grains; in Germany century-old forests have become wheat fields and the production of less essential things have been discontinued for wheat growing; Russia is pushing forth almost super-human efforts to raise enormous quantities of wheat to sell abroad in order that it may buy back machinery, electrical equipment, chemicals, ailments of all kinds, and thus create enormous industries which can, when required, be converted into munitions plants. The man on the large state farms in Russia who are operating farm tractors are, at the same time, being taught the mechanism of tanks for war purposes so they will be trained and ready to switch from the tractor to the tank. The selfish thing is varying degrees is taking place in all continental European countries.

It is all a price exacted by "Fear," and the countries are prepared to pay the price of low prices instead of the conversion of lands to wheat growing which could much more profitably be utilized for other purposes. As a result Europe no longer needs to import quantities of wheat, and the prairie provinces of Canada, whose primary business is wheat, find the markets upon which they relied closed to them, and themselves in the position of being unable to sell at a price which will cover the cost of production, let alone yield a profit.

The Canadian people themselves cannot change this condition; it cannot be done by moving our Customs tariff up or down; or by inflation of currency; or by nationalization of banks, socialization of industry, writing off of debts and interest charges, because, if the prairie farmer was freed of all his debts and interest charges, he would be in no better position if he were producing wheat which he could not sell except at a price below what it had cost him to produce.

The main cause of our financial and economic difficulties in Western Canada today is the fundamental one—"Fear." If that fear could be dissipated and confidence re-established, European countries would discontinue non-profitable wheat growing and go back to the production of those things which yield them more substantial returns; they would again buy wheat instead of raising it, and would be able to pay a good price for it out of the profits derived from the production and sale of those things they can produce, and formerly did produce, to better advantage than other countries.

What can Canadians do in the matter? Only this: Resist every tendency in the direction of a narrow nationalism, and encourage a broad internationalism, because extreme nationalistic feelings and sentiments on the part of one nation develop fear and a like feeling in all other nations. Every class of racial or religious prejudice is emphasized, fear is raised in the minds of some one. Whenever one nation seeks to advance its own interests at the expense of another nation, suspicions are aroused and fear grows. Can reacts upon another, and suspicion, antagonism and fear grow like mushrooms in the dark.

The world is paying an awful price because it is filled with "Fear." Let us help both nationally and to our daily individual thought and actions to dissipate it.

Pains in Stomach and Bowels So Bad Would Have To Sit Down

Mrs. C. Lemky, Moncton, N.B., writes:—"I am certainly recommend Dr. Pooler's Extract of Wild Raspberry for cramps or pains in the stomach and bowels.

"Last Summer I had such awful pains in my stomach, and lower part of my bowels, at times, I could have to sit down. I used Dr. Pooler's and was soon relieved.

"Then my children were small I always had a bottle in the house and it helped them wonderfully. Children are of time but need medicine."

Task For Scotland Yard

British Police Trying To Discover Agents Of Drug Ring

Its immense prominence in British society, wealthy, glamorous and splendidly governed, are being watched day and night by Scotland Yard as the alleged chief agents of a drug ring supplying London with thousands of dollars' worth of narcotics.

So far the women have defeated efforts of the police to get the conclusive evidence demanded by the English courts.

The six women entertain and move freely in the titled circles of London's west end.

Rennon Bradley, noted dramatic critic and London columnist, claims to have been at several Mayfair parties when the women's traffic in narcotics was taking place. "There is a drug racket which spreads from the heart of Piccadilly through the great hospitals of Paris and right across Europe into Asia," he wrote recently.

Turkey is said to be the chief source of the drug. Most of it is brought across the Syrian desert to the small port of El Kantara, on the East Canal.

NOT A PAIN AT 78

She Feels Like 46

Aches and pains are not inevitable in old age. When they do come, there is always a cause for them — cause that can be corrected. Here is a little lesson on growing old, by a woman of 78.

"For the last five years I have Kruschen Salts and I feel as well and youthful I could not live without them. I am 78 years old. I have no pain in my body, am full of energy and I do all. I give the credit to Kruschen Salts. No one will believe my age." —(Mrs.) C. M.

Most people could add long before their time because they neglect one vital need of health the need for internal cleanliness. Instead of taking a start the healthy Kruschen habit. Kruschen Salts, probably for the first time in their lives, they start getting rid of many of the poisons matter from the system. And almost immediately they feel their youth has returned, that they energetic and happy. In a word, they've got that famous "Kruschen Feeling."

How Voices Long Virus

A compact volume, containing all the building laws of the city of Montreal, will be issued shortly. The work, which was decided in 1926 and to see the light of day 23 years later, is said to be a first class towards a limited town planning scheme. Public utility support, has devoted his whole time this year to compilation of the manual.

Freedom From Asthma. Asthma is one of the most distressing troubles, unable to find relief from its attacks in its agonies Frequently many things are tried but nothing seems to give hope of relief. Dr. J. D. Kellogg's Asthma Remedy is the one help that can be depended upon. If you have tried other remedies without success, do not fail to get at once a package of this unfailingly effective preparation.

Detroit Counterfeit Coin

Abdul Hamid, Hungarian actor, has invented an apparatus by which, he claims, one can easily detect counterfeit coins, even when such coins have the same specific gravity of valuable metals and alloys. One such apparatus is now being tested by the Hungarian National Bank and another by the post administration.

If Miller's Worm Powders needed the support of testimonials they could get it from mothers who know the great virtue of this excellent medicine. But the powders will speak for themselves and in such a way that there can be no question of them. They act speedily and thoroughly, and the child to whom they are administered will show improvement from the first dose.

The annual opening of a rice harvest has been known to take place in 30 seconds. The bloom lasts from two to three hours.

Christie's PREMIUM SODA CRACKERS

Crisp, light, flaky and slightly salted. Irresistible. Once the family starts eating them . . . be sure the supply doesn't run out.

Record Hard To Equal

Newspaper Correspondent Wrote Out Long Speech From Memory

Discussing newspapermen with prodigious memories W. Orton Tewson, the English writer who lives in New York and writes a column of anecdotes, says that Stephen de Blowitz, famed Paris correspondent of the London Times in the seventies, broke all records. According to the story J. T. Dobbs, editor of the Times, had been visiting Paris and with de Blowitz heard the French Minister of Foreign Affairs deliver a long and important speech in the Chamber. There were no arrangements for reporting such matters in those days. Dobbs remarked to de Blowitz that he was taking a train for London: "If we could have that speech from end to end in tomorrow morning's paper, what a glorious thing it would be." After his editor departed de Blowitz reasoned he could remember the speech, word for word. He wrote it out and mailed it, and Deyane found it in the columns of the Times when he reached London. It was an accurate report.

Persian Rains is the one true family aid for skin health and beauty. Aids the mother in additional loveliness. Protects the tender skin of the child. Delights the father as a hair dentrex or cooling shaving lotion No matter in what use it is put, it is always beneficial to the skin. Every woman should use it Persian Balm cools and protects the skin and creates conditions of surpassing loveliness.

One of nature's oddities is the Velvet, a minute fresh-water organism that is both plant and ant mal.

The dove of peace, apparently, does more biting than cooing.

Interior Of Earth Interests Scientists

Find Ocean Tides Disturb Crust For Mile Miles Inland

Fresh evidence that scientific investigation again has taken a permanent course comes with the announcement by two men in California that the push and the pull of ocean tides disturb the earth's crust for a distance of six miles inland. Recently scientific interest turned to the stratosphere, with the ascent of Professor Piccard; now it is directed toward the interior of the earth. Since the discovery in California was more or less accidental, being made in connection with other experiments, further observations will be required to reveal the full import. These will be made next winter.

Great Britain Is Only Country In The World To Take Her Tariff Out Of Politics

Unlike every other country in the world Great Britain has taken her tariff out of politics. Day by day, the "Advisory Committee of Tariffs" is in session, under the chairmanship of Sir Guenep May, the well known business man whose economy report a year ago was the cause of the crisis which set up the National Government.

With him at the other two members of the committee, Sir Sidney Chapman and Sir George Proval. They perform a function usually assumed by a government itself, report independently to the government and are now engaged in building a tariff in a way tariffs have never been built.

The committee has full power to investigate any tariff already in existence. One of their early acts was to reduce the tariff on certain woollen schedules from 66 to 10 per cent. They issued this order overnight, and it was promptly implemented by the government.

The procedure is for it to conduct its inquiry in whatever way suits it best. It may hear pleas from industry. It may investigate without prompting. It may call witnesses to produce whatever information it desires. It ends by issuing a report to the British treasury. On receipt of this report it is published without undue delay. It then rests with the government whether or not to implement that recommendation. The government only refuses to act. But the government has denied itself the power to pass higher duties than those recommended by the committee. It may, on the other hand, pass lower duties.

If any industry feels the duty recommended is too low, the government refuses to hear the case. The industry must appear again before the committee and state its case.

Not everyone may appear before the committee. That is, representatives of the public at large have not the right. Any industry may appear, or any merchant or dealer in any commodity. It is hoped, in this way, that the committee will receive due attention from the committee. In the case of British industry, the power of appeal to Parliament was so strong that demands from industrialists for more and more protection are at once considered. In the report of the committee, they appear before the committee to show proof that if the duties are raised, their ability to compete in the world market will increase.

For this reason, the committee's functions have, since it was set last, been largely that of a court of conciliation where conflicting claims are fought out and a balance struck.

So pleased is the government with the functioning of the board that the British delegation at the Imperial Conference pressed hard for the establishment of every dominion of a similar tariff board. On the proper functioning of these boards, the British delegation pinned their faith for the implementing of the agreement calling for the institution of competitive tariffs throughout the British Empire, a tariff which at a level at which efficient industry would be protected from unfair competition from outside

Business Pays Debts

Creates Necessary Relationship Between Debtor and Creditor

No debts are ever paid except by willing healthy debtors and no force known to human technique can make a sane sided bargain sound It is the very basis of capitalist enterprise that the debtor's interest must coincide with the creditor's, that the debtor must also benefit by the debt he assumes in the creation.

the capitalist loses his money. When debts are artificially created by politicians of one country who simply demand large payments from the politicians of another country to pay for such trumpery absurdities as wars, of course the thing ends in smoke Business, and politics is the only motive that can create the necessary relationship between debtor and creditor

779

IT'S DEFINITELY YOURS IF YOU MAKE THIS CHARMING DAY DRESS

Here's an individual dress you'll just love for its interesting details. It's cut rather along slenderizing lines, making it equally suited for the miss or the matron.

The flared treatment of the bodice is very smart. And don't you think the pointed sleeves, lightened at the wrists adorable?

A satin crepe is stunning for to handle it.

You can also use rough crepe silk, sponge silk or novelty rayons. Wool crepe would also prove a charming model.

Style No. 779 is designed for sizes 14, 16 years, 36, 38, 40, 42 and 44 inches bust. For 36 requires 3½ yards of 39-inch material with ½ yard of 35-inch all-over-lace.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Two Dozen For One

Farmer Found Others Had Lost Faith

G. F. Warhurst of Hancock, Maine, lost a pail in his well. He had been on this farm only since the "boom" in country" movement started, and he needed that pail He started to grapple for it. The first try he hooked a rail, but it wasn't the pail. So he tried again, and twenty-four times he tried and each time he brought up a pail that he could not use. Then, and the last try brought him up the pail he had lost Twenty of the pails were better than the original one he fished for.

Penny Agricultural

The Empire Marketing Board tells us that "Of the 250 million pigs in the world only 12 per cent are Empire pigs The Empire has, however, more than a third of the goats" It is difficult to know whether the Board is being funny or agricultural, says the Winnipeg Free Press.

Guest (to the rich banker): "Was your ancestor ever hanged?"

Multi-Millionaire—"Well, it may have been, but of course, we would not notice it."

Canada Stands Third In Silver Production

And British Columbia Is Now Leading All Provinces

The Canadian silver production in 1931 was approximately 20½ million ounces, or 10.5 per cent of the world's computed production of 196 million ounces Canada has for many years ranked third among the silver producing countries of the world, being exceeded by Mexico and the United States, the former contributing about 42 per cent and the latter about 22 per cent normally to the world's total production.

The silver mines of Cobalt and adjoining areas in Northern Ontario were for many years the principal sources of the Canadian production, but their output in recent years has shown a gradual decline

Important contributions to Canada's silver production are now being made by mines in the Noranda district of the Province of Quebec and in the Flin Flon district of the Province of Manitoba. The Yukon Territory has for several years been producing annually about four million ounces of silver, derived from the argentiferous lead ores of the Mayo district.

British Columbia is now the leading silver-producing province in the Dominion, having contributed about 39 per cent of the total production in 1931. The silver is obtained mainly as a by-product in the treatment of the lead-zinc ores from the well-known mine at Kimberley

Hon. Herbert Marler Sees A Big Potential Market In The Orient For Canadian Wheat

Canada Produces Prize Celery

Dominion Product Ranks First Among Nations Of World

Everyone knows that Canadians head wheat ranks the standard by which all other wheats are judged. Few realize that as a producer of prize celery Canada also ranks first among the nations of the world, states the Market Intelligence Service of the Dominion Fruit Branch.

Proof of the superior quality of Canadian grown celery is found in every grocery or fruit and vegetable store. Fresh young stalks, straight from the celery-growing areas of the Dominion, are reaching the market in quantity and although the quality is exceptional, prices are very reasonable.

In choosing her celery, the housewife would do well to keep the following facts in mind. Always look for tights that are well blanched, with a good solid heart formation. Stems should be succulent and snap readily when bend. Avoid stems that are flat and thin, as they are often stringy. Celery that is grown and properly blanched usually lacks flavor Stalks that are badly split at the base should never be purchased.

With Canadian celery so plentiful, this delightful vegetable should become an important item in the diet of every household. It provides an excellent appetizer and aids dish and because of its mineral content is ideal for purifying the blood and toning general tone to the whole system.—St. Thomas Times-Journal.

Photos Of Submerged City

Remains Can Be Seen, Records Local Girl

Photographs are being taken of the submerged city of Jamestown, seen through the waters of Nevis, an island in the West Indies. The remains of the city may be seen near the shore, beneath the level of the sea. Jamestown was destroyed by an earthquake on April 26, 1692, and the town slipped into the sea, carrying with it all its riches and a population estimated at 14,000.

School Children Help

The emergency conservation committee of the Toronto Local Council of Women is richer by 6,000 bottles of preserved produce processed by school children of the city. The children did much all the preserving themselves in the domestic science centres of their schools.

Word Now Recognized

"Appendicitis" Omitted From First Volume Of Oxford Dictionary

In the course of his Rolleston lecture dealing with "the medical revolution," Sir Humphry Rolleston said: "The word 'appendicitis,' much criticized as a hybrid of mixed Latin and Greek termination, has now constructed by R. H. Fitz, of Boston, Mass., in 1886 It does not appear in the first volume of the Oxford Dictionary, the editor, Sir James A Murray, said that when that volume of the dictionary was in course of preparation (1888) he consulted a region professor of medicine, and was informed that it was not necessary to include it, as the disease was very rare.

"Although it had been described many years before by James Hamilton in 1812, by John Burns in 1826, by Thomas Hodgkin in the same year, and by Thomas Addison in 1839 appendicitis was not generally recognized until influenza reappeared in this country in 1889, it was then called perityphlitis, a term dating from 1812, and entered in a subsequent volume (1908) of the Oxford Dictionary with a reference to appendicitis."

More than 20,000,000 square feet of sheep and lamb leather was produced in Spain in the last year.

All fishes apparently contain iodine, usually a minute quantity.

Other Than Royal Scots

Honorable Artillery Company Redesignated Officially To 1537

The Honorable Artillery Company, which is brigaded with the Guards and has a Guards adjutant and R.S.M., is a Territorial corps d'elite, though you might not have guessed it, from more outward appearances, if you had run up against them at Wipers in 1916. Though placed now only fourth on the parade order of the British Army the H.A.C. dates back officially to Henry VIII's charter in 1537, and can quite fairly claim, through descent from London's famous trained bands, an older ancestry still. For this reason all H.A.C. bloods hold that the Royal Scots, known as Pontius Pilate's bodyguard and officially the oldest regiment in the British Army, are mere babes and military sucklings compared with themselves. Full privates pay a guinea a year for the privilege of marching with the H.A.C.

"My friends all ask me what I used"

"I had a lovely delicately-colored silk scarf from Paris which was my pride," says an enthusiastic woman from Quebec "It became so soiled I had to wash it which ruined the beauty. I was heart-broken One day I saw in the drug store a new kind of tinted Diamond Tints. The druggist assisted me and I was delighted. I was surprised at how well they worked and how simple. When I finished I was the envy of my friends. I would dare to use on any precious scarf (You see, I had all my summer clothes dyed with Diamond Dyes and knew they were wonderful.) If I got a package of Diamond Tints, dipped my scarf and it came out a gorgeous shade of sunset! My daughter says repeated washings will not fade it. My friends were so delighted as I and wanted to know what I used. Indeed, I'm enthusiastic about Diamond Tints!"

U.S. State Department Issues Useful Pamphlet

Contains Location and Proper Spelling Of Foreign Places

A pamphlet issued to teach American how to spell the names of foreign cities and countries recently has been issued by the state department.

Compiled by the United States Geographic Board, the report gives the proper spelling, location and brief additional information relating to nearly 2,500 of the more important names of foreign countries, cities, provinces, rivers and other natural features.

It states the proper way to spell Tokyo is Tokyo and not Tokio, that Yugoslavia, not Jugoslavia, is the correct English spelling of the name of that Balkan country, and that the word Cayenne's should be joined together and not spelled Cape Town.

The best thing you can say for Cuticura Soap and Ointment is that they are so good. Soap 25c and 75c. Ointment 25c and 50c. Cuticura Shaving Stick 25c.
CUTICURA SOAP

Medical Chiefs Commended

Overflow classes in medicine and a 20 to 25 per cent. increase in the number of dental students marked the opening of the University of Alberta these faculties. More than 700 applications were received by the faculty of medicine which can ordinarily only seat 100 new students each year.

There are 5,000 distinct varieties of daffodils according to the Royal Horticultural Society of London, and of these 900 are registered.

Vital Statistics

Saskatchewan Had Lowest Maternal Mortality In Canada In 1932

The preliminary annual report of the Dominion Bureau of Statistics for the year 1932 has now been completed and has come to hand. Commenting upon the information contained therein regarding the Province of Saskatchewan, Honorable P. D. Marcotte, M.D., Minister of Public Health, stated as follows:

"The outstanding feature contained in the preliminary vital statistics report just issued by the Dominion Bureau of Statistics for the year 1931, which has come to hand is concerning to that Saskatchewan, for the first time in its history, leads all Canada in lowest maternal mortality. The rate being 4.4 per 1 000 live births, as compared with 5.0 for the whole Dominion. In view of the fact that for many years Saskatchewan had the highest mortality rate in this regard in the Dominion, and taking into consideration also the general economic situation existing throughout the province, as well as the adverse conditions in the drought areas, this achievement is significant.

"In Saskatchewan in 1931 there were 93 maternal deaths, 47 of these number 46 occurred in hospitals. Of the 23 deaths which took place outside of hospitals, 21 were attended by physicians, so that only 2 out of 93 cases were without medical attendance.

"While infant mortality for the year 1931 shows an improvement of three points over the previous year, this province still has the highest infant mortality rate. The general rate for the Dominion is 64.5 per 1,000 live births, while for Saskatchewan it is 69.0.

"The general death rate for Saskatchewan is lower than in 1930, the rate being 6.6 per 1,000 of population, which is the lowest in the history of the province since 1915. The rate for the Dominion is 10.1.

"The number of deaths from tuberculosis shows a marked decrease over 1930, the rate having decreased from 68.1 per 100,000 of population in 1930 to 56.0 in 1931. The rate for the Dominion is 74.0.

"The death rate in Saskatchewan for the year 1931 is 69.0 per 100,000 of population; this is an increase over the rate of 54.0 in 1930. The rate for the Dominion is 92.5. Saskatchewan has the second lowest death rate from cancer, Alberta being the lowest, the rate being 56.3.

"This province shows an improvement in the death rate from diseases of the heart.—the rate being 71.0 in 1931, as compared with 73.8 in 1930. Ontario has the highest rate, namely, 160, while the general death rate from heart disease for the Dominion is 122.

"The number of deaths caused by automobile accidents is the same as last year in Saskatchewan than in any other province, the rate being 5.0 Ontario had the highest rate—17.6— and British Columbia took second place with a rate of 16.6

"Of all the provinces of Canada Saskatchewan had the greatest natural increase, namely, 17 1 per 1,000 population, Saskatchewan coming second with a rate of 16.5

"The birth rate for the province of Saskatchewan indicates a decrease of 1.3 points in 1931 over 1930 the rate for 1931 being 23 1 per 1,000 population. The birth rate for the whole Dominion is 23.3, and Saskatchewan holds fourth highest place in this regard. The three Maritime provinces show an increase in the birth rate, but all others it is lower than in the previous year.

"It will be seen, therefore, that in no other different sections contained in the preliminary report issued by the Dominion Bureau of Statistics, which is regarded as the barometer of public health, does Saskatchewan's returns holds premier place in five that is to say, she has—

(a) The lowest general death rate.

(b) The lowest tuberculosis death rate.

(c) The lowest maternal mortality.

(d) The lowest death rate from diseases of the heart.

(e) The lowest death rate from automobile accidents.

"In two sections this province holds second place, namely, in the natural increase rate, and in the cancer death rate. Saskatchewan takes fourth place in the birth rate and fifth in infant mortality."

SUNDAY SCHOOL LESSON

OCTOBER 16

THE HOME OF THE COMING GENERATION

Golden Text: "Train up a child in the way he should go; and even when he is old he will not depart from it."—Proverbs 22:6.

Lesson: Genesis 16:17-19; Exodus 20:12; Deuteronomy 6:4-9; 1 Samuel 1:24-28; Mark 10:13-16; 2 Timothy 1:3-5.

Devotional Reading: Psalm 128.

Explanations and Comments

The Home of the Children in the Book: Genesis 16:17-19. Abraham is sitting on an entrance overlooking a fine valley that stretches to the Dead Sea. Before him are the rich and evil cities of the plain, Sodom and Gomorrah; and it is the eve of their destruction. God is represented as approaching and giving expression to the reasons for His deciding to take Abraham into His confidence and receive to him His intention and show to him His justice. As the founder of a great nation it is best that Abraham should understand God's dealing with men.

God had entered into close relationship with Abraham in order that he should train his children and his household so that they, too, should do God righteously and justly even as did Jehovah, and then Abraham through his descendants would become a blessing to all mankind.

"God's Most modest starts with the home, with the father walking in the way of the Lord to do justice and judgment, and his children and his household following after him. Home religion and home worship are very prominent in the words. He will command his children and his household after him." The most dangerous sign of the times is the neglect of home life and the perverted education of children for parents."

The Teaching of Children in the Home, Deuteronomy 6:4-9.—This passage the Jews call "Shema," from the first word of verse 4 in Hebrew, translated "Hear." The first and great lesson and then the duty of remembering these words and of teaching them to children is stressed. The words ought to upon one's heart, shall make so deep an impression upon one that they influence one's life; they must be taught to the children, made a matter of conversation everywhere and at all times, "precept in by repetition and emphasis."

attacks COLDS
2 WAYS AT ONCE
1-by stimulation
2- and inhalation
rub on VICKS VAPORUB

You can cook 3 vegetables AT ONCE in the same saucepan by using CANAPAR
Do each vegetable up in its own bag of Canapar. Cook them together.
There won't be any odor, not even from cabbage. Flavor is retained, and flavor will be retained. And you use only one burner needed for cooking. The result will get rich!
In the case with boiled or creamed fish. You'll be delighted with the results. No fishy odor in the kitchen. No greasy pots or hands to clean up. When roasting meat, line your pan with Canapar. Fats and juices will not burn. No more scraping or scouring of the pan has been needed.
You can use Canapar repeatedly by simply cleaning it off and hanging it to dry. It doesn't absorb odors. Makes a perfect dish cloth, too, or dusting cloth. Ideal for tent. Made by the makers of the famous PARKLANE Emery Wood Paper in the Green Box.

Special Offer

Send grocer's description and deposit and receive Canapar on sale. But if yours hasn't, send the coupon direct to the maker and we'll give you a new and unique booklet entitled "Leftovers", containing over hundred recipes as a bonus for your trouble.

Standard Paper Products Ltd.

The following students were late in starting school and so are not listed as absent:—Arthur Turner, Orville Gartrude Hume, Edward Roberts, Earl Lane, Harry Wooster, Donald McLellan, and Weston Wilcox. Fred Taylor and Bill Good also entered late but have taken the examinations.

Parents and others interested are urged to use everything in their power to encourage these students who have difficulty at the beginning of the term, this applying particularly to the case of those starting late.

The Principal would be pleased to have anyone call to discuss matters which might arise in connection with the school life of any student.

Notice to Creditors and Claimants

In the Matter of the Estate of Abraham Parkinson Rowland, late of Fort Saskatchewan, in the Province of Alberta, Farm Manager, Deceased.

NOTICE IS HEREBY GIVEN that all persons having claims upon the Estate of the above named Abraham Parkinson Rowland, who died on the 25th day of May, A.D. 1932, are required to file with Messrs. Abbott and McLaughlin, Barristers, Etc., 707 McLeod Building, Edmonton, by the 20th of November, A.D. 1932, a full statement duly verified of their claims and of any securities held by them and after that date the administratrix will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed, or which have been brought to their knowledge.

DATED at Edmonton, in the Province of Alberta, this 11th day of October, A.D. 1932.

ABBOTT & McLAUGHLIN
702 McLeod Building, Edmonton, Alberta.
Solicitors for the Administratrix of the Estate of A. P. Rowland.

Here and There

Maintaining her position among world nations as a producer of minerals, Canada led the world in the production of nickel and asbestos in 1931, came second in gold, platinum metals and cobalt, third in silver and fourth in refined zinc.

Mystery stories, so popular out of New York, Southampton and Palm Beach, are the fad in the Public Canal, being ushered in there by the trim little coastal liner "Princess Patricia," of the Canadian Pacific service, which is the first of these cruises recently. The ship had a full sailing list.

The Canadian Open Golf Championship, third of the new contests figuring yearly in the Royal and Ancient game, will be held this fall in the course of the Royal York Hotel, Toronto, next year, word to that effect having been received by the secretary of the links from the Royal Canadian Golf Association.

Seventy-seven per cent. of wheat and 45 per cent. of oats grown in the three western provinces were harvested by September 3, according to the report issued on that date by the provincial agricultural department, Canadian Pacific Railway, Winnipeg. This result was reached in spite of the halt in harvesting operations due to heavy rains in vide sections of the Prairie Provinces.

All records for the story of the "big one that got away" were broken recently when a Nova Scotia fisherman hooked a tuna on his Hamilton Line and played it for five minutes after which the tuna was refitted with bait and let fly and leave. The hero of the exploit was R. C. Bennett, of Toronto, a guest at the Banff Springs Hotel.

Canadians got a thrill recently when Captain J. A. Mathieu, intrepid trans-Atlantic solo flyer, flew over the air, which he has conquered, from the Mayfair League of the Canadian Pacific Railway in Britain to the Islington Hotel on board an 18 ft. motor boat from Halifax to Victoria over a network arranged by the Canadian Pacific Department of Communications. Land and sea broadcasts were broadcast to the 30,000 visitors at the big exhibition at Toronto.

The "Canadian Countess Royal," veteran of the Canadian Pacific Railway B. C. Coast steamship fleet, is now being converted into a cruising liner for the winter months, when she will be employed on the air at Ocean Falls, B.C., where she has been installed as the Ocean Falls United Church mission, which ministers to the spiritual welfare of Japanese children.

ASK STATEMENT OF POLICY ON UNEMPLOYMENT

Ottawa. A demand from different parts of the House of Commons that the government state its policy on unemployment, and a declaration from the prime minister that such a statement would be forthcoming when estimates were discussed, featured a hectic session in parliament.

The practice in British parliament, Premier R. B. Bennett declared, was to pass the address in reply to the speech from the Throne before the government stated its policies. He proposed to continue that practice. After the address was passed, the government would state its policies on several questions, particularly unemployment.

From East and West came complaints of unemployment conditions, warnings of possible riots, and demands for government action. In a spirited brush with the prime minister, Hr. Hon. Mackenzie King, opposition leader, asked for a statement of the government's unemployment policy. What had the prime minister meant during the hot election campaign when he said he would end unemployment?

"I do not propose at this moment to answer him, gentlemen opposite must wait to say what I will answer," retorted the prime minister. He claimed the government had done more to implement its promises than had this one.

J. S. Woodsworth, Labor member for Winnipeg North Centre, asked for a statement from the government on unemployment insurance. He did not regard it as a cure for unemployment —what was needed was work—but it would be of some assistance in alleviating conditions.

A question by Mr. Woodsworth that there would be riots when relief policies were offered to unemployment conditions precipitated a heated exchange between the Labor member and Hon. R. J. Manion, Minister of Railways.

The latter said a member who stood in the House and said there might be riots was "consciously or unconsciously inciting to riots."

The deputy speaker intervened to say that Mr. Woodsworth must express his own opinion, and the member for North Winnipeg Centre retorted he was expressing just that.

Finally, earlier discussion, in the interim supply bill as introduced was put through all stages and passed by the House.

May Host in Arctic

Henderson Accused Between Dr. Hugo Eckener and Sir Hubert Wilkins

Friedrichshafen, Germany. — A possible rendezvous in the polar regions between the Graf Zeppelin and Sir Hubert Wilkins' submarine "Nautilus" was announced in the name of Dr. Hugo Eckener.

"It is quite possible that a flight into the Arctic regions may accelerate the preparations for the construction of the Graf Zeppelin II, 75 of whose members we can assure the world are enthusiastic supporters," Dr. Eckener declared. "I myself have participated in 1,091 flights, 1,000 of them in the Graf Zeppelin, and have flown 1,000,000 kilometers. Therefore I am ready to try it next to the polar regions."

To Reside in Montreal

Montreal.—The Montreal Star says it is reliably understood that Lord Atholstan, Lord Avebury, V.C., the author, and Lord Lovat, will take up their permanent residence in Montreal, where he will be associated with one of Montreal's leading newspapers. The report has been current amongst journalists in Montreal for some time, but the Star is the first paper to publish it. The Star says it is understood that Lord Lovat will visit here and remain for a month or two, prior to the family taking up residence in Montreal.

Lord Avebury Dies

Aylesford, Kent.—Lord Avebury was named in government circles by the statement of friends of Mahatma Gandhi, that he was contemplating marshalling his non-violent crusaders again for a new assault on British rule in India. The Nationalist leader was said to be dispirited with the present delay.

Bad Demonstration

Six Thousand Unemployed Battle With Police in Winnipeg

Winnipeg, Man.—Six thousand unemployed disrupted the usual orderliness on city streets recently, when they clashed with officers of the law in one of the most serious demonstrations witnessed in the Manitoba capital in years.

Six demonstrators are in hospital as the result of the battle. Many thus of more or others are suffering from injuries, caused by the policemen's batons and flying missiles that broke store windows and damaged automobiles and street cars.

The struggle with the police occurred following a demonstration in front of the Legislative buildings as heads of the unemployed interviewed Premier John Bracken and placed their appeals before him. The 6,000 men attempted to parade homeward, forcing of police started and several of the unemployed attempted to block street car and automobile traffic.

Suddenly, one demonstrator picked up a stone and hurled it at a policeman. It was the signal for battle.

Huge racks, pieces of cement taken from a road under repair, New fuel and thick, flying missiles rained batons on the bodies of the marchers as the missiles whizzed around them, crashing into store windows and automobiles. As the struggle waged, the demonstrators kept up a roar of boos.

Men, bleeding around the head, rushed from the scene. Many others dragged themselves away after the force arrested several. Then the turmoil ended and the struggling mass of humanity broke into groups, singing the "Red Anthem" and cheering the Soviet regime.

Post Telegraph Service

Now Canadian National Wire Carries 6,000 Words Per Minute

Winnipeg, Man.—The world's greatest telegraph capacity for one pair of wires has been placed in service between Toronto and Winnipeg with the completion of equipment by the Canadian National Telegraphs and the installation of a 24-channel carrier current system between Toronto and Winnipeg.

Giving a theoretical maximum telegraphic speed of almost 6,000 words per minute the system is designed to take care of transmission needs between east and west for a number of years to come. It makes use of a double modulation principle by operating two types of carrier system, one superimposed on the other. One pair of wires between Toronto and Winnipeg is made, by the new system, to provide 24 trunk telegraph circuits.

Accidents On Streets In Britain Increasing

Records Show Rally Average Of Twenty Deaths During 1930

London, England.—Life on the streets of Great Britain is becoming more dangerous, according to Sergeant Bellingham, daily average of more than 20 found dead in the streets during 1930 by the home office.

Authentic cases, he declared, numbered 7,305, an increase of 1,091 over the previous year. There were 7,305 persons killed, 200,000 injured, and 211,305 injured, an increase of 4,875.

Relief For Europe

Hope Shortage and Seed Depot On Trading Vue

New York.—Wades of U. Harding, ex-Canadian farmer, 13 the United States, but he has, the former Minister of Agriculture for Canada, and Dr. Hamilton of Canada, reported to the Canadian Red Cross that the food supply in Europe is short and that there is no place to ship Canadian wheat.

Two Killed in Mine Blast

Edmonton, Alberta.—Caught in a terrific gas explosion which rocked the entire workings, two men were killed and seven severely burned at the Hillcrest Collieries mine 12 miles south of here.

Would Deport Canadians

Reported Alien Drive in New England Stokes Will Affect Many Quebec French

Montreal.—The Gazette publishes a despatch from Manchester, N.H., in part as follows:

"With 25 additional Federal officers at her command, Mrs. Anna C. M Willoghast, commissioner of immigration in the New England district, which includes all of the New England states except Maine, is completing extensive plans for a nation-wide round-up and deportation of many thousands of aliens illegally residing here.

"At least 20,000 French-Canadians will either be deported or returned to their native province of Quebec before the middle of next month, it is estimated. The drive is instituted to protect native labor.

"The immigration officials point out that the coming drive against aliens is not directed in any sense at any particular nationality or class."

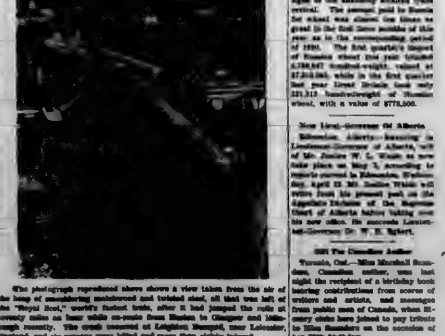
Tariff Advisory Board Promised

To Replace Old Board Which Was Abolished Last August

Ottawa, Ont.—Establishment by the government of a commission to replace the old tariff advisory board which was abolished by order-in-council last August would seem to summon more details shape in the light of promised legislation, by the inclusion of $130,000 in the estimates to provide for salaries and expenses of the tariff board."

This is an amount similar to that voted last year for the maintenance of the new defunct body.

In the Speech from the Throne the establishment by legislation of a board which would investigate matters relating to tariffs was promised.



CRACK ENGLISH TRAIN WRECKED

The photograph reproduced above shows a view taken from the air of the heap of smouldering metalwork and twisted steel, all that was left of the "Royal Scot," world's fastest train, after it had jumped the rails at Quintey mile, an hour and a half's run south from Glasgow to Carlisle, Scotland, recently. The crash occurred at Leighton Buzzard, near Leicester, England, and six persons were killed and more than eighty injured

Advocates Debated Coin

Alberta Member Thinks Monetary Policy Of Canada Needs Change

Ottawa, Ont.—Business in Canada would improve materially if the Canadian dollar were allowed to depreciate to the level it reached at the close of the Great War, in the belief of George G. Chote, member of parliament for Macleod, Alberta.

Addressing an Ottawa service club Mr Chote expounded the theory that the monetary policy of the Dominion is in need of a change. "Deflation has been practiced in practically all gold countries, resulting," he said "in a disastrous fall in the price level of commodities. All industries in Canada are suffering today and it would be just to reasonably inflate prices now as a corrective in cases of deflation of values."

Mr Chote contended that a 30 per cent depreciation of the dollar in the Argentine and Uruguay had resulted in those countries taking the Canadian wheat market in great Britain

Russian Coal

Statements Attributed To Canadian High Commissioner Are Questioned

Ottawa, Ont Statements attributed to Hon. G. Howard Ferguson, Canadian High Commissioner in Great Britain, were read to the House of Commons by Thomas Reid, Liberal member for New Westminster, who wanted to know if they were official and bore governmental approval.

The former Ontario premier was quoted as saying that Canada placed a ban on Russian imports of coal because it had been found that country was competing with Wales in the Dominion market.

Mr. Reid understood Canada had refused to trade with Russia for this country's own goods and not for the benefit of Wales or Great Britain. No answer came from the government benches and the incident closed.

Australia's War Payments

Amount Of Payment Of Australia To Britain To Be Reduced

London, England.—In response to a request from the Australian government to recognize the commonwealth's financial difficulties, His Majesty's government has agreed to reduce the payments of Australia to Great Britain under the war debt funding agreement of 1921. The payments amount to approximately $32,000,000 yearly, and under the new agreement may be reduced by more than $8,000,000 yearly during the next five financial years, commencing October 30 next. In addition, the period of repayment of the principal debt may also be extended two years.

The announcement was made in the House of Commons by Rt. Hon. J. H. Thomas, secretary of state, Australia's war debt under the agreement of 1921, was shown at $444,300,000.

CLAIM IS MADE ALFONSO DID NOT ABDICATE

Madrid, Spain Members of the former monarchial government said that Alfonso did not sign an actual document of abdication.

They still, however, will not reveal precisely what he did sign The idea was gaining ground in Madrid that Alfonso still claims the throne of Spain and may plan to return if future developments should seem to warrant it

It was said that his exile was not likely to be embittered by poverty If current reports are true he is one of the richest men in Europe, and foreseeing the possibility of loss of the throne he had had his palaces accordingly The story goes that he not only inherited an immense fortune from his mother, Queen Christine, but himself possessed financial genius which led him to make many shrewd investments. It was also said that he had withdrawn most of his funds from Spain and reinvested them in British and other foreign securities

Although there was no authoritative announcement that King Alfonso was headed for Great Britain, the present supposition is that he will go to London, England, and probably reside with his family at Kensington Palace, where his wife's mother, Princess Beatrice, lives.

Western Cattle Arrive At Eastern Market

First Shipment Made By Newly Organized Producers Reaches Montreal

Regina, Sask. The first trainload of cattle shipped from the western provinces to eastern markets by the newly organized Council of Western Beef Producers, has arrived in Montreal, according to a wire received by the secretary, Jack Byers, former Dominion livestock promoter in Western Canada.

Mr. Byers has gone to Calgary to open up the organization's offices in Calgary, which will become headquarters.

Mr. Byers said that the council was organized to market cattle from Saskatchewan, Alberta and British Columbia with the primary object that its purpose is to get as close to the producers as possible, he declared.

Britain Buys Russian Wheat

Export Duties Imports Increase For First Three Months Of Year

New York.—The New York Times publishes the following special cable from London:

"Evidence that Britain is buying more wheat from Russia, and about the same from Empire sources, is contained in the board of trade figures for March, which fail to show signs of the anticipated so-called trade revival. The amount paid to Russia for wheat during the three months ended March 31 is the first three months of this year as in the corresponding period of 1930. The first quarter's import of Russian wheat rose from valued at 1,190,847 hundred-weight, valued at $7,245,161, while in the first quarter last year Great Britain took only 231,313 hundredweight of Russian wheat, with a value of $778,500.

New Lord, Governor Of Alberta

Edmonton, Alberta.—Becoming a Lieutenant-Governor of Alberta, will of Mr. Justice W. L. Walsh is now take place on May 3, according to reports current in Ottawa. Mr. Justice Walsh, April 13, 1931. Justice Walsh will retire from his present post on the Appellate Division of the Supreme Court of Alberta before taking over his new office. His successor Lieutenant-Governor Dr. W. L. Egbert.

Bill To Canadian Author

Toronto, Ont.—Miss Marshall Saunders, Canadian author, was last night the recipient of a birthday book bearing contributions from scores of writers and artists, and messages from public men of Canada, when literary circles here joined to pay tribute to Miss Saunders on the occasion of her 70th birthday.

PROPOSAL MADE TO DISCUSS THE GERMAN POSITION

London, England.—The Exchange Telegraph Agency said the British Government was seeking to determine whether a conference could be arranged to discuss Germany's withdrawal from the disarmament conference. France, Germany and Italy were being consulted.

The agency said the matter was still under consideration, and the British Government had intimated if the unofficial discussions were favorable and generally approved, it would be willing to arrange a meeting for this purpose in London.

The exact object of the conversation would be to determine whether the difficulties arising from Germany's withdrawal could be discussed in an exchange of views.

Berlin, Germany.—The British charge d'affaires, Geoffrey Knatchbull, has presented an official invitation to a conference of the powers to be held in London to save the way for Germany's return to the world disarmament conference at Geneva.

In replying to the invitation Germany emphasized that unless certain guarantees were given that her demand for arms equality really would be fulfilled, the government of the reich could not participate.

Without fulfillment of the German demand, the charge d'affaires was informed, the London meeting would be futile.

Alberta Oil Fields

Bellevy Gushers Will Be Discovered To Stagger the Imagination

Calgary, Alberta.—In the near future enough crude oil will be produced in Alberta to supply the whole of the international boundary to supply the British Empire, according to Arthur I. Davis, consulting geologist and petroleum engineer of the Wilmshire Oil Company, visiting Alberta oil district. Mr. Davis believes oil gushers will be discovered that will stagger the imaginations of Albertans."

C. A. Roney, Los Angeles oil operator, accompanied Mr. Davis. Mr. Roney plans to drill a well at Twin River, 25 miles west of Milk River town. The drilling will take place on the property of the Nordon corporation, where Mr. Davis predicts 1,000 to 10,000 barrels daily will be produced. He placed a $100,000,000 value on the property.

Many Killed In Cloudburst

Damage Caused At Tehachapi, California, Runs Into Millions

Bakersfield, California.—The bodies of 15 victims had been recovered, five others were listed as dead and unconfirmed reports said 21 additional bodies had been found in a wrecked freight car in the Shadeorpit wash of the Tehachapi cloudburst that took a toll of possibly 45 lives and caused damage estimated from $1,500,000 to $3,000,000.

Unverified reports to the Southern Pacific Company here said a boxcar, swept from a bridge when the torrent wrecked two freight trains, had been found to contain the bodies of 21 men and boys.

An Unusual Celebration

Hiss, Jugo-Slavia.—When Mr. and Mrs. Filipovitch celebrated their 100th wedding anniversary more than 100 descendants—sons, daughters, grandchildren and great grandchildren — visited them. He is 117 and his wife 113.

Liberal For Cenbury

Wolverhampton, England. — This great midland centre witnessed on October 4, the start of a unique centenary. Enoch Wolverhampton celebrates the fact that for exactly 100 years it has sent a Liberal to the House of Commons.

A recreation park for blind persons exclusively has been opened in Edinburgh, Scotland.

B.C. Coalition Opposed

Delegates At Liberal Association Meeting Refuse To Participate

Vancouver, B.C. Demand for the holding of a general election "at the earliest possible moment" and the refusal to participate in a coalition government, as suggested by Premier S. F. Tolmie, marked the first day's session of the annual meeting of the British Columbia Liberal Association here, 800 delegates were in attendance.

The resolution declared the convention a confidence in the leadership of T. D Pattullo and extended to him "a free mandate to choose for his associates in government men of character, ability and standing having regard solely to the public interest"

Hon. Ian Mackenzie, M.P. for Vancouver Centre, predicted any success that may have been attained at the Imperial Conference would be insofar as the agreements followed along the lines of the last Dunning budget

Mrs. Mary Ellen Smith was "madame chairman" at the opening of the convention She called the delegates by their first names at times.

Appoint New Secretary

J. R. McLean To Succeed Graham Spry As National Secretary Of Canada

Ottawa, Ont. The executive committee of the Association of Canadian Clubs has announced the appointment of J. R. McLean, formerly of Winnipeg, to the post of national secretary Mr. McLean will take over his duties at once as successor to Graham Spry, who resigned May 1, last.

Mr McLean graduated from the University of Manitoba in 1926, with the degree of bachelor of arts, and took his M A. degree from the same university the following year, at which he was chosen Rhodes scholar from Manitoba. He obtained the degree of bachelor of letters from Oxford in June, 1931. He is 27 years of age and a son of Mr. and Mrs. John McLean, Yorkton, Sask.

Mrs. P. A. Wheeler, assistant secretary, has been acting secretary since Mr. Spry's resignation, will continue as assistant secretary.

Grain Shipped To Churchill

Movement Of 1932 Crop Now In Full Swing

The Pas, Man.—The movement of 1932 wheat from the direction of western Canada to Churchill for storage during the winter, and immediate shipment overseas when navigation opens in 1933, is now in full swing, with nearly 1,000 cars already north of The Pas; the grain passing over the Hudson Bay Railway at the rate of approximately 100 cars per day.

Nine hundred and fifty cars are now held in storage at this point at the local office of the Bay line, and during the past few days has been passing through at the rate of 100 cars daily.

It is expected grain will continue to go north at a rapid rate for some time to come, and according to indications the Churchill elevator will be filled before winter sets in. The total capacity of the elevator is 2,500,000 bushels.

Lens Conversion a Success

New South Wales Lists Closed Within Half An Hour

London, England.—New South Wales loan conversion, sponsored by the commonwealth along the lines of the British conversion, reducing the government's interest burden by a substantial figure, proved a remarkable success.

Cash applications were so heavy that the lists were closed within half an hour. The new loan is for five years carrying 4 per cent interest. In the case of the Australian loan there is a 2½ per cent. bonus with a seven-day limit.

The converted loan totalled £18,300,000. Former interest rates on this sum were 5½ per cent. The nominal interest for the new loan is 5½ per cent., but allowing for the premium on repayment the overall yield will be about four per cent. Altogether the conversion will mean a saving of nearly £300,000 a year.

TO HEAD COMMISSION

Hector Charlesworth famous Canadian journalist and editor of Saturday Night, who is said to have accepted the post of Chairman of the new Canadian Broadcasting Commission.

Used Hudson Bay Route

Miss Cora Hind First Woman Passenger Sailing Via Churchill

Winnipeg, Man Miss H. Cora Hind, veteran agricultural editor and the greatest woman journalist Canada has produced sailed out of Churchill Bristol-bound, the first woman passenger to use the Hudson Bay route.

For the better part of her life Miss Hind has shared in western Canada's fight for a direct outlet to world markets through Hudson Bay When the route was finally opened to the grain trade of the world she was eager to see for herself the Hudson Bay Railway and the northern sea passage for which she had fought so vigorously and successfully.

Confiding her ambition only to a few friends and associates, she left Winnipeg for Churchill determined if possible to get a passage. She had intended to leave earlier than she did, and only chance saved her from being a passenger on the "Bright Fan" which struck an iceberg and went to the bottom.

Soviet Watchword

Quality Rather Than Quantity Is To Be Guiding Principle

Moscow, Russia.—Quality rather than quantity is to be the watchword of Soviet production during 1932. So the central committee of the Communist party decided at the four-day meeting which has now ended.

The committee adopted a series of resolutions admitting serious shortcomings in the development of the country's public economy, especially in foods, and exhorting the party members and the proletariat to put their shoulders to the wheel from now on.

Expel Papal Delegate

Mexico Orders His Expulsion As a Persistent Foreigner

Mexico City.—Monsignor Leopoldo Ruizzy Flores, papal delegate to Mexico, left in a private aeroplane with two agents of the department of interior for the United States. He had been ordered expelled from the country as a "persistent foreigner."

The plane was to cross the border at Laredo or Brownsville. The papal delegate's only remark was that it was the first time he ever had been up in an aeroplane.

WEDDING OF RAMSAY MACDONALD'S DAUGHTER

Dr. Alistair MacKinnon and his bride, Dr. Joan MacDonald, daughter of Premier Ramsay MacDonald, leaving the little church near Chequers after the ceremony. Every guest wore a sprig of heather, and pipers played the bride and groom back to the reception.

Oregon Forest Fire

Loss Is Estimated At More Than $5,000,000

Portland, Ore.—Roaring in from all sides with blasting heat, a forest fire destroyed the town of Cochran in the mountain timber country, about 55 miles west of Portland in Washington county

The loss, including that in the town, two mills, railroad equipment and timber, was estimated by those in the area at more than $5,000,000. The town's 300 inhabitants escaped.

The community and mill camp at Edwards, nearby, burned to the ground. At Skylight, three railroad tunnels, a costly rail incline, several trestles and other equipment of the Southern Pacific were destroyed.

All equipment and buildings of the C. H. Wheeler Logging Company in the Cochran area burned.

The only death reported from the most disastrous forest fire in years was that of a logger killed by a falling tree.

From other sections of western Oregon there came reports of fires, less serious, but holding much potential danger. A mean east wind, drying all foliage and grass, coupled with unseasonably hot October weather, presented a menace.

Trade Wheat For Vegetables

Alberta Farmers Resorting To the Ancient System Of Barter

Calgary, Alberta.—Alberta farmers have turned again to the ancient system of barter to supply their wants for the winter. They are entering Northern Columbia by motor truck through the Crow's Nest Pass, carrying wheat which they trade for vegetables, fruit and eggs.

This method of acquiring food for the winter instead of selling their wheat at prevailing low prices was the idea of the farmers last year, but, according to reports, the movement this season is much larger. The farmers are returning from British Columbia farming areas with their trucks loaded with winter food supplies.

One farmer claims to have disposed of a load of wheat on the basis of 40 cents to the bushel, obtaining sufficient fruit and vegetables to keep his family all winter.

ALBERTA WILL GIVE ASSISTANCE IN DEBT CASES

Edmonton, Alberta.—Government action following the decision of the Alberta Bar Association to give assistance in debt cases will be taken shortly, it was announced by Premier J. E. Brownlee, who says that a further announcement will probably be made when the plan has been thoroughly considered and organized.

"I am much pleased with the attitude of members of the law society," said the premier, "in offering their services on a very fair basis in an effort to work out the debtor-and-creditor difficulties. Meanwhile I can say quite definitely that any creditor firm that is showing that it appreciates the situation now existing in this province, and is willing to cooperate in solving the problem, has but little to fear."

Queried as to a resolution reported to have been sent from the wholesalers' association in Calgary, to the effect that no further government action be taken to defeat the present credit relations, Mr. Brownlee said that no such resolution has as yet reached him.

Edmonton business interests may fight the proposed voluntary debt adjustment scheme for this province, claiming that the present system should not be disturbed.

Arrangements were being made here to call a meeting of wholesale firms in order to discuss the whole plan. In all likelihood, retail interests also will hold a meeting.

"The reaction to the scheme shows considerable opposition at present," said Secretary John Blue, of the Edmonton Chamber of Commerce. "There is a strong feeling that as new legislation was made effective this year, modifying the Debt Adjustment Act, business men are not clear as to the difference involved as between the secured and unsecured creditor."

Universities To Confer

Meetings Of the Heads Of Western Universities To Be Held

Edmonton, Alberta.—A call will be sent out probably this week by Dr. R. C. Wallace, president of the University of Alberta, for a meeting of the heads or other representatives of western universities, as proposed by Premier Brownlee a few weeks ago.

Word of the suggestion came from Saskatchewan and Manitoba approving of the suggestion, and word has come from British Columbia that an answer from that province will be ready shortly.

Jap Population Grows

One Out Of Every Eight Births At Coast Is Japanese

Victoria, B.C. Approximately one out of every eight births registered in British Columbia during 1931 was Japanese, according to figures released by H. W. Young, provincial health officer. Last year, registration of births of all races totalled 9,640, of which 1,342 were Japanese. Despite the fact the Chinese population in British Columbia exceeds that of the Japanese by several thousands, only 177 Chinese births were registered last year.

Japanese Policy

(United Nations Red Cross Aided Brotherhood Organization)

Tokyo, Japan The cabinet decided that the Lytton commission's report on Manchuria to the League of Nations did not constitute cause to alter its Manchurian policy.

A cardinal point of that policy is the separation of Manchuria from China and maintenance of the independent state of Manchukuo, which the Japanese assisted in creating, to replace the old regime, owing allegiance to Nanking.

Inaugurate Five-Day Week

Cincinnati, Ohio.—Adoption of the five-day week in all its plants in Canada and the United States was announced by Proctor and Gamble. It goes into effect October 16.

Burnt-Out Spots

Extent Of Overselling That Spots the Prairie Land

In certain sections of the prairie provinces, and more particularly in Southern Saskatchewan and southern Alberta, the prairie surface contains many irregular but roughly circular depressions varying from three to six inches in depth and from a few feet to twenty feet or more across. These depressions are known locally as "burnt-out spots," "dust-outs," "blow-outs," or "dust pots." The depressions are usually bare of support a sparse growth of vegetation, while the surrounding prairie is well covered with grass. The burnouts appear to be spots which from some cause or other have lost the original surface soil. This soil is a burn-out is very fine in texture and an inspection that after water has been standing in the depressions for several days the soil below the first few inches is quite hard and dry.

Where the burn-out spots are not extensive the land, when placed under cultivation, will produce very fair crops in favorable seasons. Breaking by the usual method has been a difficult process, as the plough tends to slide out, striking a burnt-out spot. If the work is not very well done, crops are very uneven for the first five years after breaking, these on the burn-out being thin and stunted. This fact suggests the necessity of having the normal prairie sod well rotted with the land from the burn-outs. It has also been observed by residents in burnt-out areas that the burnt-out spots are peculiarly in the county of dust. This is undoubtedly due to the encroachment of the prairie soil formed by the drifting of soil from the cultivated fields. A more satisfactory preparation for this type of land has been secured by the use of powerful machinery. The breaking is done early and profoundly with the ground moist. The soil is then well worked down and mixed by means of a heavy disc or scrubber.

Fool Pinch Of Hard Times

Snowmen From Japan's Earthquake Zone Are Being Pressed

Hard times are not queer snowmen and Japan's 70,000 Buddhist temples are feeling the pinch. Priests have taken to cultivating temple lands to raise food for their tree and their families. Temple treasures and rich cedar-shuttered robes have appeared in pawn shops and many of the temples are closing. In good years, it is a prosperous temple that receives $100 a year as contributions or revenue, but on Japan's rural districts have been worst hit by the depression, this income has been almost wiped out in 50,000 of the temples.

Seven Fair Sisters

Canada's production of creamery butter declined nearly 5 per cent. in July, and a total of 8,000,000 pounds is seven months, compared with last year. In July, however, the Dominion received much butter from the Netherlands in exporting cheese to the United Kingdom, and New Zealand made a close second in supplying the British market with butter. It is a fair division of Empire trade.

Post.—"After my death the world will realize what I have done."

Editor.—Oh, well, you don't need to worry; you'll be out of danger then."

"I'd never marry a man who was either an."

"Oh, but I suppose you're nothing against a man who looks with a modest hint."—Saskatoon, Onion

W. N. U. 1000

This picture graphically illustrates the rescue of the Hutchinson "Flying Family" by the British trawler, "Lord Talbot," after the plane "City of Rainford" had been forced down in the ice waters off Greenland. Inset Mrs. Hutchinson is shown being helped aboard the rescue craft while her children at right, are safe in the arms of rescuing sailors. At the left is her husband, George Hutchinson, leader of the ill-fated expedition. Larger picture shows Mrs. Hutchinson and her children, Jessel, Lee and Katherine, as they surveyed the wreckage of their plane from a barren rock near the Eskimo village of Eker, Greenland.

Making Own Weather

Scientists Find Black Can Be Done In This Respect

The Scientists have decided to make their own weather. So optimistic are they that an Artificial Rain Institute has been started at Missouri, and others are to follow. Canada is hoping, it depended, that the experiment will be the forms, and scientists state that presently they will be able to plan out a regular weather year. The cost of rain making at just the right times, approximately made by means of aeroplanes and powerful explosives, is comparatively modest. Experiments have shown that much can be done in the way of bringing down rain by means of powerful high-explosive rockets. It has also been found possible to break up rain-storms by bombarding them with high-explosive shells, and to bring them cheaper. When the apparatus of a hailstorm is signalled by telephone the farmers are called to their guns, and a general effort is made to drive the hail to fall in districts where it will do the least damage. The attendance set up by the hail-controlled stations frequently bring down the hail and prevent. It from travelling to places where it might do damage.

Big Complete Century

Chinese Took In Content Lavishly Has Been Doing 60 Years

Ninety-two years ago, an electric ball made by a London instrument-maker started ringing at the Chronometer Observatory at Oxford. It has never stopped, and the cells are there it will complete its century of incessant ringing. So far as I know or record, no replacements have been needed.

It is not a real ball, for its sound is a metallic only a few feet away, and it is not struck by a mechanical hammer. There are two ordinary gongs surrounded by long tubes, between which a little metal ball is supported by a thread. The ball taps the gong and then swings away and taps the other, and so it continues, from side to perpetual motion, but it is not, for the ball is operated by batteries in the tubes above the gongs. Some day these must wear out or run down. —TH-Bits.

Never-Ended Has Always Been Puzzle

Double Is Approach: Five Questions Or Answers

It is amazing the small-minded and narrow-minded men who can decry facts and failings with an eagle eye, but upon whom all the finer and more delicate shades of humanity are lost. To him who ever Hollis with most hate and eyes on the ground is the whole universe appears to be made of dust, but he who goes with head erect and eyes spiritual looking at the stars and seeing into the shining can and forgets the dust that may be under his feet.

Oil has been discovered in Huron County Cork, Irish Free State.

British Are Tea Drinkers

People Alone Use Canada Half Very Little Coffee

The British have never been a coffee drinking people. Their partiality in hot beverages is tea. Her is coffee making any progress at the breakfast table, but tea is the favorite. Last year coffee was devouring land of tea are increasing.

The importation of coffee in the seven months of 1931 by the United Kingdom was 486,141 pounds, of which only 338,451 pounds was retained for home consumption.

On the other hand the importation of tea in the seven months just ended was 184,000,000 pounds, and this compared with the figure of 34,000,000 pounds. The quantity exported to all countries was 46,170,000 pounds, leaving 137,830,000 pounds for consumption was 234,451,000 pounds.

That works out at 6 little over eight pounds in the year for every man, woman and child in the United Kingdom.

As a matter of fact the British people consume more than three times the amount of cocoa that they do of coffee.

The vast bulk of the British supply of tea comes from Ceylon and India, and the coffee from Central America and British East Africa.

Long Voyage Of Tiny Yacht

A child's toy yacht, 50-foot lobster pot, did a long voyage of 130 miles in the Irish Sea. It was picked up by a Fleetwood trawler near the Calf of Man, with the sails all set and in perfect condition. An address in Rhos, County Down, was on the sail and the ship was returned to its owner who probably valued the toy highly.

Tuvalana is the second largest island in the Azores.

Commission Set In To Be Re-Designed

Gold Service Has Not Been Used For Twenty Years

The $10,000 gold communion set of St. Paul's Cathedral, London, England, has been brought out of storage and will be melted down and re-designed. The plate was presented to St. Paul's by Ernest Tumb Hendley, the financier, in the year of Queen Victoria's diamond jubilee. There are four flagons and four chalices, the total weight being 300 ounces. They were used twice and then stored. All the time Hendley is reported to have said, "I suppose they have refused to use it because they regard me as a great sinner, and they have no room for sinners in the Church of England." Canon Alexander, of St. Paul's, has just explained: "The original shapes of the vessels made the use of them in services very difficult. As a result they have been stored in the strong room of the cathedral for more than 20 years."

A Rare Accomplishment

Centenary To General Gathers Good Stories Are Heard

There are few accomplishments to be desired above the art of a skilled and interesting conversationalist. Judged by a multiplicity of examples, it seems to discouragingly misunderstood.

So many folks seem to think that good and words make conversation. They blather about inconsequential things. Their victims are given no opportunity to drop a suggestion nor to express an opinion. That is the reason why so many intelligent and highly educated people talk as little-Rounder Sun.

Monash had hoped to find the "Northwest Passage" on the Fox Star. With 64 men he arrived at the mouth of the Churchill River and was forced to winter there. Only fifteen and two others were left when the next northern summer came. Scurvy and shortage of food had taken a terrible toll. The three sail for Norway in the smaller of the two ships. The anchor was left at Churchill.

He: "There are an awful lot of girls who don't want to get married."

She—"How do you know?"

He—"I've asked them."

South Africa has a big new-road programme.

"What are you doing with that bundle of wood?"

"That is not a bundle of wood—it is a collapsible fishing rod."—Pogue Galen, Yvardon.

The Sleepy Car Driver

Many Serious Accidents Have Been Caused By Fatigue

When will tourists and others on the road learn that any attempt to continue driving when the limit of physical endurance is in sight is to court disaster possibly with very serious consequences."

Fatigued by an all-night drive, a Syracuse man recently drove his car into the rear of a truck-load laden from off road in the Montreal, Ontario highways. He and his father were killed and his mother the remaining occupant of the car, was seriously injured. The party was en route to Michigan where the marriage of the driver was being arranged.

This accident was one of many directly traceable to fatigue on the part of the driver who found himself incapable of exercising sound judgment when an emergency arose. Had he not tried to do the impossible he and his father would probably be alive today.

It cannot be emphasized too strongly that the time to stop driving is when fatigue begins to creep over the individual at the wheel. Even the most momentary nod on the part of a driver may be attended by serious consequences when the machine is travelling at high speed, and many a driver has discovered himself in the ditch, with his machine a wreck and himself injured, because he tried to continue at the wheel as the need for rest asserted itself.

For the safety of others on the road, the authorities have seen that the good sense to demand of truck and bus companies that their drivers shall remain on duty for only a certain length of time. They recently suspended the license of one trucking concern which violated these regulations in a particularly flagrant manner.

If such a rule is required of truck and bus drivers, it ought also to be required of the private driver who all too often keeps on driving when he is physically incapable of doing so. An approved manner and thing is the sensible one which others besides himself may be involved.

Old Anchor Is Historic

County Linked With Discovery Of Manitoba's Seaport

Unimagined and unnoticed, an old anchor, linked with the discovery 313 years ago of Churchill, Manitoba's northern seaport, occupies a place among historical exhibits owned by the government of Manitoba.

Rusted beyond its prime and shaped like two great joined fish-hooks, it passes almost unnoticed by the stranger who pass it daily in the river trophies of a younger generation.

Besides, as she reflected dispiritedly, where else had she to go? The Dower House would have been open to her, of course, at any time, but there she would be certain to encounter Blaise more frequently, and of late her principal preoccupation had been to avoid such encounters whenever possible. And she could not face Bairnfels yet—alone! Some day, when Claire was married, she knew that she must return herself to return there—to a house of dreams that would never come true now. But at present she shrank miserably from the idea. She craved companionship—above all, the consoling, tender understanding which Claire, who had herself suffered, was so well able to give her.

The book that she had been reading earlier in the evening lay open on her knee, and her thoughts were with Claire now. She pictured her sitting next to Nick at dinner, her flower-like face radiant with unclouded happiness. At least her own sorrow had not yet tonight her the grudging envy which seemed another member's lot.

With a quickly repressed sigh, she turned again to her book. Its pages fluttered faintly, as though stirred by some passing current of air, and Joan, coming suddenly out of her reverie, was conscious of a cool draught wafting her forward from the direction of the bureau door.

Vaguely surprised, she glanced up, and a startled cry broke from her lips. The door was open, the folds of the curtain had been drawn aside, and in the aperture stood Blaise Tornesse.

Joan sprang up from her chair and stood staring at him with dilated eyes, one hand gripping the edge of the chimneypiece.

"Blaise! . . . . You!" The words seemed disentangling from her lips.

"Yes," he returned shortly. "May I come in?"

Without waiting for an answer he pushed the door behind him, letting the curtain fall back into its place, and stood with his back to it.

Joan felt in her heart-instinct as her eyes marked the changes wrought in him by the few weeks which had elapsed since she had seen him last. Her face haggard as though from lack of sleep, and the lines on either side of the mouth were scored deep into the flesh. The mouth itself closed in a tense line of savage misery and the stark bitterness of his eyes filled her with grief and pity, knowing how utterly powerless she was to help or comfort him.

Distracting her self-control, she summoned all that remembered remark that suggested itself.

"I thought—I thought you and Nesta were both dining at the Dower House," she faltered nervously.

"Nesta is there. I made an excuse. I came here instead."

Unconscious in the curt, clipped sentences sounded a note of warning in her ears.

"But you ought not to have come here," she replied quickly—dubiously, almost. "Why have you come, Blaise?"

"I came," he said slowly, "because I can't bear my life without you a day longer. Because—Oh, Joan! Joan! . . . . Beloved! Do you need to ask me why I came?"

With a swift, irresistible movement he swept her up into his arms, holding her close against his heart, while his mouth on hers, blotting her as a man blazes when love that has been suppressed and denied comes to its own bursts asunder the obstacles which constrained it.

And Joan, starved for four months of the love of the beloved arms, the pressure of the beloved lips upon her own, had yielded to him almost before she was aware of his purpose.

Then the remembrance of the woman who stood between them rushed across her and she tore herself free from his embrace, white and trembling in every limb.

"Blaise! . . . . Blaise! . . . What are you thinking of? Oh! We're mad! We're mad!"

She covered her face with her shaking hands but he drew them away, gazing down at her with eyes that worshipped.

"No, beloved, we're not mad," he cried triumphantly. "We're sane—at last. We were mad to think we could live apart, mad to dream we could starve love like ours. That was when you were mad! But we'll never be parted again; sweet——"

"Blaise," she whispered, staring at him with horrified dilated eyes. "You don't know! You are saying things! You're forgetting Nesta—your wife. Oh, go—go quickly! You must not stay here and talk like this to me!"

"She," he returned. "I won't go, Joan. I've come to take you away with me." Once more his arms went round her. "Beloved, I can't live without you any longer. I've tried—and I can't do it. Joan, you'll come? You love me enough—enough to come away with me to the ends of the earth where we'll find happiness at last?"

She sought to free herself from his clasp, pressing with straining hands against his chest.

"No! No!" she cried breathlessly. "I can't go with you . . . you know I can't! Ah! Don't ask me, Blaise!" There was no agony of supplication in her voice.

"But I do ask you. And if you love me"—his eyes holding hers—"you'll come to me."

"I do love you," she answered earnestly. "But it isn't the yes I love asking me this, Blaise. It's some other love—A stronger love."

"If you love me, you'll come," he reiterated doggedly. "I can't live without you, Joan. I'll not—my heart's beloved, if you know—" And the burning, passionate words, the pent-up love and longings of months of separation and despair, came pouring from his lips—harrowing and demanding, wringing her heart, pulling at the love within her that defied to give him the answer which he craved.

"Oh, Blaise, dearest of all—hush! Hush!" She clasped him brokenly, with quivering lips. "I can't go with you. It wouldn't bring us happiness. Ah, listen to me, dear!" She came close to him and laid her hands impetuously on his arm, lifting her white, stricken face to his. "It would only spoil our love—in time it would. We have no right to. It would ostrich and sail it, make it something different. I think—I think, in the end, Blaise, it would kill it."

"Nothing would ever kill my love for you," he exclaimed passionately. "Joan, little Joan, think of what our life together might be—the glory and beauty of it—just you and I in our House of Dreams!"

She caught her breath. Oh! Why did he make it so hard for her? With every flare of her being yearning to-ward him she must refuse, deny him, drive him away from her.

"No, No!" she cried frantically. "We could never reach our House of Dreams that way—Oh, I know it! At least, not the sort of House of Dreams that would be worth anything to you or me, Blaise. It would only be a sham, a make-believe. You can't build true on a rotten foundation. . . . . Don't ask me any more, dear! It's no good—no good to either of us saying no when everything in me wants to say yes. But I must say it. And you . . . . you must go back to Nesta."

Her voice almost failed her. She could feel her strength ebbing with every word that left her trembling lips. Her knew that she would not be able to resist his pleading much longer. Her own heart was fighting against her—fighting on his side!

His new her weakness and caught at it eagerly.

"Then you know what you're asking?" he demanded hoarsely. "Do you know what you are sending me back to? Her life together! Nesta's and mine—has been simple hell upon upon earth. I obeyed you—and I took her back. But I have done no good by it. She is as weak and worthless as she ever was. Our days are one continual round of bickering and quarrels."

His face darkened. "And she is not satisfied! Her nominal position as my wife does not content her. Do you understand what that must mean—if I go back?" He paused, his eyes bent steadily upon her. "Joan"—very low—"you that you know—will you still send me back to Nesta? Or will you come with me and let us find our happiness together?"

He watched the scarlet flood surge into her face and then retreat, leaving it a pallid white.

"Answer me!" he persisted, as she remained silent.

"Wait . . . . wait a little . . . ."

She turned away from him and, leaning her elbows on the chimney-piece, buried her face in her hands.

The suspense had had come at last. She realized, now, that her renunciation—that renunciation which had cost her so much pain and bitterness—had been, after all, only something superficial and false. She had not made the full sacrifice that duty and honour demanded of her. Though she had outwardly renounced her lover—made him return to Nesta—she still held him in the utter unfaithfulness of his love for her. Nesta had had but the husk, the shell—a husband in name only, every hour of their life together an insult to her pride and womanhood.

(To Be Continued.)

The Oil Of Power.—It is not claimed for Dr Thomas' Electric Oil that it will remedy every ill, but its uses are so various that it may be looked upon as a general pain killer. It has achieved that greatness for itself and its excellence is known to all who have tested its virtues and learned by experience.

"When a thing is troubling you," advises a psychologist, "sleep on it." But what if the thing that is troubling you happens to be a boarding house bed?

As a vermifuge an effective preparation is Mother Graves' Exterminator, and it can be given to the most delicate child without fear of injury to the constitution.

Archbishops and bishops of the established church are permitted seats in the British House of Lords.

Production of secondary crops in Columbia is increasing.

CHAPTER XXXIV.

The Test

New Year's Eve found Joan sitting alone in Claire's special sanctum—the room which had witnessed that frightful scene when Sir Adrian had suddenly gone mad.

It was a cosy enough little room in winter-time. A cheery fire crackled in the open grate, while a heavy velvet curtain was drawn across the door that gave egress to the terrace, effectually screening out the obliquely-driven drought which invariably seeks entry through crack and hinge-space.

Claire was at the Dower House this evening, where a New Year's dinner-party was in progress, but Joan had no heart for festivities of any kind even had she not been precluded from taking part in them by reason of her latest bereavement.

The grief and strain of the last four months had set their mark upon her. She was much thinner than formerly—her extreme slenderness accentuated by the clinging black of the dress she was wearing—while faint purple shadows lay beneath her eyes, giving her a look of frailty and fatigue.

She and Claire led a very sober and uneventful existence at Charnwood, the one absorbed in her quiet happiness, the other in her quiet grief. But the bond of their friendship had held true throughout the differing fortunes which had fallen to the lot of each, and although for Joan there was inevitable additional pain involved in still remaining within the neighbourhood of Blaise, it was considerably eased by the comfort she drew from Claire's companionship.

Besides, as she reflected dispiritedly, where else had she to go? The Dower House would have been open to her, of course, at any time, but there she would be certain to encounter Blaise more frequently, and of late her principal preoccupation had been to avoid such encounters whenever possible. And she could not face Bairnfels yet—alone! Some day, when Claire was married, she knew that she must return herself to return there—to a house of dreams that would never come true now. But at present she shrank miserably from the idea. She craved companionship—above all, the consoling, tender understanding which Claire, who had herself suffered, was so well able to give her.

The book that she had been reading earlier in the evening lay open on her knee, and her thoughts were with Claire now. She pictured her sitting next to Nick at dinner, her flower-like face radiant with unclouded happiness. At least her own sorrow had not yet tonight her the grudging envy which seemed another member's lot.

With a quickly repressed sigh, she turned again to her book. Its pages fluttered faintly, as though stirred by some passing current of air, and Joan, coming suddenly out of her reverie, was conscious of a cool draught wafting forward from the direction of the bureau door.

Vaguely surprised, she glanced up, and a startled cry broke from her lips. The door was open, the folds of the curtain had been drawn aside, and in the aperture stood Blaise Tornesse.

Joan sprang up from her chair and stood staring at him with dilated eyes, one hand gripping the edge of the chimneypiece.

"Blaise! . . . . You!" The words seemed disentangling from her lips.

"Yes," he returned shortly. "May I come in?"

Without waiting for an answer he pushed the door behind him, letting the curtain fall back into its place, and stood with his back to it.

Joan felt in her heart-instinct as her eyes marked the changes wrought in him by the few weeks which had elapsed since she had seen him last. Her face haggard as though from lack of sleep, and the lines on either side of the mouth were scored deep into the flesh. The mouth itself closed in a tense line of savage misery and the stark bitterness of his eyes filled her with grief and pity, knowing how utterly powerless she was to help or comfort him.

Distracting her self-control, she summoned all that remembered remark that suggested itself.

"I thought—I thought you and Nesta were both dining at the Dower House," she faltered nervously.

"Nesta is there. I made an excuse. I came here instead."

Unconscious in the curt, clipped sentences sounded a note of warning in her ears.

"But you ought not to have come here," she replied quickly—dubiously, almost. "Why have you come, Blaise?"

"I came," he said slowly, "because I can't bear my life without you a day longer. Because—Oh, Joan! Joan! . . . . Beloved! Do you need to ask me why I came?"

With a swift, irresistible movement he swept her up into his arms, holding her close against his heart, while his mouth on hers, blotting her as a man blazes when love that has been suppressed and denied comes to its own bursts asunder the obstacles which constrained it.

And Joan, starved for four months of the love of the beloved arms, the pressure of the beloved lips upon her own, had yielded to him almost before she was aware of his purpose.

Then the remembrance of the woman who stood between them rushed across her and she tore herself free from his embrace, white and trembling in every limb.

"Blaise! . . . . Blaise! . . . What are you thinking of? Oh! We're mad! We're mad!"

She covered her face with her shaking hands but he drew them away, gazing down at her with eyes that worshipped.

"No, beloved, we're not mad," he cried triumphantly. "We're sane—at last. We were mad to think we could live apart, mad to dream we could starve love like ours. That was when you were mad! But we'll never be parted again; sweet——"

"Blaise," she whispered, staring at him with horrified dilated eyes. "You don't know! You are saying things! You're forgetting Nesta—your wife. Oh, go—go quickly! You must not stay here and talk like this to me!"

"She," he returned. "I won't go, Joan. I've come to take you away with me." Once more his arms went round her. "Beloved, I can't live without you any longer. I've tried—and I can't do it. Joan, you'll come? You love me enough—enough to come away with me to the ends of the earth where we'll find happiness at last?"

She sought to free herself from his clasp, pressing with straining hands against his chest.

"No! No!" she cried breathlessly. "I can't go with you . . . you know I can't! Ah! Don't ask me, Blaise!" There was no agony of supplication in her voice.

"But I do ask you. And if you love me"—his eyes holding hers—"you'll come to me."

"I do love you," she answered earnestly. "But it isn't the yes I love asking me this, Blaise. It's some other love—A stronger love."

"If you love me, you'll come," he reiterated doggedly. "I can't live without you, Joan. I'll not—my heart's beloved, if you know—" And the burning, passionate words, the pent-up love and longings of months of separation and despair, came pouring from his lips—harrowing and demanding, wringing her heart, pulling at the love within her that defied to give him the answer which he craved.

"Oh, Blaise, dearest of all—hush! Hush!" She clasped him brokenly, with quivering lips. "I can't go with you. It wouldn't bring us happiness. Ah, listen to me, dear!" She came close to him and laid her hands impetuously on his arm, lifting her white, stricken face to his. "It would only spoil our love—in time it would. We have no right to. It would ostrich and sail it, make it something different. I think—I think, in the end, Blaise, it would kill it."

"Nothing would ever kill my love for you," he exclaimed passionately. "Joan, little Joan, think of what our life together might be—the glory and beauty of it—just you and I in our House of Dreams!"

She caught her breath. Oh! Why did he make it so hard for her? With every flare of her being yearning toward him she must refuse, deny him, drive him away from her.

"No, No!" she cried frantically. "We could never reach our House of Dreams that way—Oh, I know it! At least, not the sort of House of Dreams that would be worth anything to you or me, Blaise. It would only be a sham, a make-believe. You can't build true on a rotten foundation. . . . . Don't ask me any more, dear! It's no good—no good to either of us saying no when everything in me wants to say yes. But I must say it. And you . . . . you must go back to Nesta."

Her voice almost failed her. She could feel her strength ebbing with every word that left her trembling lips. Her knew that she would not be able to resist his pleading much longer. Her own heart was fighting against her—fighting on his side!

His new her weakness and caught at it eagerly.

"Then you know what you're asking?" he demanded hoarsely. "Do you know what you are sending me back to? Her life together! Nesta's and mine—has been simple hell upon upon earth. I obeyed you—and I took her back. But I have done no good by it. She is as weak and worthless as she ever was. Our days are one continual round of bickering and quarrels."

His face darkened. "And she is not satisfied! Her nominal position as my wife does not content her. Do you understand what that must mean—if I go back?" He paused, his eyes bent steadily upon her. "Joan"—very low—"you that you know—will you still send me back to Nesta? Or will you come with me and let us find our happiness together?"

He watched the scarlet flood surge into her face and then retreat, leaving it a pallid white.

Relieve that pain safely

You can always believe that aches or pains harmlessly with Aspirin. Even those deep-seated pains that make a man's very bones ache. Even those systematic pains so many women endure. They will yield to these tablets! Aspirin has many important uses. Read the proven directions in each package; and don't endure any needless pains from neuralgia, neuritis, rheumatism.

Keep a bottle of these tablets in the house; carry the packet in if subject to unexpected headaches, colds. Quick relief, without any harmful effects. Aspirin does not depress the heart. Just look each time for the name Aspirin—and the word genuine printed in red on every tab!"

Every druggist has Aspirin, and if you ask for it by that name you are sure to get relief. "Aspirin" is a trade-mark registered in Canada.

Colic Pains

"I found that BABY'S OWN TABLETS relieved colic pains almost at once", writes Mrs. Mildred Nesbitt, Long Creek, N.S. Many other Mothers report equally happy results from giving their children these Tablets.

BABY'S OWN TABLETS are recommended by Mothers for teething troubles, upset stomach, diarrhoea, colds, simple fevers, constipation.

There is no need for YOUR child to suffer. BABY'S OWN TABLETS can be given with absolute safety—see manufacturer's certificate in each 25c package.

SIMMONS' LUMBER COMPANY

The Alberta Pacific Grain Company Ltd.

CHARTERED 1916 — Business to be Wind Up and Closed in 1930 — Assets taken over by the Subscribers of the Province of Alberta—The Alberta Pacific Grain Company, Limited, has been operating in the Province of Alberta since 1916. Total production of wheat in Western Canada in that year had reached the unprecedented figure of 300,000,000 bushels. Early in the following year, with all farmers, the growth of the Company kept pace with increasing production in the West. In 1921 Alberta Pacific Grain Company, Limited, was taken over by the Province of Alberta, and established as an independent unit of Alberta Grain Company and Alberta Pacific Elevator Company, Limited.

THE "A.P." organization continued to grow. Its directors followed the well-known principles of co-operation laid down by pioneers of Alberta, and extended its operations into Saskatchewan and Manitoba.

WITH the completion of the building of the Peace River the "A.P." has become a pioneer in the movement of grain to Export markets through the Vancouver route. Terminal elevators with a capacity of 1,000,000 bushels have been completed by the Company at the Port of Vancouver.

THE "A.P." system has passed through the financial crisis of 1929-30, the war and the subsequent boom periods and the business depression of the past three years—a period of years, many of which have been attended and filled with losses and reverses to the grain trade. But all these losses of dividends with thousands of farmers and the "A.P." has emerged from the period of trial and storm, and the Company has passed into the hands of its owners, the farmers of Alberta, who have the first and greatest part of the Province to call "Home."

THE "A.P." system has passed through the financial crisis of 1929-30, the war and the subsequent boom periods and the business depression of the past three years—a period of years, many of which have been attended and filled with losses and reverses to the grain trade. But all these losses of dividends with thousands of farmers and the "A.P." has emerged from the period of trial and storm, and the Company has passed into the hands of its owners, the farmers of Alberta, who have the first and greatest part of the Province to call "Home."

"A.P." GRAINS with its customers, coupled with competent office and field staffs, ensures physical grain handling equipment and clerks and ability to return to the grower the most that can be obtained for his grain. Has brought the "A.P." system from its humble beginning in 1916 to its present position in the grain trade of Canada.

THE policies of the "A.P." today are and will continue to be, those of the founders of the "A.P." system.

J. H. Murray
GENERAL MANAGER.

LOCAL NEWS

The High School teachers of this inspectorate will hold their Convention of the Edmonton District High School Teacher's Association will be held in Edmonton, on Wednesday and Thursday, November 9 and 10.

Teachers of one-room High Schools, as well as those from large centres, should attend this convention.

The program is mainly devoted to High School work.

oooooo

We are pleased to hear that our many readers enjoy reading the new features in the paper, "10 years Ago Today", some have asked us why not go back twenty years. The paper known as the "Conservator," started publication on March 27, 1912, with the late Mr. G. G. Sabon as Editor, and we have only the files from that date to refer to.

oooooo

The St. George's W. A. held their annual Thanksgiving Supper and Dance in the Memorial Hall last Friday evening.

A fine gathering attended both the supper and the dance later in the evening.

The Redskins' Orchestra supplied the music for dancing.

oooooo

Until we heard last week of the demise of "Nigger". Stanley's black cat, we could not account for the absence of the half breed tomcat's fire ball. Nigger was a jealous guardian of the Town Hall for 17 years, and has been superceded by a chate colored little spitfire.

oooooo

The Tennis Club dance to be held in the Town Hall on Friday, October 31st, will be a success if music can help make it so. The Redskins' Orchestra is practicing many new snappy numbers for this dance.

You are reminded that the presentation of the lantern slide cups for the slogan competition will be made during the evening at the dance.

We hope that everyone will be there in his own sweet.

oooooo

North America shipped nearly eight million bushels of wheat last week, most of which went to countries outside Canada. Australia shipped 3½ million bushels, largely to non-European countries and Argentina shipped 1¼ million bushels.

26 LIVES LOST IN ALBERTA BY FIRE!

This was the Toll of Human Lives in 1931.

Added to this was:—

Property loss totalling more than..... $3,000,000.00
Forest Fire loss totalling more than .... $ 500,000.00

Help Us Fight This Great Public Enemy

SOME OF THE CAUSES:

A neglected camp fire.
A settler's clearing fire.
A carelessly handled burning straw stack.
A lighted match heedlessly flung.
An improper use of gasoline and kerosene.
A yard or building full of rubbish.

These and many other causes result often in fires that snuff out lives and do untold property damage.

ISSUED BY THE GOVERNMENT OF ALBERTA

Forest Service Branch, Department of Lands and Mines.
Fire Commissioner's Office, Department of the Treasury

Keep our own people employed

Definite action is required in times of economic depression. Co-operation and mutual support are the very best bulwarks against unemployment. You can assist in solving the problem here in our Province by demanding Made-in-Alberta Beverages.

The Brewing Industry of Alberta

...in common with other industries in the Province and the extent of its payroll, earned by Alberta workmen and spent right here in our Province, is dependent on the measure of support received from those who maintain home industry. Beverages brewed in Alberta are equal in quality to any in the Dominion. Demand Alberta Beverages — ensure PROSPERITY.

District Holds Busy Council Meeting

The regular monthly meeting of the Council of the Municipal District of Clover Bar was held on Saturday, the 8th instant.

After the adoption of the minutes of the previous meeting, By-law No. 33, a by-law restraining domestic animals from running at large in Township 53, Ranges 20 and 21, was given its final reading. The By-law becomes effective after the passing of fifteen days from the date of the final reading.

The Secretary made his report regarding the matter of the District meeting its prior right for taxes in certain mineral cases.

It was decided to hold the tax sale in the Municipal Office at two o'clock p.m. on the 12th December, terms will be announced at the time of the sale.

An application for a loan under the Preliminary Relief Settlement Plan, 1932, was received. Under the terms of the plan the total amount of the loan is shared equally by the Dominion and Provincial Governments and the Municipal District. As this was the first application ready it was decided that the entire responsibility of the Council be a committee appointed to interview the applicant and make an inspection of his farm before making any recommendation to the Provincial Settlement Board.

Mr. Buckley, Ardrossan, having withdrawn his previous offer to purchase lots in Block 7, Ardrossan, published a new offer of $40.00 for Lots 21 to 32, Block 7. The new offer was accepted.

Lots 37 and 38, Block 1, Turners Heights, were sold to Roy Rosston for the sum of Forty Dollars.

ARRANGEMENTS were completed to the appointment of Thomas J. Smith, Josephburg, for a license to sell tobacco and soft drinks.

With the reading of correspondence and the passing of payments and accounts the meeting adjourned to meet again on the 12th November.

OUR LOCAL VIRTUOSO

Why do reporters of concerts or musicals have to express an attitude of condescending superiority? Last MacDonald's recital in Edmonton on Wednesday night was a first class performance in every way. When the writer was a boy he used to go to his hobbies to stay at a farm, and soon when he returned after a daughter the farmer said, enthusiastically, "Yes, sir, she's a real boy!" And one Grace is master of her instrument and can make it talk, or laugh, or cry, as mood or music require, She has improved in technique during the past year, and gave an excellent programme of real music.

There is no need for a detailed list of the items, but for an audience to which a fervent appreciation of the "Jewel Song" by Gounod was the gem of the evening.

Perhaps one of these days we might get our local virtuoso to give a recital in her home town for some worthy object, when all of us could go, and hear, and see, and be vanquished!

St. George Tennis Club

The last meeting of the season was held at the Rectory on Wednesday evening 12th inst. The Secretary's report (Dr. Hamm) showed that the financial side was all right, and the season just past has been quite successful.

After business, the members turned into a party, bridge tables were formed and an hour or so was passed quite pleasantly, till Mrs. Reed served some welcome refreshments, and all went home feeling as happy as if they had won a tennis tournament.

SUPPORT THE ADVERTISERS

ST. GEORGE TENNIS AND BADMINTON CLUB

There will be a meeting of the Lamont Inspectorate Musical Festival executive committee at Lamont on the

At this meeting it will be decided where the Festival will be held. Different members of the committee are quite in favor of holding the Festival here, as there is three halls which could be used. The memorial hall would make an ideal place to feed the youngsters in, this should be given due consideration by the committee when picking out the town to hold the Festival in. Another feature, and a very important one, is the advertising in the Festival program, if the Festival is held in the Fort no doubt great deal more advertising could be had here.

The merchants in the town where this annual event is held do a certain amount of extra business on this day, due to the fact that in the neighborhood of 1000 people attended last years Festival.

St. George's A. Y. P. A.

St. George's A. Y. P. A. met on Friday last in the Parish Room and formed another Chapter of his life in the Klondike as a person. The Tom Cods, Bridge and other games occupied the time till Helen Karran, who was warmly welcomed back to the fold, gave word that the "Coffee" was ready. Then all went home after a quite but pleasant evening.

Here's the first of the do your Christmas something or other early item.

Already the lumbermen of New Brunswick and Nova Scotia are getting ready for Santa Claus. They are now out in the woods shanties forming Christmas trees. Practically all of these are shipped to Boston, New York and Philadelphia and the annual export averages 200,000 trees.

COMING EVENTS

A Dance will be held in the Portview Hill Schoolhouse on Friday, night, Oct. 21st. Frank Smith's Orchestra.

oooooo

The Princess Rebekah Lodge will hold its Bridge Party on Oct. 26th, at 8:30 p.m. Refreshments. Admission 25c.

oooooo

The annual meeting of the United Grain Growers Fort Saskatchewan local No. 106 will be held on Saturday, afternoon at 3 o'clock in the Town Hall.

oooooo

DON'T SLEEP ON LEFT SIDE, GAS HURTS HEART

If stomach gas makes you restless and unable to sleep on right side, Adlerika relieves GAS in TEN minutes. One dose will rid you of gas or sour stomach, and bring sound sleep. F. W. Smith, Druggist.

C.N.R. DO SHARE TOURAND INCREASING GAME BIRDS

Canadian National Railways operations foresee throughout Western Canada have been doing their share toward increasing the supply of game birds by protecting the native pheasants and Hungarian partridge which were found on the railway right of way at various points. The movement started with one section foreman in Saskatchewan, who on finding a number of partridge nests on his section instructed his men to leave a tuft of long grass surrounding the nest in each instance. As the burning of right of way for fire protection takes place before and after the nesting season of the game birds the nests were not endangered from this source. In the vicinity of sloughs and ponds many nests of wild ducks were also protected during the season, giving the birds a chance to rear in peace and safety.

Somebody ought to tell the Canadian hen that there is a depression. The Canadian hen recognizes no bad times, according to the agricultural department report. She just goes on laying and her average output of eggs for this year will be 112 per hen. Multiplying this by the number of hens in the country, rather startling total of 286,982,447 dozen eggs is reached. If these were laid end to end and then stretched they would reach a lot of omelets.

The Captain and crew of the "Bright Pan", who were rescued after the grain steamer struck an iceberg and sank in the Hudson Straits recently, are now enroute to Europe, travelling from Churchill via The Pas and Winnipeg, over Canadian National lines.

Credit Means Debt

Much is being heard these days in criticism of Governments and banks, and proposals of many kinds are advanced having as their object the "reform" of the banking system, the "curtailment" of the powers of banks, the "socialization" and the "nationalization" of banking, money and credit; the gold standard is attacked on the one hand and lauded on the other; Douglasism is advocated; "inflation" is urged by many, while others assert that present inflation means ultimate "deflation" and future trouble. Drastic writing down of present indebtedness, even complete wiping out of debts, is demanded in some quarters, which others claim is a policy of "repudiation" and the destruction of future credit.

Present criticism of the banks rests primarily in the fact that, at the present time, the banks will not extend credit. If people today could go to their bank and borrow as readily and as largely as they could did in 1928 and 1929, much of the criticism now heard of the banks would die out. It is because they cannot borrow, and in thousands of cases have no employment and no cancel cars, while in the case of farmers, prices are so low that there is here rather than profit on their production, that people, already in debt, are bitterly critical of the banks.

Critical over what? Because the banks will not extend credit to them. In other words, the banks will not allow these people to get further into debt to them. So much is being said about banking credit,—saying it, accepting it, contracting it.—that the average person is likely to have a confused idea as to what banking credit, or any kind of credit, actually means. And as most of us are just average persons, and particularly where financial and consumer terms are concerned, it is perhaps well to reduce credit to its simplest and earliest terms, and see what we make of it. Credit means debt. No matter at what angle we may view it, it means either immediately or prospectively, an obligation assumed, a debt to be paid. We borrow or buy on credit today and pledge ourselves to pay on some future day. This is true whether the transaction involves a dollar's worth of goods or a million dollars payable in a score of years, and it is equally true whether it be an individual, a corporation, a municipality, a province or a nation. The principle is the same, no matter what the circumstances.

One major difficulties today arise from the fact that there was too much credit, not too little, available to us in the past. It was easy to borrow; still easier to buy on the deferred payment, or instalment plan. Everybody was doing it. The nations of the world bought a great war on credit, and the ever-increasing cities, industries, shipping, millions of productive human lives, blowing it all away with high explosives, and promising to pay the huge bills incurred at some future time. Farmers bought more land, more implements, combines, tractors, trucks, automobiles, radios, etc., etc., on credit; the workingmen and salaried people in the towns and cities bought houses, and furniture, and automobiles, and scores of things they regarded as necessities and other things which were luxuries, on credit. Salesmen urged the people to do these things, telling them their credit was good. And all this credit meant just one thing,—it meant debt.

Governments and corporations proceeded on the same basis. Hundreds of millions of borrowed money were expended on railways, high standard highways, public buildings, and numerous public services of many kinds. People demanded all these things and enjoyed them. Voices raised in warning that a day of reckoning would come were disregarded, and those who gave voice to such warnings were decried as pessimists, people without vision or initiative, hopelessly new-progressive. Credit was available, so why not use it and let the future pay? And every credit used meant a debt contracted.

What was then the future is now the present, and we are called upon to pay. And that's the chief trouble today,—we have got to pay, and we don't like it. Nay, more, we have awakened to the fact that it is not only high time to pay, because we used up more credit, and thus created more debt, than our resources now enable us to pay.

Credit is an expensive thing. It also is an illusive thing, a will-o'-the-wisp to the unwary and thoughtlessly venturesome. But the debt created, and remember debt is always created by credit; you cannot have one without the other,—is not illusive; it is a hard, concrete fact. No matter what your credit may be, it is no more, if you are wise, than your capacity to pay the debt which the use of that credit creates.

Present debts cannot safely be disposed of by supposedly simple procedure of wiping them out by legislative action, or through the artificial process of inflation. Business would be handicapped if future credits which, within reason, are essential to the carrying on of the world's business, became all credit is merely confidence; confidence based on ability of repayment and you destroy credit. On the other hand, inflation beyond normal, ultimately means deflation back to normal. If the pendulum swings to the extreme right, it will have to swing just as far to the left before it gravitates down to a normal position. There are laws of nature which no legislation in the world can override.

Nor can present indebtedness be liquidated by more credit, which only means more debt, or a transfer of debt from one person to another. Debts must be honestly and honestly discharged. In some cases, there is no doubt a goodly number of cases, adjustments must be made in order to prevent serious losses by both debtor and creditor, but in the majority of cases debts ought to be paid through frugal living, prudent economies, and increasing work. Having enjoyed what credit bought for us, we must now pay for that credit. Because we did not know how to use credit wisely when it was obtainable, we are now realizing what it means to pass through the slow, laborious and generally painful process of paying our debts.

Suffered A Severe Attack Of Dysentery

Dr. P. L. B. Medford, Tyrone, B.C., writes:—"Last Summer I suffered from a severe attack of dysentery. I tried nearly everything on the market, without getting any relief, until a friend told me to use Dr. Fowler's Extract of Wild Strawberry, which I did, and I got immediate relief. Now I am making it a rule to always keep a bottle of it in my medicine chest.

"Wild Strawberry is sure relief for dysentery, colic and diarrhoea, but I always use it for the trouble mentioned."

An Unusual Damage Suit

Belgian Army Claims £300 For Loss Of Dancers

For the loss of six hares, which were shoved off in a French prison, a Belgian film actor, M. de Merry, is claiming £300 damages from the Reds.

The hares, a prominent gourmet, was of great commercial as well as aesthetic value, M. de Merry declared before it enabled him to play important parts in which a patriarchal appearance was required.

He bases his claim for compensation on the fact that while awaiting release after completing a sentence for fraud, he was sent by mistake to the penitentiary at Preston and subjected to the same regime as criminals who people required to be clean-shaven, instead of remaining shaggy under detention, as he was entitled.

Money is scarce yet she has pretty clothes

"You always look as if you had just stepped out of a fashion sheet. Yet money is none too plentiful with you. How do you do it?" the neighbors were always asking Mrs. Burnside. One day she told them. "My secret of pretty clothes is simple. When my husband bought our wedding things he came faded with mark's Diamond Dyes. These perfect dyes are made by the makers of Diamond Dyes which you know are the best dyes made for dark colors. Diamond Tints are for light shades. They need no boiling and they last through repeated laundrings. All you need to do is to rinse your things in Diamond Tints. You can get such lovely shades by using them. So you see, Mrs. Burnside, pretty clothes are as easy for you to have as for me."

Radio Plays Blocky

After having spectators many times with his lively sprints in a recent hockey match, the Bishop of London, who is 74, scored three goals in the penalty-taking forward for his old school, Marlborough, which clashed with Ridley public school in London.

SCORES ON THE WORLD?—THAT'S LIVER

Wake up your Liver Bile

—No Calomel necessary

Many people who feel sour, sluggish and constipated, have no appetite, coated tongue, dizziness, sick headache, bad breath, sour stomach, acid indigestion, when the liver fails to pour enough bile into your bowels. Then gas bloats up your stomach, you feel sunk and "all in all dreadful."

Doctor's Little Liver Pills will soon fix you right. Purely vegetable. Mild but sure. Ask for them by name. Refuse substitutes. 25 cts. at all druggists.

Adept Water Walkers

Girl students of Lady Margaret Hall, Oxford, England, formed an aquatic club this year, and have taken up practically every phase of water sports. Walking on the water with skid boots has been one of the most popular recreations, and the girls have become adept at it.

An OK Of Health.—Dr. Thomas' Eclectric Oil is not a jumble of medicinal substances thrown together and sold by druggists, but the result of the careful investigation of the healing qualities of medicinal oils, as applied to the human body. It is a pure combination and it wins and keeps public favor from the first. A trial of it will carry conviction to any who doubt its power to repair and heal.

Light Metal Browned

A new metal, which has been invented by a British firm, is lighter than aluminium, as strong as aluminium, cheaper than aluminium, easier to use—roll, cast or hammer—and can be hard while cold. It is already in use by the Admiralty.

Many mothers can testify to the virtues of Mother Graves' Worm Exterminator, because they have given experience have applied it in.

POWER PLUS ECONOMY

NEW LOWER PRICES

It's a basis for punishment, this big solid Eveready Layerbilt. Now more sudden battery can stand up to many hours of heavy duty. It's thick, lasting layers are pressed down tight, filling every inch of battery with active, power-producing materials. Yet Layerbilt has no round cells, waste space or fine wire connections like other radio batteries. It stands alone in weight of materials, in hours of service, in economy and satisfaction.

Buy Eveready Layerbilt Batteries and put life and pep into your radio set.

Loss Butter Produced

Falling Off In Creamery Butter Production For August

The production of creamery butter in Canada in August, amounted to 24,703,388 pounds, compared with 26,-182,938 pounds in the preceding month, and 27,899,886 pounds in August, 1935. Nova Scotia and New Brunswick have increased their production, but from Quebec to the Pacific, production has decreased. The largest percentage reduction was in Saskatchewan, which is down 34 per cent. compared with last year. These figures were issued by the Dominion Bureau of Statistics.

This Method Is Simple

One Way To Combat Problem Of Soil Drifting

Soil drifting is a very serious problem in many parts of Canada, and many are the ways that have been tried to combat it. Here is a new one, and one which looks fairly promising. Spread strips of fresh manure about three rods apart. Then drive the spreader the other way across this field so as to make checkerboards. Not only does this keep the soil at home, but it catches the neighbor's soil.

Persistent Asthma. A most distressing characteristic of this debilitating disease is the persistence with which recurring attacks come to sap away strength and leave the sufferer in a state of almost continual exhaustion. No wiser precaution can be taken than that of keeping at hand a supply of Dr. J. D. Kellogg's Asthma Remedy, famous as the most potent remedy for eradicating the disease from the tender air passages.

Hero Of the Suhm

One of the last surviving heroes of the British occupation of the Sudan, Rudolph Slatin Pasha, 75, died in a sanitarium at Vienna, Austria. He was an Austrian by birth. When 22 he enlisted in the Austrian army in Egypt. He served under "Chinese" Gordon and with Lord Kitchener as chief of the British Intelligence Service, and subsequently, as the British general, Sir Rudolph Slatin, he governed the Sudan.

Health cannot be looked for in the child that is subject to worms. Worms cause destroy health by causing internal disturbances that retard development and cause serious weakness. Miller's Worm Powders expel worms and are so beneficial in their action that the systems of the little sufferers are restored to healthful tone, all the discomforts and dangers of worm infection are removed, and satisfactory growth is assured.

Proved Good Luck

When the Thirteen Club of London held its annual luncheon recently superstition was defied in many ways. The members walked under a ladder, opened an umbrella in the room, spilt salt, sat at an oval table facing ladies' shoes, and in other ways flouted bad luck.

CANADIAN WOMEN FIND DUSTING DISTASTEFUL

Dust clothe going into discard; Unpleasant by-way; a bother to Wash

APPLEFORD WONDER PAPER HAS GREAT VOGUE

Of all household tasks, that of dusting is the least appealing to the majority of women.

However, this condition, like many another connected with housework, is undergoing radical change. In a great many Canadian homes the women are discarding dust cloths entirely, and are using Appleford Wonder Paper instead, because it actually dusts—as it cleans—as it polishes, doing a better and much quicker job than the old dust cloth ever did.

This new, and extremely modern Wonder Paper, is made from clean rags, and not from wood pulp, treated in a scientific way with a special furniture polish; and when used it does not scratch or mar the finest surface of upholstering or woodwork.

Appleford Wonder Paper comes in handy-size packages, twenty-five large sheets for twenty-five cents. You crumple a sheet into a soft wad and go over the surfaces requiring attention. Then when one side is soiled or worn, turn the Wonder Paper to another one. After you have given a quick and lasting finish to furniture and woodwork, you can still use Wonder Paper on the floors, if you wish.

And when you are through, there's no old duster to shake out or wash. Throw the soiled Wonder Paper away and you've disposed of the most unpleasant part of housework in half the time and with half the effort.

Wonder Paper is made by the makers of the famous PARA-SANI Heavy Wood Polish in the Green Can.

Special Offer

Most grocery, hardware and department stores have Appleford Wonder Paper in stock. If yours hasn't, we'll be pleased to supply you from the factory. Just fill in and mail this coupon.

DR. HAMILTON'S PILLS

Great Changes Wrought By Development Of Electricity During The Past Fifty Years

It is only fifty years since the first electric generating plant began operations. New York has been credited—the common belief a century ago when Edison pressed a button and a new era had begun. Even those who have lived in the transition and on through the "working" period may scarcely aware how much a part of public electrical power has become, how great is the change that has been wrought. It is only on those rare occasions when the power goes off that the boon is forced home.

A modern business office takes its elevators, its telephones, telegraphs and light as a matter of course. The citizen takes electrical power, transportation and street lighting as all in the regular scheme of things. Even the average household starts the day with an electrically run coffee percolator and toaster, and as a matter of course counts on the electric iron, hot water heater, vacuum cleaner and so on, until the hot side light is snapped off.

Electricity is taking over bigger and bigger responsibilities in industry. Last year, in the United States, in industry and business consumed a total of 82,162,982,000 kilowatt hours of electrical energy for lighting and power.

It has transformed the theatre by making lighting effects heretofore undreamed of possible, and in all the ramifications of cinema. It has become a handmaid to therapeutic medicine and agriculture, starting with the portable utility motor, is more and more claiming its aid. Already it is a recognized factor in the poultry business, and owning knowledge is now available to realize that it might and doubtless will be still more widely used.

There is a promise of large scale domestic heating and of cooking apparatus. Refrigeration, both for industry and home use, is now common. The day of a "private sun" with ultra violet rays guaranteed for every home is on the programme.

Ships in the air and ships at sea move electricity, from the simplest lighting devices to intricate machinery which seems almost to have sense or power.

In all this development circling the globe, it is a point worthy of note that this community stands out as the electric capital of the world. Winnipeg uses more electricity per capita than any other city, and it can obtain it more cheaply for both domestic and industrial uses.

In an era definitely opened as something new in history, a time when a great conquest of nature has increased man's power a thousandfold, it should seem something to Manitoba in general and to the City in particular, that it has not only among those in the vanguard but that it is leading the procession.—Winnipeg Free Press.

Saving Hard Time

According to figures issued by the Dominion Bureau of Statistics three electric railways ceased to operate during the year. Twenty of the 21 systems operating in Canada failed to earn operating expenses, a number of them showing heavy deficits. Radial railway systems have a hard road to travel, with steadily decreasing patronage, and the outlook for increased business anything but promising.

"I have brought my husband with me."

"Is that he standing over there?"

"Yes. How did you guess?"

"He looks so miserable."—Vart Mon, Stockholm.

The Pedestrian's Paradise

Tangier, Virginia, Has No Vehicles Of Any Kind

A curious fate of the 1,000 inhabitants of Tangier, Virginia, may tire of their confinement to that island known in Chesapeake Bay where there are "no automobiles, no horses and no wagons" and where indeed there is but a single street, though many canals which are crossed by bridges with gaps in the middle to permit the passage of fishing boats. The pace of community intercourse is such a place can not be swift. No ebb and flow of catapulting vehicles, forcing pedestrians to leap out of their skins. No vile contamination of the atmosphere with carbon monoxide and the fumes of burned oil. No rush and roar of innumable mechanisms in the care-free existence of every Tom, Dick, and Harry. In short, no artificial and dangerous acceleration of the pulse of life.

Outlook Improved

Railway Men Notice Better Conditions In The West

A marked improvement in the outlook of the people of the prairie provinces following the recently harvested grain crops of substantial proportions was noted by George Stephen, vice-president in charge of traffic Canadian Pacific Railway, who returned to Montreal from an extensive trip through the west.

A very much smaller section of the three prairie provinces was this year affected by drought, and in districts where no grain at all was harvested last year there was this year some harvest, even if of modest proportions in certain districts. For grain growers to gather, as Phil Rahm to be supplied by the government of Saskatchewan this year would be small compared with that necessary during the past two seasons, he said.

Automobiles On Farms

Seventy-One Per Cent Of Passenger Cars In Saskatchewan In Rural Areas

No less than 71 per cent. of the passenger automobiles in Saskatchewan in 1931 were on farms, 56 per cent in Prince Edward Island, 54 per cent in Alberta, 49 per cent in Manitoba, and only 13 per cent in British Columbia, and 18 per cent in Quebec Although Ontario had the greatest number of passenger automobiles on farms and the greatest number per farm of all the provinces the percentage on farms of total registrations within the province was only 39.7 per cent.

Preparing School Lunches

Phenolphtol Provides Some Interesting and Useful Suggestions

A very interesting pamphlet, No. 148, "School Lunches," has just been issued by the Dominion Dairy and Cold Storage Branch. Knowing the school lunch appetising, attractive and satisfying is always a problem in the rural community. This little pamphlet contains a very interesting analysis of the subject and provides some interesting and useful suggestions which are a great need through out rural Canada. A copy may be obtained without charge on application to the Publications Branch, Department of Agriculture, Ottawa.

John—Where are all the nice girls this evening?

Pauline—Out with the handsome men.

Installment selling in Mexico is increasing.

Analysis Is Made Of Number Of Live Stock And Distribution Throughout Provinces Of Canada

Grading Is Desirable

Establishment Of Grades Reasonable In Co-Operative Marketing

The recent issue of the "Economic Annalist," official organ of the Federal Agricultural Economics Branch, is the source of the following statement:

"The establishment and maintenance of grades is particularly desirable in the case of co-operative marketing. The grower of a good commodity should receive a premium for the extra care and efficiency involved in producing a superior product.

Canadian farmers or business men handling farm products who are looking for new markets must bear in mind that their products will meet competition from other areas and perchance other countries It will pay to study trade requirements and competitive practices and to build a sales policy around a product sold on the basis of standardized grades."

Making Leather At Home

New Methods Make Home Tanning Now Fairly Easy

In these days when advantage has to be taken of every possibly economy interest is revived in the home tanning of leather A number of inquiries as to how this can be done have been received by the Publications Branch of the Department of Agriculture, and to meet the need a special circular has been prepared. This deals with the several processes of obtaining hides, preserving, cleaning, tanning, softening and finishing leather, and hides of different kinds. While the old tanning bark method involved a long period of time and a lot of work many new methods make the home tanning of leather fairly easy.

Wild Assessment

A commercial traveller, having missed his connection, found himself in a small village. He approached an ancient porter.

"Can I get a picture house here?" he asked.

"Yes."

"A billiard hall or library?"

"No."

"Well, how on earth do you amuse yourselves?"

"We goes down to the store of an evening. They've just got a new 'accordiner.'"

Do You Know?

Fighting Days Are Over

Admiral's Flagship To Become a Gunnery Practice Vessel

Two of Britain's famous fighting ships will soon leave Portsmouth for the last time. The "Iron Duke," Sir Jellicoe's flagship in the Battle of Jutland, is to become a gunnery practice vessel. Most of her fittings already removed when she was originally ordered scrapped under the London Naval Treaty, have been retrieved.

The cruiser "Terrible," which is leaving for Newport, Monmouthshire, for breaking up, became famous in the South African War, when her guns and naval ratings were rushed at the last moment into Ladysmith and helped Sir George White to retain the siege for several months.

After lying 60 years in the River Thames on loan from the Admiralty, the training ship "Arethusa" has finally been condemned. The vessel will be replaced by the German sailing ship "Prussia," which will be renamed the "Arethusa." The condemned "Arethusa" was the last British vessel to proceed into action under full sail. This action took place during the Crimean War.

NURSE LOSES 7 LBS.

"I weighed 146 lbs." writes a nurse, "when I bought the bottle of Kruschen Salts which I have just finished. I have taken it and feel vitally tonesperful in place of hot water every morning. Now I weigh 138 lbs., a loss of 7 lbs. I can very glad to have lost weight, especially without trouble." (Mrs. H.R.) (Travel Nurse).

Unlike most salts, Kruschen isn't simply a laxative. When you take Kruschen Salts you not only stimulate your liver and kidneys to function naturally but you also help to banish hardy internal organ gland, nerve stimulus in the body with Nature's own vitalizing and rejuvenating materials.

Get a bottle of Kruschen Salts today, and take one-half a teaspoon in a glass of hot water every morning before breakfast.

Before the bottle is empty you'll feel years younger—you will brighter—step more sprightlier—nerves steadier—you'll need, enjoy your meals, and after a hard day's work you'll be ready for wholesome recreation—instead of completely tired out.

PURITY

Feed years younger

Canadian Many Valuable Recipes and In a Handsome Oil Stencil Cookbook Free

The Purity Cook Book is vastly more than a 'cook book.' It is a real guide to economy and good management. It represents two years' work in collecting, testing and editing.

Extra care has been taken to make the "method" for each recipe so simple and clear that even the inexperienced can follow each step without difficulty.

Over 60 recipes for cakes, 25 for salads, 40 for sandwiches, 40 for lunch and supper dishes, 25 for puddings, 50 for bread, quick breads, fancy breads, sweet dough, rolls, biscuits, etc., also hundreds of other recipes and housekeeping suggestions. Also valuable information regarding the desserts, muffins, waffles, griddle cakes, cereals, canapes, cocktails, soups, invalid dishes, fish, meats, poultry and game; vegetables, salads, puff, gelatine desserts, ices, apple dishes, preserving, canning, luncheon and supper dishes; sandwiches, pleasant drinks and home made candies.

Order your copy today—the first edition is limited. In grocers—great cover in any address in Canada, 25 cents postpaid. To points outside Canada, 40 cents postpaid. Write to Western Canada Flour Mills Co., Ltd., Toronto, Winnipeg, or Calgary, stating name and address and enclosing 25 cents.

Women Detectives On Scotland Yard Force

Valuable Aid In Locating Women Connected With Bandit Gangs

Having proved that they can keep a secret and know how to "size up" criminals, women are being added to the detective force of Scotland Yard, in London, England. For months they have been quietly trained at headquarters and they have not divulged a word to anybody. There are now "on the strength" of the Criminal Investigation Department. It is expected that another 20 or 30 will complete their training shortly, and will work with detectives. All are young, and have been chosen largely for their capacity for forming friendships. Definite evidence has been obtained by the Yard that there are clever women criminals associated with manhood gangs, and for this women detectives will aid in hunting them.

Eat Celery For Health

Russian Higher Among Vegetables As a Source Of Mineral Supply

It is doubtful if any of the common vegetables can compare with celery as an aid to general health. Most physicians recommend it as a blood cleanser and for stilling the body of toxic substances, this vegetable is in a class by itself.

Like most leafy vegetables, the purpose of celery in the diet is not to provide heat or energy, but rather to furnish the vitamins, minerals and other secondary food so essential to good health. As a source of minerals, celery ranks high among the vegetables, being particularly rich in lime and magnesium. For this reason it is of special value to nursing and tends to combat any tendency to excess acidity. Celery is also a valuable source of vitamins, being one of the best for vitamin "B."—Dominion Dairy Branch.

Well Children

"Frequently I give each of my five children BABY'S OWN TABLETS—I am sure that is why they never have any serious illness". writes Mrs. Joseph Morley, Turbo, Ont. This mother's opinion is passed on to all Mothers. BABY'S OWN TABLETS can be given with complete safety to the youngest child and will relieve the baby's minor ailments such as the package. Recommended by mothers for teething troubles, colds, constipation, indigestion, diarrhoea, constipation, tonsilitis. They do have no substitute.

Dr. Williams' BABY'S OWN TABLETS

Taking Precaution

"Every window in your house was lit up last night. Did you have a big party?"

"No, but my wife is returning from her holidays today and if she notices the small consumption of gas, she'll be suspicious."

PROBLEMS OF THE MODERN HOME

Golden Text: "As for me and my house, we will serve Jehovah."—Joshua 24 15.

Lesson Joshua 24.14, 15, Mark 10 2-12; Ephesians 6 1-9.
Devotional Reading Psalm 127.

Explanations and Comments

The Challenge: Choose Whom Your House Will Serve, Joshua 24.14, 15. Because of all God had done for them, the children of Israel owed Him loyal, undivided service. Joshua declared They must put away the gods which their fathers served beyond Euphrates and in Egypt If however they were determined not to serve Jehovah, they could choose whether they would serve the gods their fathers had served and had renounced, or the gods of the people of the land where they had settled. This he said ironically, showing them what alternatives they had if they would not be loyal to Jehovah.

Man must worship. He must have a god. That is universally true If man will not serve the Lord, then let them choose whom they will serve; only let them make their decision at once. Right of what the living God really means If today men say that God's anointed and appointed King, We will not have this Man to rule over us,' then let us urge them to choose among the alternatives which are offered them, only let them consider the results of the reign of Christ over human life with those of any other authority to which loyalty may be yielded."—G. Campbell Morgan.

"And to every man there openeth A high way and a low;
And every man decideth
Which way his soul must go."

"But," Joshua added, "as for me and my house, we will serve Jehovah." The world will pay little heed to our exhortation if we do not follow it up by personal practice."—Joseph Parker.

Starts On Long Hike

Ottawa Architect Proceeds On Foot To Visit World's Grain Show

Ernest Stinman, a young Ottawa architect, has already started out on a trip to visit the World's Grain Fair at Regina next year. But he needs no carry stars, for he is walking from the Saskatchewan capital and is earning his way by singing and playing his clarinet.

A picturesque figure clad in brown walking shorts, khaki shirt, high leather boots and felt hat, accompanied with a cockade of flowers, Solomon has arrived in England and is now touring the British Isles before boarding a ship to cross the Atlantic. He is a student of architecture and an accident vocalist.

The itinerant musician hopes to sing some of his Viennese songs for the king and queen as a finale to his British tour. He is a member of the Academie de Chanteurs de Vienne and has sung under the directorship of Dr. Breen Walther and Felix Weingartner.

Council House Opened

New London Headquarters Of Line In Now Completed

The Cunard House, the new London headquarters of the Cunard Line and its associated companies, the Anchor Line and the Commonwealth and Dominion Line, has been opened in Leadenhall Street, the heart of the shipping centre. The building is planned in a new fashion like a huge letter H. H. W. Corry, chairman of the company, formed to operate the building, said the structure had been planned long before the lead had been laid for the new 554, the giant Cunarder on which construction work has been hatted.

He also explained that some of the furniture in the building had been saved from the old liners "Caronia" and "Carmania," the general impression among distinguished shipping men at present is that resumption of work on the 554 will not be long delayed.

Modern Difference

James (resting his hare, but not tired)—"Dash! Your father used to borrow something as usual, I suppose."

Neighbour's Boy—"Yes, please Mr. Jones. He says could you 'ship him with the loan of a corkscrew."

James—"A corkscrew? Certainly! You run along, Bobby—I'll bring it round myself."

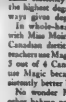
CHICKEN SHORTCAKE

2 cups pastry flour
(or 1½ cups of bread flour)
1 teaspoons Magic Baking Powder
½ teaspoonful salt
4 tablespoons shortening
1 egg ¾ cup water

Sift dry ingredients, add shortening and mix as thoroughly with a pastry fork, add beaten egg and milk. Scarce water to make soft dough Roll or pat out with hands on floured board. Cut out with large floured biscuit cutter, or half fill greased muffin rings which have been placed on greased baking pan Bake in hot oven at 475° F. about 12 minutes Split and butter while hot, and fill with hot creamed chicken. Makes 6 shortcakes.

Try Miss Alice Moir's light, flaky

Chicken Shortcake



"I always use and recommend Magic Baking Powder," says Miss Alice Moir, Dietitian at one of Montreal's finest apartment-hotel restaurants. "Magic combines efficiency and economy to the highest degree. Besides, it always gives dependable results."

In whole-hearted agreement with Miss Moir, the majority of Canadian dietitians and cookery teachers use Magic exclusively. And 5 out of 6 Canadian housewives use Magic because it gives consistently better baking results.

No wonder Magic outsells all other baking powders combined!

Favour your family with Chicken Shortcake—made with Magic as Miss Moir directs. Note its delicate flavour, its farther lightness!

WAY IS OPEN FOR INCREASED TRADE WITH BRITAIN

Ottawa, Ont.—Free entry into the United Kingdom market for Canadian manufactured products excepting in respect of a very limited list of goods

Preferences in the United Kingdom market on Canadian goods ranging from 10 per cent. to 33⅓ per cent

Canadian manufactured goods which enter the United Kingdom free under the agreement number over 100 commodities.

The list includes certain kinds of paper, aluminum, stoves, typewriters, and a long list of hardware, leather, furs, rubber and textiles, chemicals and miscellaneous goods.

Preferences in the various British Dominions

Preference in the United Kingdom market practically the entire range of Canadian natural products

Free entry into the United Kingdom market for certain timber products.

Regulation of the British income market, and an arrangement whereby free entry of Canadian loans and bonds on favourable terms will be concluded.

Modification of conditions at present governing importation into the United Kingdom of Canadian live cattle.

Free entry (except for sugar duty) to the United Kingdom market for three years certain on Canadian wheat.

Free entry into the United Kingdom market of unlimited quantity for three years certain as against 15 shillings per cwt. (112 pounds) general tariff and a preference margin of 15 shillings per cwt. during the life of the agreement.

Free entry for Canadian cheese into the British market for three years, with preference margin of 25 per cent. to be maintained during the currency of the agreement.

Preference in the British market on Canadian tobacco.

Free entry into the United Kingdom market on fresh apples as against a duty on foreign apples of four shillings and six pence per cwt.

A preference of 50 per cent. on Canadian potatoes, but at present there is an embargo in force.

Free entry to the United Kingdom market for three years certain, to Canadian eggs in shell as against certain specific duties against foreign eggs.

A preference of seven shillings per cwt. on Canadian honey in the British market.

A preference of 10 per cent. in the United Kingdom on Canadian barley.

Free entry for following Canadian grain and grain products with a 10 per cent. ad valorem preference: Wheat flour, rye, oats, peas, clover seed, hay, bran, shorts, and middlings, oatmeal and rolled oats.

Free entry for Canadian wheat as against a general tariff of three pence per bushel.

Preferential rates on Canadian confectionery in United Kingdom market.

Free entry on unsweetened milk powders as against a general tariff of six shillings per cwt.

Wheat Movement To North

Shipments To Churchill Show Signs Showing Up

Prince Albert, Sask.—Wheat movement from this division of the Canadian National Railways to Churchill is showing up slightly after wheat drawn from here has nearly twice filled the elevator at Churchill. Prior to August this year, 2,500,000 bushels had been shipped and since that date 1,500,000 more bushels have been sent northward from this division. There remains more than half a million bushels yet to be shipped.

Mill Receives Large Order

Hamilton, Ont.—One of the largest factory orders ever given in Canada, for 1,000,000 pairs of silk stockings, has been received by a local mill and will keep the stocking department busy working night and day for the next six months.

W. N. U. 2025

Death Due To Negligence

Court Finding On Auto Crash Which Killed Earl Of Egmont

Southampton, Eng. A county jury found the automobile collision in the New Forest in which Earl of Egmont, former Pribble, Alberta, member, was killed last May, was caused by "gross negligence on the part of both drivers."

The judge arrived at his decision in dismissing with costs action for £100 by John Penny, driver of the car in which the earl was killed, against Irs Jack Lithgoes, London, driver of the other car.

The action alleged negligence on the part of Lithgoes, but the judge found both were negligent in that each failed to see the other car and could have driven out.

There was not "a pin to choose" between them, he said.

Communists Expelled

Soviets Oust Twenty Prominent Members Of Executive

Moscow, Russia The central committee of the Communist party expelled 20 prominent members, including Gregory S. Zinoviev, former chairman of the executive committee of the Third International, and Leo Kamenoff, brother-in-law of Leon Trotsky.

Those expelled members were accused of organizing a counter- revolutionary group for the purpose of obtaining collective state farms.

The Communists hit by the expulsion order are party men of long standing and former followers of Lenin, who now is in exile in Turkey. They belonged to the right wing.

Decision Rests With Local Authorities

As To Whether Direct Relief Be Paid Or Money Be Loaned

Ottawa, Ont.—Agreements between the Dominion and provincial governments respecting the administration of direct relief, plans the decisions as to whether it shall be paid in money or in kind directly in the hands of the local authorities.

The Department of Labour says the act specifically gives the perogative to the local administrator of the fund.

Dies From Injuries In Harvesting Accident

Young Farmer Was Caught In Machinery Of Combine

Saskatoon, Sask.—Severely injured in a harvesting accident, October 1, Robert Potter, 26-year-old farmer of the Sovereign district, died in hospital here.

Mr. Potter was injured when he was caught in the machinery of a combine he was operating on his farm twelve miles southeast of Sovereign.

Offers Criticism

Calgary, Alberta.—Criticism was levelled at the Dominion health of animals department by Hon. George Hoadley, Alberta Minister of Agriculture, during an address before the annual convention of the Alberta Veterinary Association here. He maintained "reorganization of the health of animals branch is long past due." He urged a system whereby young men could enter the veterinary profession with the hope of adequate remuneration.

Land Matters Passed

Gravenhurst, Ont.—Drenched to the skin and suffering from exposure after spending most of two days in Muskoka's rocky woodland, two Toronto men and one from Kitchener, lost while partridge hunting, were found. All in good condition.

Coast Fishermen May Strike

New Westminster, B.C.—A general strike of fishermen covering the entire British Columbia coast appeared as a possibility following a protest lodged by the British Columbia Fishermen's Protective Association against the low price of salmon.

A material as hard and transparent as glass has been developed from crude sugar by an English scientist.

NEW QUEBEC SENATOR

J. H. Rainville, K.C., former chairman of the Montreal Harbor Commission, who has been chosen to fill one of the Quebec vacancies in the Senate.

Advances Plan For Circulation Of Money

Solution To Economic Problem Suggested By A. C. Stewart

Springside, Sask. Offering a solution to the present economic difficulties by advancing a plan of putting more money into circulation in Canada and reducing the rate of interest, Hon. A. C. Stewart Minister of Highways, spoke here.

He suggested a bank or commission be set up to a branch of the Federal government for the purpose of handling all fiduciary money and gold. This banker commission would be authorized by the Dominion government to issue fiduciary money to such extent as could be absorbed under conditions fully explained by Mr. Stewart.

He stated that the result of this plan would mean that high-priced investment securities would no longer be available to capital in Canada, but instead would be available to carry on industry and commerce.

The effect of sufficient money being put into circulation in the Dominion would mean that all great investment bodies and financiers, not having access to government or municipal securities, would lend their money to industry and it would get into commercial channels at reduced rates of interest.

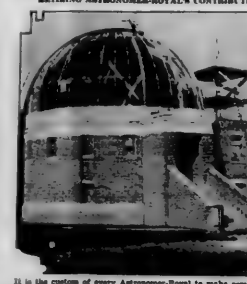
Cost Of Imperial Conference

Total Amount Expended $288,361.80 Cannot Be Told

Ottawa, Ont. The total amount expended in connection with the Imperial Economic Conference was $338,361.86, Sir George Foster, acting secretary of state, told William Duff (Lib., Antigonish-Guysboro) in the House of Commons.

The sum paid for entertainment including lodging, restaurant and other charges of delegation and official parties while the conference was sitting in Ottawa was $135,589.

RETIRING ASTRONOMER-ROYAL'S CONTRIBUTION



It is the custom of every Astronomer-Royal to make some addition to the great Observatory at Greenwich, England, upon retirement, and above is the new telescope, which is to be Sir Frank Dyson's contribution. The dome and building, almost completed, will house the new 36-inch telescope.

"Bright Fan" Sinking

Mishap Should Not Affect Safety and Possibility Of Big Route

The Pas, Man. The feasibility and safety of the Hudson Bay route should not be affected by the recent sinking of the Bright Fan.

The mishap was an act of God, declared Captain R. E. Oliver, commander of the grain steamer, upon his arrival here from Churchill.

Captain Oliver declined any statement regarding details aboard his ship when the crash came, but members of the crew declared everything was in order. Lookouts were at their posts.

Captain Oliver was reticent about telling of the accident, stating he did not want to create alarm and no reports were sent out until the inquiry into the disaster is held.

"I shall be glad when it is all over and all the facts are known to the proper authorities," he declared.

"The striking of the iceberg by the ship was an accident that no man could avoid and was one of those tragedies that strike in the night," the captain said.

Churchill is a coming port and will become the centre of one of the biggest trade and shipping routes in spite of the loss of the ship, he said.

English Woman Killed By Chinese Bandits

Mother Was Trying To Prevent Kidnapping Of Children

Harbin, Manchuria Mrs. C. T. Woodruff, an English woman whose husband is chief accountant for the British American Tobacco Company, was killed by bandits as she struggled to prevent the kidnapping of her two children.

The bandits shot her dead, seized the children and fled. Two Russians were killed by the kidnappers who opened fire, wounding both seriously. Then the Chinese police took up the chase and rescued the children. The other two kidnappers escaped.

The crime was committed in broad daylight on one of the principal streets of Harbin and the wholesale way which lately has been a prey to such raids, was raised to a high pitch of excitement. The children were uninjured.

Object To Moratorium

Calgary, Alberta.—Members of Alberta Retail Merchants' Association are opposed to a moratorium or changes in the Debt Adjustment Act, and believe there is no need for such action at the present system as proposed by the Alberta Bar Association, according to suggested committee of the House of Commons.

The sum paid for entertainment including lodging, restaurant and other charges of delegation and official parties while the conference was sitting in Ottawa was $135,589.

British Premier Here Soon

London, England.—Prime Minister Ramsay MacDonald on October 12, celebrated his 56th birthday at work at No. 10 Downing Street, where his attention was demanded by matters connected with various pending conferences.

PREFERENCE ON WHEAT SHOULD BENEFIT WEST

Ottawa, Ont A highly optimistic picture of the benefits which will accrue to Canada by the tariff concessions granted to this country on wheat and wheat flour was given in the House of Commons by Prime Minister R. B. Bennett. He spoke of the farm commodity as at the moment "of most immediate importance to this country."

From entry of flour as against a minimum general British tariff of 10 per cent. is secured to Canada under her agreement with the United Kingdom. A preference of six cents per bushel on Canadian wheat is granted.

"Not only does the increase in the sale of Canadian flour widen the Canadian wheat market, but Canadian flour is now established in promoting the direct sale of Canadian wheat," said Premier Bennett.

"In 1921, the total import of wheat flour into the United Kingdom was 6,141,182, barrels, of which 3,712,524 barrels came from British countries and 2,428,658 barrels from foreign countries. Canada being the chief British empire supplier with 3,238,690 barrels and the United States the chief foreign supplier with 1,187,190 barrels.

"This tariff preference should defend to British countries a large part of the flour trade of the United Kingdom heretofore supplied by foreign countries.

"On wheat we have secured a preference of 2c. per quarter. Article 4 of the agreement means the continuance of this preference as well as the preference granted in respect to copper, zinc and lead, conditional upon empire producers of these commodities being able and willing to offer them a first sale in the United Kingdom at prices not exceeding the world prices and in quantities sufficient to supply the requirements of the United Kingdom consumers.

"Article 4 is of the greatest importance to the wheat growers of this country that the effect of a preference would be to set up in their favor a price differential in world markets and at the expense of the British consumer. What I did maintain was that it was vital to us to find a secured market in the United Kingdom which is now by far, and is likely to continue to be, the greatest wheat consuming country in the whole world.

"There is no need of emphasizing the value of this market to Canada. The preference, it is agreed, will substantially increase the purchase of Canadian wheat by British importers.

Winnipeg Asks Action On Jobless Problem

Will Ask Federal Government To Relieve City Of Transient

Winnipeg, Man. Immediate action on the part of the Dominion Government to relieve city of the transient unemployment problem is demanded by city council. A resolution was adopted petitioning the government to provide every transient with transportation to his legal place of residence and proper food and accommodation while stranded here.

More than 3,000 transients have been taken off freight trains here within six days in accordance with the Dominion Government's ban on rod riding.

Last Ship For Season

Churchill, Man.—Monday her way through a sea as calm and clear as it was turbulent when she came in the previous week, the steamer "Pas-silvo" is outward bound from here, the last boat to leave this northern port this autumn and the 11th to carry grain surveyed by the new Hudson Bay route this season.

British Exports Lower

London, England.—British exports for the month of September were valued at £36,228,000 for the lowest total recorded for many years, according to trade figures announced by the board of trade recently.

Exploring The Stratosphere

Attempt Made To Penetrate Upper Stratum 97 Years Ago

Half a century ago an attempt was made to explore the upper stratum of the atmosphere known as the stratosphere, where wind, storms, clouds and changes of temperature are unknown." It had a tragic termination.

On April 15, 1875, Gaston Tissandier, editor of the French scientific journal La Nature (Nature Speak), an engineer, and Theodore Sivel, a well-known aeronaut of that period, climbed into a basket of the balloon "Zenith" at the Paris gas works. At twenty-five minutes past noon the ropes were cast off.

All three were experienced aeronauts. Although both balloon was provided with the best equipment available, including a supply of oxygen, the matter, under the hermetically sealed sphere of Professor Paucot, was of little use. Their clothes afforded no protection against the rarefied atmosphere and low temperature encountered.

By 1 o'clock the balloon had reached an altitude of 13,000 feet. Sivel was thrown out and the "Zenith" shot higher. Gradually in breathing became apparent, though this was relieved by inhaling oxygen. At twenty minutes past 1 an altitude of 21,000 feet was reached, and the temperature had fallen to 10 degrees Centigrade below zero. Sivel and Sphen 3 were now suffering from dizziness, and Tissandier found difficulty in retaining his feet. Here he had two brown vessels and one balloon ripped at a great speed. Tissandier was able to record the reading of the altimeter at 24,600 feet, then he lost consciousness.

It was ten past 2 when he recovered and noticed that they were falling rapidly. He put on a mask under him, and noted that the temperature was now 5 degrees below zero. His two companions lay on the floor of the basket insensible. Though he made no attempt to assist them, he was unable to do so, and again lost consciousness himself. He was awakened by Spinell, who was saying, "Throw out more ballast." The lightened balloon again shot up at a terrific speed.

Tissandier relates and knew nothing more until a moment past 3 when he became aware that the balloon was moving swiftly to earth and that the basket was swaying violently from side to side. He struggled to his knees and made desperate efforts to revive his companions. Both lay unconscious, their eyes closed, blood streaming from their mouths. Sivel's face had turned black.

Meanwhile, the balloon continued its downward course, and Tissandier, discovering another ballast to lessen the force of impact with the ground. Then with his last remaining strength he loosened the anchor. The basket touched the ground and bumped for some distance over the plowed fields. It was exactly 4 o'clock when the "Zenith" came to rest. Spinell and Sivel were both dead when taken out of the basket. The fight had lasted three hours and thirty-five minutes. Two dauntless pioneers had lost their lives. Tissandier nearly lost his reason. Today they are forgotten.—H. F. Lonsdale-Rathven in the London Daily Telegraph.

Wife (turning from upsetting bids): "Well, how is your new novel coming?"

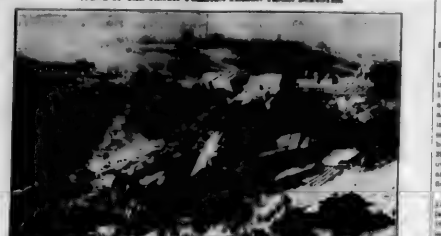
Husband: "Fine! The hero is just proposing to the girl."

Wife: "Well, tell her to say no."

The latest musical instrument—The Saxophone.—Lustige Kolner Ballong, Cologne.

W. N. U. 2000

SCENE OF THE TRAGIC FRENCH LEGION TRAIN DISASTER



Our picture shows the scene of the French Foreign Legion Troop Train, which was derailed and fell into a ravine on the way from Sidi-bel-Abbes to Tlemcen. The French War Ministry stated that 22 soldiers were killed and 250 injured.

Many Foods Found Suitable For Freezing

Increasing Now Done In Original Flavor In Evidence

Frozen food is fast establishing a place for itself in the market. Meats, fruits, and vegetables are all on portable retail sales and delivery have to be made within a limited period to avoid waste. Pre-cooling and refrigerator space in transit by rail or boat has extended the market and many shipments possible across the continent and even to Great Britain. The problem of freezing is not as simple as would seem at first thought, as each product must be dealt with in a particular way. So far there are said to be over sixty food products frozen and sold commercially. Experimental work is being carried on with many others.

Although not every product is investigated has proved suitable for freezing the great majority have survived the taste and will in time probably be placed on the market. The berry growers of the Pacific States are now planning about fifty million pounds every year. Most of these are frozen in barrels and tins until in the packing plants of London, but more recently great quantities have gone into one-pound containers for sale in retail stores. Southern growers are utilizing this method for dispatching of juice from oranges, lemons, cantaloupes and grapefruit. Shelter although it was not guaranteed on account of freezing and thawing. This is now being overcome and refreezing is done in such a way as to retain nearly all the qualities of the fresh fruit.

A Familiar Old Saying

Phrase "On Tenterhooks" Came Into Daily Use

The weaving industry of Halifax, England, was carried on in the workers' cottages in earlier days and the "pieces" were spread out on the hillsides. Theft became so common that what was known as the Halifax Law came into being. Under this law anyone stealing cloth to the value of more than thirteen pence was liable to instant execution. In those days, therefore, to tell a man to "Go to Halifax" was equivalent to telling him to go where (presumably) he stood a good chance of being beheaded.

The Meaning Of Sunshine

Those Who Appreciate Most All Others Help To Make

Those who bring sunshine to the lives of others cannot keep it from themselves. There is something so penetrating about sunshine that it inevitably lets some of itself be left behind when you call it forth. It is all around, for light is stronger than darkness and good is stronger than evil. To be a bearer of sunshine is dark places is the greatest work in the world.

Every state and territory of the United States except Nevada has a national guard or militia.

The most dangerous part of an automobile may be the nut that holds the steering wheel.

Canada's Poultry Industry

Figures Show Remarkable Increase In Last Ten Years

It will come as a surprise to some to learn that the poultry industry has increased more than any other class of live stock in the Province during the past ten years. A jump from forty-three to ninety-five millions is remarkable, when it is considered that there was no great expansion in the number of farms. Poultry keeping has developed as a special branch of farming, and even within the business itself, new features have been entered. It appears that there are actually fewer farms on which hens are kept, on the other hand there are many on which poultry have taken the lead, even taking the place of dairy cattle. Farms especially for poultry have sprung up in the vicinity of cities, to cater to the fresh egg, broiler or dressed poultry trade. A few such plants are devoted entirely to ducks.

British Columbia made the greatest increase in numbers showing a gain of 1,100,000 as compared with 41 per cent for the whole Dominion. These figures are for 1921, before the slump in prices caused a slackening of effort in the business. Nevertheless it may be assumed is only temporary and the next ten years should witness a growth equal to the last.

Port Saskatchewan, Alberta, one of the first struggling posts in the West to get a move, a police detachment now is without a representative of the famous force.

Oxygen was discovered independently by Joseph Priestley, an Englishman, and Carl Scheele, a Swede, author of the honoring of the other's discovery

Some Facts About Food

Cheese, Nuts and Beans Are Good Substitutes For Meats

It is well to remember in these days of national economy that pulse foods, such as peas, beans, lentils and peanuts, contain more protein than the best cuts of meat, or any other cereals.

Lentils are the richest in the amount of protein matter. They are also the most easily digested, partly on account of the absence of sulphur, which predisposes to flatulence.

Peanuts are valuable, not only for the amount of protein matter they contain, but for their large proportion of fat.

They should be cooked long and slowly, and eaten in moderate quantities combined with other vegetable foods. Peanuts are useful as tissue-formers.

Cheese is another useful substitute for meat. One pound of cheese contains as much nourishing matter as 2 lbs. of meat, and as much fat as 3 lbs. Hard cheese is difficult of digestion and should be grated before cooking.

Cheese dishes combine best with green kind of vegetables, mustard, such as rice, bread, omelettes, macaroni.

Telling the Truth

The landlady approached the complaining boarder.

"I think you had better board elsewhere, Mr. Hitherkin," she called sternly.

"Yes, I often have," he returned dryly.

"What's that?" she snapped. "Often here what?"

"Better board elsewhere. Good-day!" he flashed back.

Miniature Tower of Babel

The survey of the Canadian Pacific liner "Montrose" sounded like Babel to a musician during the voyage ended recently. Five unaccompanied children speaking three different languages were passengers. Left to right: Irene Fung, German, three and a half; Jacqueline Des Forges, six; Arletie Des Forges, three and a half; French; Rodwigh, six, and Zella Clarke, three and a half, English. The children were all joining parents who preceded them to Canada. The four stewardesses speak 10 languages between them.

Every Canadian Pacific liner has a number of stewards and stewardesses who are fluent in foreign tongues. They are distinguished by coloured cuffs on the cuffs of stewards, and a narrow ribbon (such as may be seen at either end of the picture) on the snowy caps of the stewardesses.

Unaccompanied children are not an unusual problem, either. Never a voyage passes but what some motherly stewardess has in her care an unaccompanied child who may be anything from six months to 16 years of age. And they seem to have more fun than many of the adult passengers.

Canadian Farm Statistics

Increase In Farms Is Shown In All Provinces Except

The Canadian census reveals that there were 736,664 farms in Canada in 1931 compared with 711,000 in 1921 an increase of 17,574. There is a decrease in the number of farms in all eastern provinces and an increase in all western provinces, but the largest number in 1931 is Ontario, which boasts 192,174 farms. There are 368,209 farms in Canada occupied by owners, 74,382 occupied by tenants, and 67,942 occupied by persons classified as part owner and part tenant.

The total area of Canada may [illegible] per cent. is as yet occupied as farm land in 1931 the percentage was 16.4. The Island [illegible] occupied [illegible] in Prince Edward Island (82½ per cent. of the land is occupied for farms. At the opposite extreme is British Columbia where only 1.37 per cent. of the land is included in farms.

In the last ten years the size of the average Canadian farm has increased from 196 acres to 224½ acres. The smallest average farms are in Prince Edward Island (82½ acres) and the largest in Saskatchewan (650 acres), although Alberta, with an average farm of 490 acres, is a close second.

The value of occupied farm land for all Canada is placed at $16.54 per acre; the value of improved land is placed at $61.25 per acre. In all provinces there has been a reduction in land values per acre during the decade.

Britain Wants Good Seed

Best Quality Red Clover and Alsike Brings Top Price

In a statement issued recently by George H. A.H. Clark, Dominion seed commissioner, in connection with the sale of red clover and alsike seed in the British market, the following comment appears: "Our growers should know that our valuable export market for overseas pays top prices for only well matured, bloomed, bright seed of not less than 99 per cent. purity by weight, and should know also that if they sell poorer seed of the quality asked for in Great Britain the demand there for Canadian grown seed may be expected to continue."

Has Faith in Wheat

Montana Farmer Is Prepared To Bow Large Acreage Next Season

Thomas D. Campbell, reputed to be the world's largest wheat farmer, is prepared to seed a "substantial" part of his large acreage on the Crow Indian reservation in eastern Montana, confident, he asserted, that "20 cent wheat" is going to be a thing of the past by next harvest.

The former engineer, whose industrialized 90,000 acre Montana holdings produced 638,000 bushels of wheat in 1931, shared the distressing results of low prices and drought with other agriculturists of the country. The crop that cost more than a quarter of a million dollars to put in two years ago, was ravaged by the drought. Much of it didn't come up.

Richmond Park, England, made $18,000 from its municipal golf course in the last year.

Bankruptcies have dropped 25 per cent. in New Zealand compared with last year.

"Oh, is that how these shops managed to scratch themselves?"—Boston Transcript, Montreal.

Protect Your Boy

SCOTT'S EMULSION

THE HOUSE OF DREAMS-COME-TRUE

— BY —

MARGARET PEDLER

Author Of

"The Splendid Adventure," "The Herself Builder & Daughters, Ltd., London.

CHAPTER XXXIV.—Continued.

Jean's thoughts lashed her. She shudders bent and cowered a little as though beneath a physical blow.

There had been a time oh! very long ago, it seemed, before Destiny had come with her scathes and quenched the twin flames of love and happiness at a time when, only in some exquisite dream, she had heard the sound of little voices, felt the helpless touch of tiny hands. Perhaps Nesta, too, had heard these voices, felt those clinging hands, while her soul quickened to the vision of a future which might hold some deeper meaning, some more sacred trust and purpose, than her empty wayward past.

And she, Jean, had stood between Nesta and the fulfillment of that dream, forever binding her outcome to her own misery.

She saw it all now with a terrible clarity of vision, understood to the full the two alternatives which faced her — to go with Blaise, as he implored, it to send him—her man, the man she loved back to Nesta. There was no longer any middle course.

A cold sweat broke out over her.

"No true happiness ever came of running away from duty. And if ever I'm up against such a thing—a choice like this—I hope to God I'd be able to hang on, to run straight, even if it half-killed me to do it!"

The words sounded so clear and distinct that Jean half raised her head to see who spoke them. And then, in an overwhelming rush of memory, she recognized that it was to nobody else she heard but the mental echo of her own words to Nick — to Nick at the time when he had been passing through a like fire of fierce temptation.

How easily, in her young, untried ignorance, the words had fallen from her lips as she had urged Nick to renounce his fixed resolve! Such eminently wise and excellent counsel! And how little—how cruelly little had she realized at the time the huge demand that she was making!

She had spoken as though it were comparatively easy to reject the wrong and choose the right—to follow the stern and narrow path of Duty, through the mists and utter darkness that enshrouded it, up to those shining heights which she beyond human sight the outposts of eternal Heaven itself.

Heaven! . . . Oh, God! . . . .

What at last these unanswered Tat face and Ethel it to meet the wet gaze of the man beside her, it was sad and resigned, in the face of one who has come through some fierce purgatory of torment.

"Well?" he demanded, his voice roughened because he found himself unable to steady it with that strained and altered face upturned to his still I ought to be going to send me back to Nesta?"

She did not answer his question. Instead she asked him quickly:

"Do you think she—loves you?"

"Nesta? Yes. As far as her sort can love, I believe she does."

She nodded, as though it were the answer she had expected.

"Blaise . . . . I'm going to need you. Perhaps I shall be more now. It's the only thing we can do . . . . We must say goodbye—altogether—never see each other again."

"Never!" The word came dragging-ly.

"Never. It—it would be too hard for us. We—we should be afraid."

"Yes," he answered slowly. "It would be too hard."

They were both silent. The minutes ticked away unregarded. Time had ceased to count. This farewell was till the end of time.

Blaise's fatalistic reconcance had gone out of her voice. It sounded flat and tired. "You—you will go back to her?"

"Yes, I will go back."

She stretched out her hands fluttering.

"Then go . . . . go soon, Blaise! I—I can't bear any [illegible] more."

He opened his arms, then, and she went to him, and for a space they clung together in silence. For the last time she let his lips kiss hers, let her once more against his heart. Then slowly they drew apart, stricken eyes gazing lingeringly into other eyes as stricken, and presently the closing of the terrace door told her that he had gone, and that she must turn her feet to the solitude of those who have said farewell to love.

Henceforth, she would be alone—living or dying, quite alone.

It was long past midnight when Claire returned from the Dower House.

She found Jean sitting beside the grey embers of a burnt-out fire, her hands lying folded upon her knee, her eyes staring stonily in front of her in a fixed, unseeing gaze.

Claire called to her softly, as when one wakes a sleeper.

"Jean!"

Jean turned her head.

"Do you have got back?" she said dully. She stood up stiffly, as though her limbs were cramped. "Claire, I am going away—right away from here—to Saxtrahe."

"Why?" asked Claire.

She waited tensely for the answer.

"Blaise has been here. He asked me to go away with him. I've sent him back to Nesta."

The short, stilted sentences fell mechanically from her lips. She spoke exactly like a child repeating a lesson learned by rote.

Claire's eyes grew very pitiful.

"And now! you go to Saxtrahe Manor?" she asked quietly. "Won't you take me with you?"

"Will you come?"—incredulously.

"Of course I'll come. I shouldn't dream of letting you go by yourself."

And then, all at once, Jean's tired body, exhausted by the soul's long conflict, gave way, and she slipped to the ground in a dead faint.

CHAPTER XXXV.

The Eve Of Departure

A week later Jean sat at the foot of the stairs and surveyed with faint amusement the motley collection of trunks and suit-cases which thronged the hall.

She was still looking pale and worn, strong up to date her self-imposed exile from the country which now held everything that was dear to her, but an uncanny air of serenity would ever blind Jean for long to the whimsical aspect that attends so many of the little things of daily life.

"What a lot of useless lumber we women carry about with us wherever we go!" she commented. "Five—six—seven pairs of shoes for one week . . . . We must say goodbye—altogether—never see each other again."

"Never!" The word came dragging-ly

"Never. It—it would be too hard for us. We—we should be afraid."

"Yes," he answered slowly. "It would be too hard."

They were both silent. The minutes ticked away unregarded. Time had ceased to count. This farewell was till the end of time.

Blaise's fatalistic reconcance had gone out of her voice. It sounded flat and tired. "You—you will go back to her?"

"Yes, I will go back."

She stretched out her hands fluttering.

"Then go . . . . go soon, Blaise! I—I can't bear any [illegible] more."

He opened his arms, then, and she went to him, and for a space they clung together in silence. For the last time she let his lips kiss hers, let her once more against his heart. Then slowly they drew apart, stricken eyes gazing lingeringly into other eyes as stricken, and presently the closing of the terrace door told her that he had gone, and that she must turn her feet to the solitude of those who have said farewell to love.

Henceforth, she would be alone—living or dying, quite alone.

It was long past midnight when Claire returned from the Dower House.

She found Jean sitting beside the grey embers of a burnt-out fire, her hands lying folded upon her knee, her eyes staring stonily in front of her in a fixed, unseeing gaze.

Claire called to her softly, as when one wakes a sleeper.

"Jean!"

Jean turned her head.

"Do you have got back?" she said dully. She stood up stiffly, as though her limbs were cramped. "Claire, I am going away—right away from here—to Saxtrahe."

"Why?" asked Claire.

She waited tensely for the answer.

"Blaise has been here. He asked me to go away with him. I've sent him back to Nesta."

The short, stilted sentences fell mechanically from her lips. She spoke exactly like a child repeating a lesson learned by rote.

Claire's eyes grew very pitiful.

"And now! you go to Saxtrahe Manor?" she asked quietly. "Won't you take me with you?"

"Will you come?"—incredulously.

"Of course I'll come. I shouldn't dream of letting you go by yourself."

And then, all at once, Jean's tired body, exhausted by the soul's long conflict, gave way, and she slipped to the ground in a dead faint.

She glanced at him keenly, a new note in his voice, an unexpected gravity and restraint.

"Every need," he repeated. He paused, then went on quickly, with a nervousness that was foreign to him. "Jean, I know everything that has happened. I've been engaged to Tormarin is at an end—and I have come to ask you if you will be my wife. No—hear me out!"—as she would have interrupted him. "I'm not asking you now as—as I did before. If you will marry me, I swear I will ask for nothing that you are not willing to give. I'm making no demands, I've learned now"—with a faint, wry smile—"that you cannot force love. It can only be given. And I want nothing but just the right to take care of you, to shield you—to keep the ugly corners of life away from you." Then, as he read her incredulous face, he went on gravely: "If I had wanted more than that, Jean, if I had not learned something—just from loving you, I should not have waited until now. I should have come at once—as soon as I learned from Madame de Varigny that Tormarin's wife was still alive."

She looked at him curiously.

"Why didn't you come then, Geoffrey? I'd sometimes wondered—you being you!"—with a faint smile. "Because, of course, I knew why you had rushed off to France, Madame de Vargny explained that."

A dull flush mounted to his face.

(To Be Continued.)

Persian Rain

Persian Rain creates lovely rain pictures. Velvety smooth. Clear and follows the skin. Makes it delightfully soft-textured. Alluringly fragrant. Delightful to use. Swiftly absorbed by the tissues, imparting that absolute charm so distinctive of the beauty woman. Persian Rain protects the delicate skin. Preserves and enhances the natural complexion. Every discriminating woman should use this delightful lotion. It is unrivalled as a foundation and to beauty.

British cats owners have just discovered an ancient law permitting them to shoot the properly charged wheels to his car to drive it on any British railway.

Douglas' Egyptian Liniment is without a rival. Stops tearing in-stantly. Centerless wounds and pus-vents blood poisoning.

Cheery food (to friend): "Louise, my dear, you a turn you gave me! I thought you was dead—straight, I did. I heard several people speak-well of you lately."

In one survey country in England there are 21,618 members over 70 years of age, 2,773 over 80, and 286 over 90.

Quick RELIEF from pain

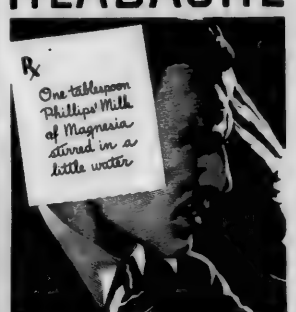
A lot of things can cause a headache or other pain, but there is one thing that will always give you relief! Just take a tablet or two of Aspirin. Your suffering ceases. Relief comes instantly, regardless of what may have been making your head throb with pain.

Aspirin is harmless—cannot depress the heart. So there'll no use waiting for a headache to "wear off." It is useless to endure pain of any kind when you can get Aspirin. It is a blessing to women who suffer regular systemic pain; to men who must work on, in spite of eye-strain, fatigue or neuralgia.

Learn its quick relief for colds; for neuritis, rheumatism, lumbago. Be sure to get Aspirin—and not a substitute. All druggists sell Aspirin tablets. "Aspirin" is a trade-mark registered in Canada.

W. N. U. 2000

HEADACHE



Made in Canada

● Frequent headaches mean too much acid. Neutralize the acids with Phillips' Milk of Magnesia. It ends your headache because it removes the cause. Take a little whenever a casted tongue or sour stomach or sluggish bowels warn you of an acid condition. Take it when you've eaten too heartily, or after any meal that "disagrees." Be sure it is genuine Phillips' Milk of Magnesia, in this bottle.

ALSO IN TABLET FORM. Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

LOCAL NEWS

Miss Meta Graham is home convalescing after her recent appendicitis operation.

Miss Olive Lane, Miss T. Fraser, and Miss M. Peterson of Edmonton, spent Thanksgiving holiday with Mr. and Mrs. W. T. Lane.

Remembrance Day, November 11, falls on Friday this year, and is a proclaimed holiday, according to the Dominion Statutes.

A number of Townspeople motored to Edmonton Monday evening, attended the plano recital given by Miss Grace MacDonald of the Fort in the Masonic auditorium.

Mrs. George MacNutt of Innisfail is a patient at the Hillcrest Hospital.

News around the town and district seems to be hard to find this week. It seems to run that way every week in this place where news is much harder to get.

We hope to have more next week.

If will pay you to notice the advertisements in this weeks' paper.

BORN to Mr. and Mrs. E. A. Reagan of Fort Saskatchewan on Friday, Oct. 14th, at LaPage's nursing home, A daughter, Evelyn, Mary Rose.

CARD OF THANKS

Mrs. George Armstrong and family wish to thank their many friends for the kindness and sympathy received during their recent bereavement, and also for the beautiful floral tributes received.

Judicial Sale of Farm Properties. Farms For Sale

There will be offered for sale by public auction by ROBERT GORDON FRASER, at the Post Office, in the Town of Fort Saskatchewan, Alberta, at 12:00 o'clock noon, on Saturday the 5th day of NOVEMBER, A.D. 1932, the following properties:

PARCEL 1. All that portion of the N.W. ¼ of Sec. 14, Tp. 53, Rge. 23, W. 4th., which lies to the east of the North Saskatchewan River as shown on a plan of said Township approved and confirmed at Ottawa on the 2nd of May 1883, by Andrew Russell Dominion Land Surveyor and Dominion Lands, containing 105 acres more or less.

The following is an approximate description of the above lands:- This property is situated 6 miles from Fort Saskatchewan on the Sackatchewan River. 40 acres are under cultivation and 50 additional acres could be broken at a moderate cost. The land is sandy loam of good depth, has 2 wells and is fenced on the north and west. There is a frame house with stone cellar 16'x24' with various outbuildings, garage, frame stable 30'x 26', log stable 16'x28', 6 granaries, henhouse, workshop, etc.

PARCEL 2. N.E. ¼ of Sec. 14, Tp. 53, Rge. 23, W. 4th Meridian, containing 160 acres more or less. Reserving unto His Majesty all mines and minerals out of Legal Subdivisions 9, 10, 15 and 16, Sec. 14, Tp. 53, Rge. 23, W. 4th Mer. and the E. ½ of the N.E. ¼ of Sec. 14, Tp. 53, Rge. 23, W. 4th Mer. as more particularly described in Certificate of Title No. 1332 HV.

The above is an approximate description of the above lands:—This property is situated 8½ miles from Fort Saskatchewan, 115 acres are under cultivation and an additional 43 acres could be broken at a reasonable price. The soil is a rich sandy loam and is fenced on three sides.

PARCEL 3. All that portion of the E. ½ of Sec. 32, Tp. 53, Rge. 22, W. 4th Meridian, which lies east of the North Saskatchewan River as shown on said plan of said township containing 36 acres more or less, Reserving unto the Canadian Pacific Railway Company, all coal under or on the said land. The following is an approximate description of the above lands:-This land is situated 6½ miles from Fort Saskatchewan. It is clear of all stone, under cultivation and an additional 10 acres have been broken for cultivation. The land is sandy loam of good depth. The land is fenced on three sides.

The above mentioned properties will first be offered for sale on Sale, subject to the upset price which has been fixed by the Master in Chambers at Edmonton, and if not sold, then they will be offered for sale, according to parcels 1, 2, & 3, as above described at the following upset prices: Parcel 1 at $2500.00; Parcel 2 at $3500.00; Parcel 3 at $1000.00.

Terms of sale are as follows:—If purchaser elects at time of sale to pay down a deposit of 10 per cent. of the amount of the purchase price to the vendor's solicitors and the remainder of the purchase price within 60 days without interest or the purchaser shall pay 10 per cent. of the purchase price as aforesaid and execute a mortgage to the vendor which shall be a first charge on the land for $4000.00 payable as follows: $250.00 yearly for the first four years and the balance at the end of the fifth year with interest at eight (8) per cent. per annum, and to pay the remainder of the purchase price then owing into Court within 60 days without interest.

PARCEL No. 2 The purchaser is at the time of sale to pay a deposit of 10 per cent of the amount of the purchase price to the vendor's solicitors and the remainder of the purchase money is to be paid into Court within 60 days without interest or the purchaser shall pay 10 per cent. of the purchase price as aforesaid and execute a mortgage to the vendor which shall be a first charge on the land for $5000.00 payable as follows: $250.00 yearly for the first four years and the balance at the end of the fifth year with interest at eight (8) per cent. per annum, and to pay the remainder of the purchase price then owing into Court within 60 days without interest.

PARCEL No. 3. The purchaser is at the time of sale to pay a deposit of 10 per cent. of the amount of the purchase price to the vendor's solicitors and the remainder of the purchase money is to be paid into Court without interest or the purchaser shall pay 10 per cent. of the purchase price as aforesaid and execute a mortgage to the vendor which shall be a first charge on the land for $1500.00 payable as follows: $250.00 yearly for the first four years and the balance at the end of the fifth year with interest at eight (8) per cent. per annum, and to pay the remainder of the purchase price then owing into Court within 60 days without interest.

Further particulars can be had from Messrs. Parlee, Freeman, Smith & Macdonald, Barristers & Etc., 201 Bank of Commerce Building, Edmonton, Alberta.

Dated at Edmonton, Alberta, this 23rd day of September, A.D. 1932.

R. F. Wallace, Clerk of the Court
Approved: "A. Y. B." M.C.

Sunoky Lake Chosen For School Festival

A meeting of the executive and directors of the Lamont Inspectorate School Festival was held in Lamont on Oct. 20. The main business of the meeting was to decide on the places for holding the Festival and the order in which these towns will come. Mr. C. H. Robinson M.A., Stenlake.

Mr. S. Hambly of Fort Saskatchewan pointed out the advantages of the Fort as a place to have the Festival and assured the executive of the hearty support of the school board and people of his town. He strongly recommended that the 1933 Festival should be held there.

On the other hand Mr. McKenzie believed that the 1933 Festival should be held at Waskatenau. He also pointed out the convenience of his town and held no doubt as to the hearty support of that place.

The executive however favored holding the next musical Festival at Sunoky Lake for several reasons:—

1. Sunoky Lake serves a larger number of schools as a business centre than any other town in the inspectorate.

2. The Festival has been twice south of the river and it seems only just that it should be north now as the district extends a considerable distance north.

3. When a vote of the teachers was taken last spring they favored Sunoky Lake for the 1933 Festival.

After much discussion the following schedule was drawn up.

1933 Sunoky Lake.
1934 Fort Saskatchewan.
1935 Waskatenau

This program is of course tentative depending on the accomodations and report the town are now to offer.

The printing of the programmes was also dealt with among other matters.

The executive will meet again sometime before Christmas.

Coming Events

The regular monthly meeting of St. George's W. A. will be held at the home of Mrs. Byers on Thursday, Nov. 3rd at 3 o'clock.

Don't forget the annual Hallowe'en Supper at the United Church on Saturday, Oct. 29th, from 6 to 8. Admission 35c and 25c.

St. George's A. Y. P. A. will hold a dance on Friday, Nov. 11th., in the memorial hall. Watch for further announcements.

The regular meeting of the United Church ladies aid will be held at the home of Mrs. C. Glover on Thursday, Nov. 3rd at 2:30 o'clock.

Don't miss this great event of the year. The Girl's A. A. A. Hallowe'en Dance in the Memorial Hall on Monday, Oct. 31st. Monday ? till ? a.m. Silver Club Orchestra.

DUCK & GOOSE SHOOT

A Duck and Goose shoot will be held at Elmer Mohr's farm, 7 miles East and 1½ miles South of Fort Saskatchewan, on Tuesday, Nov. 1st., starting at 12:30 p.m.

WEDDINGS

Barnett — Campbell

On Friday, 21st. inst., at West Saskatchewan, David Archie Barnett of Good Hope was united in marriage with Margaret May Campbell of Lake Mist. Rev. Leslie Pidgeon officiated as bridesmaid while Mr. Wm. Barnett supported the groom.

Rev. S.J. Hodgins performed the ceremony.

Patricia United Church Hold Anniversary Supper

The Patricia United Church congregation held its Anniversary services last Sunday and Monday. On Sunday afternoon, Rev. Philip Dumon of East Church, Edmonton, was the special preacher, and his services were much appreciated. Mrs. Yeomans of McDougall Church choir rendered two appropriate solos acceptably. On Monday evening the annual supper was held at Rowe Hill Community Hall. The ladies of the congregation supplied a bountiful supper for the large crowd present.

The program which followed was given by the United Church choir, Mr. Ford Anderson, and was much appreciated.

1. "O Canada".
2. Chairman by the choir.
   (a) "The Bells of St. Michaels".
   (b) "The Song of the Oyesire".
3. Solo Miss Christie Thomas.
   (a) "As a Sunbeam Loves a Rose".
   (b) "Say Hallos!".
4. Duet Mrs. Glover and Mrs Baker.
   (a) "Hamilton Wights".
   (b) "Dreaming Alone in the Twilight".
5. Solo Miss Elizabeth Jones.
   (a) "Danny Boy".
   (b) "The New Worse".
6. Dance "Hornet".
   Miss Denise Moret.
   Miss Marie Baker.
7. Duet Miss Irene Graham
   Miss Jewel Butler.
   "The Twins".
8. Quartette Mrs. Glover, Miss Dulla Anderson, Miss Christine Anderson, Mrs. Baker.
   (a) "In the Gloaming".
   (b) "Katy Did".
9. Solo Mr. Watt.
   (a) "There",
   (b) "Warrior Bold".
   God Save the King.

Fort Tennis Club Dance Drew Large Crowd

The Fort Saskatchewan Tennis Club dance held in the Simmons Hall last Friday evening was very successful indeed.

At midnight tasty refreshments were served by members of the club to the large gathering. After luncheon was over, the president of the club, Mr. Dr. Calhoun, took the platform and gave a short talk on the aims of the club in planning the two cups for interclub singles tennis tournament events held this fall. Dr. Calhoun then introduced the Hon. President of the Club, Mr. J. D. McGregor, who after a very complete speech, presented the cups to the winners, Miss Muriel O'Brien and Mr. Earl Lane, who in turn replied suitably.

Both winners are of the Fort Saskatchewan Community Tennis Club. The presentation over, dancing was indulged in until 2 a.m., when everyone went home tired but happy.

Mrs. Bruce Orchestra supplied the music for dancing.

Those here from Edmonton were Miss Inglis and Miss Graham.

Those who have been in a maid of a hurry

But just the same I'll say with a grin, It's a decent good year for the chaps in't it.—Daily Courier.

LOOK AT PAGE SIX OF THIS WEEK'S HOUR MORE NEWS!

Josephburg News

On Friday, Oct. 28th, at 7:30 p.m. there will be Lantern Slides given by Rev. Gottenstein of Calgary, in the Reformed Church.

Mr. and Mrs. Geo Weber and family of Bawlwood spent several days with relatives here.

Miss Hannah Thomas returned home last week from Saylard, Alta., after having been there several months.

Miss Ruth E. Mohr spent a two week's vacation with her sister Mrs. R. Thomas, Edmonton, (South).

Miss Irma Becker is visiting her aunt Mrs. V. Carlson, Edmonton.

The four supper held at the Josephburg Reformed Church last Wednesday evening by the Josephburg Ladies Aid was very well attended.

Mr. and Mrs. W. Longe from Edmonton were visitors at Rev. and Mrs. Wendenmark's of Josephburg this week.

Rev. and Mrs. Korn of Vegreville, Alberta, were visitors at the home of Rev. and Mrs. A. Wiesbrenner last week.

THORBJELD FARMER COMMITS SUICIDE

Believed despondent over physical ailments, including stomach trouble and rheumatism, together with grief over the recent death of his 26 year old son, Swen August Hansen, 70, a farmer residing 12 miles from Thorbjeld, committed suicide by taking a draught of strychnine at 8 p.m. on Monday, according to reports received at headquarters of the "F" division, Mounted Police, Stettler.

After preliminary investigation by R. C. M. P. officials and the coroner, it was decided that an inquest would hardly be necessary.

Mr. Swen Hansen was a resident of the Fort for a number of years.

The funeral service was held in the United Church Fort Saskatchewan, on Wednesday, Oct. 26th. Rev. D. C. Munro officiating. Interment will take place in the Fort Saskatchewan cemetery, Howard & McBride, funeral service.

Taken from the Files

19 Years Ago Today

Thursday, Oct. 23, 1913

Albert and Thomas Todd, late of Wisconsin, U. S. A., having purchased from Dr. Ayles acreage enough to start a truck farm on which suitable buildings are being erected at the present time. Todd Bros. expect to be in full operation next year.

At the request of the "Societe du Parler Francais d'Alberta" the Rev. Father J. A. Normandeau, parish priest of Lamoureux, Alta. has been appointed organizer of the said society in and around Edmonton.

S. Powell, foreman of the C.N.R. section gang, had the misfortune to have his leg taken off by the express train on Saturday last. Dr. Turner was called and gave assistance.

Charles Flintoff is loading a car of wheat this week.

Mr. Joseph Normandeau and family arrived here on Friday, and will settle in the district. He is a brother of the parish priest, Rev. J. A. Normandeau.

W. Ross is filling W. Graham's position at the telegraph office during Billy's holiday at Whitford Lake.

P. Gordon, D. Simmons, R. H. Parsons and A. Chappell, spent the holiday at Beaverhills lake. A good bag of geese was the result.

One of the most exciting foot races ever pulled off here, took place the morning when W. Proctor beat S. Truby in a hundred yard dash on Main Street, Sid was out "heeled" out, he was beaten by "feet".

What The Census Tells.

Statistics are generally regarded as dry and uninteresting, but to those who make a study of them as they relate to matters of vital importance to the welfare of the human family they become of absorbing interest. In fact, a knowledge and understanding of the statistical position of many matters are essential to a true grasp of such matters, and where it is possible to present such information to people in the form of charts and graphs they tell a story which more words could never convey.

Within recent months the Dominion Bureau of Statistics, which, by the way, is one of the best organized and most efficient departments of the Ottawa public service, has issued a large number of bulletins presenting the facts ascertained in the decennial census-taking during the past year, worthy of study and consideration by the Canadian people. They indicate what progress has been made, where it has been made, and wherein as a people we have slipped a bit backward, or remained stationary.

Some things stand out as worthy of note. We learn, for example, that Canada's population increased by 1,508,827 in the ten year period, 1921-31, or slightly over 15 per cent. which is 1 per cent. higher than the United States. A very healthy and substantial growth, and that the four Western provinces continued proportionately to increase in numbers more rapidly than the five Eastern provinces. Not as satisfactory from the standpoint of the nation as a whole is the declining birth rate wherein the population of cities, towns and villages increased by 1,319,436, or 24 per cent., our rural population only increased by 189,391, or slightly over 5 per cent., with the result that whereas our rural population in 1921 exceeded the urban by 91,000, the urban now exceeds the rural by over 707,000.

It is interesting, too, to learn that of Canada's total population of 10,376,786, no less than 5,040,396, or 77% per cent. are native born Canadians, while a further 1,184,529, or 11% per cent., were born elsewhere within the British Empire, leaving less than 11 per cent. of other than British birth.

Classified by religious denominations, the fact emerges that Roman Catholics constitute the largest single denomination with 4,055,941 adherents, the United Church coming second with 2,202,929, followed by Anglicans, 1,635,185, and Presbyterians 870,482. Not one of the remaining 27 denominations listed reach 500,000.

Canada's population consists of 5,376,845 males and 5,002,941 females, and the number of males predominates in every one of the nine provinces. There are, of course, more single than married persons, because of the large number of children, but the percentage of single to married is steadily decreasing, single persons constituting only 37.35 per cent. of the population in 1931, as compared with 43.67 per cent. in 1921, while married persons increased from 54.15 per cent. in 1921, to 55.37 per cent. in 1931. The number of widowed remained about the same, but the number of divorced rose from 063, or .01 per cent. in 1921, to 7,641 or .07 per cent. in 1931.

When we turn to the bulletin on the literacy of the people, a most encouraging picture is presented. It shows that a steadily increasing proportion of our people five years of age and over can both read and write, and taking Canada as a whole no less than 92.34 per cent. can do so compared with 89.89 per cent. only ten years ago. That the progress will be continued is made evident by the statistics of school attendance which reveals the encouraging fact that, whereas the increase in population between the ages of 5 and 24 years in the ten year period, 1921-1931, was 19.66 per cent., the percentage increase at school was 29.55 per cent. Better than one out of every five persons living in Canada is attending school.

Analyzing the economic position so far as agriculture is concerned, it is revealed that, were it not for substantial increases in many departments in the three prairie provinces, Canada would have to report a decline instead of going back during the past ten years. There are, for example, 326,000 fewer horses on Canadian farms than in 1921, but this is accounted for by the introduction of automobiles and tractors. The number of cows in milk only increased by 261,000, and actually decreased in the Maritime provinces; other cattle were fewer in number by 643,000, every province except Quebec and British Columbia reporting decreases; sheep increased by 626,000, but again decreases took place in all provinces east of the Ottawa River; swine, on the other hand, showed the substantial increase of 1,343,000, only Nova Scotia and Ontario reporting small decreases; poultry jumped over 3,000,000 with all provinces sharing in the gain.

The number of farms in Canada is greater by 17,574 than ten years ago, there being fewer in the east and more in the west. Farms are also becoming larger, the average size in 1931 being 396 acres as compared with 326 acres in 1921. The acreage in occupied farms increased by 23,000,000 acres in 1931, while improved land in these occupied farms rose by some 18,000,000 acres.

On the other hand, the value of farm lands decreased by $964,000,750 and farm buildings by $41,171,200, all provinces registering drops in land values, and the eastern provinces, except Prince Edward Island, likewise in value of buildings, while Saskatchewan, Alberta and Manitoba reported increases.

There, however, a marked improvement in farm comforts, conveniences and equipment, including automobiles, machinery of various kinds, gas and electric light, radios, telephones, water piped into farm houses, improvement in roads, and shortening of distances to market and railway towns.

Right feel in height and played by seven persons at once, the world's largest harmonium has been constructed at a Detroit man.

Tests indicate that canned salmon contains 60 to 80 per cent. as much vitamin "D" as is found in cod liver oil.

Troubled With Her Children Having Summer Complaint

Mrs. L. E. Dingwall, Ass. K. Scott, Sask., writes:—"I am the mother of two children and have a great deal of trouble with them having summer complaint, in fact, several times every Summer they were subject to attacks.

"I have found that Dr. Fowler's Extract of Wild Strawberry is by far the most effective remedy I have ever used. It is quickly relieved and gives them a feeling of comfort. I recommend it to all my friends as the best medicine for Summer Complaint."

—Thanks to Dr. Fowler's Extract of Wild Strawberry.

God Impedes Modern Record

Cost Of Two Trips Reduced To Approximately $2.60 Per Mile

In completing ten trips across the Atlantic from Germany to Brazil this season, the Graf Zeppelin has made a record that astonishes even her builders. Instead of costing almost $50,000 a crossing, as had been expected, the expenses of the journey have been reduced to $30,000, it is said, or approximately $2 a mile. The present charge for passage is $470, only a third more than steamer fare, while the time of transit is reduced from 12 days to three.

Not For the Housewife

Story Way To Liquify Jam That Has Hardened

If jam left from a previous season has become hard and granulated, need not be thrown away or reserved exclusively for cooking purposes. Put a large earthenware bowl with cold water, placed over, covering the jam-pot covers, stand the pots in the cold water, placing the bowl in a fairly warm place. After a time the jam will become liquid, and when it has cooled down it will be found that no hard lumps of sugar remain and the jam is as delicious as ever.

Madness Of Soldier Found In Quebec

Believed To Have Been In Ground Since 1918

A skeleton believed to be that of a young Frenchman killed while defending the city against an Iroquois attack on August 25, 1692, has been unearthed by workmen excavating in the heart of Old Three Rivers.

A brass plaster, a leather-covered calve sheath bearing the initials "J.B." and some small pieces of cloth were found near the bones.

HER HAND FELT DEAD

Woman Wakes From Nightmare

At one time she thought she would lose the use of her right hand. But a blessed relief in the form of Kruschen Salts put her right again.

"I was sure in a bad state, I must say," writes "In fact, I could not do my housework, I was so bad with rheumatism in my arms and hands. I could not sleep at nights, and had to get up and beat about the room in my misery and distress. I took all kinds of medicines. I rubbed it, but gained no relief. I was still there, thought I would lose the use of my right hand. I could not hold the cup, nor could I put a button on. My arms would go dead. I was nervous and irritable with it. Sometimes I felt I was going mad. I thought I would have to go to the asylum. I was in Kruschen stimulate the liver and kidneys to healthy activity, and I found them to get rid of the excess uric acid which is the cause of all rheumatic sufferings. When poisonous uric acid gets—with its deposits of needle-pointed crystals—a man's joints and muscles, then aches and pains going too!

A new British military airplane is provided with a revolving, transparent turret where the gunner may be protected from the wind as he aims.

IT'S LIVER THAT MAKES YOU FEEL SO WRETCHED

Wake up your Liver Bile

—No Calomel necessary

Do you go to bed feeling sad, happy, tired, grouchy, sleepy, sour, sick, and don't care what to do? Is your head dull, your skin muddy and pimply, your breath bad, your tongue coated? Then your liver is probably sluggish and you need Carter's Little Liver Pills. Purely vegetable. Gentle, yet thorough. You don't take them regularly. Ask for Carter's Little Liver Pills. Price 25c.

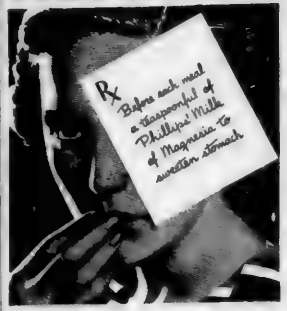
Sure—That my cheque carries me away when I hear it."

Listener-by.—"I'll have them play it again for you."

One smoke has been nearly 2000, 000,000 damage by English buildings in the last 30 years.

Mothers can easily know when their children are troubled with worms and they have no fear to "physic" them. Mother Graves' Worm Exterminator.

SOUR STOMACH



● Get rid of all that sourness and gas. End that bilious headache or any sluggishness caused by too much acid. Put the stomach and bowels in good order. Sweeten the whole system with Phillips' Milk of Magnesia. Be sure it is this bottle, with the familiar blue wrapper that tells you it is genuine *Phillips'* Milk of Magnesia. The substitutes are not the same, and do *not* get the same results.

ALSO IN TABLET FORM. Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

Made in Canada

Sewage Survival Of Souls

Flowers Grow Fired Year After Wreaths Are Cut

In this country and doubtless in others as well, whenever a wood on a hillside is cut down the following year that hillside is one bloom of foxgloves, though none was visible or existing when the wood was standing. When, as during the war, large woodlands were cut down the blaze of exterminating sometimes for miles, was a fine sight. Now comes the strange part. After so fine a crop of foxgloves one would expect a still finer crop the following year, but no, the succeeding year the crop is not more than half and in about half a dozen years they disappear altogether. Where do the original seeds come from? Have they lain dormant for a few centuries?—J. E. Howell in the London Times.

One Little Incident

Easy To Understand Why Prince Of Wales Is Popular

An article in the Christian Science Monitor says the Prince of Wales has replaced one retiring Scilly Island farmer with two unemployed Welsh miners and has sent an agent from his Duchy of Cornwall to help them the intricacies of agriculture. Meanwhile, since they have been taken off the dole, he is paying them from his own pocket until their first crops are harvested. It is little incidents like this that continue to send our estimate of His Royal Highness still higher.

Employer: "I'll give you a position as clerk to start with, and pay you what you are worth in the meantime."

Second College Graduate: "Oh, certainly, but—er—do you think you could afford it?"

Bread Of Anthrax makes conditions miserable in Russia. Night after night the attacks return and even when brief respite is given the mind is still in torment from continual anticipation. Dr. J. D. Kellogg's Asthma Remedy stops all attacks, relieves and at once, while future attacks are averted or, if coming, the collected one is of a mild form. Dr. Kellogg's is not a habit forming remedy and never disappoints. Get one from your druggist.

A Returning Influence

Night Economy When Not Necessary Does Much Harm

All over the province the high schools and collegiate institutes are trying to cut down expenses. In fact all over the province everybody is trying to cut down expenses, even those who have no reason at all for doing so. People who have their 2926 acres are pleading like the lead "Just the reducing of expenses, they retrenching from buying anything that can be purchased without necessity, and the result is a decided retarding of business activity. And yet a force like this operates inevitably and no argument can prevail against it.—Toronto Star.

PAIN
relieved
instantly

Aspirin will check any pain. No doubt about that. Can't. Bayer will prove it. Breaker it. The pain is checked it. Breaks on that.

No harmful after-effects from Aspirin. It never depresses the heart, and you need never hesitate to take one of these tablets.

So it is needless to suffer from headache, toothache or neuralgia. The pains of colation, lumbago, neuritis or neuritis can be banished completely in a few minutes. Periodical suffering of women can be soothed away; the discomfort of colds can be avoided.

Aspirin tablets have other important uses—all explained by the proper directions in each box. Look for that name Aspirin on the box—very time you buy them tablets—and be safe. Don't accept substitution. "Aspirin" is a trade-mark registered in Canada.

Unprofitable Practices Followed On Farms Causes Heavy Losses Which Could Easily Be Avoided

Share Renting Of Farms

Helpful Circular Prepared At Ontario Agricultural College

An excellent circular containing a brief but comprehensive discussion of the principles and conditions of share renting of farms has just been prepared by Department of Agricultural Economics at the Ontario Agricultural College.

Anyone interested may secure a copy by writing to that department.

Two main plans of rental are set forth, namely crop-share renting and live-stock-and-crop-share renting. Many modifications of these are suggested and discussed. Tables are given showing satisfactory proportional divisions of expenditures and returns under various kinds of land tenure, under varying conditions of soil fertility, buildings and equipment, and market facilities. The circular also contains a form of agreement which should prove very useful, both to tenants and to those who lease thereto to rent, in helping to avoid some of the pitfalls common with loosely stated or with unwritten agreements.

Cost Of High Schools

Free Secondary Education For Everybody Is Encouraging Statement

The outcry against the unprecedented cost of high school increases day by day, and the attack centres more and more upon the question of salaries.

It's the new coat type sanrity like the grown-ups with a big boy collar of white piqué. The little article is in vivid red crepe de chine to match the leather belt.

Style No. 2120 requires 2 yards of 39-inch material with ¼ yard of 35-inch contrasting and 2 yards of binding to trim the flare.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

WHAT NEW YORK IS WEARING
Illustrated Dressmaking Lesson Furnished With Every Pattern

Spanish Apiarist Has Evolved A Plan To Greatly Increase The Production Of Honey

Russia's Five-Year Plan Now Failure

Production Dropped Off This Year Instead Of Increasing

Complete production figures for the first seven months of the current year indicate practically the end of the Soviet hope to complete the five-year program for basic industries into furrous metals, coal, transportation and agriculture in four years.

The production figures showed that industry gained 17 per cent. over the corresponding seven months of 1931, but this was less than half of the 36 per cent. growth set for the year with the view of completing the five-year program.

Industrial growth may if sharp improvement is achieved in the final report of 1932, reach 30 or 32 per cent., which is about the average for recent years. But this would be still far short of the soviet goal and leave the plan hideously unfinished.

The most disturbing element in the statistical picture for the seven months of 1932 is the fact that the output in leading industries has been declining rather than increasing. After a fairly good start in January and February, production slumped gradually as food and transport difficulties pile up.

Commuter Used Again After Fifty Years

First To Furnish Commercial Power For Electric Light

Although the hand of the master inventor was not there to help, Old Jumbo No. 9, the first generator ever of furnished commercial power for electric light, came to life recently at Henry Ford's Greenfield Village. The occasion was the dedication in New York of a plaque at the site of the old Pearl St. station which housed the generator 52 years ago.

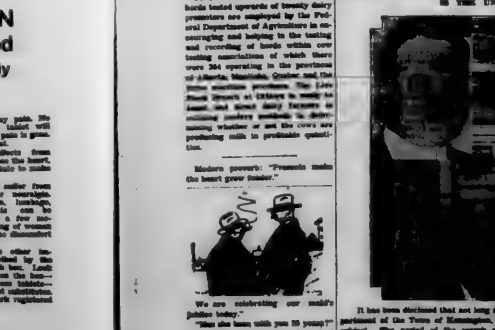
As the old generator, rebuilt and housed in the Ford museum, swung into action a connection with the line was conveyed to the New York dedicatory group by radio.

Alex Dow, now president of the Detroit Edison Company, handled the valve wheel. He recalled that when Thomas a. Edison first turned on the current and provided electric light to 400 New York homes, he was studying under a Sebering lamp light in a brush-like cabin at Menlo Park. The same one Edison had handled a half century ago, the old generator, sire to all the great power plants of today hopped into action and current went through the circuits to light a dozen old-fashioned light bulbs.

Remedy For Sleeplessness

Sleeplessness is frequently caused by a disordered stomach. Right after eating take a dose of Dr. Hamilton's Pills and you will sleep well. Mild, gentle, effective. Sold everywhere.

IN THE UNITED STATES PRESIDENT AN ENGLISHMAN?



It has been disclosed that not long ago a great deal of research was made by officials in the Town Clerk's Department of the Town of Kensington, England, to find out whether or not President Hoover was ever a British subject. The period of the search covered the years between 1874 and 1884. The inquiries resulted in the United States' President, who among years ago lived in the "Red House," in Sheridan Street, Kensington. No official information has been given concerning the result of the search. Above is a picture of the old house to "Red House," which inset is a good photograph of President Hoover.

Working on the theory that the long bee still can be kept busier, Dan Jose Rovira-Mari has invented a hive which may revolutionize the bee industry.

Senor Rovira is an experienced beekeeper at Santiago, in Valencia. After perfecting his new device and becoming convinced that the productivity of the bees can in some cases be increased 300 per cent. he has demonstrated his apparatus at the museum of natural sciences, Madrid, where it created a good impression.

The basic principle of the new hive is the simplification of the bee's labors so that it can dedicate more of its energy toward the business of making honey. The apparatus is known as the "humidifier." Set to extract honey, all that is necessary is to perform a simple operation with a device of Senior's invention, and then open a gap through which the honey pours out.

All of this is accomplished without disturbing the bees, and in this case, are all the complicated procedure of the old style beekeeping is eliminated. The humidifier, it is explained, "the fountain-hive" enables us to invite the bees to more work. In the springtime, when there is plenty of nectar in the flowers, they produce far more honey is greatly increased. In order to utilize the protected capacity as much as possible, the bees must labor, and they will then begin to produce more.

And, in view of the fact that the honeycomb is practically undisturbed, the energies which the bee would otherwise have to'be constantly making to create a new comb are somewhat relaxed, and can be devoted to the task of producing more honey Or, in the case of the bee whose comb has become ruined, the bee imposes exactly the necessity for purchasing them.

Of course, as things are at present, many persons desire to buy their honey in the comb, in order to be sure that it is pure. But, when the public learns that the product of the "fountain hive" is guaranteed to be extracted without the necessity of having to smash the comb in all or of fighting the bees away by smoke or some other method, and instead is obtained by simply turning a key and letting it run out in all its purity without any pollen or other matter, they will be reassured of its quality. Senor Rovira says hundreds of thousands of the new invention," Senior added, "one of these beings that there is no necessity for ever handling the bees. When, under the present system, the beekeeper goes out to rob the bees, he is well protected by a no aromal his face, and gloves—but the rafter and bees go so far as two kids receive many and sting other persons who do not happen to have a no around their faces. Under the new system they are never molested, and hence are perfectly happy and fit that runs on, they are productive."

Rovira has made a life study o bees. He long ng become convinced that they are more intelligent than man, and that man in robbing the secretions of the bee does not get so much benefit as might be secured provided the bee were left undisturbed. Senor Rovira-Mari is employed by the bee industry.

Mrs Smith (showing picture of herself on her mother's knee): "This is how I looked twenty years Ago." Guest: "Wonderful! And who is the baby on your arm?"

"You lady complains that you chew all day in church."

"Yes, sir, I chewed her everything we had in the shop."—Yes! Man Revolution.

Health and Happiness in Old Age

SCOTT'S EMULSION

Steam Engine For Aeroplane

New Type Of Piling Machine To Be Tested

Harold C Johnston, proprietor of an Ahrens, Ohio, welding shop, opened the doors of his small plant and disclosed a steam aeroplane engine which he tuned up to 1,000 revolutions per minute.

Johnston a builder of his own aeroplane engine, and he had spent time in experimenting the engine after a "plane accident more than a year ago had caused him to seek a way of eliminating the five hundred in vibration.

Weighing only 150 pounds, exclusive of the propeller, the engine will develop 62 horse-power

The engine is to be installed within a few weeks in a small plane and flown in the Pacific Coast.

Your pipe and Ogden's Cut Plug... that's a combination without equal for fragrance, sweetness and absolute satisfaction.

OGDEN'S CUT PLUG

If you "roll your own", use Ogden's Fine Cut and Chanticler cigarette papers

WORLD HAPPENINGS BRIEFLY TOLD

Says bees have been successfully grown in an experimental plot at Calgary, Alberta.

It is learned at Victoria that Japan will have a naval attache stationed at the Chinese legation in the near future

Out of 24,660,554 passengers carried by Canadian railways last year, only three were killed in accidents. Persons killed at highway crossings numbered eighty-four.

Premier George S. Henry of Canada, declared that unemployed treatments may again be given relief work on construction of the Trans-Canada highway this winter, within the provincial boundaries, despite the decision of the Federal Government against wholesale relief works.

"My husband says it's my prettiest dress"

I want to tell you how I got acquainted with Diamond Tints," says a cordial letter from a Windsor woman. "I went in the drug store and saw some attractive Diamond Tint packages. The druggist told me they were for tinting light shades without boiling. He said they were made by the Diamond Dyes people. I have always used Diamond Dyes for dyeing dark shades, and they are by far the best dyes made. When I saw Diamond Tints I thought of a 5-year-old dress which I had in quiet wearing because it was so faded. I got a package and gave my dress the simple rinsing called for. It came out the loveliest shade—a lustrous, deep wearing yellow. I have laundered it several times but have never had to retint. It certainly holds the colour. I'm perfectly delighted with my new dress as I call it, and my husband says it's the prettiest one I have."

DIAMOND TINTS AT ALL DRUG STORES

A Lost Island

Submarine Cruising For Ship But Of Land In the Pacific

Sarah Ann, mush to the consternation of the astronomical world, has disappeared and, it is feared, drowned. She is probably reclining on the broad face of the Pacific. Sarah Ann was—and maybe to the tiniest sect of an amoeba still is—an island.

This Cinderella of the sea was last reported alive some 15 years ago. Then of no value to anyone and shunned by ship captains, she has become today a spot of great importance. If she can be located, many scientists want a data they years from now.

The reason for the sudden popularity arises from efforts to calculate the course of the 1937 world cruise.

It has been found that on June 30, 1937, the sun will be eclipsed totally by the moon for about seven minutes. In all the Pacific, Sarah Ann was the only reported spot of land suitable for observation in the 3,600-mile long, 130-mile wide band of totality.

Unless Sarah Ann can be found, it is possible a coral reef may be built up to island status for the seven minutes.

SUNDAY SCHOOL LESSON

OCTOBER 30

THE CHRISTIAN AND LAW OBSERVANCE

Golden Text "Whatsoever a man soweth, that shall he also reap." Galatians 6 7

Lesson Proverbs 23 29-35, Romans 13:1-7, 1 Corinthians 9 19-27, Galatians 5 13-25, 1 Timothy 1 5-11.

Devotional Reading 1 Peter 4 12-19.

Explanations and Comments

The Duty Of Obeying Civil Authority. Romans 13:1-7. 13:1-7. The Jews at Rome were notoriously bad subjects. Many of them hold, on the ground of Deuteronomy 17 15, that to acknowledge a Gentile ruler was itself sinful. The spirit which prompted Pharisees of Jerusalem to ask, "Is it lawful to give tribute to Caesar or not" had, no doubt, its representatives in Rome also. As believers in the Messiah, "another king, one Jesus" (Acts 17 7), even Christians of Gentile origin have been open to the impulse of the same spirit; and unbalanced minds there as in all ages, might be disposed to find in the loyalty which was due to God but alone, an emancipation from all subjection to inferior powers." Paul counseled the Christians of Rome to obey the highest powers—those in authority, the civil rulers—and then he laid down the principle that the fact of the authority's being established argues that it was ordained of God. Therefore, he argues, he who defies the power is defying what has been instituted by God, and shall be judged accordingly.

The cruel abuses in governments are no necessary part of them, and do not invalidate their divine character any more than the abuses of marriage rob it of its sacred distinction. Use it for hands and face.

Will Try Again

When the sunken "Bright Fan" crew was landed at Churchill, Bertram Barker, 41, prospector, said he intended to make another try and get to Britain via the Hudson Bay route. He was on the "Bright Fan" when it hit an iceberg.

Talkies are to be produced in Spain.

SORE THROAT

...Here's comforting relief without "dosing."

Just rub on VICKS VapoRub

There is NO ODOR from FISH

or from Vegetables cooked in CANAPAR

Boiled, or steamed, fish comes out firm and solid, refreshing to the eye and palate, when you boil it up in Canapar Cooking Parchment. No fishy odor. No greasy steamer or saucepan to clean or disinfect.

And vegetables are simply delicious. Using Canapar you can cook three or four in the same pot over one burner or oven. Canapar saves them as it does so fish. Ensures all the delicious juice and flavour.

Fat and juices from meat won't boil away if you have Canapar over the pot. Canapar is tasteless, odorless, non-poisonous. No pan-scraping afterwards.

Canapar only costs 25 cents for a large convenient roll. You can use each sheet several times. Don't wait! Obtain others. Make a perfect dish each time you cook fish, or young, and there's special fun.

Special Offer

CANAPAR is made by the makers of the famous PARA-SANI Heavy Waxed Paper for the Green Box. Many grocers, druggists and department stores have Canapar on sale, but if you don't find it, send coupon below to the makers and you'll get you a new and unique book entitled "Leftovers", containing new luncheon recipes as a bonus for your trouble.

Canadian Paper Products, Ltd., Dept. 1, Montreal, Que.

Enclosed find 25c for which please send me one full size package of CANAPAR Cooking Parchment and your book of 50 recipes for "Leftovers".

Will Not U.S. Trade

Economic Conference Agreement Will Affect American Exports

Report of food products from the United States to the United Kingdom will probably be affected to the tune of $139,784,000 annually by the agreements reached at the Imperial Economic Conference between the United Kingdom and the Dominions, says the Journal of Commerce, New York.

Pointing out the effect of the agreements on United States products in predominantly agricultural, probably impossible to forecast with any degree of certainty. The paper states a compilation of export values of the foodstuffs affected for the past five years but to the above valuation.

Ready-Made Medicine.—You need no physician for ordinary ills when you have at hand a bottle of Dr. Thomas' Eclectric Oil. For coughs, colds, sore throat, bronchial troubles, it is invaluable, for rheumatism, bruises, sprains it is unsurpassed, while for cuts, sores and the like it is an unquestionable healer. It needs no introduction other than the use, and that will satisfy anyone as to its effectiveness.

Old Legend Revived

Roman Skeleton Discovered In Grand Fir in Ohio

An old legend that two men had their lives in 1846 while walking through an unexplored forest in New Knoxville, Ohio, has been revived with the finding of a human skeleton in a gravel pit near that town.

According to the story, the men starved to death and their bodies, found months afterward, were buried near the spot where the bones were found.

Complexion Free Disease

Pimples in various sections of Western Alberta are causing worry to the Dominion Government over reports of distribution of seed last spring. They believe the seed was of poor quality and that the rust was too green when it came to bind. The disease has spread to the east and arrived too late in the season.

Request Passes For Workless

Alberta Asks Help From Ottawa For Stranded Men

Edmonton, Alberta Efforts to move single unemployed men, residents of Vancouver and other British Columbia cities, who have been stranded in Edmonton and Calgary and other points as a result of the ban on freight train riding are now under way.

Premier J E Brownlee stated no intimation had been received as to what Ottawa was prepared to do.

It is understood R C M P officials have suggested each man be required to make an affidavit as to his proper place of residence and then the required number of railway passenger cars, of the colonist type, be requisitioned by the federal government to take the men to their homes. Under this plan each man would receive a pass to travel on these cars.

Premier R.B. Bennett and Mr. Vallance were short.

Mr Vallance said he had received three telegrams from points in the west, each urging him to press for the lessen of five cents a bushel on wheat. One telegram, he understood if the bonus were not granted, "revolution was inevitable."

"The government has the matter under consideration," the Prime Minister replied

Voyage Was Uneventful

Miss Cora Hind Arrives In England From Churchill

Avonmouth, England Miss Cora Hind, Winnipeg newspaperwoman, arrived on the Canadian passenger steamer the Raima motorship "Juventus," 13 days and 21 hours after leaving Churchill, Man. She was the first woman to sail from Canada's northernmost seaport.

What impressed her most was the fact the pilot was dropped only two miles out of Churchill after which the ship steamed steadily between nine and 12 knots, meeting fog only on one day.

During the entire 2,078 miles, she said, the vessel sighted only three icebergs, all early in the trip and all at a considerable distance.

Age Of the Earth

Toronto Scientists Place Age At Three Thousand Million Years

Toronto, Ont. Two Toronto scientists, by means of their experiments, claim to have condemned the age of the earth at three thousand million years.

Professor E. F. Burton, chairman of the Physics department at the University of Toronto, and Professor J. C. McLennan claim that experiments with liquified helium in glass vacuum bottles confirm deductions from analyses of radio-active rocks.

By-Election In Chaval

Liberal Candidate Nazon Got By Majority Of One Vote

Summerside, P.E.I.—Given a majority of one vote in the by-election, Dr. J. F. MacNeill, Liberal, was declared elected to represent the Egmont district of Prince in the Prince Island legislative assembly.

His total vote, officially announced by the returning officer, was 1,587. H. M. Downing, his Conservative opponent, received 1,586. It is understood that Mr. Downing will file application for a recount.

Labor Battalion Formed

B.C. Plans To Carry Out Road Work During Winter

Victoria, B.C. - British Columbia's first labor battalion sprang into being when provision for the segregation of young men in camps, members of non-permanent active militia, was made so that these men may be place in a single camp in the university endowment lands area, Point Grey, Vancouver, under military discipline, with the object of carrying out road work in that area during winter months.

Tahiti, Society Islands, has only three motion picture theatres.

MAY CONSIDER FIVE CENT BONUS FOR 1932 CROP

Ottawa, Ont. The Federal Government is considering paying a bonus of five cents a bushel to western Canada's farmers of the 1932 wheat crop.

This was definitely stated in the House of Commons by Prime Minister R. B. Bennett, when questioned on the subject by John Vallance, Liberal, (South Battleford). No indication was given when a decision could be expected.

A bonus of five cents a bushel was paid to western wheat growers last year by the government, and was paid through the board of grain commissioners.

The question and answer between Prime Minister Bennett and Mr. Vallance were short.

Mr Vallance said he had received three telegrams from points in the west, each urging him to press for the bonus of five cents a bushel on wheat. One telegram, he understood if the bonus were not granted, "revolution was inevitable."

"The government has the matter under consideration," the Prime Minister replied

Criticizes British Attitude

De Valera Says Britain Playing Part Of Shylock

Dublin. Irish Free State Great Britain is playing the part of Shylock toward the Free State and at the same time petitions.gg the United States for relief from war debts which in some debts are morally and legally due," President Eamon de Valera declared before the dail eireann today

The president was making his report to the legislature on the failure of the negotiations in London which had been aimed at terminating the Anglo-Irish tariff war He said those negotiations had failed because British insisted members of a suggested arbitration committee should be limited to representatives of empire nations. This insistence, he added, ruled out any possibility of arbitration.

Mr. De Valera declared the Free State was neither legally nor morally obligated to pay land annuities to Britain.

For Disarmament

Memorial To Premier MacDonald Urging Acceptance Of U.S. Proposals

London, England. Three hundred well-known Britons signed a national memorial to Prime Min ster Ramsay MacDonald urging acceptance of the principle of the United States proposal to cut armaments by nearly one-third.

The memorial said the government should "as a practical step towards establishment of a status of equality in armaments declare forthwi th acceptance of the principle of the proposals of President Herbert Hoover."

Among the signers were Lord Cecil, the Lord Mayor of York, Dean Inge, Sir Oliver Lodge, Sir Norman Angell, Maud Royden, John Drinkwater, John Galsworthy, and H. G. Wells.

Lumberman Pleased

Abrogation Of Anglo-Soviet Commercial Deal Given Nod In B.C. Legislature

Victoria, B.C. Abrogation of the Anglo-Soviet commercial treaty announced in London, England, is good news to the British Columbia lumber industry, which has been forced to compete with Russian dumped lumber in Great Britain.

"This is the most encouraging news that has been received for some time," said Hon. R. S. Lenglsed, Minister of Lands, in commenting on the statement of Rt. Hon. J. H. Thomas that the Soviet trade agreement with Great Britain would be terminated.

Vancouver Cancels Winter Fair

Vancouver, B.C.—The annual winter fair here will not be held this year because of the expense involved, it was decided by the Vancouver Exhibition Association.

Japanese Bandits May Release Captives

Have Come To Agreement About British Subjects In Report

Shanghai, China Japanese intermediaries at Mukden were reported to have reached an agreement to effect the release of Mr. Kenneth Pawley and Charles Corkran British subjects, who were captured several weeks ago by bandits.

The agreement provides for payment of 130,000 yen (about $22,500), 200 pounds of opium and a supply of winter clothing for the bandits

World Economic Conference

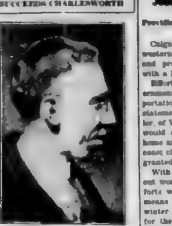
Date For Meeting of London To Be Decided Soon

Ottawa, Ont.—The date for the convening of the World Economic Conference in London England, will be decided upon some time in November, it was stated on highest authority. Fixing of the date, which may be in December or January, will be a matter of agreement between the government of the United Kingdom, which extended the invitations, and foreign and other powers who will be represented at the parley.

1,200 Men Given Work

Detroit. David Widman, secretary and treasurer of the Murray Corporation of America, manufacturers of automobile bodies, announced that the company this week is rehiring 1,200 employees, mostly tool makers, and increasing its payroll about $50,000 a week in preparation for the production of 1933 models by automobile factories.

SUCCEEDS CHARLESWORTH



R. K. Sandwell, well known Canadian author and critic, who is reported to have been appointed Editor of Saturday Night to succeed Hector Charlesworth who goes to Ottawa as head of the National Radio Broadcasting Commission.

Jobless Create Problem

Providing Government Officials With Plenty Of Worry

Calgary, Alberta. Single jobless in western Canada are in a quandary and providing government officials with a knotty problem.

Efforts to have the Dominion government provide them with transportation back to their homes brought statements from Mayor Louis D. Taylor, of Vancouver, that he feared they would all say Vancouver was their home and seek transportation for the coast city if such transportation were granted.

With 1,000 men in Edmonton without work and another 1,200 here, efforts were being made to find some means of aiding them during the winter months or paving the way for their return to their homes, declared when the ban on rod-riding went into effect at the end of September.

Civic officials here said no relief was being granted able-bodied single men Whether easy would be granted later was not ventured, pending information from the Federal relief plans for the coming winter.

No Comment From Soviets

From Silent So Far On Annulment Of Trade Agreement

Moscow, Russia.—A despatch from London, England, reporting the annulment of the British trade agreement with Russia was published in Moscow newspaper without comment, apparently having been received too late for editorial expression.

During the Ottawa conference Soviet newspapers threatened reprisals if Great Britain sought to place restrictions on its purchases from Russia in accord with reported Canadian demands.

London, England.—There was a general recognition in the London press that the announcement of the Anglo-Russian trade treaty was the logical sequence of the Imperial Conference at Ottawa.

Afar Long Sleep

Girl Said To Be Recovering From Sleeping Sickness Leaving Many Months

Chicago.— Like Washington's Rip Van Winkle, Miss Patricia McGuire, 27, who has been ill with sleeping sickness since last February 24, is going to have a lot of news to catch up on when she awakens from her long slumber.

Physicians who have attended her in her suburban home in Oak Park say there are unmistakable signs that she is awakening and her friends are wondering what her reactions will be to the many things that have happened since she fell asleep.

WHEN FIFTY MILLION METHODISTS UNITED

The picture above shows the deed of union being signed by the three leaders at the Methodist Reunion Conference when the three great Methodist groups in the Mother Country united. The Duchess of York can be seen in the picture.

OTTAWA PACT IS APPROVED BY BRITISH HOUSE

London, England.—A majority of 433 was secured by the government in the House of Commons on the first vote relative to the Ottawa agreements. The vote was not on the agreements themselves but on a resolution of procedure in connection with legislation implementing the agreements.

It was taken, nevertheless, as a good indication of how the House is divided on the trade agreement and the tariffs necessary to carry them out.

To implements the agreements it will be necessary to impose 22 new United Kingdom duties on foreign goods. The normal procedure would be to pass a separate resolution for each duty. The government motion before the House was to authorize the incorporation of the whole 22 resolutions into one Act of Parliament.

The government motion was carried 291 to 68, and the House resumed general debate on the main resolutions.

Major C. R. Attlee, former Labor minister, announced the Labor party did not intend to be bound by the Ottawa agreement. He added that he understood his party's views were shared by Sir Herbert Samuel, Rt. Hon. W. L. Mackenzie King, Liberal leader of the Canadian House of Commons, and H. Stullin, leader of the opposition in the Australasia government.

The Thames Rist

Matter To Come Up For Debate In House Of Commons

London, England. Twelve hours after 10,000 jobless men and women had rioted across the Thames from Parliament Square, Prime Minister Ramsay MacDonald promised to permit debate soon in the House of Commons on unemployment.

A questioning member of parliament previously had brought up the matter as a subject of discussion, and Sir John Gilmour, the Home Secretary, reported the demonstration was organized by a Communist organization.

Fifty men and four women who were rounded up during the rioting and looting that followed, were taken into ancient London police court recently under heavy guard. Outside crowds of unemployed began to assemble and had police hold them in lower Kennington Lane.

The prisoners were sentenced to pay fines of 40 shillings each (about seven dollars) or serve jail terms of 14 days to one month.

Kingston Prison Rist

Claimed Convict Helped To Quell Disturbance

Ottawa, Ont.—The Ottawa Citizen carried the following despatch from Kingston following the penitentiary riot:

It is stated a threat was made to set a fire before the riot, at one time a dangerous bandit, took action, and then he addressed an angry mob of convicts and appealed to them not to start the blaze or say damage. "For God's sake, men, do not do this —it will not get you anywhere. I tried it one time and it didn't get me any place," he is reported as saying.

It is stated that "Red" Ryan's appeal helped to quiet down the convicts.

Death Of Rhys Thomas

Winnipeg, Man.—Rhys Thomas, for a quarter of a century choi.ma ter and musical director in this city, and well known throughout Canada as adjudicator at musical festivals, is dead in London, England, according to word reaching here.

Royalty Weds

Coburg, Germany.—Princess E ly,he of Saxe-Coburg-Gotha, who is famed for her democratic manner and her queenly dignity, Wednesday, October 19, became the wife of Prince Gustaf Adolf Oscar, eldest son of the Crown Prince of Sweden

"THE RIDDLING AGE"

This famous Paramount photoplay is not a routine story of juvenile wildness; it depicts the cross-currents that nowadays arise between conservative thought indulgent parents and modern, intoxicated, selfish children. An interesting comedy-drama, it provides several hearty eye scenes which are neatly balanced by many a hearty laugh.

"The Reckless Age" has a great cast with Charles Rogers, Mae Busch, Richard Bennett, Charlie Ruggles, Miss Dee and Frances Starr, in the featured roles.

"The Reckless Age" will be shown at the Empress Theatre on Friday and Saturday nights. Be sure and do not miss it!

In view of the World's Grain Exhibition and Conference which opens at Regina on July 24th, next year, the placing of additional directional signs south and east of the city at intersections leading to the province on Roosevelt and other U.S.A. highways is undertaken next spring by the Regina Board of Trade.

By looking carefully you will find many things to commend than to criticize.

Here and There

A total of 130 millings to sent from Halifax will be made during the coming season to the Old Country, the majority of which will be by Canadian Pacific steamships.

A rise in wholesale prices in Canada during September, is announced to be one of the most outstanding favorable events in the Canadian economic situation, according to a statement recently issued by the Department of Trade and Commerce.

Popularity of Canadian tobacco in the United Kingdom is increasing. For the eight months to August last, 8,846,346 lbs of Canadian tobacco valued at $2,546,288 was exported to Great Britain as compared with 4,917,139 lbs. valued at $1,429,862 exported in the same period of 1931.

The Canadian silver production to 1931 was approximately 29½ million ounces, or 10.1 per cent. of the world's computed production of 194 million ounces. Canada has for many years ranked third amongst the silver-producing countries of the world, being exceeded by Mexico and the United States.

New Brunswick is to change the North American Cover Dog International Trials to an annual sporting event. Success of two days' trial conducted at Petitcodiac with recently, has brought about suggestion of a permanent dog meeting and owners association which has fixed dates for 1933.

Photographs of Sandford's Harbour, Loughan, Halifax, and other places of interest in Nova Scotia during world cruises by the Canadian Pacific liners, are being taken by Sandford for King Philadelphon by the Steamer Company's General in Canada, who made the Pre Fair Boat on the Empress of Asia recently.

OBITUARY

MR. JOSEPH FLUER

Mr. Joseph Fisher passed away at his residence at Beaver Hills on Saturday, October 22, at the age of 71 years. The deceased leaves to mourn his loss, his wife, three sons and two daughters, John, William, Reginald, Mrs. Ernest Pfister and Mrs. John Pendleton, all of Beaver Hills district. The funeral service was held on Tuesday, Oct. 25, at 2 p.m. in the Union church, Lamont. Interment took place in the Bonnet Lake cemetery. Bankman Funeral home.

MR. ROBERT WEBB

An old-timer of the district, Mr. Robert Webb passed away at the hospital, Vilna, on Monday, Oct. 24th at the age of 70 years.

Mr. Webb lived in the Beaver Hill district for a number of years before moving to Vilna.

The funeral service will be held at the Lutheran Church, Beaver Hills, on Wednesday, Oct. 26th, at 2 p.m. Interment will take place in the Beaver Hills cemetery.

MRS. MARION HARDY

Mrs. Marion Victoria Hardy, daughter of Mr. and Mrs. Geo. Kimball residents of Fort Saskatchewan for a number of years, before moving to Saskatchewan, Sask., passed away in an Edmonton hospital on Oct. 23rd.

"The Record" has come very fine samples of "Sunshine Christmas Greeting Cards", that your customers would be delighted to receive from you.

If you do not need out calendars for 1933 why not send a card card? The cost is small, yet they mean so much. Ask to see our samples.

Hallowe'en

Hallowe'en, the evening of the 31, of October, so called as being the eve or vigil of all Hallows, or festival of All Saints, which falls on November 1st. It is associated in the popular imagination with the pervasion of supernatural influences, and is always a role of pagan times. In the north of England hallowe'en is known as nutcrack night. In the Highlands ceremonies of the eve were formerly regarded in a highly superstitious light, and Burn's "Hallowe'en" gives a humorous and vivid imagined representment of the usual ceremonies as practised in the rural Scottish districts in his day. The principal object of curiosity in connecting the future was to discover who should be partner in life. Popular belief ascribed to children born on Hallowe'en the faculty of perceiving and holding converse with supernatural beings.

Ontario exhibits for the World's Grain Show at Regina next year will be collected at Guelph and forwarded to Regina free of cost.

Bride of a Few Weeks "Deserted" by Friends

On Friday evening, Oct. 21st., a very pretting linen shower was held at Beaverdale United Church for one of the Sunday school scholars, Mrs. Hill Cook, (formerly Miss Una Morris), a bride of a few weeks.

An interesting program was given including the following items:—

Reading—"A Hysterly Schoose" by Mrs. B. Cook.

Duet—"Matrimonial Sweets" by Mr. and Mrs. H. Hodgins.

Reading—"The Goat", by Mrs. W. H. Griffin.

Solo—"Grandma's Advice", by Mrs. Jos. Dunn.

Reading—"What Men are", by Mrs. J. Hare.

Reading—"A Dangerous Product" (A demand analysis of woman) by Mr. Jos. Dunn.

After the program the gifts were opened by the bride. Each gift contained a verse. A prize was given for the wittiest verse which was won by Miss Aileen Cook. In a little speech the bride thoroughly thanked the friends and neighbors for their kindness.

Gifts were received from the following:— Mr. and Mrs. Harrell; Mr. and Mrs. Alan Pinnell; Mr. and Mrs. Harold; Mr. and Mrs. Ira Fisher; Mrs. Pendleton and family; Mrs. J. Hare; Mr. and Mrs. H. Hodgins, Ann and Blyvie Kelly; Erdmon Arndt and sisters; Davis and Dorothy Dunn; Mrs. Reinhold Mann and Margaret; Mr. and Mrs. Geo Dean; Mr. and Mrs. J. Gunn; Mrs. Cook and Aileen; Mr. and Mrs. Morris and family; Mrs. Ridge Fisher; Mr. and Mrs. W. E. Griffin; Claire Kelly; Mrs. F. Spencer; Mr. and Mrs. W. Fisher; Albert Woodruff.

THE HOUSE OF BREAKS—COME-THEN

— BY —

MARGARET PEDLER

Author of "The Silent Sentinel," "The Shrine of Love," etc.

Hodder & Stoughton, Ltd., London.

CHAPTER XXXV—Continued.

"Did she? I expect she told you merely what was the truth. I went to see her because she had assured me that she could stop your marriage with Tormarin—could interfere in some way to prevent it. That was why I went to France. . . . But when she told me her blackguardly scheme how she had planned and plotted to conceal the fact that Tormarin's wife was alive—and why she had did it, I would have no hand in anything that followed. I'm no saint' —a brief, ironical smile flitted across his face "but there are some methods at which even I draw the line."

"So that was why you stayed away?"

"That was why. I wanted you, Joan —God only knows how I wanted you! —but I couldn't try to force your hand at such a time. I couldn't profit by a damnable scheme like that."

Joan's eye's grew soft as she realized that beneath all the imperious arrogance and dominant demands of the man's temperament there yet lay something fine and clean and straight —difficult to get at, perhaps, but which could yet rise, in answer to a sense of honor and fairness with which she had not credited him, and take command of his whole nature.

"I'm glad—glad you didn't come, Geoffrey," she said gently. "Glad you —couldn't."

"I don't know that I'm glad about it," he returned with a grim candour. "I simply couldn't do it, and that's all there is to it. But I've come now, Joan. I've come because I want you to give me just the right to look after you. I'm not asking for anything. I only want to serve you—if you'll let me—just to be near you. If Tormarin were free, I would not have come to you again. I know I should have no chance. But he's not free. Does that give me a chance, Joan? If it doesn't, I'll take myself off—I'll never bother you again. I'll try Africa—big game shooting"—with a short laugh. "But if it does——"

He paused and waited for her answer. The intensity of longing in his eyes was the sole indication of the emotion that stirred within him—an emotion held in check by a stern self-control that seemed to Joan to be part of this new, changed lover of hers. Surely, in the months which had spaed since she had fled from him in Dartmoor, he had fought with his devils and cast them out!

She held out her hands to him.

"Geoffrey, I'm so sorry—but I'm —said it. Doesn't I wish—I wish I could give you any other answer. But, you see, it isn't marrying—it's love that matters. And all my love is given."

He took her hands in his and held them gently with that strange, new restraint he seemed to have learned.

"I see," he said slowly. Then for a moment his calm wavered. The underlying passion, so strongly held in leash, shook the even tones of his voice. "Tormarin is a lucky man—in spite of everything! I'd give my soul to have what he has—your love, Joan."

His big hands closed round her slight ones and he kissed them to his lips. Then, without another word, he went away, and Joan was left wondering sorrowfully why the love that she did not want was offered her in such full measure, here to take at will, while the love for which she craved, the love which would have meant the glory and fulfillment of life itself, was denied her—shut away by all the laws of God and Man.

CHAPTER XXXVI.
Reunion

Joan leaned city against the ancient wall which bounded the stone-paved court at Bicarocia and looked down towards the valley below.

Spring was in the air—had come to the eastern corner of Europe—but, as yet, even here the frog, sence of awakening things was permeating the atmosphere, strips of vivid blue rent the grey skies, and splashes of golden sunshine lay dappled over the shining roofs of the village that nestled in the valley.

But no responsive light had lit itself in Joan's wistful eyes. She was out of tune with the spring-time, hope and hope go hand in hand, the one symbolical of the other, and the promises of spring-time, the blossom of hope, was dead within her heart—withered almost before it had had time to bud.

The months she had spotted Englland had sufficed to blunt the keen edge of her pain, but always she was conscious of a dull, unceasing ache—a corroding sense of the uselessness and emptiness of life.

Yet she had learned to be thankful for even this mean respite from the piercing agony of the first few weeks which she had spent at Bourlefois. Whatever the coming years might bring her, no future joy, pain, or even of some semblance of joy, those weeks when she had suffered the torments of the damned would remain stamped indelibly upon her memory.

During the last days at Charcrevoix she had been hoped up to a high pitch of endurance by the very magnitude of the renunciation she had made. It had been enough, when the last strains upwards to the accomplishment of some deed that is almost beyond the power of weak human nature to perform, to keep her unflinching for the time being, a merciful oblivion to the immensity of pain involved. But the reaction had come with a rush, the martyr beyond any ordinary recognition of the physical fire that burns and chars his flesh, and some such ecstasy of sacrifice had supported Joan through the act of abnegation by which she had surrendered her lover, and with it her life's happiness, at the feet of the stern altar of Duty.

Afterwards had followed the purchasing and bustle of departure, the necessary arrangements to be made and telegraphed to Bastwick, and finally the long journey across Europe and the hundred and one small details that required settlement before she and Claire were fully installed at Bicarocia and the wheels of household machinery running smoothly.

But when all this was accomplished, when the need to occupy and plan and make decisions had gone by and her mind was free to concern itself again with her own affairs, then Joan realized her full folly of her renunciation.

And she paid it. In days that were an endless panorama of suspended hours; in sleepless nights that were a mental and physical torment of unbearable longing such as she had never dreamed of; in tears and in dumb, helpless silences, she paid it. And at last, out of those rushed and tortured weeks she emerged into a numbed, listless capacity to pick up once more the torn and mutilated threads of life.

Looking backward, she marvelled at the wonderful patience with which Claire had borne with her, at the sublime way in which she had devoted all her energies to ministering to one who was suffering from heartsickness —God knew! worrying of all complaints to the sufferer's friends because so difficult of comprehension by those not similarly afflicted.

Well's "pale gold narcissus!" To Joan, who had clung to her, helped inexpressibly by her tranquil, steadfast, unswerving faith and loving-kindness. It seemed as though the staunch and sturdy oak were a mere appropriate setting in which to engrave the soul of Claire.

She heard her now, coming with light steps across the court. She rarely left Joan kneeling long alone these days, exercising all her tact and ingenuity to devise some means by which she might distract her thoughts when she could see they had slipped back into the past.

Joan turned to greet her with a faint smile.

"Well, my good angel? Come in rout me out? I suppose"—laughingly—"you want me to ride down to the village and bring back two lemons urgently demanded by the cook?"

Claire laughed a little. Many had the transparent little device she had employed to beguile Joan into the saddle, knowing well that once she was on the back of her favorite mare the errand which was the ostensible purpose of the occasion would quite probably be entirely forgotten. But Joan would return from a long ride over the beloved hills and valleys that had been familiar to her from childhood with a faint colour in her pale cheeks and with the shadow in her eyes a little lightened. There is no cure for sickness of the soul like the big, open spaces of the earth and God's clean winds and sunlight.

"No," said Claire. "It's not lemons this time."

"Then what is it?" demanded Joan. "I'm didn't come out here just to lose myself in the snow. There's no sin of importance about you."

It was true. Claire wore a little flattering neglect of excitement. The colour came and went swiftly in her cheeks, and her eyes had a bright, almost dazzled look, while a small smile hovered on her lips as though at some secret joke.

"Well—yes, it is annoying," she acknowledged. "I had a letter from Lady Anne this morning."

Smith's Drug Store

Judicial Sale of Farm Properties. Farms For Sale

There will be offered for sale by public auction by ROBERT CORIMER FRASER, at the Post Office, in the Town of Fort Saskatchewan, Alberta, at 12.00 o'clock noon, on Saturday the 8th day of NOVEMBER, A.D. 1923, the following properties, namely:—

PARCEL 1. All that portion of the W. ½ of Sec. 14, Tp. 55, Rge. 22, W. 4th., which lies to the east of the North Saskatchewan River as shown on a plan of said Township approved and confirmed at Ottawa on the 2nd of May 1883, by Andrew Russell for the Surveyor General of Dominions lands, containing 105 acres more or less.

The following is an approximate description of the above lands:—This property is situated 4 miles from Fort Saskatchewan on the North Saskatchewan River, 60 acres are under cultivation and 50 additional acres could be broken at a moderate cost. The soil is a sandy loam of good depth, has 2 wells and is fenced on the north and south. There is a frame house with stone cellar 16'x24' with verandah, bunkhouse, granary, frame stable 20'x 36', hog stable 16'x20', 6 granaries, henhouse, workshop, etc.,

PARCEL 2. N.E. ¼ of Sec. 14, Tp. 55, Rge. 22, W. 4th Meridian, containing 160 acres more or less, Reserving unto His Majesty all mines and minerals out of Legal Subdivisions 15, the E. ½ of L.S. 15, and the E. ½ of the N.E. ¼ of L.S. 16. The following is an approximate description of the above lands:—This property is situated 8½ miles from Fort Saskatchewan, 118 acres are under cultivation and an additional 42 acres could be broken at a moderate cost. The soil is a rich sandy loam and is fenced on all sides.

PARCEL 3. All that portion of the S.W. ¼ of Sec. 28, Tp. 55, Rge. 22, W. 4th Meridian, which lies east of the North Saskatchewan River as shown on said plan of said township containing 96 acres more or less, Reserving unto the Canadian Pacific Railway Company, all coal under or on the said land. The following is an approximate description of the above lands:—This land is situated 6½ miles from Fort Saskatchewan. There are 81 acres under cultivation and an additional 10 acres have been under cultivation. The soil is a sandy loam of good depth. The land is fenced on three sides.

The above mentioned properties will be offered for sale on blue, subject to the upset prices which has been fixed by the Master in Chambers at Edmonton and if not sold, then the lands will be offered for sale according to parcels 1, 2, & 3, as above described at the following upset prices: Parcel 1 at $3000.00; Parcel 2 at $5000.00; Parcel 3 at $1800.00.

Terms of sale are as follows:—If purchased on blue the purchaser is at the time of sale to pay down a deposit of 10 per cent. of the amount of the purchase price to the vendor's solicitors and the remainder of the purchase money is to be paid into Court within 60 days without interest or the purchaser shall pay 10 per cent. of the purchase price as aforesaid and execute a mortgage to the vendor which shall be a first charge on the land for the balance at the end of the fifth year with interest at eight (8) per cent. per annum, and to pay the remainder of the purchase price then owing into Court within 60 days without interest or the purchaser shall pay 10 per cent. of the purchase price as aforesaid and execute a mortgage to the vendor which shall be a first charge on the land for $1000.00 payable as follows:—$200.00 yearly for the first four years and the balance at the end of the fifth year with interest at eight (8) per cent. per annum and to pay the remainder of the purchase price then owing into Court within 60 days without interest.

PARCEL No. 3. The purchaser is at the time of sale to pay a deposit of 10 per cent. of the amount of the purchase price to the vendor's solicitors and pay the remainder of the purchase money into Court within 60 days thereafter without interest, or the purchaser shall pay 10 per cent. of the purchase price as aforesaid and execute a mortgage to the vendor which shall be a first charge on the land for $1000.00 payable as follows:—$200.00 yearly for the first four years and the balance at the end of the fifth year with interest at eight (8) per cent. per annum and to pay the remainder of the purchase price then owing into Court within 60 days without interest.

PARCEL No. 3. The purchaser is at the time of sale to pay a deposit of 10 per cent. of the amount of the purchase price to the vendor's solicitors and pay the remainder of the purchase money into Court within 60 days thereafter without interest, or the purchaser shall pay 10 per cent. of the purchase price as aforesaid and execute a mortgage to the vendor which shall be a first charge on the land for $1000.00 payable as follows:—$200.00 yearly for the first four years and the balance at the end of the fifth year with interest at eight (8) per cent. per annum and to pay the remainder of the purchase price then owing into Court within 60 days without interest.

Hallowe'en Dance

A Gay Affair

The Hallowe'en dance sponsored by the A. A. A. Girls in the Memorial Hall on Monday evening was an enjoyable and successful affair.

The chandeliers in the dance room were decorated with lanterns, and in the buffet room colored paper decorated the lights, and tables in orange and black.

During one of the novelty dances, Hallowe'en novelties were given out to the dancers, this caused much noise and merriment.

At midnight a tasty luncheon was served by the Club members in the buffet room, where two sittings were necessary to accomodate the crowd.

The most popular number on the program was an elimination Fox Trot, two very suitable prizes being given to the last couple on the floor.

The dance continued until 2 a.m., with the Silver Club Orchestra of Edmonton supplying the music for dancing.

NOVEMBER 11th IS REMEMBRANCE DAY

The Annual Memorial Service will be held on Sunday, November 11th. All ex-service men are requested to parade at the memorial hall at 10:45 a.m. A two minutes silence will be observed at the memorial monument and a wreath laid in honor of fallen comrades.

The Canadian Legion request that all citizens that are able to attend, be at the memorial plot on Friday, morning at 10:45 a.m.

YPRES VALLEY

Miss Lassila our school marm and pupils gave a hallowe'en party for mothers and small children last Thursday afternoon.

*****

A Hallowe'en Military whist drive was held on the home of Mrs. W. H. Pearce in connection with the U. F. W. A. Fifteen tables were in play.

*****

We have a parson and teachers' association here, and our school yard has new swings, teeter-totters, and shoots for sliding on in winter. There is also a volunteer fire fighting unit.

*****

Little Gus Irwin dislocated her shoulder, falling off the new teeter-totter at the school.

Coming Events

The United Church ladies aid held a successful Hallowe'en Supper in the United Church last Saturday evening.

*****

St. George's A. Y. P. A. are holding a dance in the Memorial Hall on Friday, Nov. 11th. Good music. Refreshments. Admission 75c.

*****

The regular monthly meeting of the Fort Saskatchewan Women's Institute will be held in the Union Hall on Thursday, Nov. 10th., at 2 p.m.

The speaker of the day will be the Rev. D. C. Ramsay. Everybody welcome.

ANNOUNCEMENT

Under the auspices of the Fort Lodge No. 14 I.O.O.F. a Card Party and Social Evening will be held on Wednesday, Nov. 7th, in the Union Hall at 8 p.m. Admission 25c. Refreshments. Proceeds will be used for local relief. Everybody welcome.

IMPOUNDED ANIMALS

Impounded in the pound kept by Fred Lawrence, Fort Saskatchewan, one yearling heifer calves. Unless redeemed the same will be sold on Monday, Nov. 7th, at 2 p.m.

Municipal District of Clover Bar,
D. Roberts, Sec.-Treas.

Turn to page 4 and 5 of this week's paper for bargains.

RED CROSS TO MAKE APPEALS DURING THE WEEK OF NOV. 21.

The President, Dr. Egbert, in announcing the appeal, states that few people realize the tremendous amount of work which has been done by the Red Cross during the past year with the funds put at its disposal through the Emergency Appeal. In relation to relief this year, however, it is felt that by limiting the scope of relief work to deal with the type of case that is not being covered through other sources, especially the need of the sick and of school children, the Red Cross will be functioning more adequately within its own limits, emergency clothing relief being left entirely in the hands of the Government.

His Honor, Lieutenant Governor Walsh, has kindly consented to act as Patron of the Appeal, and the Honorable J. E. Brownlee as Honorary President. The Red Cross have been particularly fortunate in securing the services of Mr. Norman Hindley to act as chairman of the organization for the Province. The Appeal in the Cities will take place during the week of November 14th and in Country Districts during the week of November 21st; the latter date for rural districts has been decided upon owing to delay in threshing, harvesting and fall seeding time for rural organization.

The Society, states Dr. Egbert, appeals to every organization, to all citizens of the Province, both young and old, to co-operate in this Appeal, the objective of which is placed at $50,000.00. All funds raised will be spent within the Province and local Branches of the Society will retain out of the monies raised sufficient to supply their own needs after which the balance will be forwarded to the Provincial Office for the work of outlying districts.

Taken from the Files

10 Years Ago Today

Thursday, Oct. 28, 1913

G. T. Montgomery, D. Simmons and J. Jolliffe, accompanied by W. Cameron and W. Findlay of Edmonton, have gone to the headwaters of the Big Sucker, after moose.

Large audiences heard Rev. Gold in Rev. McIVeen at the Presbyterian and Methodist churches.

Dunbar McClellan and H. "Dollie" Mitchell went to Edmonton Sunday.

The Conservator goes on record to say that the street car radial line will reach the Fort during next summer.

Dr. Ayles is attending court at Edmonton, being up on the case of Oscar Fredrick, who is being tried this week on the charge of murder.

A dance was given at G. Majors's home on Monday last, which was enjoyed immensely by all those present, and was kept up till long past midnight.

The local Bohemian contemplate giving a ball in their lodge rooms some time in November.

Major Lynett, Fort Saskatchewan barracks came in from Edmonton on Saturday to take part in the staff ride.

We are pleased to welcome Mr. and Mrs. Bob. Johnson and family back to our district and hope they have come to stay. Good Home News.

Quiet Hallowe'en Observed

On Monday night the Fort and district observed the usual Hallowe'en for a long time.

Watchmen around by the town Council through the town and police, served to keep the town's boy headlines in practically complete check, and very few pranks have been reported. Various gates, out side of the usual buildings being turned over.

Three extra policemen were added to the staff for this occasion.

The lonesome of the night indicated a complete success of the evening, all over the province to observe a safe and sane Hallowe'en.

SUPPORT THE ADVERTISERS

Partridge Hill News

Messrs. Verde Lawrence and Cliff Alton are away on a Moose hunt, to the Mitsue district.

*****

Miss Clara Horne who has been with Mrs. Wilmot Alton for the summer returned to her home in Stony Plain this week.

*****

Miss Hetty Snow who has been with Mrs. Wesley Attwell, has taken a position in Edmonton for the winter.

*****

The entertainments sponsored by groups and by-law of the U.F.W.A., a hard time holiday party at the home of Mrs. C. H. Hatcliff on Oct. 31st, and a Mid-Winter Social at the home of Mrs. W. Dawson on Oct 29, were well patronized and enjoyed by those attending. Group three are putting on a Military bridge at the home of Mrs. Warning, Friday, Nov. 11th.

*****

Mrs. Jos. Smith was hostess at a "quilting bee" at Bethany Lodge last week.

*****

The Hallowe'en spirits made merry here Monday night. We have not heard any ser- ous damage. The U. F. W. A. entertained the Junior U. F. A. and other children of the district at a grand party in the basement of the church Monday night. Nuts and apples were the chief items on the menu. Lively games made the evening pass all too quickly. Fines, Comic, Sinister, and Grotesque, pointed at us through the masks, with continuous to match made a great show in the grand march. Prizes went to Gladys Osbaldeston, Hazel Lawrence, Ralph Lawrence, and Margaret Morgan. Mrs. Frank Kidd, Mrs. Wilmot Alton and Mr. Lumsby acted as judges.

*****

We are looking forward to the Sunday school Institute which will be held in the church on Nov. 16th, with Sunday schools from Clover Bar, Fort Saskatchewan, Beaver Hills and Partridge Hill participating. Programme will include Rev. G. H. Villett, and Rev. Elliott, superintendent of Sunday schools.

*****

Misses Vera and Blanche Gordon of Lamont were visitors at home Saturday evening. Mrs. Gordon entertained with a party in honor of Blanche's birthday.

*****

At a well attended "bee" Saturday, Oct. 26, ground was prepared for a skating rink, on the recreation grounds.

*****

Mrs. George Charleston will be hostess to the ladies aid and W.M.S. at their meeting Thursday, Nov. 8, a "sewing bee" in preparation for the bazaar which will be held in the Memorial Hall at a date to be announced later.

*****

Jones, Graham & O'Brien's Anniversary Sale with Bunches of Surprises, are on the middle pages of this weeks' paper. Look them over.

St. George's A.Y.P.A.

St. George's Branch of the A.Y.P.A. met at the Rectory last Friday evening. A good attendance was present. After business there was a Hallowe'en Party, with bobbing for apples, etc. Then one of those sort of feed games that require quick thinking and a general education. Really they are only test of quick thought, for many a University graduate could be beaten by a bright high school boy or girl. Irene Graham won this contest. Other games and some display were followed by a good supper, and so, as Pepys would say, to bed!

CARD OF THANKS

Mrs. Jos. Flasher and family wish to thank their many friends for the kindness and sympathy received during their recent bereavement and for the beautiful floral tributes received.

Moose hunting is getting to be the best forgot to see Jones, Graham & O'Brien's advertisement on the middle pages. Next week the woods will doubtless be full of "coons".

Lest We Forget.

Fourteen years have come and gone since that momentous eleventh hour of the eleventh day, of the eleventh month of 1918, when the armistice which ended hostilities in the greatest war in the history of mankind became effective. Once again the people of Canada observe "Remembrance Day."—a day on which they pay tribute to the memory of the thousands of their fellow citizens, men and women, who gave their lives in a cause which to them, and to us who survive, was a sacred, a noble cause, namely, a war to end war.

But as we look back over these fourteen years, and as we view the state of the world today, we are perplexed as we seek an answer to the question: Has war, after all, been ended? We are disturbed as we endeavor to contemplate the present world situation. Were the sacrifices of 1914-1918 all in vain? Is something worse to follow?

The nations of the world know not discernment; quite the reverse is true. Armaments are greater and more deadly today than they were in July, 1914. There have been numerous attempts to reduce armaments, but none to do away with them altogether, and the attempts at reduction have been feeble and for the most part heedless.

Under the terms of the Peace Treaty Germany was disarmed, and her allies reduced to a position of impotence for the time being. But in disarming Germany, the Allies lacking agreed to bring about world disarmament. They have failed to do so, and now Germany is insisting on one of two things, either that the Allies proceed to disarm or that Germany be permitted to re-arm. The German demand is a reasonable one. The Allies cannot expect to hold a great, proud and powerful people in the position which the German people are forced to occupy at the present time.

What is to be the outcome? Will the Allies at last make a rent, a determined, and resolute attempt to disarm? If they do not, they will either have to agree to the re-arming of Germany, or that country will proceed to re-arm without their consent, and who will, or can, stop her?

But did the World War end war? As a matter of fact, is not the war still in progress, but in another form which is being carried on upon all nations and imposing huge and incalculable losses and intense suffering upon millions of people? The weapons now employed are not bullets and bombs and hayonets, but extreme nationalistic policies of many lands,—restrictive trade measures, prohibitive tariffs, trade quotas, immigration quotas, with each nation striving to promote its own interests by working some harm to other nations. Where do we find two nations working in cordial co-operation to the end that their own welfare but the welfare of each other, and the world at large? Rather, are not the nations engaged in waging war upon one another actuated mainly by the motive of the survival of the fittest?

Warfare of nationalism kept alive by, and in turn keeping alive, racial and religious suspicions, passions and bitterness, rules today, with every nation counting its own selfishness, its own narrowness and bigotry, on the ground that other nations started it, are worse than they are, and that they are merely providing needed self-protection for themselves.

So we find Russia, while teaching its farmers and workers how to build and use tractors, at the same time instructing them in the mechanics and operation of tanks for use in war. We find dictatorships established in Italy and a war-like dictatorship set up. Fearing each other the countries of Europe adopt policies the result of which is ruin to the agriculturists of Canada, the United States, and all of the great food exporting countries of the world. The United States and France grab all the gold in the world and store it away in vaults indifferent to the fact that thereby they bring financial chaos upon the world. Bank notes is cut to half the value of all other nations, and they have succeeded to the extent that tens of millions of men and women are thrown out of work.

It is a disconcerting picture, one to cause the stoutest hearted to lose its courage to face it, grapple with it, make a break in the vicious circle, and attempt to cut the cords which are throttling and strangling mankind. Instead, the old, threadbare excuse is given and acted upon,—the other fellow is doing it, he is to blame, and I must follow suit or be submerged.

If this attitude is maintained much longer complete world collapse is inevitable. Conditions resulting are nothing but a hatbed in which anarchy thrives and grows apace. All the causes of war and order, all the feelings with pot but unsound theories of their own, are preparing upon the public in all countries, promising to create utopias if the people will only arise en masse and destroy everything now existing and which has been built up out of the labor, the experience, the suffering of the generations that have gone.

It is the whole system that is wrong, so these agitators declare, but nothing is quite so wrong as such statements. It is not the system that is wrong, although the all systems it must constantly change, but improve in an ever-changing world to meet conditions as they, too, change. No, the fault lies in the hearts and minds of people themselves. They still entertain their old suspicions and dislikes of each other; they hate any race and language but their own; they scorn any religion but their own; each nation suffers either from fear or a superiority complex because of the other; on the one hand existing trait of character of the individual man and woman who make up the nation. It is the individual view which finds expression in purblind national policies.

Many of the politicians and statesmen of the world, the men chosen to direct national and international policies, realize the situation and left to themselves would be able to accomplish much in the way of relief and recovery the danger which is imminent, but their people will not support them. The people would scrap them aside and put others in their place to continue to insist upon policies of extreme narrow nationalism. It is their own suffering they are thus determined to maintain, and their ultimate undoing which they will bring about, unthinkingly, heedlessly, and from purely selfish motives.

Life Is Reflected In War Memorial

Book Of Remembrance To Be Illuminated By Hundred Men

A five-year task of illuminating the Book of Remembrance which will contain the names of the 68,000 Canadian men and women who died overseas from August 1914 until the disbandment of the Canadian Expeditionary Force in 1920 is the life-work of William Purves, who exhibited a rough sample of the proposed Book in the Public University Library here. The completed work will be placed in a specially-built vault in the Peace Memorial Tower in the Parliament Buildings at Ottawa.

"The work I am now engaged on is my life-work," said Mr. Purves when interviewed. "If I live the next five years to finish the job I shall feel that my life has not been spent in vain."

The Book of Remembrance containing 450 leaves of the finest calf-skin vellum will be bound in purple morocco, with the maple leaf and gold and engraved with the Canadian Coat of Arms. The 68,000 names will be inscribed by hand in Gothic Lettering on the vellum pages, with the names of several men, but 15 pages will be fully illuminated by Mr. Purves.

He intends to tell posterity, year by year, the story of the war; for instance, the theme for 1914 will be the story of the war by the navy, for 1915, the pouring in of men from every province to aid their country, and so on. Mr. Purves also plans to work into his illuminated pages such authentic scenes showing the pleasures and pastimes of the men overseas.—Montreal Correspondent Canadian Press.

Barley In Export Trade

Production Now Amounts To Nearly 150,000,000 Bushels a Year

The production of barley in Canada is rapidly increasing and now amounts to nearly 150,000,000 bushels a year. The principal uses for barley are for Malting; Pot and Pearl Barley; Stock Barley; Barley Flour and Barley Meal; Breakfast Foods; Stock Feed Products; Malt Coffee and Barley Coffee; Malt Flour; Malt Extract; Proprietary Medicines and Non-Alcoholic Beverages. Distilled Alcoholic Beverages and Solvents; Industry at Large; Animal Stock Food; and Yeast.

A special study of the particular needs of that section of the market which the producer wishes to serve, is essential to the satisfactory development of the export trade.—Department of Agriculture, Ottawa.

Women, by the introduction that they have in their storehouses, will deprive infants of the nourishment that they should derive from food, and that nourishment is the very thing Worm Powders destroy worms and without the special assistance of the stomach and bowels that are favorable to worms, so that the full nutriment in food for the child may be enjoyed in every way encouraged.

New Source Of Revenue

Enterprising ministers of London, Ont., have discovered a new source of revenue for their churches. They have undertaken this year by issuing their cars with drawn seal lapels, which they sold to people in the rural districts. Rev. Wayne Wormwood, who titled girls who started on a tour through Yorkshire sold out their stock within a week.

Technical Education

Explains Delay In Giving Effect To The Vocational Act

"Some delay has occurred in bringing the Vocational and Technical Education Act into effect by reason of the fact that the necessary regulations governing the act are still under consideration by the government," reads the communication explaining the status of this legislation from Hon. W. A. Gordon, Minister of Labor, tabled in the House of Commons. The letter was dated last March, and was in answer to protests from the Alberta School Trustees' Association against the delay in giving effect to the 1931 legislation.

Anthem Vet'an. The man or woman subject to asthma is indeed a victim. What can be more terrifying than to suddenly be seized with paroxysms of choking which seem to fairly threaten the existence of life itself? Then comes a condition Dr. J. D. Kellogg's Asthma Remedy is brought many to completely restored health and happiness. It is known and used in every section of this broad land.

Cost Of Direct Relief

Per Capita Cost In Regina Is Given As $7.50

The per capita cost of direct relief in Regina during the period from May, 1931, to April, 1932, for food, clothing and shelter, was $7.50, according to information given recently by Hon. J. A. Merkley, Minister of Labor.

The figure which represent an expenditure of $430,000.33, does not include administration costs, drugs, medical attention or railway fares.

Worms cause restlessness and rob the infant of sleep, the great nourishment so necessary. Worm Exterminator will clear the stomach and bowels and restore healthfulness.

Trinkets Belonging To Edgar Wallace Sold

Unusual Things In Collection Bought By Late Author's Wife

A collection of jewelry which belonged to the late Edgar Wallace was brought into a hotel of this city in London. The sale was "by order of the receiver, Edgar Wallace administrator." Mrs. Edgar Wallace brought several of the items for members of the family. An engraved gold cigarette case weighing about seven ounces brought $170. A suite of cuff-links and diamond square shaped links and two studs sold for $400 and a platinum watch for $250.

When the Chinese New Year comes around, the Chinese make a point of paying their debts. Do they need further civilization?

The status of Yemen is to begin on 312 Slavic Islands.

World's Grain Show

British Empire Farmers' Co-Operation To Show At Regina

The Empire Farmers' Co-Operative, Limited, will be represented both by exhibit space and by delegation to the world's grain exhibition and conference opening at Regina in July next year, according to a cablegram received at headquarters' office of the exhibition and conference.

The Right Hon. Lord Strathcona, chairman, who with two of the directors will attend as delegates, expressed the opinion that an excellent opportunity is thus provided to meet, to confer with and to present the scope and advantages of the Empire Farmers' Co-Operative to farmers of all parts of the Empire. Exhibit space in the new grain show building has been booked for the organization.

This will be used for the presentation of such matters as may be of interest to farmers and for convenient distribution of literature.

Must Study Japanese

The study of the Japanese language is made compulsory under new regulations announced for all primary schools in Fengtien province, of which Mukden is the capital. Similar regulations are being enforced throughout Manchukuo.

ACHES and Pains easily relieved
Aspirin will relieve your suffering promptly and in a hurry. Drop into a tabloid in a glass of water. The pain is gone!
It's so easy as that to be rid of the pain from an aching tooth; of neuralgia, neuritis, rheumatism; of backache due to rheumatism, lumbago; to colds or strains, are easily overcome by Aspirin. Relief from all of these is assured away to a surprising degree.
The modern way to relieve pain is with Aspirin. Trust to the very best modern medical knowledge. They know Aspirin is safe—can do no harm. It does not depress the heart.
You will always find Aspirin in any drugstore, and if you read the package directions and follow them you will always get relief. You will avoid lots of suffering if you just remember—get Aspirin tablets. Do more you get Aspirin and not a substitute. "Aspirin" is a trade-mark registered in Canada.

WIDER POWERS ARE SEEN FOR THE DOMINIONS

Ottawa, Ont. Statute of Westminster has been approved by representatives of the nine provinces of Canada. A section of this proposed act, however, will contain definite safeguards of the Canadian constitution. This section, which was left in Canada by draft, ensures that the Statute of Westminster cannot repeal or amend the British North America Act.

This was the net result of the Dominion-Provincial conference which concluded here. An official statement, handed out after the conference, announced that a final draft of the Canadian clause in the Statute of Westminster was now in the hands of the provincial representatives. While agreed by the conference, this draft would be taken home for submission to the provincial governments. Its text has been altered for discussion by the provinces.

Now that the clause is under consideration by each province, it may learn that the B.N.A. Act might be altered by the Statute of Westminster, the question of how the B.N.A. Act can be changed as the occasion for amendments develops is to be taken up at further conference in which the Dominion and the provinces will take part. This was announced by Premier Bennett.

Many changes to the act, which is Canada's constitution, affecting provincial and Dominion rights, have been made from time to time, but the parties are for the most part in agreement that where a change of importance is to be made, all the provinces must consent. The conference will seek to arrive at the most satisfactory method of making changes.

Adherence to the Statute of Westminster means widened jurisdiction for the Dominions of the British Empire. It provides that the Dominion may enact extraterritorial laws. It declares the Dominions will no longer be subject to British statutes unless they so desire. It repeals the Colonial Laws Validity Act. It gives legal approval to the claim of the Dominions to equality of status in the British Commonwealth.

If the provinces approve of the clause which was agreed on at the conference, the next step will be taken up by the Dominion Government at the present session of parliament. A resolution or bill will be introduced to approve Canada's adherence to the statute. The Imperial conference of last year agreed that the Dominions should express their attitude toward the statute by August. If there is general agreement, the Imperial parliament will be asked to pass the Statute of Westminster.

Royal Grain Commission

Chief Justice Brown May Be Appointed To Represent West

Ottawa, Ont.—Chief Justice J. T. Brown of the Court of King's Bench, of Saskatchewan, is likely to be the third member of the Royal Grain Commission, which goes into touring in futures. Chief Justice Brown would represent the prairie provinces.

Sir Josiah Stamp, eminent London (England), economist, has been named as chairman of the commission. The representative of the Grain Exchange will be W. Sanford Evans, Winnipeg, whose selection has already been approved.

President Of Bible Association

Ottawa, Ont.—At the annual meeting here of the Dominion of Canada Bible Association, Lieut.-Col. D. R. Street, of Ottawa, was elected president. He succeeds Brig.-Gen. J. Duff Stuart, of Vancouver. Proposals for increasing the grain bids at the site sections to be held at Connaught Ranges next August were approved.

Plane Public Flight

Tokyo, Japan.—Captain Thomas Ash, arriving in Japan aboard the liner "Hoten Maru," announced he had hopes of obtaining the use of the aeroplane of Harold L. Brearley for a projected non-stop flight across the Pacific.

W. N. U. 1695

Chicago's New Mayor

Mayor-Elect Cermak Busy With Re-Organization Of Municipal Government

Chicago Speedy re-organization of Chicago's municipal government was promised by Mayor-elect Anton "J." Cermak.

The new mayor will have a working majority in the city council considerably enhanced by victories which accompanied his own success. Thirty of the city's 50 aldermen are Democrats. Nine of the 20 Republicans were classed as allies of Mayor Thompson.

"What are you going to do about Al Capone?" British reporters asked on the 'phone.

"I understand he is out of town," replied Cermak, "and my advice to him is to stay out for the next four years. He is under sentence here you know, and I suggest that he stay in Florida, that's where he belongs now."

Cermak laughed when the London reporter asked Mayor Thompson attack on the king.

"He didn't really feel you people, he I'm" chuckled the mayor-elect. "No, he isn't really anti-British. The British vote is the smallest in Chicago, so he doesn't pick on the British vote. No, I haven't anything against King George or any other king."

Importance Of Wheat Conference

Robert Gardiner Says Hopes Of Western Agriculture Depend

Calgary, Alberta.—Upon the outcome of the wheat conference in London, opening next month, the hopes of western agriculture depends, according to Robert Gardiner, U.F.A., president and leader of the Progressive group in the House of Commons.

Mr. Gardiner will seek to arrange agreements for the disposal of the surplus markets. The solution, he thought, would be an arrangement by which the United States, Canada, Argentina and Australia to permit orderly marketing of the export surplus of each of the countries by mutual advantage. This, if developed, would involve development of central selling marketing boards, possibly under government auspices.

The other alternative would be a compulsory pool, Mr. Gardiner said, although he had been opposed to this method.

No Cancellation Likely

Serious Hardships Would Attend Reduction In Air Mail Service

Ottawa, Ont.—It is unlikely that with any consideration of existing air mail contracts it was stated on usual authority here. This need for carrying out the terms of post office department, coupled with the necessity for overtaking some of the $5,000,000 deficit with which the department is confronted the fiscal year, had given rise to the expectation that the government would reduce some of the unremunerative services, in which category the air mail service is understood to fall.

Cancellation of the contracts, however, would have entailed considerable hardship inasmuch as to the expectation of a continuance of the services, several companies had incurred heavy capital expenditures in establishing air transportations organizations.

Borrowers In Difficulty

Winnipeg.—Farmers who have attended to their affairs and all right, only the farmers who have borrowed money and now have interest charges to carry for having sought a short cut to prosperity through a broker's office are in serious trouble, Senator D. B. Riley, High 'River', Alberta, member, said on reaching this city.

History Books Criticized

Toronto, Ont.—Accusation of dates and facts in history text books and development in schools of a "subconscious" hatred of Britain was declared by Prof. E. Wallace, librarian of the University of Toronto, addressing Ontario Educational Association here.

Beneficent telephone booths have been installed at one California airport.

The U.S. government maintains 26 schools for natives in Alaska.

SAYS RUSSIA DOOMED

W. E. Clifford Montreal engineer, recently arrived from Moscow. U.S.S.R., who declare Russia is despotically controlled by Communist dictatics, and that the country is doomed to failure.

Projects For Churchill

Two Million Dollars Behind The Boom

Big Manitoba Bring Expansion

The Pas, Man.—Two million dollars worth of building, equipment and stores are under way for the completion of 1,200 miles of railway, work on the 1,000,000 bushel elevator project at Churchill, terminus of the Hudson Bay Railway.

Material is being assembled in Winnipeg and Brandon and 40 cars each will be required for the shipment of steel and equipment to Manitoba's seaport. Work on the elevator project will be well under way by July 1, contractors stated.

Churchill will have its first hotel this summer and the first test shipment of grain will be made from the port in September, according to Hon. D. L. McKenzie, Minister of Natural Resources. No "boom" conditions will be permitted.

Soviets Extending Air Service

Ambitious Civil Aviation Program Announced By Government

Moscow, Russia.—Coincident with the opening May 1, of several Russian passenger and mail aero lines, the Soviet Government announced an ambitious civil air program. Some 12,000 student aviators are in training and a total of 172,000,000 rubles is budgeted for civil aviation in 1932. Plans call for extending the passenger and mail lines over 25,000 miles, and installing fifty new aerodromes and 350 landing fields.

Dunbar Quota Policy

British Miner Thinks Wheat Scheme Is Too Dangerous

London, England John Westgate, of Liverpool, who is an officer of the National Association of British and Irish millers, is inclined to doubt the report that the government is considering the imposition of regulations requiring British millers to take 15 per cent. of requirements from wheat grown in the United Kingdom.

No definite scheme has been submitted to the millers by any political party, he said.

"It is perfectly certain that no legislation is possible without the millers' agreement," said Mr. Westgate, in an interview with the Manchester Guardian. "The quota system is far too dangerous to be acceptable. And the English wheat policy at present is insufficient to constitute a 15 per cent quota."

Anglo-German Conference

Matters Of Vital Importance Will Be Discussed

London, England.—Matters of the utmost importance in European politics will be discussed from June 5 to 9, when Chancellor Bruening and Foreign Minister Julius Curtius, of Germany come to England for a conference with Premier MacDonald and other British statesmen.

Among the questions expected to be considered are general disarmament, especially in relation to the Geneva conference early in 1933, and the Austro-German economic pact, but no topic of significance to European politics is likely to be barred.

Official British circles take very calmly the suggestion that other European powers had been somewhat ruffled by the exclusive nature of the conference.

Canadian Wins Medal

Honor Goes To Deputy Minister Of Department Of Mines

Ottawa, Ont.—A signal honor has been conferred on Dr. Charles Camsell, deputy minister of the Department of Mines. A cable from London announced that he had been awarded this year's gold medal by the British Institution of Mining and Metallurgy. One medal is awarded each year to the person, without regard to nationality, whom the institution decides is the most deserving.

May Delay Radio Hearing

Ottawa, Ont.—Preparation of the case for the Dominion Government on the radio reference to the supreme court of Canada is not completed, and expectation is that an adjournment will be asked.

SOME AMBITIONS BY PLANE

Chief Pilot Joe Crosson (in fur flying kit) of the Alaskan Airways, leading antitoxin aboard his fast cabin monoplane "plane before making a dash to Point Barrow for the relief of diphtheria-threatened Eskimo residents. Three are reported as already seriously stricken with the disease. The "plane was commissioned for the flight by Alaska Territorial Health Commissioner Dr Vighaus. Dr. Henry Gruben, Presbyterian missionary physician at Barrow, performed the inoculations.

Dunbar Quota Policy

British Miner Thinks Wheat Scheme Is Too Dangerous

London, England John Westgate, of Liverpool, who is an officer of the National Association of British and Irish millers, is inclined to doubt the report that the government is considering the imposition of regulations requiring British millers to take 15 per cent. of requirements from wheat grown in the United Kingdom.

No definite scheme has been submitted to the millers by any political party, he said.

"It is perfectly certain that no legislation is possible without the millers' agreement," said Mr. Westgate, in an interview with the Manchester Guardian. "The quota system is far too dangerous to be acceptable. And the English wheat policy at present is insufficient to constitute a 15 per cent quota."

Anglo-German Conference

Matters Of Vital Importance Will Be Discussed

London, England.—Matters of the utmost importance in European politics will be discussed from June 5 to 9, when Chancellor Bruening and Foreign Minister Julius Curtius, of Germany come to England for a conference with Premier MacDonald and other British statesmen.

Among the questions expected to be considered are general disarmament, especially in relation to the Geneva conference early in 1933, and the Austro-German economic pact, but no topic of significance to European politics is likely to be barred.

One medal is awarded each year to the person, without regard to nationality, whom the institution decides is the most deserving.

May Delay Radio Hearing

Ottawa, Ont.—Preparation of the case for the Dominion Government on the radio reference to the supreme court of Canada is not completed, and expectation is that an adjournment will be asked.

ARGUE QUESTION OF RESOURCES COMPENSATION

Ottawa, Ont.—The amount of compensation to be paid to Saskatchewan and Alberta by the Dominion for alienation of their natural resources from 1905 to October 1 last, the date of return, may be decided upon by the same commission for the four provinces. This suggestion, it is understood, was under consideration at a meeting between Premier R. B. Bennett; Hon. T. G. Murphy, Minister of Interior; Hon. M. A. MacPherson, Attorney-General of Saskatchewan, and Premier J. E. Brownlee, of Alberta. No official statement, however, was made.

Under the respective agreements between the Dominion and the provinces, concluded but little more than a year and a half ago, the amount of compensation to be paid to Saskatchewan and Alberta for alienation during the period was not fixed. Commissioners were to be appointed and, in the case of Alberta, one was named, but no such step was taken in regard to Saskatchewan. What the personnel of the commission would be if the same body is to function with regard to both provinces is uncertain at the moment, assuming that such a suggestion is acted upon.

Further discussion will take place on this point and in the matter of the turning over by the Dominion of public records to the provinces. In addition, Saskatchewan has an appeal pending before the judicial committee of the privy council also on accounting by the Dominion in respect to the administration of that province's natural resources prior to 1905.

Reduced Railway Fares

Seaside Cut For Summer Week-End Trips Is Announced

Montreal.—Drastic cuts in fares on Canadian railroads for the summer week-ends were announced by C. T. Biddell, chairman of the Canadian Passenger Association, after a series of conferences with the railroads.

The present round trip fare for 100 mile journey is $6.30 and under the new week-end rate will be only $4.20.

The reductions will apply between all stations in Canada and will commence with the first week-end in June.

Cost Is Prohibitive

Winnipeg-Calgary Air Mail Letters $27 Each In Report

Calgary, Alberta.—Air mail letters between Calgary and Winnipeg are costing on an average $27 each, according to statements made here by Dr. G. D. Stanley, M.P. for Calgary, who has just returned from Ottawa.

Government investigations have revealed the prohibitive cost of the present air mail service, he said, and these surveys since Mid-Calgary sends two letters by air for every one sent by Winnipeg.

Viscount Secures Motor License

Ottawa, Ont.—Viscount Duncannon, son of the Earl of Beauborough, lost no time on his arrival in Ottawa in securing his license to operate an automobile. The Governor-General and his family arrived at Rideau Hall shortly before noon. Four hours later Viscount Duncannon was at the office of motor licenses to secure his permit.

Hunger To Be Relieved

Winnipeg, Man.—Plans for rebuilding of the Western Canada Airways hanger here, destroyed by fire a short time ago at a loss of about $200,000, have been completed and tenders on the construction called for. The new hangar will be about the same size as that destroyed.

GOVERNMENT OF THE

DOMINION OF CANADA

4% LOAN—1932

The Minister of Finance offers for public subscription

$80,000,000

Dominion of Canada 4% Bonds

Bearing interest from 15th October, 1932, and offered in two maturities, as follows:

$35,000,000— 5 YEAR 4% BONDS, DUE 15th OCTOBER, 1937

$95,000,000—20 YEAR 4% BONDS, DUE 15th OCTOBER, 1952

Subject to redemption at par and interest on or after 15th October, 1947

Principal payable without charge, in lawful money of Canada, at the office of the Minister of Finance and Receiver General of Canada at Ottawa or at the office of the Assistant Receiver General at Halifax, Saint John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary and Victoria.

Interest payable half-yearly, 15th April and 15th October, in lawful money of Canada, without charge, at any branch in Canada of any Chartered Bank.

Denominations:

5 YEAR BONDS, $1,000

20 YEAR BONDS, $100 and $1,000

The proceeds of this Loan will be used to retire $74,449,210 of bonds maturing 1st November, 1932, and to provide for the general purposes of the Dominion and the Canadian National Railways.

The Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge on the Consolidated Revenue Fund of Canada.

The amount of this Issue is $80,000,000. The Minister of Finance, however, reserves the right to allot or reject the whole or any part of subscriptions received, provided such allotment does not increase the principal amount of the Issue by more than $15,000,000.

Applications will not be valid on forms other than those printed by the King's Printer.

ISSUE PRICE: 5 Year Bonds, 99.20 and interest, yielding to maturity 4.28%
20 Year Bonds, 93.45 and interest, yielding to maturity 4.50%

Payment to be made in full at time of application or in the case of the larger bonds, on allotment.

Subscriptions for which cash is not tendered will be dealt with as soon as possible after the receipt thereof, and will be received by any branch in Canada of any chartered bank and by recognized dealers from whom official applications forms may be obtained.

Department of Finance,
Ottawa, 31st October, 1932

FAIRNESS TO ALL IN PENITENTIARY INVESTIGATION

Ottawa, Ont.—Local radicals plan and a demonstration on parliament hill in connection with the visit of [illegible] and friends of the Communists contined in Portsmouth penitentiary, according to notices posted here.

A sweeping investigation was underway at Portsmouth penitentiary with fairness being meted out to all, and so far there had been no development indicating the necessity of a public inquiry, Hon. Hugh Guthrie, Minister of Justice, said in the commons of the Canadian Defence League who waited upon him. The party was refused admission.

"If a situation develops," the Minister told the delegation, "that calls for a general or open inquiry, I will be prepared to consider it. At the present time I see no reason for such an inquiry."

With a suggestion of Edward Smith, Toronto, that the riots at the institution "were strikes, the same as the strikes of any industrial workers," the Minister of Justice disagreed, adding them more in the light of revolts.

The eight incarcerated Toronto Communists were styled "political prisoners" by the delegation, who were entitled to special treatment. "We have no political prisoners in Canada," the Minister of Justice declared. "Anyone can hold any political ideas he may like so long as he stays within the law. We have no political prisoners."

[illegible] should take place at the institution in regard to the eight Communists, Mr. Guthrie stated. "No favors or no discrimination will be shown to any prisoner during the inquiry."

"These statements are being taken down by a competent stenographer, and will be forwarded to me from day to day," the Minister declared. No copies had reached him yet.

[illegible] the Minister said he personally would see that the visits of relatives to the prisoners would be restored.

Oil Company Withdraws

Montreal Firm Decides To Drop Russian Barley Scheme

Montreal, Que.—One party to the barley-for-oil deal has decided to withdraw from the transaction. Joseph Bisa, a director of Lasalle Petroleum Refinery Company, has announced his company will not accept further shipments of oil.

"There seems to have been some dissatisfaction about the whole deal," Bisa said. He did not, he said, wish to "be bothered" with any more of the business.

Ottawa, Ont.—Complaints in connection with the quality of the Soviet oil imported recently into Canada are being investigated, the Prime Minister told Hon. Ian Mackenzie (Lib., Vancouver Centre), in the House of Commons.

Preparatory Conference

Conference To Negotiate Russo-Jap Treaty Is Called

Tokio, Japan.—A preparatory conference to negotiate a non-aggressual tariff pact between the Soviet Russian and Japanese Governments will be held here, the News Service Nippon Dempo said.

Count Yasua Uchida, Japanese foreign minister, conferred with Premier Makoto Saito and Sadao Araki, war minister, regarding the treaty. After hearing Ambassador Kobi Hirota's report on the Russian attitude, Uchida ordered his office to start preparations for the treaty.

Succeeds Hon. W. B. Ross

Ottawa, Ont. Col. Herbert Alexander Bruce has been appointed Lieutenant-Governor of Ontario. Official announcement to this effect was made early by Prime Minister R. B. Bennett. Dr. Bruce succeeds Hon. W. B. Ross, who resigned from the past a year ago.

W. N. U. 1668

Canada Assured Of Large Lumber Market

But Full Advantage Cannot Be Taken For Some Time

Ottawa, Ont. Assured of a large potential market for lumber in the United Kingdom under the new trade treaty with that country Canada will not be able to take full advantage of it for from three to five years.

This statement was given the House of Commons by one of the leading operators of northern Ontario and the chairman of the committee which represented the Canadian lumber industry at the imperial economic conference. George B. Nicholson (Con. Algoma East).

It was one of two conflicting views on the effect of the treaty on the lumber industry given the House in the course of the debate on ratification of the treaty.

A. W. Neill, (Ind., Comox-Alberni), said the lumber preference would be of no value to Canada because Scandinavian countries, operating on depreciated currencies, could still undersell Canada.

Mr. Nicholson said the potential [illegible] amount to more than 1,000,000,000 board feet. The British market at the moment, was saturated with lumber from Russia and central Europe and Canadian lumber had not sufficient stock on hand to satisfy the [illegible] market.

Russian Plan Is Ahead Of Last Year

But Increase Planned For 1932 Not Much Exceeded

Moscow, Russia With the end of the first five-year plan only a little more than two months off, official figures published showed that Russia's industry as a whole accomplished less than half the increase planned for 1932, but still is running considerably ahead of last year.

The country's entire industrial production for the first eight months of this year, including heavy and light industries, timber and food industries, reached a combined average of 143 per cent. above the same period of 1931, as compared with a scheduled increase of 36 per cent. for the whole year of 1932.

Province Will Be Aided

Federal Government Promises Help If Needed For Relief

Ottawa, Ont.—The government is not in a position to make any exact pronouncement or policy respecting unemployment relief, but if any responsible provincial government officials report their inability to care for the needy within their jurisdiction the government will take "adequate action," Hon. W. A. Gordon, Minister of Labor, told the House of Commons.

Montreal Bandits Make Haul

Montreal, Que. A swiftly executed hold-up secured for three unmasked men the sum of $12,000 in cash, and bonds valued at $1,500, when they escaped down on a branch of La Banque Canadienne Nationale, on Chevrier Street, behind the manager and five employees in the vault, scooped up the money and escaped.

To Discuss Tariffs

Ottawa, Ont.—Liberal members and senators met in caucus to set up committees to study individual tariff schedules affected by the Canada-United Kingdom Trade Treaty. The tariff schedules will be reviewed individually by the House of Commons after the treaty as a whole has been ratified.

Thought It Was a Gun Station

Galt, Ont. A joke is a joke, but when motorists add injury—that's different. William Mulhall, Detroit, for instance, sped through the village of Hyr at 62 miles per hour. When he appeared in court he declared he thought the village was a gun station. He was fined $5 and costs.

Depression Hits Shippers

London, England.—The annual report of Lloyds register on shipping revealed that the economic depression has laid up 10,000,000 tons or the equivalent of 20 per cent. of the world's total shipping.

ARE BRITAIN OF WORRIES.

In order that the work of the Anglican Church in the Prince Rupert Ecclesiastical Province may survive the calamity brought about by misappropriation of funds by ex-Chancellor MacInty, Archbishop Worrell, Primate of the Church, has initiated the opening of a fund to which the general body of bishops and clergy and members of the Missionary Society will be asked to contribute.

Noted Economist Resigns

Sir Walther Layton Leaves Committee Of World Conference

London, England. Sir Walter Layton, noted economist, announced his resignation from the preparatory committee of the world economic conference because of a "serious difference of opinion" between himself and the British Government.

He said he had differed with Neville Chamberlain Chancellor of the Exchequer, on "what further action is required in order to restore reasonable [illegible] to the movement of international trade."

Sir Walter does not think the government view that the desired result can be obtained through individual negotiations with foreign countries within limits set by the Ottawa agreements and subject to strict insistence on most favored nation rights will be successful.

Scottish Parliament

No Revolt To Be Gained By Ashley For Home Rule

London, England.—Scottish Conservative members of the House of Commons decided not to support any move for home rule in the northern half of the United Kingdom.

At a meeting held under the chairmanship of Sir Robert Horne, a former Chancellor of the Exchequer, they reached the conclusion no benefit could be obtained by setting up a Scottish parliament.

Short Rail Haul

M.B. Route Offers Decided Advantages For Shipping Cattle To Britain

Saskatoon, Sask. The short rail haul from the province of Manitoba makes the shipping into ports more advantageous for the shipping of cattle to the British market, was the opinion expressed by Professor A. M. Shaw, dean of agriculture, at the quarterly meeting of the Saskatoon Board of Trade. "The navigation season opens too late to permit of large movement of grain fed cattle" he said, "but affords ready and profitable outlet for grass fed prairie beast."

Dean Shaw was of the opinion that cross-bred cattle developed through experiments carried out by the University of Saskatchewan, made it possible for Canadian packers to compete with Argentine in the chilled meat market in Great Britain.

British Preference

Ruling Made Regarding Customs Shipments To Britain Via U.S.

Ottawa, Ont.—Canadian goods being shipped to the United Kingdom will receive the British preference if consigned directly from Canada to Great Britain, whether they pass through the United States or not.

Canadian goods consigned to the United States and then reconsigned to the United Kingdom will not receive the preference. Premier R. B. Bennett made this explanation of the British tariff regulations in the House of Commons.

British customs commissioners have to have proof that the transit has been uninterrupted before the preference is granted.

Lean Trade Advantage

Irish Free State Will Not Receive Benefit In Preferential Affair

November 15

London, England The Irish Free State will lose the advantage of imperial tariff preferences in the United Kingdom on November 15, J. H. Thomas, Dominions Secretary, told House of Commons.

On that date, he explained preferences granted goods from the Dominions under last year's tariff act will expire, and as the Free State failed to conclude any trade agreement with the United Kingdom at the Ottawa economic conference its exports to Great Britain will be accorded tariff treatment similar to that affecting goods from foreign countries.

Big Terminal Elevator

Victoria, B.C.—At the rate grain is pouring into the Ogden Point elevator of the Alberta Wheat Pool the 1,000,000-bushel capacity will soon be filled. There is a total of approximately 250,000 bushels of grain in the elevator at the present time.

BRITISH JOBLESS CONVERGE ON LONDON

It is understood from the British Home Office that communistic organizations are responsible for the attempt of an army of unemployed men to disrupt the Parliamentary session which is at present in progress. Above is a good photo of the Mother Parliament, while inset is Premier MacDonald, who is endeavouring to overcome what might be a serious disturbance.

WORK TO BE PROVIDED FOR THE UNEMPLOYED

Ottawa, Ont. Public undertakings such as sewers and waterworks, to an estimated amount between $11,000,000 and $12,000,000 will be completed in various municipalities throughout Canada up to the end of December, as a measure of unemployment relief.

Road construction will be carried out in Nova Scotia, Ontario, Manitoba and Alberta. Relief camps will be operated in the prairie provinces. Additional families will be placed on farms in eight of the nine provinces.

In the west the plan of boarding men on farms, with the farmer receiving $5 per month and the boarder a similar sum, of which the Dominion Government will pay 50 per cent. will be continued. Work will be undertaken in the national parks and by the department of national defence in the establishing of emergency landing fields.

The amount of money granted by [illegible] to the Minister of the Interior for the work which is to be carried out this winter in the national parks of Canada is $200,000, according to the terms of the order-in-council tabled in the House of Commons. The money takes care of homeless single men.

"I am confident as are all this country need worry about, provided with food, clothing and shelter this winter," Hon W. A. Gordon, Minister of Labor, informed Hon. Ian Mackenzie (Lib. Vancouver Centre) in the House of Commons.

Federal Aid Requested

Regina Thinks Government Should Share Expenses For Airport

Regina, Sask.—Dominion assistance in bearing part of the carrying charges on an the Regina municipal airport will be sought by City Commissioner R. J. Westgate, who has gone east.

Mr. Westgate will be absent from the city for about 10 days. During that time he will attend a meeting of the Anglican Church in Toronto and will visit Ottawa on civic business.

It has been the claim of the city that the airport was developed to the present state because of the air line service there. This service has been discontinued, the port is no longer revenue producing and the outstanding is that of the fixed charges the Dominion Government should assume part.

Indian Terrorists

Disease-Infected Needles Said To Be Used On Victims

London, England The Exchange Telegraph Agency's Calcutta correspondent reported that political terrorists in India are using disease-infected needles in attacking European and Anglo-Indian office girls en route between their offices and homes.

Thirteen cases of such attacks already have been reported, the correspondent said.

Tea Consumption In Canada

Montreal, Que.—Canadians drink four pounds of tea per capita annually, two-fifths as much as Englishmen and half as much as Australians and New Zealanders and about five times as much as people in the United States, according to T. Reid, of the Ceylon Association, who is returning to England after making a survey of the Canadian market for tea.

Lindbergh's Son Named

New York.—The World-Telegram says that the second son of C.l and Mrs. Charles A. Lindbergh has been named Jon Morrow Lindbergh. The Jon was chosen for a Scandinavian forbear of Col. Lindbergh's. Morrow is Mrs. Lindbergh's maiden name.

Cyclone Hits New Zealand

Auckland, N.Z.—A cyclone left a trail of destruction many miles long and about 200 miles wide in the Waikerwaiti district. Buildings were razed, roofs torn off, trees uprooted and general havoc wrought. There were no deaths or serious injuries.

Pie Crust Lucky Finds

No Child Required For Success With Mother's Recipe

The making of a good pie crust used to be one of the criteria by which a housewife's skill was judged. Most experienced cooks will remember the anxiety with which they mixed and kneaded flour and shortening, and their solicitude in adding just the right amount of ice water. Since makers of flours have varying capacities for absorbing moisture it has sometimes to know by the "feel" of the pie dough when it was ready for rolling.

The filling was not so hard to make, from a technical point of view, but it took time and there were plenty of utensils to wash afterward. Now there is a new method of making pie with crumb crusts and uncooked fillings which is being hailed with delight.

Sweetened Condensed Milk is the "magic" ingredient that makes these new pies possible. These only contain butter, sugar and flavoring are divided into two groups; meringue pies and cream pies. The fillings in each case are made by heating sweetened condensed milk and lemon juice. This makes a thick, rich base to which various kinds of fresh fruits may be added.

In making the crust for meringue pies blend one cup crumbs (graham cracker, toasted graham bread, chocolate wafers or lemon snaps) with two tablespoons confectioners' milk and a few grains of salt. Line a well-buttered pie plate with this crumb mixture and pat into shape. Pie made with this crust should be spread with meringue and require only as much time in the oven as is needed to brown the meringue lightly.

If whipped cream is to be used in place of meringue roll ¾ cup of crumbs and cover bottom of buttered pie plate. Cut halves of walnut meats in quarters and set them around the edge of the pie plate. This type of crust needs no baking at all.

Both types of pies require thorough chilling before serving. Peaches, raspberries or strawberries may be used in place of blackberries in the Blackberry Meringue Pie which is given below:

BLACKBERRY MERINGUE PIE

1½ cups (1 can) Magic Blend Sweetened Condensed Milk.
½ cup lemon juice.
2 eggs.
1 cup blackberries.
2 tablespoons granulated sugar.
1 Graham Cracker Blend Pie Crust.

Blend together Magic Brand Sweetened Condensed Milk, lemon juice and egg yolks. Fold in blackberries which have been slightly crushed. Pour into plain-inch pie plate lined with Toasted Graham Cracker Pie Crust. Cover with meringue made by beating egg whites until stiff and adding sugar. Bake in a moderate oven (350 degrees Fahrenheit) until brown. Chill before serving.

An Optical Illusion

Experience Most Serious Here When Approaching Intersection

A car coming from the right at a street intersection will always seem to be going faster than it actually is.

This is an optical illusion produced by the action of yours and the other fellow's car arriving at the point of a "traffic wedge" at the same time. As the cars near the point of this wedge they seem to increase in speed, when the matter of fact they may be slowing down.

When meeting a car under such circumstances it is best to be guided by the illusion and slow down accordingly, but if caught in a situation where you are too late to avoid a collision by stopping, it will be to lower that the other car is not travelling as fast as it seems and that you can steer to crossing safely by speeding up a little.

Deserves The Honor

Earl Byng Named Head of Fund With Marshal's Baton

General Byng had a remarkable record as a commander in the great war and richly deserves the field marshal's baton that has been awarded to him. He was also a republicanary force served under General Byng, who, after the war, became governor-general of the Dominion.

When a British soldier is given "the baton," he reaches the highest rank in the army, that of field marshal. The baton is a short staff presented by the King as a symbol of office. No one is made a field marshal unless he is of royal blood or has rendered distinguished service.

Smith—It must be nice to own a car.

Brown—I mean it should be, but I'm never allowed it. Either the car is being repaired or else I am.

FAT MAN LOSES 63 lbs.

Kruschen and Walking

Overweight man, who went to him a few months ago has the benefit of this man's experience He gives them to us for publication:—

"In a little over twelve months I have reduced my weight from 227 lbs to 164 lbs., by taking a dose of Kruschen Salts every morning for six months, and taking walking exercise every day. This means quite an hour's stroll in the more interesting when one considers that I did not resort to any form of dieting." G. L. B.

You can take off fat with Kruschen Salts if you will take one-half teaspoon in hot water every morning before breakfast, modify your diet, and exercise regularly.

While you are losing fat you will be gaining in energy in endurance in condition. The old arm chair won't hold you any more — you'll want to be up and doing — you'll enjoy work and active recreation, and you'll sleep like a top. You'll lose fat, and probably live years longer.

Canadian Wheat Exports

Continue In Much Greater Than Year Than Previous Season

For the first 11 weeks of the current crop year exports of Canadian wheat totalled 53,660,000 bushels compared with 29,613,000 bushels for the same period of last year, according to a report issued by the Dominion bureau of statistics. For the week ended October 14, the total was 6,-945,788. This was a decline from the previous week of nearly 1,000,000 bushels.

The following table shows the countries exported and their characteristics of exportation in the first 11 weeks:

	1922	1921
Montreal	24,921,512	11,774,077
Vancouver	15,298,275	6,012,703
Churchill	2,736,609	nil
Quebec	3,623,182	1,728,267
Prince Rupert	431,237	436,042
Victoria	214,627	844,799
Prince Rupert	477,815	
U.S. Ports	3,746,609	7,266,000

Arctic is Place For Real

Food Plentiful Up There and Work Not Too Hard

For a real rest, go to the Arctic according to Bostonians of the crew of the Hudson's Bay Company trading boat "Karlos," which is striking coast-wise at the present time. The crew had a quiet, sedate trip to the Eurlin-cement Arctic outposts.

The "Karlos" returned to Vancouver after three months in the north.

"Depression hasn't hit the Arctic yet," said R. H. Bennycastle, wireless operator, a member of the company who was among the passengers. "Food is plentiful up there and work is not too hard."

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile

"When you feel blue, depressed, sour on the world, it's your liver which isn't pouring its bile into your bowels. Your bowels get clogged up, and you have constipation and sluggishness, and you're a sour, grouchy person. Your head aches, your tongue is coated, your breath is bad, and you feel rotten all over. You need a liver stimulant! Carter's Little Liver Pills. Just take two of these little pills after meals. Soon feel better than you've felt for months. 30c, at all druggists.

Royal Record After Canadian Captain

Son Of Churchill's Thoroughbreds Will Be Under Shorter

One of the streets of his own home-side to be named at Churchill next spring has been named after a living Canadian. Captain J. E. Bernier of Quebec Que. He is the only Canadian now alive to be given this recognition in the building of Canada's new northport on Hudson Bay. All the other streets have been named after explorers and navigators of the north lands long since departed.

Sir Leslie E. Porbes's Explosive Compound

She's Up in the Air Again

These she loves . . . are first to suffer when unsightly pores shower her person. Leslie E. Hudson's Explosive Compound will blow your pores to smithereens.

SUNDAY SCHOOL LESSON

NOVEMBER 6

THE CHRISTIAN AND WORLD PEACE

Golden Text: Blessed are the peacemakers: for they shall be called sons of God." Matthew 5:9

Lesson Psalms: 33 37, 39. 67 1-7 72 8-19. Isaiah 2 1-4, Matthew 26 15-20, Ephesians 2 13-19

Devotional Reading: Psalm 66 4-11

Explanations and Comments.

A Vision Of the Righteous King. Psalm 72 1-7 "The Psalmist declares that the king may be so just and right that his subjects will be guaranteed justice and peace "Bonne ar-tuel ruler Solomon, Hezekiah, or another is no doubt in view, but, as in Psalm 45, the royal figure is so magnificent that the human becomes lost by Messianic, and applicable only to the perfect Divine King." Dummelow.

A Vision Of the Righteous Kingdom, Psalm 72 8-17 The kingdom over which this righteous king will rule will expand until its influence reach the confines of the sea. Desert tribes will bow before Him, and His enemies will fall in humble obeisance into the dust at His feet. Tribute will He receive from Tarshish—lands beyond the western sea and from the more near Seba. gifts will be brought to Him from the kings of Sheba (in southern Arabia), and Seba (on the Red Sea.) He will pity the needy and the poor and on their lives His blood will He allow to be shed unjustly. Prayers will continually be offered for him and blessings showered upon him.

"The sense of God was prevalent with the Hebrews in the days when these Psalms were written. They lived in the consciousness that the God of their fathers tabernacled amongst them. The same consciousness is characteristic of the great poet, hero-statesman and mystic who has left us into modern life. All the advantages of modern civilization would hardly be too much to give, if it were possible to get men to pray continually and to honor God all the day long."—F. B. Meyer.

Christ In Our Peace, Ephesians 2:13-19 Gentiles and Jews are now one in Christ. Paul proclaims. Christ is thinking of the fact that the reconciliation between Jew and Gentile, and between both Jew and Gentile and God, have been put upon a new basis by Jesus Christ. A new covenant has been made, and one of its terms is that the Gentile is to be admitted to the fellowship of God on precisely the same terms as the Jew. The death of the Messiah was the means by which change was sent to play a real part in the change. It "sealed the covenant."—G. A. Johnston Ross.

Valveless Motor Device For Boats

Used Alternations In Engine Produce Speedy Motor

Invention of a valveless four-cylinder motor for boats is claimed at Indianapolis, by John Irvine, who says he worked sleepless years on the gasoline. Irvine believes the invention may result in vast alterations in engine production.

Valveless motors of two cylinders are in use, according to Irvine, but four-cylinder engines failed because of sticking valves. Irvine said he had overcome this difficulty and found his invention to be a success in several tests.

The motor is water-cooled and is capable of driving a small craft 40 miles an hour, according to its inventor.

Irvine said he believed that with a few additional improvements his motor could be adapted to aeroplanes and automobiles.

An Oil For All Ills

An Oil For All Ills —The author, the soldier, the fisherman, the sailor, man, the out-door laborer and all those who are exposed to injury and the weather will find in Dr. Thomas' Eclectric Oil a true and faithful friend. To sore feet, relieve colds, sore wounds, outdoor bandages and chapped hands it is unsurpassed. Therefore, it should have a place in your medicine chest and be managed those taken on a journey.

An Important Business

The making of taste, trees, and shoe findings in Canada has grown into quite an important business. The factory value of the output in 1921 was $1,190,068. The business also turned out some boxes, cooperage, not included in the above. There are fifty boats, tan pins, duck pins, golf club heads, wagon and sleigh stock, cooperage squares and shingle mills. The factory values of these last year was $21,000. There are seven factories in Quebec, two in Ont., South and two in Ontario.

Cambridge, England, is to have a new Shakespeare Memorial theatre.

Mixed Marriages Not Favored By Italians

And Nearly All Weddings Are In Place Of Worship

A curious fact about Italian life is the small number of mixed marriages among Italians with regard to marriage. There are hardly any mixed marriages (if those who found up cases last year, 99.96 per cent of the "Catholic bans" married Catholic wives Of the very small fraction who went further afield half married women of other Christian cults, and the other married wives of the Jewish faith

Of the women, rather fewer Catholics married Protestants or Jews and only a dozen espoused men who registered as "without any religion." On the other hand 28.52 per cent of the Jewish men who married and 27.52 per cent. of the Jewish brides chose Christian partners—Pearson's.

Although a purely civil marriage is now legal, about 94.55 per cent were married in a place of public worship.

DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women vote dust cloths a nuisance to use and to wash

MUCH PREFER APPLEFORD WONDER PAPER

With so much inventive thought being given to eliminating unnecessary drudgery, it is only natural that a worthwhile substitute for the dusting cloth should be sought.

Now it has been found! Appleford Wonder Paper which actually cleans—as it cleans—as it polishes in removing a heavy accumulation of dust. Women who detest dust cloths and all they stand for, Wonder Paper is made from clean rags and soft paper pulp, thoroughly impregnated with a high-grade furniture polish, and absorbs dirt instead of spreading it. Appleford Wonder Paper comes in handy-size packets, twenty-five sheets, each as large as a duster. You merely crumple a sheet into a soft wad, and go over the surfaces requiring attention.

You'll be amazed at the quick and lasting finish Wonder Paper gives. When one side is worn and soiled, simply turn the Wonder Paper inside out. Because of the moisture or woodwork has been removed, you can still use your Wonder Paper on the floors.

Wonder Paper needs no thought—throw it away. No dinner to shake out or wash. No bother at all. The most unpleasant part of housework is relieved of by the use of Appleford's gas through the day with half the effort. Dinner's the time to put to you!

Special Offer

Wonder Paper is made by the makers of the famous PARAGANI lacey enamel paper in the Green Box. Most grocery, fancy 'n and department stores sell Appleford Wonder Paper. If yours doesn't, just send the coupon and we'll give you a new and unique booklet entitled "Leftovers," containing one hundred recipes, as a bonus for your trouble.

Appleford Paper Products, Ltd.,
Toronto.
Enclosed find 30c for which please send me one full-size package of WONDER PAPER and your 100 recipes for "Left-overs."

All Her Children Were Troubled With Diarrhoea

Mr. J. J. Bisher, R.R. 1, Rodney, B.C., writes—"Last Summer all my children were troubled with diarrhoea, and were so bad I did not know what to do. A friend told me to give them Dr. Fowler's Extract of Wild Strawberry, so I got a bottle, and after a couple of doses you should have seen the change. The children were soon well again, and I am very thankful to your wonderful remedy. I find it the only one that relieves so easily and quickly."

If you "roll your own", use Ogden's fine cut and Chantecler cigarette papers.

CHAPTER XXXVI.—Continued

Both girls had their "premiers dancers" partners in their arms in their rooms, so that each one's morning meal was an unknown quantity to the other until they met downstairs.

"From Lady Anne?" Joan looked interested. "What does she say?"

"She says—she writes——" Here Claire hesitated and came to a stop as though uncertain how to proceed, the little puzzled frown deepening between her brows. "Oh, Joan, she had a special reason for writing—some news——"

Joan's arm, hanging sturdily at her side, jerked suddenly. Something in Claire's half-frightened, depressing air cast a thrill of foreboding through her. Her heart turned to her within her.

"News?" she said in a hoarse, strangled voice. "Tell me quick—what is it? . . . . Sister! He's not — dead?"

Her face, drained of every drop of colour, her suddenly plucked nostrils and eyes stricken with pain from a clear a certain cry from Claire.

"No—no!" she exclaimed in hasty reassurance. "It's good news! Good — not bad!"

Joan's taut muscles relaxed and she leaned against the wall as though sustaining herself.

"You frightened me," she said dully. "Good news? Then it can't be for me. What is it, Claire? Is Hick?" with him. Is—coming out here to see you?"

Claire looked——

"Yes, Hick—and Blaise with him."

Joan stared at her.

"Blaise—coming here? Oh, but he must not—he mustn't come!" she cried in her pain. "Claire, you must write and tell him not to!"

Claire looked at her in amazement.

"Joan, what do you mean? How can he stop?"

"Stop? Why, he must! He must not come! He mustn't come!" Joan's voice rose to a shrill cry. "Claire, you must write and tell him not to! You must write at once! Oh, but you must!"

"I don't feel at all sure," returned Claire, laughing a little, too, in spite of herself. "You've looked lately as though you wouldn't take very much of anything—good or bad—to kill you."

"Well, it would now," Joan sentenced her solemnly. "But all the powers of darkness could not prevail against me, I verily believe." Then, pausing, frowning a little. "How beastly it is, though, to feel unequal to being happy because someone is dead! It's indecent. Poor little Nesta! Oh, Claire! Is it hateful of me to feel like this? Do say it isn't, because——because I can't help it!"

"Of course it isn't," protested Claire. "It's only natural."

"I suppose it is. And I really am sorry for Nesta—though I'm so happy myself that it sort of swamps it. Oh, Claire darling"—she flung her arms round her sister and sheer gladness of soul bubbling up again into her voice—"I'm going to kiss someone and—and, it'll have to be you! And look! Those two may be here any moment—Lady Anne said so. I'm going to make myself beautiful—if I can. I wish I hadn't grown so thin! The most ravishing frock in the world would look a fright on a skeleton! Claire, what's the matter?"

Still, I'll do what I can to conceal from Blaise the hideous ravages of illness. And I'm not going to ever time. And I'm not going to ever mind myself"—with a hideous laugh at sackcloth and ashes! I won't I won't! I've got the darlingest frock upstairs pearly and soft, shimmering. And yet such a death seems quite in the picture with her lustrous, wayward mane! Oh, Claire, I'm so happy, and I'm so sorry! Somehow I can't be sad. I have—I know—sadly—that Glyn would understand."

And if he knew anything at all about it—and one would like to think he did—it is quite certain Peterson would have approved his daughter's decision. A heir to his heavy responsible spirit, the idea of a woman going to meet her lover of whom a malign fate had so nearly robbed her, together, and in the noble habitments with which she had paid Sisi tribute to her father's death, would have appealed to him as the most honourable, gracious and irreconcilable.

So that when at last a protracted whistle, clamorous and shrill, at the Green Dragon in the village below, stood slowly up the hill Hick followed and Blaise and Nick climbed down from the dickey, and a stout, elderly moon-grey figure, which might have been observed standing within the shadow of a tall rose-bush and following with straining eyes the small-like program of the old-fashioned carriage up the steep white road, fitted swiftly back into the shelter of the house. Claire, dimpling and smiling at the great gateway of the castle, alone received the travellers.

"Go along that corridor," she said to Blaise, when they had exchanged greetings. "To the end door of all. That's the sun-parlour. You'll find Joan there. She thought it appropriate"—meaning to him——

Then, as Blaise strode down the corridor indicated, she turned to Nick and asked him with an adorable coquetry why he, too, had come to Saturnia?

"I've heard it is the House of Dreams-Come-True," replied Nick promptly "It seemed a likely place in which to find you, most beautiful."

"Oh, am I that —really, Nick?"

"Of course you are. The most beautiful in all the world, Claire"—lashing his arm into hers here—"tell me, how is the 'soul-reloading' process going on? that's why I came, really, you know. I'm tired out if you had consciously finished redecorating your interior?—I am vouch for the color scheme myself—but I've had a glance at the fluffy sub-blonde hair and pure little Greuze profile.

Claire rubbed her cheek against his sleeve. To a woman who has been for four months limited almost exclusively to the society of one other woman —the rough 'lost' of a man's confidences (more particularly if he should happen to be the man) and the faint fragrance of tobacco which pervaded his form an almost delirious combination.

Claire bended down her flag precipitately.

"I'm ready to go back to England any time now, Nick," she murmured.

"Are you? During! How soon can you be ready? In a week? Tomorrow? Next day?"

"Quite soon. And meanwhile, mightn't you—you and Blaise—stay in a bit at the Green Dragon?"

"We might," replied Nick unkindly, quite omitting to mention that Blaise's presence had been precisely their intention when leaving England.

Meanwhile Blaise and made his way to the door at the end of the corridor. Outside it he paused, overwhelmed as by the sudden realization that he stood that wooden barrier by but ground—Paradise! And the Adam with the Flaming Sword stood at the gate no longer. . . . .

She was walking for him over by the window, straight and slim and tall in her mouse-grey, her hands hanging in front of her tight-clasped like those of a child. But her eyes were woman's eyes.

(To Be Continued.)

Persian Balm is magical in creating and allaying complexions. A little goes a long way. Softens and skin is invigorated and touched with the true beauty of youth. Charmingly fragrant. Delightful to use. Cools and caresses the skin. Relieves all roughness and sunburn caused by weather conditions. Tones and stimulates. Enhances and protects the loveliest complexion. Unrivalled as a perfect aid to beauty and charm.

Britain's Oldest Woman

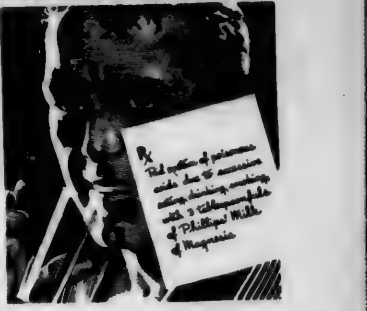
Never Could Be Persuaded To Swallow Her Age

Mrs. Archelle Bridgman, who has just died at The Laurels, Clewer Windsor, at the age of 108, was believed to be the oldest woman in Britain—but she never admitted it.

She refused to put her age on any document—even the census paper—and she would not fill up income tax forms.

She had lived at The Laurels for more than 50 years, but she always refused to have gas or electricity in the house, which was lit by candles.

MORNING AFTER



Eat, drink, and be merry! No need to feel "sunk" next day. Take a laxative dose of Phillips' Milk of Magnesia when you go to bed, or with your breakfast orange. It aids stomach and bowels of all lingering poisons. No headache. No nausea. Not even a control tongue. Get the genuine Phillips' Milk of Magnesia; substitutes are not the same.

ALSO IN TABLET FORM. Phillips' Milk of Magnesia Tablets are sold in 25c and 50c packages. Each tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

Regular Meeting Of The Town Council

A regular meeting of the Council of the Town of Fort Saskatchewan, was held on Thursday the 3rd. instant at 7:30 p.m. Present:—Mayor G. T. Montgomery, Councillors, Simmons, Gaul, Lobreau, F. W. Smith and Pillmore.

The minutes of the last meeting held were read and adopted.

The following accounts were passed. A. Nicoll $2.75 for repairing tools; Bank of Montreal Service Station $5.00 for gas and oil; J. T. Lalonde relief $20.00; Western Municipal News $2.50 for office supplies. R. Buchanan work with team $3.50; Fort Hardware Co. $1.05; Alberta Government Telephones $7.90, Calgary Power Co. $125.56, electric light for streets and town hall. 3 special constables at $2.50 each for duty on Hallowe'en. Royal Cafe $1.00.

The Secretary was instructed to advertise in local paper for tenders for 50 tons of coal, more or less, lump, either double screened, single screened, mine run, or stove coal. Tenders to be in the Secretary's hands by noon of the 17th. Instant.

The Secretary was also instructed to get tenders for 50 Sanitary Buckets to be in by noon of the 17th.

The application of E. Hallam to purchase lots 6 and 7 in block 12 was approved by the Council, the price of $5.00 each was set for same.

The Council had under consideration the matter of the disposition of certain properties which are at the moment under the Tax enforcement Act. The application of one party for permission to remove a building from land under this Act, on his paying the taxes on said building only, did not pass the Council.

J. B. Allison of Granum, Alberta, Grand Master of Alberta Pays Visit to Fort Lodge No. 14, I.O.O.F.

The Oddfellows and Rebekahs of the Fort were honored by a visit from the Grand Master of Alberta, J. B. Allison on Monday evening, Nov. 7th. Mr. A. W. Cosford, D.D.G.M., with a number of Oddfellows and Rebekahs from Lamont came to hear the Grand Master speak.

After an interesting address, the balance of the evening was spent by a large number of people, playing bridge.

The prize winners were announced after lunch.

Those winning prizes were:
Ladies 1st. Mrs. E. Kelterborn.
Consolation, Mrs. Fontaine.
Gents 1st. Mr. C. Thomas.
Consolation, Mr. Taylor.

The proceeds of the evening were donated towards a fund in aid of those who may be in need of relief this coming winter.

Alberta Teachers Alliance Branch Formed Here

On October 19th, a meeting was held in Fort Saskatchewan of teachers from the town and surrounding district.

After some discussion on the advisability of forming a local of the Alberta Teachers' Alliance it was decided to go ahead with the work.

An election of officers resulted as follows:—

President, Mr. Griffin of Josephburg.

Vic.-Pres. Miss F. Fleming of Fort Saskatchewan.

Secretary, Miss A. White of Fort Saskatchewan.

Press Rep., E. H. Anderson of Fort Saskatchewan.

It was decided to hold the next meeting in the Fort Saskatchewan School at 7:30 p.m., Nov. 16th.

All teachers around the Fort able to attend are cordially invited to do so.

St. George's A. Y. P. A. are holding a dance in the Municipal Hall on Friday, Nov. 11th. Good music. Refreshments, Admission 50c.

Much Business Done At School Board Meeting

Minutes of a regular meeting of the Fort Saskatchewan School Board held in the Council Chambers on Monday, 7th, of November, 1932.

Present:—Mr. F. Atkinson, Chairman, Trustees, Mr. R. Todd, Mr. R. A. Carson, Dr. Grosnert and Dr Pillmore.

The minutes of the last meeting held were read and adopted on the motion of Mr. Brown.

The Chairman reported that Mr. McLean the Warden of the Gaol, had kindly sent some men to put the school grounds in shape for the trees to be planted in the spring. It was moved by Dr. Grosnert and adopted that a letter of thanks and appreciation be sent to Mr. McLean.

Letter from Inspector of Schools, Mr. C. H. Robinson regarding the 1932 School Festival was discussed at length by the Board; finally the Chairman appointed Dr. Grosnert and Dr. Pillmore a committee to consult with the School Staff and consider the practicability of the school being represented at Smoky Lake, and report at next meeting.

It was moved by Mr. Brown and adopted, that—the Secretary be instructed to advertise in local paper for tenders for 100 tons of coal, more or less, double screened or single screened. Tenders to be in the Secretary's hands not later than noon of the 16th. of November.

A special meeting of the Board to be held at 7:30 p.m. on the 14th. to consider the tenders, and any other business requiring attention.

Principal Anderson was present and submitted attendance and other reports, and received directions from the Board regarding certain school matters. The Board decided that High School Recess will be closed on the 11th. and 18th of November. The two teachers attending the Northern Alberta High School Teachers' Convention in Edmonton. All the rooms in the School will be closed on Remembrance Day, Friday, November the 11th.

Authority was given by the Board to have necessary repairs done to the furnace, and to electric light and blinds in the Principal's room.

The following accounts were passed for payment on motion of Dr. Calhoun:—Secretary Lumber Ltd. 98c; Jones, Graham & O'Brien $1.68; A. C. Brown $7.20; Purchase of 1 tin of plastic wood 40c; F. W. Smith, School supplies $60.39.

The meeting adjourned on the motion of Dr. Calhoun.

Monetary Systems.

Individuals the world over have always discussed money. They have always been interested in money. But the vast majority of people in years gone by never bothered their heads very much about monetary systems, and they long worked. They knew that their country was on "a gold standard," but they did not trouble to find out and understand just what that meant. They knew that Governments and banks issued paper bills and that these bills were money. But the main thing one and all were concerned about was how many of these bills they could get in return for the produce or the services they had to sell, and how far these same bills would go in buying the goods or services they found it necessary to buy Of the system behind the issue of these paper bills they averages person knew little and cared less.

Today this indifference has disappeared. Many other things in this rapidly changing world. People are still interested in money, how to get, how to spend it, and what it will purchase for them. But they also want to know about the whole system bank of the issue, circulation and exchange of money. The people of the world have been awakened with a jolt to a realization that the monetary system is not working as it should work in the interest and welfare of mankind, and ever hear the opinion expressed on every hand that money has become the master and not the servant of mankind, that instead of remaining a mere convenience in order to expedite the exchange of the world's commodities and services, it has itself become a commodity; and, that being the case, the people want to know who controls the production of that commodity,— money.

As a result of this aroused interest, everybody is talking about monetary systems. People are debating the subject wherever they congregate it or not. The number of theories, opinions, suggestions and remedies are legion. The out-numbered all the monetary and banking systems of the world. Most of what is said, and is even being soberly advanced as a panacea for the world's ills, is based in the most profound ignorance. The "cures" being offered would prove far worse than the disease they would seek to cover cure.

Out of the confusion of ideas and suggestions and so-called solutions, one thing emerges. It is this: That no one knows what is responsible for the cause of the financial embarrassment and cure the malady from which it is suffering. There may be persons who honestly think that their pet theory will work where all others have failed; that a nation can, of itself, remedy its own ills, and that even a subordinate department of a single nation can do so, but all history proves the fallacy of any such notion.

In our dilemma, the safe thing to do is to take a middle-course,—not to take the theories of the bankers on the one hand, nor the theories of cranks on the other hand, but rather to weigh well the opinions and advice of impartial students of world economics, men trained and having experience in the weighing of causes and effects, men who have no axe to grind, but who desire that solutions be reached based on solid facts and economic truth.

There are such men in most countries, and outstanding in this group in the world today is Professor Gustav Cassel, of Sweden. He is an originator, not merely an exponent of a great deal of modern economic thought. His counsel has been sought by central banks in many countries, by governments and by the League of Nations. His opinions cannot be lightly discounted. He was invited to deliver the Rhodes Memorial Lectures this year at Oxford. There were three lectures dealing with the gold standard and the break-down of the world's monetary system. These lectures have now been published in book form.

One Canadian reviewer of this book says that Professor Cassel misses no words in these lectures. There are none of the cautious phrases and complicated qualifications to which one is accustomed in the writings of economists. He speaks as one having authority and absolutely knowledge that his subject has been carried beyond the bounds of controversy. Professor Cassel first shows that gold has ceased to impart value to money and that its automatic regulation of the value of money has given place to bank policy as a means of regulation. "For a true understanding of the managed money system," says Professor Cassel, "it is of fundamental importance that we should realize ourselves familiar with the fact that a national currency ceases to depend on more than a paper currency and that the management of a gold standard only means that this currency, by a deliberate monetary policy, is kept in a certain parity with gold." He goes on to show that the ratio of gold fixed is then determined by the monetary policy of the leading gold country, and he lays the blame for the great fall in world prices upon the monetary restriction policies of France and the United States.

Professor Cassel points fun at the sympathetic old gentleman who will not entertain the notion of a "managed money" and talks largely about "sound money," by making it absolutely clear that we already have a managed money. In fact he attributes a great deal of our grief to the fact that not only is our money managed, but that it has been very badly managed. After pointing out the amount of intelligent co-operation that is needed to make even a reformed gold standard work, he concludes that gold must, in the circumstances, be regarded as singularly unsuitable for use as a standard of value.

Professor Cassel completes of the loose and unintelligent use of the word inflation, which does not mean what the press think it means. An examination of the legal basis for money does not necessarily produce inflation. Inflation, he thinks that some inflation would be a good thing. The best thing that the gold standard countries could do; he says, "would be immediately to start an inflation of their currencies. Remember, it is no crank who proclaims this, but one of the world's leading authorities, a matured man, and one whose influence has been established and proven.

Palpitation of the Heart Nerves Hurt - Could Not Sleep

Mrs. Fred Hughes, Smith Corners, Sask., writes:—"I am bothered with palpitation of the heart, and my nerves were so bad I could not sleep.

I was getting desperate and confided my trouble to a friend who recommended me to use Milburn's Heart and Nerve Pills. I purchased a box and got such relief I would gladly recommend them to all who are troubled as I was."

Price 50 cents per box, 3 boxes for $1.25, all dealers or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

U.S. Bank Failures

Count All Re-Opened on Business

September Says Investigator

All American bank failures cannot be blamed on the business depression, Dr. Charles O. Hardy, of the Brookings Institute, reported after an intensive survey.

He estimated that in the decade 1921-1931 there were 8,704 bank insolvencies in the United States, or 39 per cent. of the number of banks in operation at the beginning of the period.

Hardy blamed "the inherent banking instability" on:

"The whole system of pyramiding a vast array of obligations which technically or practically, are payable on demand on a shoestring basis of cash and an even slenderer basis in the form of stockholders' equity. This dependence for solvency is placed on assets which can only be liquidated by transfer or by wholesale destruction of monetary values."

He concluded his survey with the assertion that "while the United States is not the only important commercial country which has become insolvent it is the only one in which they are allowed to fail."

HAD RHEUMATISM FOR 20 YEARS

But Gone Since 1930

This man must have something like a record for suffering. He says:—"Since 1910 up to 1930 that is 20 years I have been a great sufferer with rheumatism. I am pleased to say that since 1930 up to date, I have been free from that dreadful pain, simply by taking Kruschen Salts each morning also. I must say that 20 years is a long time to have that awful rheumatic pain about me." (F. P.

Your rheumatism is just like his everyone else's. It is caused by sharp-edged uric acid crystals getting into your joints. Kruschen will dissolve those crystals away. Furthermore—if you keep up the "little daily dose" every morning, it will never be possible for them to form again. Rheumatism will be gone for good.

Simplicity Needed

It is to be hoped that higher education is not clog to result in a condition of two of individuals who prefer to say: "I proceeded to my residence and pursued a volume," when they might just as well admit: "I went home and read a book."

for NEURITIS

Pain means all!

MINARD'S KING OF PAIN LINIMENT

A Real Benefactor

Portland, Ind., erects a stone shaft memorial to Hiram Hughes as tribute to one of the modern benefactors. But what a lot of shafts a grateful public would be willing to erect to anybody who invented an automobile that would stay indoors for more than two months.

Preston Rubber invents every week a new automobile. Dalhousie fire-proof. Cooling and heating. Dispels all roughness or choking. Makes skins glow lightfully soft-textured. Every woman should use this positive toilet requisite. Dainty—Refreshing—Delightful.—Persian Balm achieves these in every instance. Softens and whitens the hands. Promotes clear and youthful complexion. Send 10c (coin) today for additional cleans unbelievably shown Persian Balm.

The Bright Side

You can always find some excuse for looking on the bright side of things. For instance, we are so glad on a cold day to see that we are not the rabbit called by the hounds.—Montreal Premier Craig Heinz-Star of Jazzmaniacs was in conference with Foreign Minister Rabih Child-Tub.

Worms feed upon the vitality of children's blood and destroy it. Use Miller's Worm Powders. A simple and effective remedy to kill or expel Worms Recommended.

"Did you say CRISP?

Just try one"

Such crispness, flakiness, freshness are found only in Christie's Premium Soda Crackers. They furnish just the salty tang for soup or salad . . . just the crisp base for cheese or jam.

Pays Fine Tribute

Frank Frawley Pays Homage To German War Dead

Premier Edouard Herriott, of France, paid tribute to the German war dead in an address dedicating a new municipal hospital.

"Here in Lens," Herriott said, "then 75,000 Germans war dead who were undoubtedly men taking only to live in tranquility. Let us confer on them the homage that we have conferred on our own dead. France has not hatred for her former enemies What our country wants is a plan for pacific organization which will obtain from everyone, a renunciation of arms."

War Debt Cancellation

United States Would Profit If They Would Agree To It

Senator Borah estimated that the economic depression has cost the United States $30,000,000,000 (about $10,000,000,000). Such calculations are necessarily conjectural, but the loss has certainly been fabulous, and must continue so long as the world's financial machinery is thrown hopelessly out of gear by the attempt to transfer huge payments of war debts. That is at bottom the positionedge of the seeming paradox that it will handsomely pay the United States to cancel her war debts.—London Daily Telegraph.

Canadian Theatres Safe

Have Highest Rating In Respect To Fire Risk

Reports from Ottawa show that the theatres in Canada now have the highest rating in respect to fire risk of any property This fact was brought out in the report just issued by J. Grove Smith, Dominion Fire Commissioner.

The report further shows that there were only 19 fires in theatres in the last year and not one of them of a serious nature The total fire loss was only $4,300.

The report gives high credit to the type of men engaged in the business of managing theatres in the Dominion. Mr Smith stated that nowhere in the world did the managers take the precautions to safeguard their patrons as in Canada and particularly in Ontario. When one stops to think that over 3,000,000,000 feet of film was shown in the close on to a thousand theatres in Canada last year this small fire loss is remarkable. — St. Thomas Times-Journal.

Easy Teething

"Baby cut all his teeth with no trouble, thanks to BABY'S OWN TABLETS," writes Mrs. Thomas Hay, Hamilton, Ont. Scores of other Mothers have written in similar vein.

CUNARD ANCHOR-DONALDSON

Inter-Provincial Ploughing Match Held At Ottawa Was Attended By Thousands Of Spectators

It would seem that the present generation here by no means lost veneration for the oldest of all industries—the tilling of the soil—and a demonstration, of how this ancient history should be done in this day and generation, was almost enough to bring out to attend big league baseball or football games. An inter-provincial ploughing match was held recently at the Canadian Government Central Experimental Farm, on the outskirts of Ottawa, and many thousands attended to watch the competitive events during the four days the meet was held On the last day more than 10,000 persons were present to see the finish of the final contests, when fifteen men ploughed from one end to the other of the large field, as straight as a gun barrel. The ploughs, which, when not use upon to horse and tractor ploughs, demonstrated that the farm horse is by no means on the way to join the Dodo or the Great Auk; indeed, the consensus among farmer feels is that the farm horse is steadily plodding his way towards the plane of his former popularity.

The Inter-Provincial Ploughing match was formally opened by His Excellency the Earl of Bessborough, Governor-General of Canada, who tried his hand at ploughing a long, clean, straight furrow and made a good showing for an amateur. The plough used in the contests were modern implements, greatly improved on the first cast iron plough made in Canada more than 150 years ago. This distinction of making that implement belongs to Jonathan Pitman, a native of Lisle, Broome County, New York. In 1836 he moved to Chippewa, Ontario, near Niagara Falls. He was poor, but had an idea that cast-iron ploughs would be more serviceable than those of wood and wrought iron, which were then in general use. He gathered together scrap iron, constructed a rude furnace and cast his ploughs, which proved to be models of lightness and durability. The demand for his ploughs soon became great. In 1837 he died at the age of 50 years. His business was carried on by a Mr. Mackinon. In three years Parsons made a net profit on the sale of his ploughs of $9,000.

Canada's Flour Exports

Substantial Increases In Shipments To United Kingdom Is Expected

In 1931 Canada sent 2,226,450 barrels of flour to Great Britain out of a total importation by the British of 6,141,190 barrels. The United States sent 1,167,190 barrels. It is expected that Canada will increase substantially her exports of flour to the United Kingdom.

In 1931 Great Britain imported to the equivalent of 225,000,00 bushels of wheat. With the flour and wheat preference granted through the agreements, the wheat exports from Canada to the United Kingdom are expected to increase by many millions of bushels.

And as the wheat industry is one of the chief importers of Canadian prosperity the advantages granted to wheat and flour are hoped to prove important factors in the national recovery.

New Style in Eggs

Pure White Shells and Pale Yellow Yolks Now Correct

When we speak of good taste in eggs we usually mean gustatory, or at least, olfactory taste But butter and egg men declare the visual taste is the selling appeal to eggs, now-laid eggs, fresh eggs or eggs. Hens are, perhaps, more conscientious than is the public in the announcement that current style in eggs from the poultry yard this coming winter demands pure white shells and pale yellow yolks. R. S. Kilbourne, president of the United States Egg Men's Association, is quoted as authority for that statement, which makes it evident that esthetic considerations enter into the marketing of eggs. Of course we Canadians have as many protective laws and inspectors always working that our eggs must be always in good basis for breakfast table manners. At least, legally, no warranted eggs can enter a home unless daily is needed according to class.

Still, we don't know where that Chicago expert gets his fashions for hens and their eggs The egg public is not directly amongst about the date of the packing of the eggs and style it doesn't go by shells, beige tint, sun tan, or what not A pallid yolk is not a worrisome as long as the parting between the hen and the cup is moderately brief However, the golden yellow of an egg is rather appetizing to even the less dilettanic, though a mere egg-eater might not notice the warm pastel shades of the yolk as it slides down his throat. Farmers' wives in this section of the egg's public with a strong leaning to the belief that strenuous application of steel indicates richer and more nutritious content. The chemistry persons deny that fancy At the same time boarding house keepers say that for citizens eggs bachelors to satisfy boil their white eggs in coffee and produce the beautiful rich warm tones natural to hen fruit of good taste. Moreover, the average egg consumer will never believe Chicago designers can decree a fashion in eggs, to keep to the depression.—Brandon Sun.

Indian Sailor Was Brave

Saved Salonician Crew With Great Danger To Himself

Sailor Giuseppe Valsecchi has got a silver medal because he thought of others and forgot himself. The submarine N-4, the award disclosed, started to go down with the conning tower open off Taranto. Valsecchi, on the tower at the time, leaped to the deck and closed the hatch, from the inside, and left himself in the sea ocean and was nearly dead when picked up. The submarine later returned safely to the surface.

New Process Being Perfected For Producing Synthetic Lumber Stronger Than Natural Product

Alfalfa Makes Good Pasture

Not Necessary For Farmer To Harvest Second Crop

We once heard a man say that he did not grow alfalfa because "it makes too much haying." Sometimes we think he was right Ordinarily it is a fine thing to get a second and a third cut of alfalfa, but the best haymaking season is over when they come and curing is often a problem. This year, after taking off 150 loads of hay, we were not at all enthusiastic about a second cut. we had four fields that would have yielded another crop, but only two of them were harvested the two smallest and we made ourselves think that the other two were needed for pasture, as indeed they were for the pasture season was only half over at the time. Farmers rarely have too much pasture, and the two fine stock will usually take care of any second or third cutting that a weary farmer does not care to harvest. Where alfalfa will grow there is no second argument against it. — Farmer's Advocate

The Pride Of London

Life Guards Have Come Back To Old Barracks

The Life Guards are once again back at their old barrack quarters in Knightsbridge They have been stationed there for about 200 years. Troubles was broken the other day when for various military reasons, the Knightsbridge barracks, the oldest in the country, were vacated by the mounted six-foot troopers and taken over by a battalion of Foot Guards. Strangely enough, it has been London residents' traffic conditions that have restored the Life Guards to their old home They are much closer to Whitehall at Knightsbridge and their daily progress to and from mounting guard at the old Whitehall hit-yard offers less obstruction to the roaring motor traffic. It is said the order posted up inside the Whitehall sentry-boxes where the Life Guards mount guard, which identically the same as they were more than three centuries ago.

A photograph taken at a recent social gathering in Scotland revealed that only one man was wearing a kilt, and he was an Englishman on his first visit to Scotland.

An Aristocratic Horse

Valiant At a Thousand Guineas Is One Of Untried In World

One of the most beautiful, cleverest and smallest backs in the world is to be seen in Hyde Park's Rotten Row most mornings just now.

This horse belongs to Wilson Cross, chairman of the American Club in London, and president of an oil company It is a full-mounted, full-tailed bright chestnut, six years old, and valued at a thousand guineas, and Mr. Cross has just brought it from the United States, where it has been winning big prizes in a special class unknown to our horse shows.

It belongs to the type that American calls "a five-gaited horse," which means that in addition to the walk, trot and canter or gallop, it has been trained to two special intermediate paces a walk and a trot in which the legs move all four in sequence instead of in two pairs.

This special gait is taught by American cowboys to their mounts because for long-distance riding it is so easy to sit a-trot—the rider being able to sit still in his saddle instead of rising to the motion of the horse. London Sunday Pictorial.

Something To Know

To prevent glass bowl from cracking when hot custard or stewed fruit is poured into it, wring out a large flannel in warm water, fold in two and stand the bowl on the middle pouring. Glass has been heated. Glass has may be safeguarded when hot pies or preserve is poured into them by the same method. When a number of jars are to be filled a piece out of a warm blanket is convenient, as it is thick and does not require folding.

Value Of the League

Also Accomplished Much in the Years Of Its Existence

We have had the League of Nations only a few years now, and in that short time it has done much. It has bound up some wounds of the last war, cured some ills of the present, and prevented some evils for the future. It cannot attempt impossibilities all at once: to give peace in twelve years to a planet which has been distracted by war for more than double that number of centuries. It can only attempt what a cable-and master of its supporters want it to attempt. The real danger in this crisis in its affairs is not of too slow progress but of its falling back through inattitude and ignorance on the part of Governments and peoples into a state where nobody cares whether it lives or dies. That must not be, the world would have no use for an agoraphobic survival, lingering on like a Holy Roman Empire or a Holy Alliance long after that life had left it.—Manchester Guardian.

Using Food For Fuel

Nebraska Engineering Co Heat School Buildings With Corn

Down in Hemet, recently, they were burning surplus stocks of coffee just to get rid of it, as they do not need fires in that part of the world, except for cooking purposes. But out in Nebraska artificial heating is necessary during a good part of the year and the school commissioners in one district have decided to heat the court house and all school buildings under their jurisdiction with corn next year. They figure it will provide a ready market for the farmers' surplus crop and, incidentally, give the county some money at the same time. They estimate they can purchase corn, still on the cob, at 20 per ton, while coal costs $12 a ton.—Moncton Times.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile Without Calomel

You are taking poor, sluggish bile into your system. Your liver is not working right. What you need is a liver stimulant that will get the bile moving. Calomel is a dangerous drug that gripes and makes you sick. Don't take it. Ask your druggist for Dr. Chase's Liver Tablets. They are a liver stimulant and bowel regulator. Dr. Chase's Liver Tablets are sold under a positive guarantee. Price 25c per box.

Japan and Britain

London Mail Is Opposed To Any Anti-Japanese Proceedings

On behalf of this country it should be clearly stated and generally recognized that we do not intend to be involved in any anti-Japanese proceedings. The British nation will have nothing to do with such criminal history. It regards Japan's presence in Manchuria as being as rational and salutary as that of Britain in India or Egypt.—London Daily Mail.

A trim smart looking dress in this cool cotton that could easily be worn for dress as well as school. It depends upon the material you choose to fashion it.

Her simple, it's distinctive and practical mode of a wine-red wool crepe. The tie is of white crepe with white silk or of white pique, and attached to the neckline so as to be readily removed for laundering.

Then again, it's just precious carried out in velvet for "best."

SUNDAY SCHOOL LESSON

NOVEMBER 13

MAKING A LIVING

Lesson: Deut. 24:19; Matt. 6:25-33; Mark 6:3; Luke 12:13-21; 19:1-10; 2 Thessalonians 3:6-13, 1 Timothy 6:6-16.

Devotional Reading: Proverbs 30:7-9.

Explanations and Comments

Remonstrance Of Injustice and Oppression, Amos 5:11-13. The prophet Amos is addressing the judges who "trampled upon the poor" by exacting from them a share of their scanty substance in payment for justice. They shall reap what they have sown. Adams tells them, they shall reap fire in the houses of hewn stone which they have built, nor drink the wine from the vineyards they have planted. The prophet sees the approaching downfall of the kingdom of Israel.

Recall the observation of Lamartine that man never fastened one end of a chain around the neck of his brother that God did not fasten the other around the neck of the oppressor.

I know how manifold are your transgressions, and how mighty are your sins. Amos exclaims, that God accuses them of accepting bribes from the rich, while they refuse to the needy due, and of withholding their rights from the needy who could not pay a bribe. The "gate" refers to the city open space before a city gate where claims were adjusted.

"Representative government, democracy, the world under Hamil', exist in no greater danger than that threatened by the brute-giver and the bribe-taker. When both are passed or denounced by money secretly paid in court, when justice is sold and the poor are robbed of elementary rights, then no system of government can endure and disorder are undermined."

Therefore he that is prudent . . . shall keep silence in the same time; for it is an evil time. The evil days were in power, and it was impossible for others, as, they thought, to do anything. Nothing bad and he would only get themselves into trouble in such a time as has just been described.

"Life is God's sacramental gift
To man for his enjoying—
The talent given into his care
For his soul's convening—
A sacred trust bestowed on him
For his immortalizing
And he alone who loses it one day
His own again with interest,
Due to it then, but then be found
Of those who failed Him here."
—John Oxenham.

How Orientals Do It

Japan Has Spies and Secured Warship Up To China

For a year undeclared war between China and Japan has been going on, all the time in Manchuria and for two months in Shanghai.

But Japan has just delivered at Shanghai a first-class warship which has been building for China since last May, 1931. Japanese warships are in port and threatening action if the anti-Japanese boycott have does not cease, and while a section of the Japanese fleet lies in the river at Shanghai the new Japanese-built Chinese warship planes up-river and is taken over by the "enemy."

The new vessel is a destroyer of 1,600 tons, costing $2,000,000, has a crew of 80 hands and represents an advanced type of naval craft. She is called the "Ningpo."

There is no "L" in the Japanese language and so "R" in the Chinese, so John Dickinson say "All right" and the Japanese enemy says "Alright."

Building Each Car

Sir Malcolm Campbell is building 6 1,000-horsepower automobiles with which he intends to attempt to better his one month's record of 239 miles per hour. The car will be equipped with a Rolls Royce Schneider cup trophy engine similar to the ones used in setting the world's air speed record and is expected to reach 300 miles an hour

By Lydia E. Pinkham's Vegetable Compound
Cried Herself to Sleep
All worn out . . . aching headaches make life down every month. Nic needs a tonic . . . Lydia E. Pinkham's Vegetable Compound relieves cramps.

NEW INVENTION DOES AWAY WITH COOKING ODORS
Even fish and cauliflower now boon to Canaper Cookery Parchment
BETTER, CHEAPER AND EASIER COOKING
Delicious as cauliflower, cabbage and cornbeef, when vegetables are, they have always been unhealthy, as people who previously tasted them. Not so nutritious when boiled as either the odor escaping carries the nutrient product. The same thing is true of fish.
Canaper Cookery Parchment, a very ingenious invention, does away with this unpleasantness. Just by wrapping in it, odors, it also retains flavor and juice. Cooking is greatly simplified and parallels the famous French method of cooking en papillote, leaving food and its flavor in the closed casserole.
You buy Canaper in a large envelope of handy size sheets which may be stored and used over and over again because they won't shrink when boiling vegetables you simply wet the Canaper and make a bag similar to a pudding bag. If you steam them, you line the steamer with Canaper, arrange food and seasoning, and fold back corners of the Canaper to prevent moisture from dripping back. You can actually cook three vegetables at once in the same steamer, each in a separate Canaper bag. Meat, fish, eggs—not overcooked.
Steamed, or boiled, fish comes out firm, moist and retaining in its own juice. No shrinkage. No stale steamer or saucepan to clean up afterwards.
Line your roasting pan with Canaper, unless the fats and juice can't burn. Baking is more economical and there is no scouring or scraping of the pan afterwards.
Many women use Canaper for a dish cloth —it is so silky and satisfactory, and doesn't spread lint.
You'll never be without Canaper once you start using it. It saves time and money, and is the favorite method of the famous PARA-SANI Henry Wemal Paper in the Green Box.
Special Offer
Most grocers, druggists and department stores sell Canaper. If they haven't yours doesn't, just read the coupon and we'll give you a new and unique book entitled "Leftovers" containing one hundred recipes as a bonus for your trouble.
Sanitized Paper Products, Ltd., Montreal, Canada.
I endorsed find 25c for which please send me a copy of your new booklet entitled "Leftovers" containing one hundred recipes for "Left-overs."

FARMERS ASK FOR LIMIT ON OTTAWA PACT

Dauphin, Man. Limiting of the imperial preference agreements to the "life of the present parliament" unless a mandate is obtained from the people continuing the five-year term they now maintain, is demanded by the United Farmers of Manitoba in a resolution unanimously adopted at the annual convention today. The resolution declares the present policies "no redress to agriculture, be discontinued."

Another resolution bearing on international problems was adopted when, after lengthy debate on currency, a motion was adopted urging the dominion government to maintain the rate of exchange on the pound sterling at a parity of $4.86⅔.

Dissatisfaction at further reductions in lake freight rates, and the encouragement of shipowning via the Hudson Bay route, the dominion government to handle the traffic if necessary during the initial development, also received the support of the convention.

Wheat Surplus Increasing

Some Institute Report Shows 116,000,000 Bushels Carry Over

Rome, Italy.—Exportable surplus of world wheat are inferior to 1931 by 60,000,000 bushels, the International Institute of Agriculture reports.

This drop is offset by a fall in the probable requirements of importing countries of 176,000,000 bushels. This situation has been caused by poor crops in the exporting countries and good crops in the importing countries, coupled with an abundance of rye, corn and potatoes, the institute report says. Stricter regulations of international wheat trade have also played a part.

The total available for export is fixed at 1,300,000,000 bushels, and this amount 570,000,000 bushels are not wanted, said 780,00,000 bushels represent the new crop surplus.

Since the old exportable stocks are adequate to meet almost a no-tenths of the needs of importers, presumably the entire surplus of the 1932 crop will be carried over for consumption in 1933 and 1934.

It is estimated the existing stocks have increased by 116,000,000 bushels.

Jobless in Toronto

Mayor Asks Premier Stewart To Care For Transients

Toronto, Ont.—It is the duty of the Dominion Government to care for jobless men who arrived by train from Winnipeg, Mayor W. J. Stewart declared, and wired Premier R. B. Bennett that the government should provide for transportation of the men to their homes.

The number of arrivals was variously estimated as high as 800. Mayor Stewart, in his telegram, reported arrival of 60 on one train and said he was advised another train had arrived with a larger quota. . . . He claimed the homes of some are in the west.

The jobless are said to have come from different parts of western Canada, many of them from the harvest fields in the prairie sections.

Sherry Wheat Exports

Vancouver, B.C.—Vancouver is not waiting for the effect of British preference to send its wheat export totals to new high marks. During the past seven days, the weekly report of the Vancouver Merchants' Bluebook reveals, a total of 2,727,622 bushels was exported. This brings the season's total to 30,921,546 bushels as compared with 19,156,933 bushels at the corresponding date last year.

Wheat Loses Preference

London, Eng. Government official confirmed to the Canadian Press that Canadian wheat shipped in bond to the United States, pending sale and shipment to the United Kingdom, will not be entitled to the six-cents-a-bushel imperial preference formulated at the imperial conference.

The Little Information

Mystery Unable To Shed Much Light On Shortage Of College Funds

Stony Mountain Penitentiary Stony Mountain, Man. Clustered about an impromptu sick bed in a little room in the administration building of the prison, a board of inquiry and staff learned from John A. Mackay that he knew little of the financial colleges that sent him to penitentiary for seven years.

Obviously suffering severely, the former lawyer, university bursar, churchman and financier lay propped up pillows on a couch and emphatically declared he saw anyone else to his knowledge, ever profited from the financial debacle that wiped out endowment funds of the University of Manitoba and the Church of England, and prompt his own investment firm into bankruptcy.

At times writhing in pain and tossing his head with half closed eyes, Mackay lifted a shaking white hand to emphasize his declaration He had no memory of any happenings in his life, he said, and seized the opportunity, investigating $1,000,000 deficiencies in college funds, to allow him to continue his plans for providing information.

May Have Planned Robbery

Youth Arrested In Garden Of Ramsay MacDonald

London, Eng What was believed to be an attempt to rob Prime Minister Ramsay MacDonald or his home was revealed in a case in Hampstead police court.

Ivan Sevens, described as a British subject, was arraigned on a charge of loitering at the Prime Minister's home He was arrested, police said, in the garden of Mr. MacDonald's home at 5 a.m.

Mr. MacDonald rarely uses his lodge at Forgnal, near Lossiemouth, when parliament is in session, preferring to remain in his official residence at No. 10 Downing Street.

The head of the National cabinet was believed to have been at Forgnal Tuesday night, November 1, however, during the disturbance in Whitehall.

Sevens is a well-dressed, thick-set youth, who speaks English with a foreign accent. He was carrying a knife under his arms when the police found him.

The prisoner said he had just entered the garden for a look around. He did not resist arrest.

Air Regulations

Operating Plans Over Canadian Transcontinental Is Forbidden

Toronto, Ont.—The Mail and Empire in a despatch from its Ottawa correspondent, quoted J. A. Wilson, controller of civil aviation, as issuing an order forbidding operation of aircraft over Canadian penitentiaries.

The text of the order as carried by the newspaper is:

"Pilots and operators of aircraft are hereby warned to avoid flying over or near any penitentiary or like institution. In future any aircraft observed intentionally flying over such institutions for any purpose whatever will be considered to have committed an infringement of the air regulations concerning prohibited areas."

Hunger Marchers On Train

London, Eng.—Balked in their third attempt to enforce their demands, the unemployed hunger marchers," who struggled into London, turned homeward. Thirty men climbed aboard a freight train and started back for Brighton, whence they came. Other contingents also prepared to go home.

Sales Motor Ship

Woods Hole, Mass.—The motorship "Amarilla" of Halifax, with a crew of 11, was captured by U.S. coast guardsmen in New Bedford harbor, one mile from its destination.

In Charge Of Indian Affairs

Ottawa, Ont.—Dr. H. W. McGill of Calgary has taken over his duties here as deputy supt.-general Indian Affairs.

Turkey has materially reduced its consumption tax on gasoline.

Japan plans to spend nearly $60,000,000 on public works this year.

HEADS PENITENTIARY

Lieut.-Col. W. B. Mogiloughlin, M.C. of Ottawa, who has been appointed temporarily warden of Kingston Penitentiary, scene of the recent serious riots. Col. Mogloughlin served overseas with the 35th Battalion and until he resigned was Commander of the 38th Ottawa Battalion of the Militia. He is forty years of age.

Britain Lifts Embargo On Canadian Livestock

No Need To Slaughter Cattle For Fear Of Disease

London, Eng.—The House of Commons moved without division to remove the existing embargo against importation of Canadian cattle to the United Kingdom.

The House decided to lift the embargo after passing the most quota clause of the Ottawa agreements bill, 328 to 88.

Malcolm MacDonald, son of the Prime Minister and under secretary for the Dominions, explained there was no further need to exclude Canadian cattle from the country on the ground it might be diseased.

He said also the period of detention of cattle at the Canadian port, of shipment would be one day instead of the customary three days as the length of the voyage was sufficient to allow time for development of disease should it occur.

Lifting of the embargo will go into effect when the Ottawa agreements bill becomes law. The bill is expected to encounter little opposition in the House of Lords.

Car Amalgamation

Ottawa, Ont.—A new amendment to the motion for ratification of the Canada-United Kingdom trade treaty was moved by Dr. Thomas Donnelly (Lib., Huntingdon), in the House of Commons. It declares that no approval by the Canadian parliament be held to preclude the entering of this country into any arrangement which may be proposed at the coming world economic conference.

West Railway To Keep Agreement

Montreal, Que.—The city of Montreal intends to keep the Canadian Pacific Railway to its contract to keep 2,000 men employed at its Angus shops here. What amounted to an ultimatum to the railway was issued by the city following a conference.

Against Public Ownership

C.N.R. Vice-President Does Not Believe In Government Operation Of Railways

Montreal, Que.—The Star prints the following despatch from its Ottawa correspondent

"Plans put forward by E. W. Beatty, K.C., president of the Canadian Pacific Railway, and Cornard Rusk, K.C., former legal vice-president of the Canadian National Railway, for the solution of Canada's vexed railway situation were rejected by the recent royal commission on transportation in order that the scheme suggested by Sir Henry Thornton, former C.N.R. president might be adopted in its substantial outline.

"Perhaps as sensational an angle to it as any is the statement of Sir Rose, after his years of association with the Canadian National system, that he does not believe in public ownership.

"My experience of public ownership of railways has been that it means government ownership," he told the commissioners.

"You mean political ownership?" Sir Joseph Flavelle asked him.

"Yes," Mr. Rose returned.

The plan of President Beatty for the C.P.R. for the solution of the country's transportation difficulties, as revealed by the evidence, was that the government to lease the C.N.R. to the C.P.R. for a long term, or else in perpetuity. Mr. Beatty estimated that the C.P.R. management of the two systems would result in economies totalling $50,000,000 annually.

"In commenting upon this scheme, C.N.R. witnesses stated the savings would not amount, in their opinion, to more than $20,000,000 annually.

Sir Joseph Flavelle was virtually a temporary amalgamation.

Interested In Grain Show

Eastern Provinces Preparing To Compete In All Classes

Regina, Sask.—John A. Mooney, managing director of the World's Grain Exhibition and Conference, has returned to the city after an extended visit to eastern Canada in the interests of next year's world-wide cereal exhibition.

He stated that all the eastern provinces are making elaborate preparations to be represented at the exhibition, not only in the competitive classes, but also in the section reserved for provincial educational exhibits.

Interest in the forthcoming exhibition is very widespread in the east, Mr. Mooney stated, and farmers are working in close co-operation with provincial departments of agriculture to ensure the best possible grain samples for entry in the competitive classes.

No Session Till January

Saskatoon, Sask.—Rumors of the possibility of the Saskatchewan legislature meeting early in December were scotched when Premier J. T. M. Anderson stated it was extremely unlikely there would be a session until early in January. The premier made the statement on his arrival here last week.

ANGLO-SWEDISH ROYAL ROMANCE REVIVED

With the sudden arrival in London of Princess Ingrid of Sweden, Dame Rumor is again busy predicting that a royal engagement is in the offing with Prince George as the lucky man. Above is a picture of the popular couple. Prince George is the fourth son of His Majesty while Princess Ingrid is a daughter of the Crown Prince of Sweden.

HOUSE REFUSES TO DISCUSS SUN LIFE CHARGES

Ottawa, Ont.—Efforts to discuss the finances and management record of the Sun Life Assurance Company of Canada proved abortive in the House of Commons.

At a series of interruptions and general disorder, the Speaker ruled the subject was not sufficiently important to adjourn debate on the Anglo-Canadian trade treaty. And the House upheld him 136 to 80.

Minister F. Stephens, Liberal, West Elgin, sponsored the move "to investigate the present financial position of the Sun Life Assurance Company of Canada and the conduct of its senior officials as disclosed in Chicago by the recent report investigation into the affairs of Samuel Insull." Mr. Insull, now indicted by the United States government on charges of embezzlement and larceny."

A loud yell over the chamber as the leader of the Ontario Liberal party handed the Speaker a three-page typewritten statement containing his charges against the officers of the insurance company. For a minute or two the Speaker studied it, then ruled the discussion out of order.

"Read the statement," shouted members of the Progressive group.

"Let's know all about it," came from others. But the Speaker steadfastly refused to read the statement or permit any discussion.

J. S. Woodsworth, Winnipeg Labor-ite, jumped to his feet, flourishing a copy of the Hepburn statement. He declared that the Speaker was "muzzling that in his years in the House he had seen nothing "quite so arbitrary."

To Care For Jobless

Alberta Relief Commission To Take Charge Until Relief Camps Open

Calgary, Alberta.—Calgary city relief department will be closed, Monday when the Alberta government decided it would take full responsibility for single jobless men. It is expected the city's relief bill will be reduced by one-third in the number of more than 2,500. Alberta relief commission will handle the feeding and housing of the men who will obtain a free meal a day and bed tickets until relief camps are opened.

Following conversations with city officials the relief commission chairman, A. A. MacKenzie, and Mayor Andy Davidson announced the agreement whereby the provincial authorities would handle the situation. A community kitchen will be opened here, and the men will be given meals after they have registered with relief officials.

How long the arrangement will continue is unknown as it depends on when the relief camps are opened. However, it was emphasized men returning to go to the camps when they are formed would be refused any relief.

The Exchange Question

Federal Government Is Deeply Concerned About the Matter

Ottawa, Ont.—The Canadian Government is very deeply concerned about the exchange question, Hon. H. H. Stevens, Minister of Trade and Commerce, told the House of Commons. His remarks followed an amendment by G. G. Coote, (U.F.A., MacLeod), who had asked that the ratification of the imperial conference agreements be withheld until negotiations taking to bring the Canadian dollar to a parity with the pound sterling.

New Wheat Tariff

Now Duty Goes Into Effect In Germany

Berlin, Germany.—A new wheat tariff was in effect in Germany Nov. 9, imposing a 7.50 marks duty (about $1.77) per ton on wheat imported on import certificates.

This tariff will not affect wheat brought into Germany, under ordinary tariff schedules, but only that grain previously brought in duty free on certificates issued by the government against wheat exported earlier in the year.

Ice In North Receding

Conditions Are So Much All Over The World

Scientists have continued to watch our flank crews, and if they have not succeeded in doing so it is certainly not from lack of close observation." Imagination, We are constantly being told about the unpleasant things that would happen if such and such an occurrence took place in nature or if this or that were done by man in the exchanges of the solar system. One of the latest marvels is Dr. W. J. Humphreys, of the United States Weather Bureau, who declares that if all the ice in Greenland and Antarctica were to melt the water formed would raise the level of the ocean 150 feet (that is, more than sufficient to inundate a large portion of the world's land) and do no damage.

"Pooh!" says the pragmatic public, "let the ice melt, can't." "Don't be too certain of that," interrupts a chorus of geologists. "For the ice of the Frozen North is slowly receding." At certain points in the Arctic archipelago, Greenland did not have much ice, and those lands many years ago. About 1000 A.D. the Danes settled in parts of Greenland now uninhabitable because forested and then melted again. The ice has been retreating for a long time now. From the 13,- 000,000 square miles in existence at the period of last maximum glaciation there now remaining only 6,000,000 square miles, nearly a million having melted away in Antarctic. Other cheerful geologists have recently pointed out that a drop of only three degrees in the average temperature of the temperate zone would bring back the glacial period and push the inhabitable zone northward. North America, and elsewhere down to the Equator.

Simply Not Done

Nothing Is Stolen About Penal Living Years Without Ado

The book which is said to have lived for 23 years inside a cement ball at Franklin, Penn., turns out to be a mere bubble, a monkey is imagined to have lived for 20 years in a hollow tree, and the theory was evolved that it had been down there fifty to sixty years—Bylog, as it was called, "in the like" finds operating from the roots of an old tree."

This was not bad, but not good enough to hold the record very long. A professor, an archeologist at that, at Wellesley, Mass., made the rubber discovery that it is in Cornish, Devon, where he was excavating in the ruins of a theatre, he released two toads incarcerated 1,500 years ago. They blinked a bit, and then went on about their affairs.

These reports and a hundred like them which could be plotted from the news of the season, indicate of course, nothing more than the enormous capacity for self-deception possessed by the average individual, sewer-digger or professor. As the St. Catherines Standard puts it, "any load which begs mental an old building which is being demolished, or a cement wall which is being smashed up or excavated would have the impression that he found something very unusual and that it should be described and given big heads."—Ottawa Journal.

Be School In Winter

Children In Colorado Mountains Kept Busy

While school children all over the country returned to their studies after a summer's vacation, Hamilton's eleven pupils looked forward to the beginning of their annual vacation.

Hamilton, high up in the Greenhorn mountains in Colorado, is covered with deep snows during the winter months, making school attendance impossible. Instead of the usual summer vacation the children are given a vacation during the winter months.

Of 4,000 varieties of flowers native to Europe only 600 bulb an appreciable size.

Florida plants 50 Million for the Hawley trade to take September.

FORT SASKATCHEWAN, ALBERTA, WEDNESDAY, NOV. 16th, 1932

$1.50 PER YEAR IN ADVANCE

Man Sought By Police, Picked Up East of The Fort

Eli Romaniuk, insane criminal, who escaped from the Prince Albert Penitentiary Guard Tomlinson in Edmonton last Tuesday morning, was arrested at Lamont by Corporal James of the R. C. M. Police this afternoon, and taken to Edmonton. It appears that Charles Thomas a farmer living east of the Fort, was driving in his car towards Lamont when a man who came across the fields from the south, asked him for a ride saying he was going to Villeneuve. Mr. Thomas having heard the news of the escape over the radio, at once suspected that his passenger was the man wanted by the Police. Mr. Thomas made an excuse on the way to stop at a farm and telephoned his suspicions to Town Constable Stanley Dennis who immediately got in communication with Corporal James at Lamont. The Corporal met Mr. Thomas's car when it arrived at Lamont and made the arrest.

OPPORTUNITIES FOR ALBERTA EXHIBITORS

The possibility of Alberta exhibitors in seed grains bringing home to the province a considerable sum of money to prime within the next few months from four major exhibitions is stressed by E. L. Gray, provincial field crops commissioner.

Mr. Gray points out that with the Alberta provincial seed fair, the Chicago international grain show, the Royal winter fair at Toronto and the World's grain congress at Regina next July, totalling in prize money $11 seed grains more than $50,000. there should be a possibility of Alberta conquering the larger share of this money.

Preparations are now under way for Toronto and Chicago, where most of Alberta's well known seed grain exhibitors will be showing, and also for the Regina Congress, for which entries close January 21. In this world show, all the old Alberta exhibitors and many new ones, including four class of Junior farmers, will be prominent with exhibits.

United Veterans!

Last Thursday evening the Veterans held a get-together social in the Buffet Room of the Memorial Hall. It was quite a success too, thanks to the Chairman who was more often at the piano than in the chair, (you can't keep Wootton down!) and to Harry Brenton who wangled the Clarinet till the cows nearly came home, to Comrade Bell with his banjo, or is it a guitar? Major Dawson sang songs, so did most of the others! Magor and Cummings danced a Jig, or was it?

There were refreshments with (whisper it!) a wee dropple in the coffee, there was lots of fun, with toasts to the King and a silent one for departed comrades; there was goodwill, and speaking seriously, there was a pleasant evening which did more to make united Veterans than many business meetings could ever do.

TESTING SOY BEANS

Leading varieties of Illinois soy beans have been tested in Alberta this summer, following arrangements made by the provincial field crops branch to secure samples from Illinois. One bushel lots of each of five varieties were secured together with special culture from Urbana state college, and these were distributed to farmers in the Edmonton, Lacombe, Olds, Drumheller, Brooks and Lethbridge districts.

Sufficient reports have been received to indicate that soy beans make an excellent growth of forage during the Alberta season, but none of the varieties were successful in maturing seed.

Red Cross Society

The following are extracts of a letter received by our local Red Cross Secretary, Mrs. C. Reed from Mr. Norman Hindsley, chairman of the Organization Committee for the Provincial Appeal for $55,000.00.

"As it is now essential to raise funds to carry on the normal work of the Society an Appeal which is endorsed by the Premier of Alberta, will be made during the Period from November 15th to 26th.

The Red Cross Society this year will limit its services to its own particular work Health—more especially among the Juniors.

It should be emphasized that the work of the Red Cross Society is not unemployment relief except where sick people of children are involved; and Government Relief is for any reason not available. All the funds raised will be expended in Alberta for sick and unfortunate people and such cases of emergency as are not fully provided for by the other channels."

Your energetic support of the Campaign by way of work, financial assistance and sympathy, is earnestly solicited."

Please do what you can to help this much needed work when our faithful annual canvassers call for your subscriptions.

Fort Curling Club Elects Officers for Coming Year

A well attended meeting of the Fort Curling Club was held in the Town Hall on Tuesday, Nov. 15th.

The following members were elected to office for the coming season.

Hon. President, Warden J. D. McLean.
President, J. S. Wright.
1st. Vice President, F. W. Smith.
2nd. Vice President, E. Graham.

Executive Committee

Messrs. F. E. Murray, W. A. Graham, W. Anderson, A. M. Carondelet, E. Philcoff, and H. Dennis.

Secretary-Treasurer, A. M. Barnett.

The Club financially is enjoying very good health.

It was resolved to display the Ash Trophy Cup in the window of the well known Carondelet Hardware.

The President, Executive Committee, and all members wish to extend their appreciation to Warden J. D. McLean for his many kindnesses and help, also their thanks to the Ladies' Curling Club.

The next meeting will be held on Wednesday, Nov. 23rd. Important.

School Board Considers Coal Tenders

A special meeting of the Trustees of the Fort Saskatchewan School district No. 91, was held in the Council chambers on Monday night the 14th. instant, at 7:30 p.m.

Present Mr. F. Atkinson, Chairman; Trustees Mr. R. Tosh, Mr. R. A. Brown, Dr. Calhoun and Dr. Grauert.

The minutes of the last meeting were read and adopted on the motion of Mr. Todd.

In answer to advertisement, 6 tenders for coal were received and considered by the Board. After deliberation it was decided by the Board, upon the motion of Mr. Brown, to place a trial order with the lowest tenderer, Mr. G. A. Cranston, for four trucks loads about 12 tons, of Stargrove coal from Sheals mine at $3.85 per ton.

The Committee appointed at the last meeting to consider the matter of the school being represented at the 1933 musical festival to be held at Stoney Lake, reported, that, owing to the distance, and doubtful roads, it is felt that the school should not participate as a body, but Mr. S. Hambly would attend with certain soloists.

The Board concurred.

The meeting adjourned on motion of Dr. Calhoun.

Josephburg News

Mission Sunday will be held at the Josephburg Reformed Church on Sunday, November 20th. Special music has been arranged for this occasion. Rev. Mr. Mahnken will take the morning service at 11 a.m.; Sunday School will be as usual at 10:30 a.m.

Mr. and Mrs. R. Krebs and daughters spent a couple of days at Stony Plain, the guests of Mr. and Mrs. J. Dietrich.

Mr. and Mrs. F. B. Becker Jr., and Mr. and Mrs. Ed. Mohr motored to Ryley last week to attend several days with Mr. and Mrs. Frank Krause, formerly of Josephburg.

Miss Matilda Mohr is spending several weeks at Vermilville with her sister, Mr. Philip Mohr.

After spending a week with Mr. and Mrs. J. Dietrich at Stony Plain, Mr. Ernest Krebs returned home Saturday.

On Wednesday evening November, 9th, a Junior U. F. A. meeting was held at the home of Mr. Ed. Ashton. The President E. F. Rippel occupied the chair throughout the evening. There was a very good attendance. Five new members being enrolled at this meeting. After the business was completed, a short program was given and enjoyed by all.

At the finish of the program Mrs. Ashton served lunch.

The next meeting will be held at the home of Mr. W. C. Cranston on Wednesday evening, November 23rd.

Coming Events

The Fort Saskatchewan Badminton Club will hold a Dance in the Simmons Hall on Friday evening, November 18th.

Fred Berg and his Orchestra to supply the music. Admission 50 cents each person.

The St. George's W. A. will hold a Tea and Sale of Home Cooking and Fancy Work in the Fort Confectionery on Saturday, Nov. 19th., from 2 to 6 o'clock.

Many bargains in winter footwear will be found at Jones, Graham and O'Brien's sale which has been extended until Saturday, November 19th.

Partridge Hill Ladies Aid will hold a Dance in the Memorial Hall on Saturday, December 10th.

Afternoon tea 25c; Supper 35c. Phone Keep this date open.

FARM TRACTOR MAY NOW RAMBLE OVER PAVEMENT

Low pressure rubber tires carrying only 12 pounds of air have been developed by Firestone and are now being introduced by tractor makers.

The aim is to make the farm tractor truly an all-purpose machine. Fitting it for more work, it will enable the farmer to haul loads over the pavement into town, much as a separate motor truck would do. It will enable machines to be handled over the fields without without the partial effect of a packer from ordinary wide tractor wheels. It will not injure golf courses, orchards, meadows or gardens, nor injure the floor of barns or elevators. Further it is claimed, rubber tires will minimize power losses. Operators of tractors will no doubt like to ride on air—a new wrinkle.

With reference to a newspaper statement that a harpoonist has been known to earn as much as $200,000 in a season, an old lady writes suggesting that some of these musicians are overpaid.

The Chinese turn soy beans not only into bread and milk and cheese, but also into oil for cooking and for lamps.

Name Was Justified

First Guest. "I'm sure I don't know why they call this hotel the Palms, do you? I've never seen a palm anywhere near the place."

Second Guest: "You'll see them before you go. It's a pleasant little surprise the whole staff hums for the guests on the last day of their stay."

So large is the collection of cups and trophies owned by the late Sir Thomas Lipton that it will require two months to prepare them for exhibition at the Art Galleries at Kelvingrove, Scotland.

YPRES VALLEY

After a weeks absence Mr. Pete Gunn has returned home with a moose.

The Ladies Aid met at the home of Mrs. D. Cranston last week. Mrs. Hodgens presiding.

A number of Good Hope members attended the meeting as guests.

No less than one out of every ten gallons of gasoline is wasted through failure of motorists to replace worn-out spark plugs, according to tests conducted by the University of Pittsburg.

Have You Taken Full Precaution!

It is not necessary to spend a lot of money to produce a great deal of Comfort in your Home.

Storm Sash and Doors, are much cheaper now. Perhaps a roll of paper, or some cheap material for lining up your building, will just make that great difference you are hoping for.

Strength And Courage.

Can we do better this week, following on soon after the observance of Remembrance Day, than reproduce in this column an editorial from the National Home Weekly, published in Winnipeg? We think not. So here it is:

Gradually it is becoming clear to the minds of most people that matters today are far more serious than they were during the years of the War. For then, men were buoyed up by hope. They knew that in time their troubles would be over. But no one can tell when that promised satisfaction will end. The mist of yesterday has become the dense black cloud of today. With beauty, despair has stripped the strength from countless hearts.

It is all not be out of place, then, if recall the words and deeds that during the War inspired hope and urged steadfastness. Of all the words written those of Sir Arthur Currie, who was perhaps nothing finer than the message of General Currie to the Canadian army on the eve of the great advance in March, 1918. In it he makes clear the sort summon of the struggle and the dangers of defeat. He indicates the success already won, and states the need of the moment. Finally he speaks of the reward of victory. The message will be read again. Finally he speaks of the reward of victory. The message will be read again. With vivid recollections by those who were in the ranks in 1918. May all who read it now for the first time feel that it is equally appropriate to them today. The problem to be solved, the factors to be overcome, the call to zeal and to arms, are great, and the virtues of constancy, courage and self-sacrifice are just as necessary.

SPECIAL ORDER. March 27th, 1918: "In an endeavour to reach an immediate decision the enemy has gathered all his forces and struck a mighty blow at the British Army Overwhelmed by sheer weight of numbers the British Divisions in the line between Somme and Oise have fallen back fighting hard, steady and unbroken.

Reserves have been taken successfully to meet the German onslaught. The French have gathered a powerful army, and are moving to the battle. Our trusted leader and this army is now moving to our help. Fresh British Divis ons are now being thrown in. The Canadian Corps, the Australian Corps, Our Motto Machine-Gun Brigade has already played a most glorious part and once again covered itself with glory.

Looking back with pride on the unbroken record of your glorious achievements, asking you to realize that today the fate of the British Empire hangs in the balance, I place my trust in the Canadian Corps, knowing full well where Canadians are engaged there can be no giving way.

Under the noble and more devoted leadership the coming battle you may advance or fall where you stand facing the enemy.

"To those who will fall I say. You will not die but step into immortality Your mothers will not lament your loss but will be proud to have borne such sons. Your names will be revered forever and ever by your grateful country and God will take y r unto Himself.

"Canadians in this fateful hour I command you and I trust you to fight with all your strength with all your determination, so you have ever fought with all your strength with all your determination, so you have ever fought with all your strength with all your determination, so that when this battle is fought and won we may look back and say with all your tranquil courage.

"And with God's help you shall achieve victory once more."

English, German and French

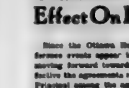
EDWARDSBURG

"CROWN BRAND" CORN SYRUP

A trifling cost



the most Nourishing and Delicious Food

CANADA STARCH CO., Limited MONTREAL

STAIRS MADE HER GASP FOR BREATH

Penalty Of Excess Fat

Although she has lost but 7 lbs. of her overweight, this woman finds that 7 lbs. has made a remarkable difference in her health. It certainly is nothing wrong with a reducing treatment like Kruschen. Read her enthusiastic energy and vigor.

Mrs. Byrne writes:—"I am 58 years old and my height is 5 ft. Last year I weighed 154 lbs. For months I have been troubled by a half-teaspoon of of Kruschen Salts, making no change in my diet, how I can lose round the hips, and only weigh 147 lbs. dressed. But I feel lighter and can move the upstairs, which before used to make me gasp for breath. Everyone says how well and fit I look. I am in a hurry and get to walking more so at all. The penalty of excess fat is ill-health, but the fact remains that I feel much better than of late years—and no hurry—and I now enjoy dancing."

Mrs. J. H.

Kruschen is based on scientific principle—it's an ideal blend of 6 separate mineral salts which, when taken, revive blood and body organs to function properly and maintain a splendid state of health—it bui'ds up energy and strength all the while you're truly reducing yourself down to a point of normal weight

---

Means Revenue For Paris

Electricity Lighted At Cn. Eiffel Tower Opened With Fanfare

The Citroen electrically lighted ad. on Eiffel Tower spill Paris into fanfare. The only opportunity to meet a living soul and communicate being deprived of the opportunity to earn a living and to contribute to good citizenship. The result is a growing feeling of discontent Each individual is inclined to blame all others for perverting m sfortunes

Internationally the problem is even more acute Because countries are unwilling to pay because they feel that they have been unjustly treated, or because they no longer have world-cash in most the demand. Nor will tariff barriers permit payment in the form of goods. To accentuate the situation nation is vying with nation in the production of armaments. As for overcrowded states there is no territory available for the surplus population. All of these things make for the spread of those malcontents which are one of the causes of war. If quarreling is easily possible when people are prosperous and inclined to be neighbourly, it is certain to occur in times of depression, when they lose confidence in each other, and when extreme distress prevails.

The only way to avert disaster in the way of unselfishness and self-sacrifice. It is true today as of old that regardless of race, color or creed every man is his brother's keeper. It is true now as two thousands years ago that man shall find their lives in losing them. The victories of peace are as glorious and as costly as the victories of war.

Driven by the higher motive it is easy for men to remember a world. The channels of trade will be thrown open, waste areas will be populated, armaments will be cast away, production and consumption will find a balance. Within the state, opportunities for culture and comfort will be immensely equal for all. The men of the machine will be of more value than the machine's production, the needs of the many shall be of more account than the desires of the few the rich shall not batten on the poor, the lusts of the land shall not favor the designs of the privileged class. But each man, recognizing that his neighbor has rights equal to his own, must honor justice and practice right-consciousness. In peace may they catch the spirit of General Currie's message. In 1922 men may be as brave, as hope and as nobly self-sacrificing as they were in 1918. May they hear again the words "Canadians, in this fateful hour, I command you, I trust you to fight with all your strength, with all your determination, so you have ever fought with all your strength, with all your determination, so that when this battle is fought and won we may look back and say with all your tranquil courage.

"And with God's help you shall achieve victory once more."

Landlords Would Be Protected

Quebec May Grant Them Priority Of Lien On Instalment Goods

A bill that would give to landlords priority of lien on goods bought by instalment, instead of the merchants who sell them, will be presented at the next session of the Quebec legislature, it is announced by Ronaric Gascony, secretary of the Property Owners' League of Montreal Such a measure, Mr. Gauthy explained, would provide landlords with further protection against tenants who want beyond their means in the purchase of long-period-to-pay goods

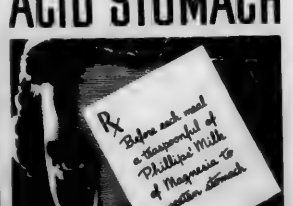
Britain's longest-lived people have been found in the rural districts near Newcastle, where many people still lead quiet primitive lives.

Miller's Worm Powders

work so effectively that no traces of worms can be found The pests pass away in the stools without being perceptible They make an entire and clean sweep of the intestines, and nothing in the shape of a worm can find lodgement there when these powders are in operation Nothing could be more thorough or desirable than their action.

The largest valley in the Great Rift of Africa, which begins in the north of Palestine and stretches south for a distance of 5,000 miles.

ACID STOMACH



If rich food disagrees, it need not mean a "sick stomach." Sourness and gas doesn't mean "indigestion." Just take an anti-acid to counteract the sickness, and enjoy life! Before meals, or afterward when distress is felt. Do this awhile, and stomach and bowels will be in fine order. Use only genuine Phillips' Milk of Magnesia; it is standard. The other preparations do not have the same anti-acid action.

Made In Canada

ALSO IN TABLET FORM. Phillips' Milk of Magnesia Tablets are easy to take all drug stores carry them. Each tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

W. N. U. 2000

Agreement Reached At Ottawa Conference May Have Beneficial Effect On Hog Industry In Canada

Since the Ottawa Economic Conference events appear to be steadily moving forward towards making effective the agreements reached there. Principal among the agreements are those affecting livestock and animal products.

The principle adopted by the United Kingdom for the control of her markets for meats is "limitation of imports." This system of limitation of imports is being applied to all the important classes of meats beef, lamb and mutton, bacon and hams, and certain classes of by-products.

In Canada, more has been said about the agreement as it affects bacon. However, it would appear that the determination by Britain to limit the importations of all meats, is the really big fact to grasp. It is this fact that gives the assurance by the United Kingdom to Canada of 500,000 hogs a month for a season and signalizes.

From the standpoint of the Canadian livestock industry it is important, then, that the agreements, as they apply to all classes of meats, should be known. It would appear that the United Kingdom adopted, at the Conference, the principle of meat by meat agreements, rather than attempt to determine what she should look to do with reference to the meat and meat products in which each Dominion was particularly interested. Canada, however, does not limit the effect on any particular meat to the Dominion to which the United Kingdom looks for her supply. The agreements should be viewed as a whole in order to understand the policy adopted by the United Kingdom.

The agreements apply to certain classes of meats, but for some time Britain has had restrictions of import of other classes of meats. These restrictions are mostly based on protection of the health of British livestock. Its premises of restrictions against imports of live cattle and other meat animals to those from Ireland and Canada. Imports of meat meals from Europe are embargoed, which practically limits this import trade to the Irish Free State. These restrictions, then, although limit imports of fresh meats and live animals. Other meats enter Britain as chilled, frozen, or cured. The policy declared by the United Kingdom at Ottawa will limit the importations of these latter classes of meats.

The policy declared by the United Kingdom with regard to livestock and animal products may be summarized thus:

Live Cattle—removal of restrictions on imports of Canadian commercial cattle, but, in part, on the number that may be used for breeding.

Chilled and Frozen Beef—regulation of imports from foreign countries on the basis of an agreement reached with Australia.

Frozen Mutton and Lamb—regulation of imports from foreign countries (and from Australia and New Zealand for a period) on the basis of an agreement reached with Australia and New Zealand.

Pork and Bacon—authorization to undertake the regulation of importation of bacon and hams and, on the basis of an agreement reached with Canada, to guarantee free entry for up to 2,250,000 cwts. per annum of Canadian bacon and hams of good quality (1,000,000 lbs.).

The adoption, by the United Kingdom, of what would appear to be a most comprehensive policy was the result of a series of events and conditions. Europe's bargaining restrictions and Australian and Canadian preferential barriers of various kinds against the importation of animal products. Great Britain remained the only open market. Therefore, all those countries that had formerly been exporting a part, or the bulk of their products to Britain, and all the exporting countries which had not formerly sent product there in quantity, were forced to concentrate more and more of their surpluses on that market.

In addition, production particularly of bacon and ham hereby increased. The colleges of pork prices which gave European hog producers very sharp feed for hogs in 1929 and 1931 induced large increases in production, not only in the countries that had formerly been supplying the built of British imports, but also in the countries that lately had been forced to send their bacon to Britain Furthermore, the new countries to enter the British bacon market, such as Poland, Estonia, Lithuania, Latvia and Holland, in order to develop the proper kind of hog and establish themselves on the British market adopted various scheme of bounties and subventions.

Britain's declared policy gives an aspect to the future which deserves the closest study and consideration Present prices for bacon and hogs are so low as to be extremely discouraging If the future is to be judged only by present price conditions, there is no encouragement for anybody in all countries will die But the conditions which led the United Kingdom to declare its policy which was declared at Ottawa. Apart altogether from that declared policy, present price conditions, viewed in their proper perspective, afford hopeful indications of better prices in the future.

Under extreme conditions, such as at present, the industries best suited to certain countries always survive Canada is one of the countries that has the natural resources for the survival of the hog industry. The policy declared by the Government of the United Kingdom is intended to favor the survival of the hog industry of Canada.

New National Park Planned

Tree Isles On Vancouver Island Are Being Considered

Establishment of a new national park in British Columbia is being considered by the Canadian and provincial governments and F. M. Wrinch, chief engineer of the federal parks branch, has been on the coast recently laying the groundwork for such a project.

Garibaldi Mountain is favorably regarded as a site for the new park, although the parks branch is said to be eager to establish a sea level park to complete its trans Canada parks system For the latter purpose a park site on the west coast of Vancouver Island is being considered. The only other national park on Vancouver Island is Strathcona, which, however, is mountainous and somewhat inaccessible.

Colonel W. W. Foster, member of the Mount Logan expedition, of several years ago and one of the best known mountaineers in Canada, has completed a report on the Garibaldi project and this has been sent to Ottawa.

United States Rigidly Enforcing Restrictions

Immigration Figures For 1930 Are Compiled

Only 834 Canadians were admitted to the United States as immigrants in August, against 1 168 in August, 1931, the latter Department's last monthly report shows In the period 1926 to 1930 Canadian immigration to this country in August averaged 7,000.

Restrictions on the influx of people are being enforced even more severely than in 1931 when the number admitted was the smallest in a century. Only 2,719 from all countries passed the gates last August, as compared with 4,000 in August, 1931, and an August average of 34,000 for the years 1926 to 1930 Indications are that for 1932 aggregate immigration will not reach 20,000, which would be the lowest figure on record.

Last August 1,000 persons who had established domicile in the U.S. left to live permanently elsewhere. "The exodus of alien residents," says the report, "is now outnumbering the new arrivals by over three to one."

By use of a nicotine just patented in Germany, lumber may be fed into it at one end to appear as finished boxes at the other at the rate of two a minute.

Andros, one of the Bahama Islands, is a lake which generates its own soap from its alkaline limestone bed.

Distinctive Canadian Formula Is Now Used For Extraction Of Radium From Western Ores

U.S. Farm Population

Many Return To the Land As a Result of Hard Times

Hard times have resulted in a trek "back to the land" in the United States, statistics issued by the Department of Agriculture reveal. Present farm population of the country is estimated at 32,000,000, an increase of about 2,000,000 in three years.

Farm population in the United States reached a peak in 1916, the department says, when it was 32,077,000. Thereafter it steadily declined for twenty years as country families moved into the towns to share the profits of the long industrial boom. Unified statistics estimate living on the land numbered 31,570,000 in 1920 and 30,000,000 at the start of 1930. The slump over depression has driven nearly two million people back to rural life, so that farm population now approaches its 1916 high point.

A Prosperous Town

Full-Time Job For Every Man In Carbide, B.C.

Which is the most prosperous town in Canada?

According to Thomas Uphill, Labor member for Fernie, B.C., the distinction should go to Carbide, B.C. Every man in the town has a full-time job, Carbide is a coal mine town, and although the mine employs only 300, there are more than 100 automobiles in the town. The town incidentally is the only place in British Columbia where not a dollar of unemployment relief money has so far been spent.

But just a few miles away, at Fernie, B.C., in one of the poorest towns from the economic standpoint, according to Uphill. The city is unable to meet its one-third share of unemployment relief, already it is far in arrears

Mr. Uphill created a sensation at the last session of the legislature by proposing that the government should raise money by selling titles. Wealthy men would be eager to pay a stated sum for a provincial knighthood, he said.

To ward off a hail storm, peasants in southeastern Europe used to ring bells or blow horns.

A new product similar to celluloid and made of wood pulp, has been developed in Norway.

Forester Explains Coloring Of Leaves

Contrary To Popular Belief Frost Is Not Cause

Jack Frost's only paint is white, John Keller of the Pennsylvania State Department of Forests and in explaining that time, not frost, gives forest leaves their autumn colors.

"The ripening of leaves is the cause of the change in color of the forest foliage and not the action of the frost. said Keller in disputing a popular belief

"Frost may hasten the processes of turning leaves brown A heavy frost-ing in late September or early October robs neither them of the leaves of their chances for brilliant coloration.

A long dry autumn with not too heavy frosts brings the finest succession of colors, while chemical changes in the mineral substances within the internal leaf cells produce the wonderful shades of red and yellow, according to Keller

Leaves fall from trees because they are "worn out" and have been drained of all the pulp that was stored in the twig, the forestry expert said

---

Only One Answer

He—You're so good at conundrums —try this.

She—Have go ahead.

He—Take away my first letter and take away my second letter, and my whole my letters, and I am still there. What am I?

She—That's easy you're a still existence.

A magistrate says no man can drive a car properly while he's in love with a girl. The more serious thought is that few men can kiss a girl properly while they're driving a car.

Do You Know?

Photograph, Canadian National Railways

TRUE The most costly and most delightful sound of the wild animals of North America is the bugling of the moose. After only a few days in captivity a keeper will be able to train him to come when called, to eat from his hand, and to enjoy petting. The photograph shows an Indian boy guiding a moose that had been in captivity only eight days when the photograph was taken.

Saskatchewan Fruit Growing Complete

Dr. Seager Announces To Be Given to Orchard Men Under Plan Now Ready In the Province

According to a statement just issued by Hon. James F. Bryant, who is in charge of the Saskatchewan Fruit Growing Campaign on the Institutional Farms of the Province, an excellent start has been made this fall.

The plans which have been carefully thought out and considered in detail for the establishment of fruit orchards on the Saskatchewan Government Institutional Farms, and for the propagation of fruit growing in Saskatchewan are now definitely being undertaken and work has commenced in connection with the trial nursery and fruit breeding grounds at Regina, and the orchards on the Institutional Farms have been laid out and will be surrounded with windbreaks either this fall or early next spring.

Over eleven hundred grafted crab-apple trees, one, two, and three years old, of sixty named varieties, all on Siberian Crab roots and northern grown, have been obtained and will be distributed in the Government Nurseries or distributed to the Institutional farms. Already at Battleford, an orchard plot of 1,200 feet long and 8½ feet wide has been laid out and planted with one hundred and eighty-five each of thirteen varieties of hardy crab-apple trees have already been shipped to Battleford. The balance of the eleven hundred have been shipped to the Regina Nursery and will be cast out next spring. Several thousand hardy Siberian crabs have been obtained and will be planted

For World Peace

A Peaceful Atlantic All That Is Needed Says Premier Of France

Let Britain and America "give us a peaceful Atlantic and we, single-handed, will guarantee the peace of the world." Premier Herriot told the Anglo-American Press Association in Paris, in a speech in which he emphasized international peace with espionage.

Peace is like marriage between two countries," Herriot said. "Both gives formal promises to respect mutual rights.

"I have been foreign minister several times, but have been a mayor for many years," Herriot said. He has been mayor of Lyons for 37 years. "As a mayor, one asks two people whether they wish to live in peace and harmony together."

Herriot said he had been a lifelong pacifist, but a pessimist one. "I don't disbelieve building a stable of Augeans in the cities," he said. "I want a practical, mutual peace machine built on the solid ground of Europe.

"As a Frenchman, I have a proposition to make to just British and Americans. Give us a peaceful Atlantic, and we single-handed will guarantee the peace of the world."

Evidence Of Shooting Pled How Churchill

Speaks Against To Be Made An Caught On Norway Coast

Discovery of evidence that exit cooter herring is to be found in Hudson Bay was told by John Ingebrigtsen, Norwegian fisherman, who arrived in The Pas after being the summer at Churchill, from whence he ordered again the east coast of the bay while on fishing and dredging trips.

Discovery of the herring was made by Ingebrigtsen at Stony Island, 180 miles north of Churchill. He had spent some of the fish washed up on shore. They were approximately eight inches in length and appeared to be of the type known to are brought by fishermen on the coast of Norway.

He took a few samples picked up on the shore to Churchill. He was not equipped with the proper nets to catch any of the herring.

Ingebrigtsen said he had also found this summer a new kind of bait cooter for boy fishing. It was a small fish apparently identical to the lake variety. He thinks perhaps it is a species of capin. It is the tiniest kind of bait he has found in Hudson Bay, having discovered two kinds, whitefish and last summer.

Gas Lighting Bill Tied

London Has Fifty Thousand Street Lamps Lighted Every Night

You would think anyone, that gas illumination belongs to a disappearing epoch—didn't Robert Louis Stevenson write a poem about Lamps and Lamplighter? Yet the Gas Light and Coke Company, of London, still carries on, still lights every night nearly 50,000 street lamps. It has just signed a contract with the City of Westminster that rich municipality which is really the heart of London's metropolis, and which amongst its 55 miles of streets, includes such famous ones as Pall Mall, Piccadilly, Regent Street and Whitehall—for another 21 years.

A great contract, if you like, affecting more than half the West End of London; and the Gas Light and Coke Company recently took a few brief page ads in the most expensive papers to announce the fact.

—

No Thanks To Him

"This is a wonderful suit I am wearing."

"It looks very ordinary."

"But the wool came from Australia. English merchants said it is a Scottish factory, it was woven in Sweden, made into a suit in Berlin—

"Nothing wonderful about that."

"No, the wonder is that so many people can get a living out of something I have never paid for!"

—

The oldest town in the world is said to be the ruins of Tepe Gawra, in Northern Mesopotamia.

ALL HANDS LED TO SHOULDERS BUT THE SMILING OCTOPUSES THERE WELCOME

Our pictures show two small groups of hunger marchers who marched upon the British capital intent on presenting a petition to the House of Commons. They were commanded and either giving the London police a warm time for three days departed for home. Left, one of the women demonstrators is given a lift by some of the boys from Brighton. Right, some of the boys in the vanguard carry the banner and march to the tunes from a harmonica.

Opening Royal Chalet

Prince Plan Has Been Set By Buckingham Palace

Twenty-four men are busy at Buckingham Palace giving the king's chalet at Sandringham a new look.

The work will occupy two months, for they will clean and adjust every one of the innumerable windows of more than 300 rooms at the palace.

Even then most of the clocks in the royal collection will remain to be done, for at Windsor Castle there are another 250 belonging to the king, as well as about 200 more at Sandringham and Balmoral and other royal residences.

The king's favorite timepiece is a small clock with a golden mounting and a simple plain dial, on the desk of his study in Buckingham Palace, where he does much of his official work. It has been in his possession for many years, and by it he regulates his many audiences and interviews.

The king is one of the most punctual men in the country, and is never late for an official function or a private engagement, so that all the palace clocks must be accurate. It is an expert's duty to wind and adjust them every day.

The most curious clash in the collection is the one made in France in the time of Louis XV., in the form of a sugarcane bend, with two cupids shoving the hour and the other the minutes.

While great care is taken at Buckingham Palace to keep every clock accurate, at Sandringham, the king's home in Norfolk, every clock is half an hour fast.

The generally accepted explanation of this is that Edward preferred to make it easier for himself to be in time for engagements, but the real reason is that King Edward, impatient at the shortness of the winter days when most of his shooting was done, forestalled sunset time by ordering the clocks to be advanced. The custom has been maintained ever since.

The Home Of Horses

Canada Has Grown Rapidly Since Its Confederation

It is difficult to associate Mr. Gandhi with a sense of humor, but an artist who painted him while he was in London tells of a rather humorous American who burst in while the Mahatma was absorbed in meditation, reports the News of the World. "Say, Mr. Gandhi," said the visitor, "what good would it do if your country was freed from the English? You would fall into the hands of the Germans or the French or the Russians in no time." "Would that matter?" retorted Gandhi, "if we were able to keep out of the hands of the Americans!"

—

British Millions Gained Over Wheat

Since the commencement of the present crop year British mills have been using a high percentage of Canadian wheat—actually 70.6 per cent. percentage since 1932. The re-establishment of a high percentage of Canadian wheat in the mixtures used by British mills is a matter of importance, says a report of the Canadian Bureau of Statistics.

Airport Of the Skies

Plan Huge Combined Aerodromes In London, England

An overland aerodrome at the cost of a gigantic wharf half a mile in diameter, at an estimated cost of £25,000,000, is a proposal of London promoters, who hope to have a bill introduced in parliament in the near future for permission to build it. The proposed airport of the skies is to be supported by 32 skyscrapers. In the center, for all Weather Centre there are railway lines called King's Cross and St. Pancras stations.

The aerodrome is outlined by W. Crouch-Hills, Conservative, M.P. for Camberwell, one of the promoters, in his subject.

There will be eight spokes in the wheel design of the overland aerodrome so that aeroplanes can always land and be reached without circuiting the wind. Each spoke and surrounding rim will be 300 feet wide—three times the width of London Bridge.

The 32 buildings which will form the legs of the aerodrome will be 150 feet high and will be used as warehouses, factories for light industries, flats and offices. One of them will be a hotel. The flats will have 2000 families at a rental of 10 shillings a week.

Licenses Suspended For Life

Punishment Imposed By English Magistrate On Reckless Driver

Captain Harry St. Clair Dyson, who had a fine career in the war, was convicted in England by the Scotland branch of magistrates on a charge of driving a motor car when under the influence of drink, was fined £600 or two months' imprisonment, and his driver's license was suspended for the remainder of his life. It was his third conviction on similar charges since 1927.

After the war he was associated with Lord Beyg in connection with the distribution of the United Service Fund, and then went to British West Africa, where he contracted malaria.

Untouchables Live Lower Than Beasts

Caste Lines Have Been Maintained In India Through Of Years

There are four sharply divided [illegible] in India. [illegible] to split into hundreds of sects equally sharply divided. For thousands of years, through countless generations, these caste lines have been maintained in all their rigidity.

First come the proud Brahmins, or "earthly gods," whose priests have a monopoly in the Hindu temples.

Second are the Kshatriyas, or fighting men.

Third are the Vaisyas, or litters of the soil. Gandhi was born into this caste.

Fourth are the Sundras, or servants.

[illegible] lower [illegible] Outcasts, [illegible] "untouchables," because of the law. They are doomed, by Hindu law, to drudgery of menial and unsanitary slavery for life, and so are their children for all time to come.

For to "untouchables" or his children may ever rise above his lowly station. His only hope is in reincarnation that he may be born into a higher caste when he next appears on earth This he asks in his prayers.

Crushed and beaten by centuries of oppression and discrimination, many of these 60,000,000 outcasts live lower than the beasts of the field Some of them live on carrion, or on rats and offal. When they seek jobs they are permitted to hold only such low positions as scavengers, sewer cleaners and sweepers.

If a high-caste Brahmin mentions the name of an "untouchable" he must spit after doing so If the latter should chance to fall upon him the Brahmin must undergo an elaborate "purification rite" conducted by the priests of the temple, so that he may be cleansed in body and soul.

If the "untouchable" desires to buy food in a shop-keeper of higher caste he must not enter the store. From some distance away, he shouts in the shopkeeper what he wants, places the exprecious coins on the ground and then retreats. The shop-keeper comes out with the purchase, places it upon the ground, picks up the money.

There are the people for whom Gandhi went on his successful hunger strike. Not only did the aristocrat little prophet of India's new day seek to gain better recognition for them, but he also sought to smash the injustice practiced upon them by their own people by reason of the caste system. Two hundred years before Christ, Hindu's great Buddha tried in the same thing that Gandhi is trying to do in 1932. Asoka failed.

But whether it is to be done by London, Delhi, or by Gandhi, the job of curing India's political and realm ailments is a tremendous one Development and modernization seem to be a gigantic task in a land that has slumbered through centuries with a philosophy of fatalism and humility which is epitomized in the Hindu proverb: "It is better to sit than to walk, to lie down to sit, to sleep than to walk, and death is best of all."

Treatment For Anaemia

Formula Doctor Has Perfected Now and Effective Syrup

Dr. G. H. W. Lucas, associate professor of pharmacy and pharmacology at the University of Toronto, is responsible for the preparation of a new and effective syrup for the treatment of anaemia.

The preparation has been tested with success by doctors not only upon themselves but upon patients.

The new preparation is said to be effective for these forms of anaemia requiring iron, which, does not include pernicious anaemia.

The preparation will not be made by the university, it was stated, but the recipe will be available to physicians.

THE HOUSE OF DREAMS-COME-TRUE

BY MARGARET PEDLER

Author Of "The Splendid Path," "The Herald Of Far Dawn," "The Bladder a Bongbon," Ltd., London.

CHAPTER XXXVII—Continued

She was lying on her back in the shady wood whither they had ridden out to lunch that day, staring up at the b ts of blue sky overhead which showed between the interlacing branches of the trees. The remainder of the party were grouped around her, reclining in various attitudes of a "duke for picnic" nature, while from a little distance away, where the horses were picketed in charge of a groom, came the drowsy, rhythmic sound of the munching of corn, punctuated by an occasional stamp of an impatient hoof.

"Tea. It's been good," agreed Lady Anne "I shall never settle down again prosperly as a dowager at the Dower House!" And she laughed gleefully

To her, it had been almost like a return to the days of her youth, for "her fony children"—as she called them—had insisted on her sharing in all their active pursuits, and Lady Anne, who in her girlhood and early married life had been a first-class horsewoman and a magnificent swimmer, had condemned "fat nonsense."

Blaise found himself lying on his back in a sitting posture and glanced towards the crimson glow of westering sun which it struck athwart the tall trunks of the trees.

"You'll make of you live to go back to England. Instead, you'll be dying of pneumonia and a few other complaints—If we don't get a move on soon," he observed. "It's almost sunset, and after that it grows abominably chilly in this eastern paradise of Jean's. Besides, I fancy it's going to blow great guns before long."

It was true. Already a little chill whisper of wind was skimming the tops of the trees, and before the party was fairly mounted and away, like whipped and changed to a shrill whistling, harking the big gale which drove along behind the innocent zephyrs of noon which at first had barely reached the topmost branches.

It was a languid ride back to Beirutsenoun, and the sun had dipped below the horizon in a sullen splendour of purple and gold when they reached the crest of the hill, upon the further side of which the castle stood, came into sight. Now and again the moon peered out between the racing, wind-driven clouds, clearly limning the bold black curve of the hill against a background of lowering sky.

Jean and Blaise were riding abreast, a little in advance of the rest, engrossed by the difficulties of carrying on an animated conversation in a high wind. As they swung round the bend in the road which brought the hill's great shoulder into view, Jean threw back her head and stared at the sky above it with a puzzled frown on her various

"Why . . . . how queer!" she exclaimed. "The sun not nearly half an hour ago and yet there's still quite a brilliant red glow in the sky. Look, Blaise—just above where Beirutsenoun stands—"

Blaise glanced up casually in the direction indicated, then suddenly reined in his horse and half-rose in the stirrups, staring at the red glow deepening in the sky ahead.

"That's no sunset!" he exclaimed sharply. "It's—Great heavens, Jean! Beirutsenoun is on fire!"

Even as he spoke a tongue of flame, mocking the dull glow with its gleaming blaze, shot up like a thin red lance into the air, and was gone.

A short moment passed behind. The others had seen it, also, and recognized its import. Jean turned her head, the clatter of galloping hoofs echoed along the road as the whole party urged their horses on towards home as fast as they could travel the ground.

Soon they struck off from the road, taking a short cut across the planted country, the woods climbing the base of the hill, and as they emerged on to the broad plateau where Beirutsenoun stood sentinel through wind and weather for so many years, the whole extent of the catastrophe was revealed.

By this time the angry glow in the sky had turned itself into fury, white from the doors and windows of the castle fire vomited forth as from a furnace—upward in long, menacing tongues of flame, licking the blackened walls, downward in leaping showers of sparks that drifted towards the earth like flights of golden butterflies.

Little groups of men and women, helpless as ants to stay the fire, rushed futilely hither and thither with buckets and engines, while on the smooth sward which fronted the castle lay piled enormous quantities of household stuff, a medley of fine old furniture, torn tapestry, wrenched from its place against the walls, pictures, mirrors—anything and everything that would be dragged out into the open by eager hands and willing arms.

The major-domo, an elderly, grey-haired man who had been born and reared upon the estate and who had taken service with Glyn Petersen on the day when he had first brought Jacqueline, a bride, to Beirutsh, caught sight of the riding party returned and came hurrying to Jean's side.

The tears were running down his wrinkled face as he recounted the discovery of the fire, which must have started either just before or during the servants' dinner-hour when few people, of course, were about the castle, and which had obtained a firm hold before it was detected.

The household staff practised to a limited extent,—a fire drill had been held once a month in Petersen's time, had done their best to cope with the flames, but vainly. The high wind which had arisen had thwarted their utmost efforts, and finally giving up all hope of saving the interior from being gutted, they had confined themselves to rescuing such valuables as could be easily removed.

There was the usual mystery as to how the fire had originated, and several circulated among the chattering throng which hurried hither and thither, momentarily augmented by the peasants who, at sight of the smoke in flames, had come trooping up the hill from the village below.

The most likely story, and the one to which Blaise inclined to give great credence, was that the child of a woman who worked daily at the castle, escaping from its mother's care and launched on an independent voyage of discovery through the rooms, had knocked over a burning lamp. Then, terrified at the immediate consequence—the sudden flaring of some ancient tapestry, dry as tinder with the summer heat, near which the lamp had fallen—he had bolted away, out of the castle and so home, too scared to tell anyone of the accident.

Jean commented unnaturally, what did it matter how it happened? Except from the prosaic viewpoint of the fire insurance company, who would probably desire to know all kinds of details that it was impossible to supply!

For her, nothing mattered except that Beirutels, her home from childhood and the place where she had always looked forward to spend a great part of their married life, was a furnace of flames.

It was a splendid but very terrible sight. The great grey walls of the castle stood four-square against the sky, charred and blackened but defiantly impervious to the flames that were licking covetously against the solid stone which fashioned them. Sentinel to the very end, they reared themselves unconquered, guardians still, though all that they had sheltered through their centuries of watch and ward lay consumed within their very heart.

Jean, standing beside Blaise and watching the upward-leaping flames from the crimson hunger of the lowering heavens spoke suddenly:

"And the sky as red as blood

Quick RELIEF from pain

A lot of things can cause a headache or other pain, but there is one thing that will always give you relief! Just take a tablet or two of Aspirin. Your suffering ends. Relief comes instantly, regardless of what may have been making your head ache or pain.

Aspirin is harmless—cannot depress the heart. So there's no use waiting for a headache to "wear off." It is useless to endure pain of any kind when you can get Aspirin. It is a blessing to women when suffering regular periodic pain; to men who must work on, to quiet of eye-strain, fatigue or neurosis.

Learn its many kind for colds, [illegible] Rheumatism, [illegible] Be sure to get genuine and not a substitute. All druggists sell "Aspirin" in 5 cent handy tablets. "Aspirin" is a trade mark registered in Canada.

above it.' Blaise, the last of Kshirah Stanley's prophecies has come true!"

An hour later help was forthcoming from the distant town to which a messenger had been dispatched post-haste as soon as it was realized that the household staff, even with the neighbours from the village, were hopelessly inadequate to cope with a fire of such magnitude. But it was already too late to accomplish very much in the way of salvage. All that remained possible was to quench the outburst of fire as soon as might be and so, perhaps, save some of the outbuildings.

Hour after hour through the night, human endeavour fought with the flames—subduing them again and again—subduing them finally into fresh life at the gusty bidding of the wind, leaping redly from the lambent heart of the conflagration, which glowed and pulsed and heaved like some living monster intent upon destruction.

It was not until dawn was breaking, that, with the dying down of the wind, the flickering crimson light on inner haze, when the fire had been pulled finally from the sky; and a half at last extinguished, the village folk gathered about the ruins of the catastrophe, had dispersed to their homes.

Lady Anne, accompanied by Nick and Claire, started for the inn of the Green Dragon, whither the landlord had hurried on ahead to prepare temporary quarters for the new hostesses little company from the castle. But Jean and Blaise still lingered by the deserted ruins loth to say farewell to the place that had meant so much to them.

Beneath the misty azure of the morning heavens, sky, flamed by little [illegible] sapphire—rearguard of the hurricane which had passed—stood all that remained of Beirutels—blackened, ruined walls, stark against that [illegible] above the mass of coming wreckage.

Jean's mouth quivered a little as her glance fell in the scene of utter desolation.

"My House of Dreams," she whispered brokenly.

She was silent a few moments, her eyes embracing all that had once been Beirutels in a gaze which held both farewell and retrospect. And something more—some vision of the future. In the dawn-light pearling the sky above she recognized the eternal promise of Him Who "commanded the light to shine out of darkness."

Her House of Dreams! The inner meaning of the song had grown suddenly clear to her.

When she turned again to Blaise, her expression was grave and tranquil. Touched with regret perhaps, but bravely confident.

"I don't think it matters, Blaise," she said simply. "Beirutels was only a symbol, after all. My House of Dreams-Come-True isn't built of stones and mortar. No one's in. It's just—where love is."

THE END

VOL. 11 No. FORT SASKATCHEWAN, ALBERTA WEDNESDAY, NOV. 23, 1932 $1.50 PER YEAR IN ADVANCE

Regular Meeting Of The Town Council

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Council Chambers last Thursday night, with Mayor Montgomery, Councillors Simmons, Graf, Lalonde, Smith and Fillmore present.

The minutes of the regular meeting held on the 3rd instant were read and adopted.

A motion was passed approving the application of John Gullette for an old age pension.

Tenders for coal were opened and considered. The Council accepted the tender of Jerry Larson for 80 tons of double screened coal, more or less, from the Scanlo mine, at $3.75 per ton delivered in the basement of the town hall, this being the lowest.

Tenders for Sanitary buckets were opened and considered. The Council accepted the lowest tender that of The Fort Hardware Company for 30 sanitary buckets, 24 gauge galvanized iron, at $1.77½ each.

The following accounts were passed for payment:—Calgary Power Co., Electric light for October for streets and town hall $137.45. Alberta Government Telephones, rental for November $7.80.

The meeting adjourned.

Fort Saskatchewan Club Entertains Visiting Players

Monday evening several members of the Gibbons Badminton Club visited the Fort Saskatchewan Club and engaged in a friendly tournament.

The Gibbons Club were victors in 13 events out of 20. Practically all the members of the Fort Club participated in the events.

The visiting players were Mr. and Mrs. Yeo, Mr. and Mrs. Rodgers, Mrs. Franca, the Misses Johnson, Menzies and Gibbons, Messrs. Marshall, Knott, Fraser, Ferguson and Goddard.

A dainty lunch was served under the supervision of Mrs. Loober.

The Fort Club intend to pay Gibbons a return visit on Dec. 3rd.

Don't forget the Badminton Club Dance in Shannon's Hall, Friday evening, Nov. 25th.

SINGLE UNEMPLOYED RELIEF

No further registrations of single unemployed men from other centres or other provinces are being accepted at Calgary, Edmonton and other points where community kitchens are established, according to an announcement made by the Alberta relief commission. All single unemployed in centres other than those in which kitchens are established will be cared for at their own centres of residence, state the commissioners. Investigations have been made respecting employment of single unemployed on farms. Farmers may come in to the centres and select from those registered under the jurisdiction of the relief commission at the unemployment bureaus, and provided a mutual arrangement is arrived at, the federal government will pay $5 per month to the farmer and the same to the man employed.

The farmer must agree to keep the man until next spring and the man must accept and agree to stay till then.

ANOTHER GOOD COAL ORDER

Another good coal order for Alberta coal will come to Alberta mines this winter, as a result of contracts let by the Manitoba government for something like 25,000 tons for provincial institutions. Of this possibly 15, 000 tons will be purchased from Alberta mines.

Good Reason for Economy

Absent salesman went into a drug store the other day and ordered a plate of crackers and a glass of water. A friend who happened to be in the same store asked him: "What's the matter, Mac? On a diet?"

"No," snapped the other. "On economics."

YPRES VALLEY

The Davis family held a reunion at the home of their mother, Mrs. Rachel Davis on Thursday, Nov. 17th, to celebrate the birthday of Mr. Arthur Davis. Many happy returns of the day Arthur.

*****

A few friends from Ypres Valley attended the shower given to Mr. and Mrs. Raymond Shears by their Brookville friends.

*****

Mrs. Dang of Clyde with daughter Nancy, sons Ernest and Norman were visitors at the home of Mrs. D. Gunn last week.

*****

Despite the cold weather, the community turned out to the "pie social" last Friday. A very enjoyable time was had by all. The program was an excellent one.

*****

We welcome Mr. D. Bennett and his bride to our district.

*****

We all wonder just who Paddy Pearce is!

*****

We hear Mr. Gillison is improving nicely.

Taken from the Files

19 Years Ago Today

Thursday, Nov. 20, 1913

The addition to the curling rink is completed and already a good bottom is laid for ice, which should be ready to curl on very soon.

E. Ketterborn left on Monday's local for Winnipeg where, we understand, an interesting ceremony is to be performed. Mr. and Mrs. Ketterborn will take up their residence in the Fort.

The prominent sportsmen of Edmonton had a go-as-you-please race from there home town to the Fort and return. Mr. Stebbens beat Mr. Blunt, who had to be taken the last three miles in an auto. Our old friend, "Johnny Walker", was one of the judges.

Ratepayer's meeting is called for Monday at 8 p.m.

LAWSON'S NEWS ITEMS

George Marsley constable for the town of Lamont has resigned and will move to Andrew, where he will open a harness repair shop. Mr. J. A. Wilson was appointed to fill the position at a salary of 65 per month.

*****

Andrew Bell has the contract for building the new Curling rink. Work started last week.

*****

Hockey teams of Andrew, Bruderheim, and Lamont are looking forward to an excellent season of hockey.

There is a suggestion of a four-horse team for Andrew during the winter.

*****

A meeting will be held at the home of Mrs. Geo. Hehr at 2.30 p.m. next Tuesday, Nov. 29th and everyone will be welcome. It is noted that rinks will be drawn up at this meeting and play will begin a day or so later.

Let's go ladies and see what we can do.

POPULAR YOUNG FORT LADY DIES SUDDENLY

Stella, 23, wife of Mr. Reid Bainbargh, and daughter of Mrs. E. Brockenridge, passed away suddenly in an Edmonton Hospital last Tuesday night. Funeral service will be held at two o'clock on Friday afternoon at the Fort Saskatchewan United Church. Rev. D. C. Bassnay will officiate and interment will take place in the Fort Saskatchewan Cemetery.

LETTERS TO THE EDITOR

Editor of the "Record

Dear Sir:

On page two of the 19th of October issue of the Record, there was an editorial entitled "Credit means Debt". I anxiously awaited the next two editions, fully expecting a reply from a pen, far more able than mine. I feel sure Mr. Lunn must have overlooked this particular article, or there would have been an answer before this.

As close as I (a very ordinary farmer, but no banker, I expect, than the average, by the depression) can find this editorial down at means this. The world went on a spree and fought a few years' war on credit, and some then the individual nations, provinces, corporations and private citizens have been buying their own roads, homes, farms, implements, etc., which are not necessities; purely luxuries on credit, and now we must pay for it, and like all big debt lazy-bones who have come to the end of their credit, we call at our creditors (the banks) because they will not give us further credit. And here is the interesting solution,—"Debts ought to be paid through frugal living, personal economy, and painstaking work.

Now I firmly believe that this editorial would make very good subject matter to be used by a sixteen year old Sunday School teacher for an infants class, but it will not bear looking into when applied to the world's affairs as a whole.

Let us start with the war. It was fought by the soldiers and sailors, backed up by munition and transport workers right down to the primary producers and they were fairly well paid for the same. Paid with what? Paid with promissory notes issued by various banks against which there was only the country's resources to back them; as there is not enough of gold in the country to make a ten thousandth impression on the total war loans. But although it was the nations resources which were pledged to back these notes, still we (the nation) must pay interest on them.

Still, if we could see our way clear to produce in kind, that which we borrow legal tender for, we are quite entitled to do it. And the world has done it, as nations and as individuals. Then why is not this everlasting war debt paid?

My humble opinion is this, "Like Euclid we'll start with an Axiom. "You cannot get something for nothing". Yet the big financiers got hundreds of billions of government bonds for practically nothing, merely book keeping accounts and the exchange of promissory money or promissory notes on which the risk was born by the taxpayers, the government. And as farming back to the axiom, as the banks supplied nothing but got something to supply the real wealth for their bonds.

The deal Jacob put over his brother Esau when he bought his birthright for a mess of pottage was an honorable one compared with the deal the banks put over the politicians when they brought them into giving the banks the sole right to issue the medium of exchange. (Of course it's just possible that some of the leading politicians who framed the bank acts of the various civilized nations were themselves interested in banks, so there may really have been nothing put over the politicians at all,—just the people.)

As far as I can gather, the situation of the nations is not much different from the individual, and I'll give you a concrete example. (No names no pack-drill).

A certain returned soldier of my acquaintance purchased a farm in 1919 through the Soldier Settlement Board and has met the greater part of his due payments till the last two years. Added to that he received a re-adjustment on his land which further reduced his loan. This year he threshed a crop, which had he threshed it in 1919 would have completely paid off his loan. Now, with an indebtedness of about half that of 1919, his whole crop barely pays his interest. But he has other debts. So really his income on a good crop is less than his interest and he has another year to go before he has any more of an what business we are in, we are all asinine. I cite this case believing it fairly typical.

But are we to be censured for incurring these debts when we can and do produce sufficient real wealth to over year to pay them off, if measured by the same standard as when we incurred them. If times were normal and it was purely a case of supply and demand, we could say, "We're in an over-crowded trade, lets try back-keeping. The local manager's tell something that pays better." And so that it is only depositors money hard as a shift in, some of us would like to see that the only money is stamped legal tender which we borrow from the banks, whose only labour is that of its own over-crowded trade, lets try book-keeping. The local managers

Conditions through which all peoples and nations are just passing are a lasting lesson of individual character and responsibility. Thought and activity, of national stability. Present conditions constitute a yardstick by which to measure one's real outlook upon life and a means whereby to gauge one's inner conception of what true constitutes true. In his study of human economics in which things material are of first importance? Or in his recognition of higher and holier, well mantled things men cry necessary adjustments in our pays, on well-being in order that the better, finer things of life may be found and enjoyed?

For the men using the world lies wounded and bleeding at the bottom of a sea of bitterness and human depression. All mankind is suffering. Are we Canadians, to turn and rend each other like savage animals, after the fashion of the jungle? It is the nature to have full away over us, and back out 15-mile of all those things and immediately set up a new standard of living for our troubles; tear down what we ourselves, in our calmer, more thoughtful moments, and our predecessors throughout the ages of the past, have erected? And, in we do so, and complete the work of destruction, will we then be or war, better equipped, more efficient for the work of re-construction?

Turning over the world was riding the pendulum of the tower of a re-called prosperity. Everybody was engaged in scaling the heights. Having reached the apex of the swing, the pendulum paused, hung motionless, and, by all the laws of science, to swing back, and having swung on far to the right it had, of necessity, to go as far just so far to the left. It took some years to reach the peak of 1929-30; it will take some years to again reach a normal, trustworthy level. It is not the pendulum's fault that it swings to extremes. Those extremes are carried it to one extreme but, having carried it there, are now powerless to prevent its backward swing.

In the chaos and unforeseen reconstruction period the world was engaged in a few feverish years of great productive and industrial activity. There were lightheaded war loans to make peace, but the end of that did not leave. People everywhere again carried the pendulum to one extreme. Now, ploughs plunged into debt, buying right and left on credit, mostly of it on the instalment plan of deferred payments. They kept on doing on until the time, and the unbroken period of their buying over reached the point where began its return jou, say or couple again to normal. The limit of easy credit, much too easy, was reached; the time to "pay" had arrived. Consequently, purchasing power also subsided, died. Industrial plants were closed because of lack of purchasers. Unemployment grew apace, and as it grew, feeding time found ability to pay the per-purchase commitments.

In their trouble and worry thousands of people are to no state of mind to calmly apportion the blame. "They refused to see that they, themselves by any response but; they only did what everybody else was doing. So they say it is the "system" that is to blame; therefore, destroy the system and create a new one. Such a change, however, is not reform, but improvement. There is no question about that, because people need to be saved from themselves, from their own improvidence, their own extravagance, their own foolishness. But people cannot be saved from their "salvation," or prevented from making mistakes, unless they are to be treated as irresponsible children. And who are the supermen to whom the responsibility of thus denying any humanity shall be given? Granted, the "system" calls for change... what, like everything else in this changing world, the system needs changing, changing rapidly as a result of the experiences of the past and the present. Should it be destroyed and a new one created? Or should it be shorten in government, in finance, in the basis, computational world of economics, freeing of all paralyzing, distributing influences, whether within a given country, or throughout the world, experimented with?

Blame it in what at this time, when so much is at stake at thought provoking, when people everywhere are not content to be led, but are demanding with which they are mostly endowed, when because of their wear, are they are unlawful and sad to strike out blindly and ruthlessly to destroy that which took all these pioneers and builders on which only war or two years ago they approved and supported? Because of the pendulum's swing, is for the moment at the extreme left... although it must, just as sure being to swing again to the right, is that any reason to attempt to tear it from its moorings and send to celestial space? Would defy the laws of gravity and momentum?

Where is the remedy to be found on the one hand, or unduly stated on the other hand, in the revolt of all those for this to make important, far-reaching decisions that will affect his future course? When, in the midst of unmistakable hope of so-called prosperity in 1928-29 they made fatalities, selections of the party which they were now paying to betterment and rest. Its time, and equally important, to be sure that the party is worthy of representation, would be worthy control, capable of the task.

Let, for example, put forward a man who, in the troubled air of the convention-hop, was to the glasses of the voting... as neither of whom has made any definite promise and serious commitments, who has been tried and found wanting? Has her outcome... from 60 below in winter to 100 in the shade in summer—had the misery of those days of the past to endure one extreme or the other, nor do we want the recurrence of any of those days of excessive activities, or vice versa. We should plan for the message of our people, and, following extremes, to be kept to the middle course, and, refusing to make that course a highway of the feet to travel upon, a road to travel upon, a road to travel upon, a moderate and abiding degree of individual prosperity, and then for the development and enjoyment of the finer things of life.

Nerves—Could Not Sleep Tired Out All The Time

"For years I was nervous, irritable, [illegible] could not sleep at night, and felt tired out all the time.

A neighbor told me about Milburn's Heart and Nerve Pills, and so she was using them so I got the first she gave me some to try. I found they were doing me so much good I purchased the box and they proved of wonderful help to me."

Price 50 cts. at all dealers and postage paid, or mail to Milburn Co., Limited, Toronto, Ont.

Bible Has Its Say

Current Adjust To Endure Accumulate More Than Other Nations

"Fifteen years ago one whole nation was singing the Queen of Sheba. That English doctrine of there is likely to continue in that faith for a couple of generations longer unless a miracle is wrought. To match treatment with treatment has been the only safe way for England, Britain and her offspring have done in the past. At the reminiscency work that has ever been done in the world, and printed and distributed nearly all the Bibles that are in use in the mission fields; surely it is the will of heaven that her statesmen should be permitted to preserve her life in the same humanity and divine way that it has been preserved for a thousand years and more.

Car Thefts in Chicago

Reported Near Once Held In Three Days

Here's Chicago summed up in a few sentences. Automobile thefts in that city during the three summer months totaled the number of cars and in the months during the same period.

Figures, released by the Chicago Automobile Trade Association, show that 10,139 autos were stolen, as compared to 9,008 during the corresponding of the stolen machines were recovered, but only after they had been stripped, the association report points out.

UNABLE TO KNEEL

Mauritius Hampered Her

In writing of the pain and inconvenience she suffered from neuritis before using Zam-Buk she has the following letter of it:—

"I have been using Kruschen for four weeks and I certainly was the most wonderful gift. My knees were very painful, and it became almost impossible to kneel. As I do all my own housework I was up against it. Kruschen is a bottle in the house for anything. I recommend Kruschen to everybody."—(Mrs.) H. St-ord Gott.

Neuritis, like rheumatism, lumbago, and sciatica, is caused by deposits of uric acid in the blood. Such acid pierces the nerves and causes those stabbing pains. Kruschen Salts dissolve these deposits and the tiny crystals and converts them into a harmless solut on, which is promptly removed through the natural channel the kidneys. And because Kruschen Salts do this so regular—so free from interesting waste matter—so healthy kidneys are kept active and get the balance to assimilate again.

Ring George Leaves Bank

The King of England has decided to cut costs. He will reduce by twenty per cent the staff of the Bank of Buckingham, used as allotments, thereby transferring 60 workmen, who now will only have to pay 25 an acre.

Pandex Bath powders deterioration stores and is harmless in its effect on the skin. Swiftly absorbed by the pores, it softens the outer layer of cuticle. Delightfully cool in the skin. Eliminates perspiration and odor. Keeps the skin healthy. Prevents chafing. Relieves sunburn. Leaves the skin velvety-smooth to the complexion. Prevent Rashes in the bare table Blank of the Pandex Co., Limited.

"Mind" Beggar — Thank you, ma'am, for giving me ship-me.

Old Lady—Then you are not really blind?

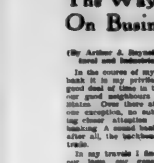
Beggar—No. All have to do is shut my eyes and the money comes. I am deaf and dumb.

Certain morbid conditions must exist in the stomach and intestines to make constipation. Until they exist, as long as these morbid conditions are absent, there can be no constipation. To be rid of constipation and spare the child suffering, use Baby's Own Tablets. They sweeten the stomach, regulate and tone the bowels, correct the digestive irregularities by clearing up the worms, conditions favorable to constipation. Any mother who tries the child will have no more suffering from these troubles.

In the days of the old sailing vessels there was a saying that "Rum, Romance and the Navy" were the three things that made life worth while. Rum has gone, Romance is fast going and the Navy is being cut to the bone. Only Rum and Navy remain to-day.

A delightful tale is about Milburn's Heart and Nerve Pills, sold on the easy terms of 50 cents a box. Once you have tried them you will be sure to buy them again and they proved of wonderful help to me."

More mothers each year.. check Colds



2 WAYS at once!

More and more mothers every year turn to the double action of Vicks VapoRub in checking colds, coughs, many times and spasmodic croup.

Rubbed on throat and chest at bedtime, Vicks acts through the skin like a plaster. At the same time, its medicated vapors, released by the heat of the body, are inhaled direct to the air-passages.

This double action of Vicks breaks up congestion and eases breathing, thus preventing the night coughs which so often rob both mother and child of restful sleep.

VICKS VAPORUB

OVER 17 MILLION JARS USED YEARLY

Builds Up Paying Business

Musician Who Lost Job Now Makes Land Scenery

Frank Dunbar, a musician of Racine, Wisconsin, lost his job with the advent of the "talkies" and the depression, but he has built up a paying business making land soldiers. Each soldier is hand-painted with the aid of a magnifying glass and all are gayer and brighter than those turned out by regular manufacturers. He has cast and painted numerous armies and has found a willing market for his figures, which, he believes, can be used to illustrate soldiers in training.

Lady Oxford Writes Ads.

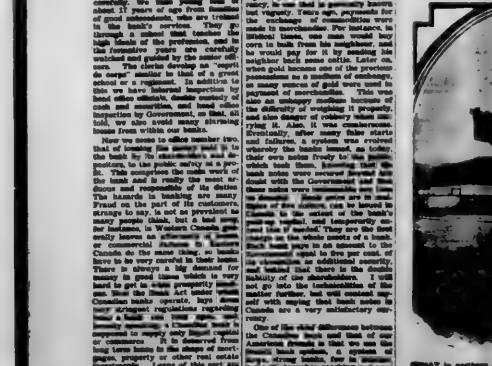
Londoners were amazed to find that Lady Oxford, better known as Margot Asquith, was writing advertisements. A full-page ad in several leading London papers bore her endorsement for a furniture company.

Requisite On the Farm.—Every farmer and stock-raiser should keep a supply of Dr. Thomas' Eclectric Oil on hand, not only as a ready remedy for all in the family, but because it is a horse and cattle medicine of great value. As a salve it is the very best oil for horses and cattle affected by sores, cuts, etc., and for internal use it can be administered.

A cigarette case stolen from F. J. Holder, of Coley-Place, Reading, five years ago, was returned to him by post with the cigarettes inland.

The first sandwich is said to have been made in the 17th century.

WHEN 'RUN-DOWN'



● The sensible way—the doctor's way—of treating that sluggish, "run-down" condition is to use Phillips' Milk of Magnesia. Try it instead of something just to "move the bowels." See how much better you feel—and continue to feel for days after! The mild-acted action clears the system of all those poisons that cause headaches, fatigue, loss of appetite. Get the genuine; look for Phillips on the wrapper.

Made in Canada

Refuse substitutes. Insist on genuine Phillips' Milk of Magnesia. Prescribed by physicians for 50 years. Just say "Phillips" and you get the genuine. Avoid imitations. Only 25c per bottle. Larger economy sizes.

Canadian Banking System And The Way It Functions To Carry On Business Of The Country

(By Arthur A. Reynolds in Agricultural and Industrial Progress)

In the course of my duties for my bank it is my privilege to spend a good deal of time in the territory of our good neighbours in the United States. Over there of present, with one exception, no subject is engaging closer attention than that of banking. A sound banking system is, after all, the backbone of a nation's trade.

In my travels I find that next to our home, our generous southern neighbours admire our banks. And rightly so, for in the period of business inertia through which we have all been passing the Canadian does not even stop to question, let alone calculate, how marvellously our banks have stood the strain as compared with those of other countries. Our banking system was grounded particularly on principles enunciated originally by a great American, Alexander Hamilton, in 1823. In addition to these also had the favourable experience of the branch banking system of Great Britain to draw upon. I will not go into details of very evolution, but it is sufficient to say that even though it started out on safe principles, it was by no means perfect, and it has taken years of growth and change to produce the good banks we enjoy here today.

Our Bank Act under which we operate is an elastic piece of legislation, allowing for revision or changes as circumstances from time to time necessitate. And even yet we shall go on, each decennial revision of the Bank Act making such alterations or improvements as time or circumstances may demand from it.

The purpose of a bank are four fold, to provide a safe place where people may keep money and valuables; to see its own money paid in by its shareholders not deposited by the public safety at a profit, to act as an agent for the collection of the interest of money, and to provide the public with a convenient currency in the shape of its own promissory notes intended to circulate as money.

The private banker, that of providing a safe place for money and valuables, is really the meaning of "Bank." A private bank is equipped for the safe-keeping of money and the biggest in the world, but it has more elaborate these arrangements go. Vaults, through the various services utilized, the safes and vaults of the modern bank are almost impregnable. In addition to that, you may notice the banks advertising safety deposit boxes. These are small vault compartments in a bank's vault, where the individual can store his own papers or valuables privately, making his own key, and, in fact, have a special apartment all his own for a more trusting annual rental. So generally speaking, safety of a bank from external robbery is pretty well established. However, internal robbery is to be provided against, and there is no money more secure than the one at within the bank, and the failure of banks caused by the betrayals or trust or confidence reposed by its officers have been often the chief cause of losses. The best protection against this is the character of a bank's staff. In Canada we pick our clerks very carefully. The young boys of about 17 years of age from the ranks of good citizenship are trained in the bank's services. They go through a period that teaches the high ideals of the profession, and in the formative years are carefully watched and guided by the senior officers. The clerks develop an "esprit de corps" and that of a great school or a regiment. In addition to this we have a thorough inspection by head office officials, double auditing of cash and securities and local office Inspection by Government, so that, all told, we also avoid many skimming losses from within our banks.

Now we come to office number two, that of lending the money paid in by depositors, to the public safety at a profit. This comprises the main work of the bank and is really the most arduous and responsible of its duties. The hazards in handling are many. Fraud on the part of its customers, strange to say, is not so prevalent as many people think, but a bad paper handled, in Western Canada, generally becomes an affair of a farmer or commercial customer. In Western Canada do the same thing, so banks have to be very careful in their loans. There is always a big demand for money in good times which is very hard to get in times prosperity when the time the bank Act under which Canadian banks operate lays down very stringent regulations regarding loans, and one type of loan is not permitted to exceed a certain percentage of the total loans. A bank is supposed to supply only legitimate trade or commerce. It is deterred from long term loans in the shape of mortgages, property or other real estate investments. Loans of this sort are taken care of by other institutions such as trust companies, insurance companies and the like. . . . The

branches of the bank loan their moneys in various ways. For instance, a branch financing a lumberman in the out rough lumber and manufacture it, and he pays back when he sells it. The textile manufacturer is financed to buy his raw wool. He pays for it when it is converted in the form of yarn. The farmer is financed for his spring expenses. He pays from his crop in the fall. In fact, any industry that buys and sells for a quick turnover can be readily financed by the bank, provided, of course, that the industry is in good shape.

There is no job as hard on a conscientious banker as the loaning of money. Funds, and possibly no feature gives rise to so much criticism on behalf of the public because it is very difficult to remove the question of human nature from a thing so vital as this. Of course, it is the invariable experience that money is easy to get during prosperous times, and in periods of depression a good many chickens come home to roost. In spite of criticisms that have been sometimes made regarding the branch banks I might emphatically state that in our system branch managers are usually quite as liberal as individuals in loaning to suit their communities. In the case of large loans, far from being a detriment to have to refer them to head office it is quite advantage and a safeguard to the depositor's money.

Branch managers have splendid opportunity of getting the broader experience of a trained staff of experts in his locality to steer him away from pitfalls he might easily enter into otherwise. This is so much so it is pretty sure to be authorized. A high banking official once stated on the subject recently, stated that 60% of the loans of Canadian banks are made on the strength of character. Under the individual bank system of loaning. Now, the department has advanced that as the bankers are all more or less experts in their line they are all local, they have local interests very closely at heart. I would ask . . . "Does it not lead to monopoly banking?" Does it not lead to moneys being loaned at less than 6% by the branches of the banks in other countries? The third function, to act as agent for the collection and remittance of money and drafts, is one with which the public is only partially acquainted. You see by the daily papers locally small money orders and travellers' cheques are issued by the banks which relieve remitting fairly large amounts say, over $100. Another thing which the public does not know is how far a more trusting annual rental. So generally speaking, safety of a bank from external robbery is pretty well established. However, internal robbery is to be provided against, and there is no money more secure than the one at within the bank, and the failure of banks caused by the betrayals or trust or confidence reposed by its officers have been often the chief cause of losses. The best protection against this is the character of a bank's staff. In Canada we pick our clerks very carefully. The young boys of about 17 years of age from the ranks of good citizenship are trained in the bank's services. They go through a period that teaches the high ideals of the profession, and in the formative years are carefully watched and guided by the senior officers. The clerks develop an "esprit de corps" and that of a great school or a regiment. In addition to this we have a thorough inspection by head office officials, double auditing of cash and securities and local office Inspection by Government, so that, all told, we also avoid many skimming losses from within our banks.

Now we come to office number two, that of lending the money paid in by depositors, to the public safety at a profit. This comprises the main work of the bank and is really the most arduous and responsible of its duties. The hazards in handling are many. Fraud on the part of its customers, strange to say, is not so prevalent as many people think, but a bad paper handled, in Western Canada do the same thing, so banks have to be very careful in their loans. There is always a big demand for money in good times which is very hard to get in times prosperity when the time the bank Act under which Canadian banks operate lays down very stringent regulations regarding loans, and one type of loan is not permitted to exceed a certain percentage of the total loans. A bank is supposed to supply only legitimate trade or commerce. It is deterred from long term loans in the shape of mortgages, property or other real estate investments. Loans of this sort are taken care of by other institutions such as trust companies, insurance companies and the like. . . . The

Canada's 1932 Arctic Patrol Returns After A Successful Expedition To Northern Posts

Canada's 1932 expedition to the eastern islands of the Arctic archipelago has returned after a 73-day voyage on the S.S. Ungava. In many respects this year's patrol under the auspices of the Department of the Interior was outstanding among the voyages of annual years to the Far North. In order to effect the greatest economy in cost the Department utilized one of the Hudson's Bay Company's ships on its voyage to the various trading posts, the usual itinerary being extended to enable ships to be made to the Government posts on the far northern islands.

Altogether twenty-five calls were made during the 9,000 mile voyage. Leaving Montreal on July 8, the Ungava made its next stop at Cartwright on the Labrador coast completing its 1,500 miles on the 14th. From there the boat proceeded to Port Burwell at the entrance to Hudson Strait, crossed the Strait to Foxe Harbour on the southern shore of Baffin Island, recrossed the Strait to Wakeham Bay, moved westward to Repulse Bay and Wolstenholme, and then swung into the bay for calls at Cape Smith and Port Harrison on the eastern shore of the bay. At Port Harrison the farthest south point of the voyage was reached and incidentally the highest temperature of the trip record of the northern islands. The visit to Godhavn was the annual "good will" call at the capital of Danish local government when courtesies were exchanged.

In the course of this year's patrol ample opportunity was given members of the Government party to make extensive inspections at each of the posts visited. Major D. L. McKeand, of the Department of the Interior, Officer in Charge of the expedition, made a personal visit to the various posts and missions at each of the ports of call in the arctic archipelago taking a census of the inhabitants and surveying health, wild life and general living conditions. Dr. John S. Douglas, of the Department of Pensions and National Health, took charge at each of the northern posts and practised treatment, whenever necessary. He reported that he was struck with the healthy condition prevailing among the Eskimo and white inhabitants of the various posts, there having been no serious outbreaks of disease during the past year in addition to his regular duties, made observations of the solar eclipse of August 31 while the ship was approximately in latitude 78 degrees north, about five miles off Cape Sabine, Ellesmere Island. This was the most northerly point reached by the patrol. He also made a study of the aurora borealis and magnetic observations were made equipment, gaining much valuable information. Inspector T. V. Wood, Officer Commanding the Royal Canadian Mounted Police party, inspected the various detachments and superintended the changes of personnel at the various posts. Inspector T. F. Hamilton was Ship's Master and his crew consisted of thirty-five officers and men.

Unusual ice and weather conditions prevailed particularly during the main northerly part of the voyage. The ice forced out from Pond Inlet Harbour, Baffin Island, on August 14 two weeks later than in previous years. Ice was encountered in Fall at River Clyde, Baffin Island, on August 26, the day on which the expedition arrived. Similar ice conditions obtains occurred but fortunately on each occasion the expedition was in port. Heavy ice was met with and had to be forced on the second and this year, barred the way to Smith Peninsula, the most northerly point on the voyage. For the second year the ship was manoeuvred in Smith Sound in an effort to find an opening in the barrier but without success. The conditions which prevailed during the voyage prevailed during this period when the mercury dropped to 20° below zero were rare. The unusual temperature added to the dangers of being caught in the ice and the ship was forced to retreat to Craig Harbour at the southern limit of Wellington where the supplies and mail for Bache Peninsula detachment were landed.

Conditions in the Far North as regards the natives were reported as very satisfactory. During the trip which included calls at the principal ports in an area extending roughly [illegible] miles north and south and [illegible] miles east and west, only [illegible] were in need of medical attention, while only [illegible] deaths occurred among the [illegible] natives or more than half the Eskimo population of the Northwest Territories. The medical examinations conducted showed that the expedition had been singularly free from disease during 1931-32. The year was on average one for the number of pelts taken, fur bearers and other wild life being fairly plentiful There were few cases of destitution, the natives in a rule being well supplied with the ne-

Kept Up His Record

George Farwell, of Milwaukee, who helped elect Abraham Lincoln in 1860, voted his 18th United States Presidential ballot on November 8. Hedisfour, he said, is a good voting age. A fellow knows pretty well "which's which" by then. He voted for Hoover this time, he said, and thereby kept intact a 72-year-old record of a man voting the Republican ticket.

Births reported in London in a recent week totalled 430, and deaths 307.

England has 2,000,000 bachelors between the ages of 30 and 50

✦ Do You Know? ✦

CANADIAN PACIFIC STEAMSHIPS

W. N. U. 1929

WORLD HAPPENINGS BRIEFLY TOLD

Both houses of the Bahamas legislature approved the Ottawa commercial conference agreements unanimously.

Germany has completed delivery of Soviet Russia's order for 250,000 tons of iron and steel.

Prime Minister Ramsay MacDonald vehemently criticized leisurely preparations for the projected world economic conference in the House of Commons.

Dr. Howard Carter, the sole survivor of the little party which, led by the late Lord Carnarvon, discovered the tomb of Tutankhamen, has left once more for Egypt.

Forty-three men and one woman have started working against time to whip into shape before Christmas a constitution for India's population of 300,000,000.

Jobless men who turned to prospecting for gold along the Fraser River and its tributaries during the summer months, have met with gratifying success, according to reports received at the Chamber of Mines, Vancouver.

The power of the Minister of National Revenue to fix valuations for customs duty on imports to Canada will be curtailed by the adoption of Bill No. 6, as set to amend the Customs Act, which was passed by the House of Commons.

Princess Imeretinsky, English wife of the Russian nobleman, and widely acclaimed as one of England's most beautiful women, has been granted a decree nisi of divorce from Prince George Imeretinsky, on the grounds of misconduct.

For the three years ending March 31, 1929, a total of 13,264 persons were deported from Canada, according to a return tabled in the House of Commons recently. More than one-third, or 5,573 were English, while the next largest national group were Slavs, who numbered 2,660.

Relief tickets entitling the bearer to food and bed will soon be offered for sale in Winnipeg citizens, who, in turn, may distribute them to needy men. The tickets, which will ensure the donor his contribution is being used for its intentional purpose, will sell at 10 cents each.

A "potato famine" is foreseen early in the new year, says the Toronto Star, as a result of widespread "late blight and rot," in the Ontario crop. Farmers of the province will lose at least one-fifth of their harvest this year, representing a cash value of about $1,000,000, says the newspaper.

Faith Justified

Speaking at Langton, Archbishop Downey said that recently a poor woman with 10 children brought him $500 in gold to be given to the Cathedral fund. Asked if she could afford it she replied:

"Of course I can afford it. I have been given to God. Whatever I give anything to God I get it back."

The Archbishop added that he gave her his blessing, and a few days ago he heard she had won $500 in the Irish Sweep.

Britain has only 13 bathhouses to America's 36, but in evidence this is to their 10.

Devotional Reading Matthew 4 18-25.

Explanations and Comments

Four Disciples Called To Followship and To Service, Mark 1 16-20 Walking along the shore of the Sea of Galilee, Jesus saw the two brothers, Peter and Andrew, casting a net in the sea, letting it down and then lifting it up, first on one side of the boat and then on the other, for they were fishermen. The successful use of this net, W. M. Thompson explains, requires a keen eye, an active frame, and great skill in throwing. The fisherman must also be patient, watchful, and prompt in seizing the exact moment to throw. These were qualities needed by fishers of men, and Jesus called to them: "Come ye after Me, and I will make you to become fishers of men."

It is unlikely that the disciples understood at this time all that this phrase, fishers of men, meant. Jesus' ministry was an it normal one; He went about from place to place preaching and preaching and healing. The hours of His work left little leisure; ship and apprenticeship of disciples necessary He had many things to say that only trained hearers would follow, many things to do that only loyal pupils could undertake, a legacy of service that only skilled followers could carry out. As one by one the four left their nets and followed Him.

Paul Called To Receive His Life Work, Acts 26 12-19 It was midday on his way to Damascus to persecute the Christians that P ul saw a light brighter than that of the sun and heard a voice saying, "Saul, Saul, why persecutest thou Me." It is hard for thee to kick against the pricks." "Paul is really in the position of a plough-ox Jesus is his driver and holds the goad. Paul can no more resist Jesus than the plough-ox can resist his driver."

"Remember that the heavenly vision comes to you in very humble and very lowly forms, not in visions of angels nor light flashing down from the skies. It comes in the simple guise of duty; the thing which you ought to do today, and which you know that you ought to do. This is the heavenly vision of the moment. You are to give up that sin, you are to undertake that bit of work for others, you are to break from certain habits and companionships. That is the God speak you at the moment. You are sure of it. It is the vision which you have to follow -follow it!" —J. G. Greenough.

BANANA MERINGUE PIE

1½ cups (1 can) Eagle Brand Condensed Unsweetened Milk.

¼ cup lemon juice.

2 medium sized bananas (cut in small pieces).

2 egg whites.

2 tablespoons granulated sugar.

Zwieback Pie crust.

Blend together Eagle Brand Sweetened Condensed Milk and lemon juice. Fold in fruity cut bananas. Pour into nine-inch pie plate lined with Zwieback Pie Crust. Cover with meringue made by beating egg whites until stiff and adding sugar. Bake in a moderate oven (350 degrees Fahrenheit) until brown. Chill before serving.

ZWIEBACK PIE CRUST

Roll enough zwieback to make one cup crumbs. Mix with ¼ cup Eagle Brand Sweetened Condensed Milk, and butter nine pie plate, pressing mixture in well. Pour in filling as usual.

To Asthma Sufferers. Dr. J. D. Kellogg's Asthma Remedy comes like a helping hand to a stinking swimmer. It gives new life and hope—something he has come to believe impossible. Its benefit is too evident to be questioned—it is its own best argument—its every best advertisement. If you suffer from asthma get this time-tried remedy and find help like thousands of others.

Wanted Them To Fit

MacPherson was to be married.

"Ye'll be givin' us a send-off?" he inquired of his best man.

"Certainly."

"With rice and white ribbons and bottles?"

"Aye."

"And old shoes thrown after us?"

"Of course."

"Well, keep in mind—I wear eights an' bought tans first."

Jack: "Women don't interest me, I prefer the company of men."

Jill: "Why don't you say you are broke and be done with it?"

To Safeguard Shipping

Extra Precautions Will Be Taken On Hudson Bay Route

Further precautions to prevent loss of ships on the new Hudson Bay route will be undertaken next summer by the government, according to word brought to The Pas, Man., by J. A. Campbell, K.C., local barrister, who was called to Ottawa to be present at the inquiry into the loss of the S.S. Bright Pen, which went in Hudson Strait, October 1, after striking an iceberg.

Mr. Campbell states that the S.S. H. B. McGuire, government icebreaker on patrol duty in the far north, will be provided with charts of the waters traversed by vessels using the grain route, and that these Canadian charts will be available to masters of vessels. The "MacLean" will also be in the neighborhood, as added protection, as was the case this year.

Find Ancient Skeleton

Remains Of Young French Soldier Who Died In 1535 Found In

A skeleton believed to be that of a young French soldier killed while defending the fort at Montreal on Iroquois attack on August 23, 1535, has been unearthed by workmen excavating in the heart of Old Three Rivers in Quebec.

A Bram plaster, a leather-covered sabre sheath bearing the soldier's regimental number, a container made of bark and some small pieces of cloth were found near the bones.

Well Children

"Occasionally I give each of my five children BABY'S OWN TABLETS—and am sure that is why they never have any serious illness", writes Mrs. George Morley, Yesler, Ont. This mother's advice is passed on to all Mothers.

BABY'S OWN TABLETS can be given with complete safety to the youngest and most delicate child as per mother's statement in each 25c package. Recommended by mothers for teething troubles, simple fevers, colds, digestive disorders, constipation, Indigestion. Buy to-day at your druggist.

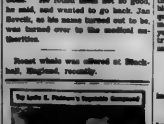
BABY'S OWN TABLETS

The Freedom Of Mice

A dispatch to Prague, Czechoslovakia, announced authorities at Moravska-Ostrau, Czecho-Slovakia, by applying for a passport to Mice. He said he was the president of that place's down town to study business conditions. He found them not so good, he said, and that the mice of Jan Havelik, as his name turned out to be, was turned over to the medical authorities.

Beast whale was offered at Stockholm, England, recently.



PRINCE GIVEN WARM WELCOME IN N. IRELAND

Belfast, Northern Ireland.—Citizens of Belfast and the surrounding countryside turned out in record numbers to give the Prince of Wales an open-armed welcome when he set foot on Irish soil for the first time a welcome that overshadowed a display of bad temper by objecting nationalists.

When the prince arrived in the harbor a group of booming 'planes wheeled from overhead. Dockside workers waved flags and sent up such cheers the roar of the 21-gun salute from the two warships scarcely drowned them out.

Earlier, an effort that might have had dire consequences was made to prevent sightseers from coming to Belfast to see the prince, passing good naturedly, take part in a five-mile parade to Stormont where he dedicated the new northern Ireland Parliament Buildings

Long sections of the railroad between Keith, County Meath, in the Free State, and Belfast, were torn up, and other parts of the road were mined. Rails also were ripped up on the vicinity of Cavan, also in the Free State.

At one end of the breaks in the tracks were placed notices reading: "Ireland belongs to the Irish, both north and south." Red flags were placed at points where the rails were broken.

The Prince, wearing the uniform of a colonel of the Irish Guards, was welcomed by the Duke of Abercorn, Governor of Ulster, Viscount Craigavon, the Prime Minister, and Sir R. Dawson Bates, secretary for home affairs Then he stepped ashore amid wild cheering.

Of the 12,000 men on guard along the five mile route to Stormont, 6,000 were armed soldiers and police and 6,000 were volunteer Orangemen.

The Prince recalled the heroic part played by Ulster in the World War in his address.

"It is my father's earnest prayer," he said, "that you will meet all of those difficulties which confront the world as well as your own sparing no effort to seek a peaceful solution by the courage, loyalty and devotion which has always characterized the men of northern Ireland and made them famous in the annals of the empire.

Thief Drops Loot

Jewelry Taken From Residence Is Recovered

Vancouver, B.C.—"Was my face red!" the thief probably remarked as he told of his night's venture.

He made a clean get-away with $1,900 worth of jewelry from the home of Mrs. C. M. Hughey, taking the dresser drawer in which it was concealed. He cross-countryed back-yards and, further from the scene of the safety of his hide-out he looked to giant again over his loot.

The drawer was empty.

The denouement came Wednesday when the jewelry was found in an adjoining yard from the home from which it had been taken. The thief had dropped it as he carefully guarded his worthless drawer in the course of his post-[illegible] effort.

Grain Shipped Through Maritimes

Saint John, N.B.—A million bushels of grain are moving eastward for shipment through this port early in December. It has already been purchased for shipment via Saint John, it was announced by Harbor Commissioner Thomas Nagle on his return from Montreal, where he interviewed railway and steamship officials and some of the leading shippers.

Loan Is Subscribed

Montreal, Que.—Beyond confirming the statement by Hon. E. N. Rhodes, Minister of Finance, that the new Dominion loan of $60,000,000 had been fully subscribed, the central campaign committee here had no information to offer. Until all the applications had been totalled up it would not be possible to state the extent of the over-subscription.

Russia's Food Problem Is Becoming Serious

People Are Now Subsisting On Meal Stringent Rations

Moscow, Russia.—On the eve of the conclusion of the five-year plan which is being ended in four years—Soviet Russia is struggling with the old and difficult problem of food for its people.

The food situation is bound to be one of the chief problems of the second five-year plan, now in the process of drafting. Russians are subsisting on most stringent rations.

There is a serious shortage of such commodities as wheat, sugar and butter. In the second plan, by all indications, greater emphasis than ever will be placed on the improvement of general living standards.

Although the state of the country's food supply is admittedly bad—some Russians say it is worse than in 1920, when the five-year plan started — reports are available here to bear out the pessimism heard abroad as widespread suffering this winter On the contrary, the 1928 harvest is expected to be most present harsh conditions to some extent.

The country failed last year to achieve planned increase in industrial production, but 1928 will record appreciable increases over the previous year.

Exports Increased

Wheat Shipments Boost Exports For Month 16 Cities

Ottawa, Ont.—Exports to foreign countries during the month of October, according to figures released by the Department of National Revenue.

The increase, compared with the figures for October, 1928, occurred chiefly in exports of wheat, the volume of which was more than double that of the same month last year.

Last month's exports had a value of $60,206,626, as against $55,537,917 for October, 1928. Nine-months were $634,379 compared with $996,065 for the same month last year.

A decrease also in imports from $45,933,872 in October a year ago to $37,562,306 last month, boosted Canada's export balance to $10,974,,667.

Total trade for the month under review had a value of $94,540,,660, as against $101,469,571 for October, 1928.

Unemployed Spectre

$50,000 Men, Women and Children Receiving Relief In Canada

Ottawa, Ont.—Canada has 500,000 men, women and children receiving relief, Hon. W. A. Gordon, Minister of Labor, announced in the House of Commons.

Of the total number mentioned, said Mr. Gordon, it was estimated that 144,000 were people who had not worked very steadily since 1919. Another 100,000 were what were known as transients, 50 per cent. of whom were recent arrivals in Canada.

Income Tax Collections

Increase Is Shown In Figures Issued At Ottawa

Ottawa, Ont.—An increase of $440,-656 in income tax collections is shown in the figures issued by the Department of National Revenue. The total for October, 1929, was $926,443, and for last month $1,384,984.

For the seven months of the fiscal year income tax collections have increased by $2,235,991 over the same period last year. Total collections were $9,346,813 in the 1921 period and $62,572,810 this year.

Forces Longer Hours

Montreal, Que.—Longer working hours—"a 13 or 14-hour day of labor"—were suggested by Busmby Leman, former president of the Canadian Bankers' Association and General Manager of La Banque Canadienne Nationale, addressing the Purchasing Agents' Association here.

No Export Bounty

Ottawa, Ont.—Department of justice has received no report from the investigation into the recent riots at Portsmouth penitentiary, Hon. Hugh Guthrie told the House of Commons.

Death Of Major Sifton

Secretary-Treasurer Of Winnipeg Free Press Passes In Toronto

Toronto, Ont.—John Wright Sifton, secretary-treasurer of the Winnipeg Free Press, died November 13.

Mr. Sifton, who was 46 years old, had lived in Toronto for some time following a long holiday in the southern United States. He died after a long illness, although his condition did not become critical until a few weeks ago.

Mrs. Sifton, who was formerly Miss Grace Christine Bell, Montreal, survives.

Ice Needle Rare

Manchester, Eng.—The Manchester Chamber of Commerce believes reductions in the Canadian tariff already announced are unlikely to enable British cotton, artificial silk and textile exporters appreciably to increase their trade.

Figure Tariff Changes

Members Of Parliament Falter In Realms Of Higher Mathematics

Ottawa, Ont. Staid members of parliament reached for pencils and scratch pads when discussing changes in the Canadian tariff resulting from the Anglo-Canadian trade treaty.

Liberals were in an inquisitive mood, wanting to know to what levels the exchange dumping duties, excise duties and sales tax would elevate tariff items specified in the agreement. H. J. Young (Lib., Weyburn), and ardent free-trader, said a 20 per cent tariff against British-made kitchenware because of per cent. when the extra imports were added. United States kitchenwares paid 30 per cent.

Pencils and paper appeared on the desks Members began involved calculations, most of them giving up in disgust when the realms of higher mathematics were reached.

Youths To Be Spanked

A Surrey-General Makes Punishment Fit the Crime

Victoria, B.C.—British Columbia youths who think it is smart to drink in beer parlors will be punished by the old-fashioned method used by fathers of the last generation in the province.

They will be spanked in the place provided by nature for such correction, under arrangements instituted by the attorney-general's department. This interesting new punishment, designed to chastise boys, without confining them with criminals in jail, was announced by Attorney-General E. H. Pooley when he was called on to review the case of two Kamloops youngsters. They were convicted of having been served beer in the town of Chase and drinking beer in a beer parlor there, although they were minors and not entitled to enter such premises.

Winter Fair Winners

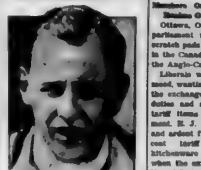
Alberta, Saskatchewan and Manitoba Share In Honors

Toronto, Ont.—James Whitehead, grower, of Saskatoon, secured a double victory at the Royal Winter Fair as judging of grain exhibits got under way

In the grain in sheaves section, Whitehead won with his sample of wheat and also took first place in the barley division. Oats awards went to Carl Schmale of Carievale, Ontario.

The entry of Patrick Shea, Winnipeg, "Warrior," was declared champion golding, with reserve going to "Martin," owned by Gibbs Brothers, Lumsden, Saskatchewan.

"Marley," owned by Jack Lenge, Delroy, Alberta, won the Clydesdale gelding special and "Martin," owned by Gibbs Brothers, the Belgian special.



Aubrey Niel Morgan, business man of Cardiff, Wales, whose engagement to Miss Elizabeth Morrow, eldest daughter of the late Senator Dwight Morrow, was recently announced. Miss Morrow met her fiance while visiting London with her father in 1920.

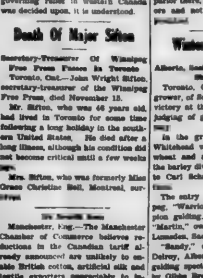
Policy Unchanged

Relief Administration For West In Hands Of Commissioner At Ottawa

Ottawa, Ont. Details of unemployed relief administration in Manitoba and Saskatchewan were discussed when Hon. M. A. MacPherson, provincial treasurer of Saskatchewan, and Hon. Ewen McPherson, provincial treasurer of Manitoba, conferred with Harry Hereford, director of unemployment relief for Canada.

The meeting followed a conference with Hon. W. A. Gordon, Minister of Labor, last night when Hon. George Hoadley, Minister of Agriculture for Alberta, was present.

No change in the general policy governing relief in western Canada was decided upon, it is understood.



The wedding of Admiral Sir George Egerton and Margaret Stella was recorded by our press photographer as the couple left Ringwood Parish Church, in England. The bridegroom who is eighty years old ago, entered the British Navy in 1866 and retired in 1916, during which time he held several important appointments, including Naval A.D.C. to the King in 1905. He was second in command of the Atlantic Fleet in 1906-7 and Second Sea Lord in 1911-12.

EVOLVE PLAN IN EUROPE TO AID UNEMPLOYMENT

Paris, France. The creation of an economic consortium by Great Britain, France and Germany with an to designed to assist in the return of prosperity and in coping with the unemployed problem, was announced by Raymond Patenotre, who will be in charge of its operations.

"We foresee," said M Patenotre, "a return of prosperity by the natural process of the development of industrialization.

"The unemployed in the minister deplored countries will be given work, while the jobless in the larger countries will be relieved by the operation of tariffs.

The plan was described as a combination of French capital and German industry, with guarantees covering the subjects of insurance, security and non-competition.

The first project of the consortium will be the offer of a loan of 17,000,000,000 francs (currently $668,-000) for the electrification of railways in Poland, Roumania, Hungary and Portugal.

The Paris edition of the New York Herald Tribune said France and Great Britain would provide 40 per cent of this loan each, and Germany would furnish 20 per cent.

The consortium will consist of three syndicates — Franco-German financial experts, British, French and German bankers, and a Franco-German syndicate designed to carry out recommendations of the banking taking a pair of girls to the town of Chase and drinking beer in a beer parlor there, although they were minors and not entitled to enter such premises.

New Duties Now Effective

Ottawa Trade Agreements Now Law In Britain

London, Eng.—The Ottawa agreements bill implementing the United Kingdom's new trade pacts with the Dominions has become law. New duties set out in the bill became effective at midnight, November 18, replacing those of the Import Duties Act passed last year.

The bill was given third reading by the House of Lords and immediately afterwards obtained royal assent by commission.

Meanwhile a treasury order was issued extending, without interruption, general empire preferences and special tariffs imposed under the Import Duties Act. Another order made the Ottawa preferences effective ilad no agreements been reached at Ottawa the preference would have lapsed November 15.

The treasury order continued preference on goods from all countries of the British Empire with the exception of the Irish Free State, which failed to conclude an agreement with the United Kingdom at Ottawa.

Remaining provisions of the Ottawa Agreements Act, brought into force at once, concern powers and duties of the treasury board in respect of trade which require no immediate action.

Preference For Canadian Ports

Will Be Used Wherever Possible For Overseas Wheat Shipments

Winnipeg, Man.—All things being equal, western exporters of grain will continue to use Canadian Atlantic and Pacific ports for the movement of wheat to the United Kingdom

Leading grain shippers interviewed by the Canadian Press stated that wherever possible Canadian ports were given the preference in handling Canadian grain for shipment overseas.

May Re-Open Coal Bunker

Victoria, B.C. Possibility of reopening the Ladysmith smelter to handle the copper ores from the Britannia mines on Howe Sound, so as to enable those mines to come in under the British preference and continue operating, was discussed during by members of the government.

Soil Moisture Experiments

Grain Crops Use Moisture At Rapid Rate During Growing Season

Experiments on soil moisture, established at the Dominion Experimental Station, Swift Current, Sask., have revealed some surprising facts on the vital importance of moisture in the production of grain. Grain seeded in many sections of the prairies rarely receives sufficient moisture to promote a normal growth. The prospect of heavy yields is frequently spoiled by spells of dry weather as the season advances.

Grain crops use, on an average, about three-fourths of a comparatively rapid rate and in considerable volume. During the past season at Swift Current a crop of wheat used a total of eighteen and a half inches of water. Eight inches of this came in the form of rain during the growing period and the balance was present as available water in the soil. The rate of use of water by the crop was at first quite slow, but the first two weeks after emergence it averaged the equivalent of six-hundredths of an inch of rain daily. This rate rapidly increased with growth and reached a maximum of forty-eight-hundredths of an inch daily during the week commencing on June 15. In this week the crop used water equivalent to forty-three per cent of the total rainfall. After July 30 the rate of use of water fell off rapidly and at harvest was again only six-hundredths of an inch daily.

The foregoing is an example of a crop produced under almost ideal conditions. Much less favorable conditions existed for a crop seeded on land already reasonably moisture-depleted in the field. This crop received the same amount of rainfall, but only the equivalent of three and one-half inches of water was available in the soil. Until June 15 both crops used water at the same rate. From this date the growth was noticeably different. An examination of soil moisture conditions showed that in the seven-day period from June 15 to 22 the crop on summer-fallow had used forty-eight per cent. of its total moisture reserve, while by June 29 only a very small quantity remained.

Wheat crops, when subject to deficient moisture conditions, pass through stunted critical periods when the absence of sufficient moisture definitely depresses the yield of grain. In this season spelled the first crop was at no time subjected to any critical period. The second crop, corresponding to that seeded on summer-fallow under conditions, was undoubtedly severely injured during the week ending June 22. At this time, with no rain and depleted soil moisture, it was impossible for the plants to secure sufficient moisture to function normally. Although heavy rains occurred early in July they failed to offset the injury previously sustained.

—E. Stevens, Experimental Station, Swift Current.

Award Goes To Galsworthy

Second Englishman To Win Nobel Prize For Literature

The 1932 Nobel prize for literature has been awarded to John Galsworthy, the British novelist.

The author of "The Forsyte Saga" had been mentioned in newspaper predictions as a probable recipient of the award. Last year's prize was won by Erik A. Karlfeldt, of Sweden.

Only one other Englishman has won the reward for literature, Rudyard Kipling took it in 1907. George Bernard Shaw, an Irishman, won it in 1925.

The most famous of his works, of course, are those comprising the Forsyte saga, which trace the fictional history of the Forsyte family in England and abroad.

His plays have engaged considerably in the drama, a field in which his notable productions include "Loyalties" in 1922 and "Old English," in which George Arliss was an enthusiastic success. He also wrote "Escape" in 1926 and "Exiled" three years later, and a number of other plays.

First Tramp: "What would you do if you was the first prize in the big lottery?"

Second Tramp: "I'd have the blisters put between sprinkled."

W. N. U. 1932

Building Material From Rock

Rock Wool Is One Of the Most Effective Insulating Materials

As an outcome of the trend toward a greater use of insulating materials in the construction of homes and offices, and in other fields, the Canadian Government Department of Mines foresees the establishment of a rock wool manufacturing industry in Canada. Should the material for the development of the large deposits of asbestic in the Niagara Peninsula of Ontario would follow it is stated. Surveys conducted by the Department disclosed the presence of these self-fluxing, argillaceous deposits and research has since established the suitability of the material for the manufacture of rock wool. At present the total requirements of the product are imported.

Rock wool is one of the most effective insulating products on the market. It is made by melting suitable natural rock to a very fluid condition in a cupola furnace using coke as fuel. The molten material issues from the furnace in a small stream, and is attenuated by a blast of steam, which converts it into a mass of fine, pliable, colourless, glassy fibres. These fibres constitute the rock wool of commerce. It is very similar in many respects to slag wool, but is practically free from the deleterious element, sulphur, compounds of which are sometimes found in objectionable quantities in slag wool.

The insulating value of rock wool is due to the myriads of tiny air cells associated with the interlaced fibres. So field of usefulness for insulating purposes ranges from the home to industrial buildings up to 1,000 degrees Fahrenheit. It is marketed for a wide variety of uses including insulating low pitch roofs, lumber for cold chamber stores, and refrigerators; covering for steam pipes, oil stills, hot water pipes, boilers and furnaces. It is also the principal ingredient of an insulating cement and of an acoustic tile, the latter being used extensively in offices, moving-picture theatres and auditoria.

Chinese Use Pictures

Children Are Taught By Sight Instead Of Sound

Douglas W. Thompson, writing in the Contemporary Review, London, says:

"What is a specialist's work with an infant in the schoolhood literature of the Chinese. They use no alphabet, are not troubled with parts of speech, have no declensions robbed into their memories, and no conjugations to make them sweat. Instead they are given a number of neat pictures, each one depicting some thought or thing. Every one explains itself at once, and the whole theory of the curve in light is expressed by a picture of how it appeals to the eye and heart. The majority of these pictures are themselves simple enough to be understood by a child. Advancing by a compulsory inside-double-window bylaw would elect any civic reformer. He merely because made them to put on the crude double windows of today—and builders could even make it a recreation and a pleasure.—Brandon Sun.

"Your George has been blotted by a borer."

"How dreadfully clumsy!"

Double Window Task

Every Man Has Become Martyr To This Evil

It is an odd trait in the average man that he will follow beaten tracks rather than distinct routine by making new paths. Also in the matter of storm windows man permits himself to become a martyr to custom and a slave to worry. Double windows are a night-mare to most all householders. The average of accidents to paterfamilias in putting up storm sashes must be very high indeed. Preceding every winter the dread task is faced with trepidation by the majority of men. It should be unnecessary. There ought to be a law against any householder raising their heads pulling on the double windows. It should compel all builders to erect dwellings that do not need storm sashes.

There doesn't need to be any genius or mechanical science, or universal skill to erect homes without the requirement of this opprobrious, dangerous, dog-goned job. Any elementary architect could design any home where the double windows can just click on inside. Why they do not do so is a mystery. Standard virtually compel an actually invite indoor storm sash fastener—and they could then be done away with. Even the present double-glazing could be made to be permanently closed if there were replaceable windows clamped on quickly from the inside any warm winter day. Advancing a compulsory inside-double-window bylaw would elect any civic reformer. He merely because made them to put on the crude double windows of today—and builders could even make it a recreation and a pleasure.—Brandon Sun.

"Your George has been blotted by a borer."

"How dreadfully clumsy!"

Facts About Early Indians

Among Northern B.C. Tribes Wife Was Head Of Family

In early times in northern British Columbia, the wife was the head of the family among the Indian tribes. The wife claimed the children, and the husband was little more than a privileged visitor, marriages being arranged within the tribes.

This is the contention of Prof. Hill-Tout, noted anthropologist of British Columbia, who has completed an intensive study of northern Indians.

Indians in the southern portions of this province, according to Prof. Hill-Tout, acknowledged the man as the head, with the mother of his children a visitor who returned to her tribe when the father died. Further south the family group was recognized.

Prof. Hill-Tout claims the Indians as they are known today represent the final offspring of the last of a series of migrations from eastern Asia. Six thousand years ago, he claims, Polynesians and Mongolians crossed to this continent—possibly in an open boat from Alaska and Siberia were joined by land.

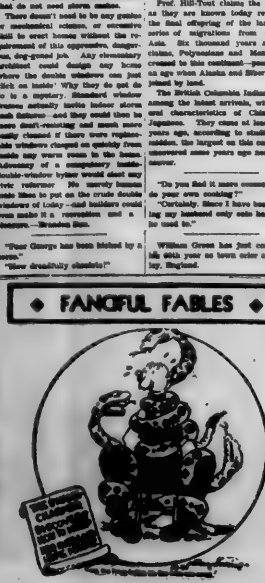
The British Columbia Indians were among the latest arrivals, with general characteristics of Chinese or Japanese. They came at least 2,000 years ago, according to studies of a number, the largest on this continent, discovered some years ago near Vancouver.

"Do you find it more convenient to do your own cooking?"

"Certainly. Since I have been cooking my husband only eats half what he used to."

William Green has just completed 55 with year as town crier at Slaughter, England.

◆ FANCIFUL FABLES ◆



Canada's Great Problem

Finding Export Market For Wheat At Fair Price

If there was any doubt heretofore as to Canada's greatest problem, publication of the Government's estimate of this year's wheat yield settled the matter. It is the sale of our wheat.

The Government's statistical branch estimates that we have produced this year 600,000,000 bushels of wheat. The Government's long ago report and a carry-over from 1931 of 130,000,000 bushels of wheat. That is a total of 730,000,000 bushels, or practically [illegible] Canadian needs.

We must, that is, average seed and food requirements of the home market amount to 270,000,000 bushels while the average export since prior to 1928 was 70,000,000 bushels. That makes 145,000,000 bushels. But allowing 40 million more for seed this year, that Canada needs 210,000,000 for the year's use and as a reserve. We have left 520,000,000 bushels of which we must dispose this crop year, that is up to next July 31 if we are not to have another burdensome carry-over to depress prices when the 1933 crop comes on the market.

To get rid of 450,000,000 bushels of wheat we must export either as wheat or flour 1,100,000 bushels daily. That is double what we exported last year.

There are statesmen in this country who will worry themselves sick over the fate of a tariff factory, but they go joyously on their way when the problem of finding an export market for Canada's wheat, which will return to the grower a fair price, is mentioned. Until Canada wakes up to the seriousness of this problem with a determination to find a solution, there can be little prosperity in this fair Dominion.—Lethbridge Herald

Bush Cabin On Border

Shagbarker Ate In Canada and Slept In United States

"Rawhide Jack" Moore, border oldtimer, is dead. "Rawhide Jack" was, in turn, bull-whacker, shagbarker and saloon-keeper, and he had the unique distinction of being the only man known who ever slept in the United States and ate his breakfast in Canada without leaving his house.

His cabin was built on the international border, part in Canada and part in the United States and the Custer, Alberta, folk insisted that "Rawhide Jack" flipped the finest flapjack in the northwest.

This famous western artist has stood there for 30 years or more. It was built first on the site of a cheap camp headquarters, and out of deference to "Rawhide Jack" the authorities of the Dominion have allowed it to stand without molestation.

Born in Texas, he came to Montana and Alberta years ago. He was of the pioneer stock, tipping the scales at 300 pounds, and in his earlier days was famous and feared for his quick temper. As a shagbarker in Montana mines in the old pre-Volstead days "Rawhide Jack" could handle the toughest character with ease.

An Amazing Road Structure

New Jersey To Have Elevated Highway Three Miles Long

An elevated super-highway, one of the world's most amazing road structures, is being rushed to completion between Jersey City and Newark, N.J.

Stepping across three miles of marshy meadowland in Jersey, the giant structure, which is now beginning to look like some dream from the mind of John Verne, will permit the crossing of darkness in five minutes which now require anywhere from 20 minutes upward.

The concrete travelway, suspended from 100 to 150 feet in the air, crosses the Passaic and Hackensack Rivers, railroad tracks and yards and highways. Eighteen million cars yearly are expected to flow over the specially designed concrete pavement on the viaduct.

Saskatchewan's Phone Lines

There were 6,000 pole miles and 48,000 wire miles of long distance telephone lines in Saskatchewan at the close of the last fiscal period, according to the most recent report of the department of telephones.

CHAPTER I.

The Silleys

Father Cheverly, leaning against the rail of the "Midnight Sun," suddenly straightened up, stiff with shock; and stared incredulously at the six men.

For moments he could not believe he actually was witnessing a robbery. Here in this Canadian Northland where outlawry was rare and furtive, here on the mighty Mackenzie where river boats time and again carried untguarded consignments of half a million in furs and gold, a brazen daylight attack upon a big steamer was simply unthinkable.

A few minutes ago the six men in a pair of birch-bark canoes had skirted out of the tributary river, the Big Akonda, and hailed the steamer as though they were merely trappers or a trading party wanting passage up south. A bidder was hauling up the flows for them, and they had come aboard, taking a deplorable advantage of the friendly, accommodating spirit manifested from man to man in this North country.

Now, under the leadership of a tough red-haired fellow, they stood on a pile of dark cargo sacks-bales, watching each way. With repeating rifles slant in their hands, they loomed ugly and menac ng over the crowd.

Father Cheverly, quickly recovering from his shock, stared sharply at the six men, trying to identify them. One was a Yemed; the other five were undescript whites. All of them were unknown to him.

While he was wondering what their next move would be, a girl among the passengers suddenly cr ed out.

"Bandits! They're bandits! Oh-oo -!"

To half the people aboard the "Midnight Sun" the girl's cry was a first warning of the holdup. Whirling, the passengers stood transfixed, staring at the six vicious strangers who had them covered.

Fearful of bloodshed, Father Cheverly glanced around at the crowd. Realizing that a fight would turn the deck into a shambles, he prayed that somehow, by quick thinking, he could avert a battle.

There were courageous men among those fifty on deck, but only one man had the quiet deadly courage to draw a long bolt-gun against six rifles.

He was Jimmy Montgomery, mate of the steamer.

Crouched beside a bale of wolfskins, Jimmy had been paying out things ashore to his four-year-old daughter. At the cry he glanced up, saw the bandits, understood instantly; and his face hardened. In his Mounted-trained, Jimmy was—seven years with the scarlet-and-gold Mainlanders of the North—observing his baby girl behind the wolf pelts, he whispered, "Lie down, sweet; keep down, down," and rose to his feet.

His right bullet, first from the hip, sang between two bandits and whanged into the pines beyond. His left, second shot, flashed from his chest from a bandit's hand. His th rd was never fired. A Savage spoke out through the throat of his brother. It was pain to Father Cheverly that they had not bargained on a battle, and that bloodshed had been precipitated by a trading party wanting passage up south. A bidder was hauling up the flows for them, and they had come aboard, taking a deplorable advantage of the friendly, accommodating spirit manifested from man to man in this North country.

Now, under the leadership of a tough red-haired fellow, they stood on a pile of dark cargo sacks-bales, watching each way. With repeating rifles slant in their hands, they loomed ugly and menac ng over the crowd.

Now, under the leadership of a tough red-haired fellow, they stood on a pile of dark cargo sacks-bales, watching each way. With repeating

PAIN relieved instantly

Aspirin will dispel any pain. It works almost like magic. Just take a tablet and drink a glass of water. Relief is as simple as that.

No harmful after-effects from Aspirin. It never depresses the heart, and you should never hesitate to take one of these tablets.

So it is good—as to suffer from headaches, toothache or neuralgia. The pains of sciatica, lumbago, rheumatism or neuritis can be banished completely in a few moments. Periodical suffering of women can be soothed away; the discomfort of colds can be avoided.

Aspirin tablets have other important uses—all described by the proven directions in each box. Look for that name Aspirin on the box—every time you buy them tablets—and be safe. Don't accept substitutes. "Aspirin" is a trade-mark registered in Canada.

W. N. U. 1932

paid the rush, who stopped it dead short at one stroke. Everybody on deck, at a young schoolmistress, Margaret Forester, one of the passengers, he ordered her, "Step up here, sister; step up close;" and when she obeyed him, wild-eyed with terror, he cocked his weapon with an audible click and pointed it at her breast.

His voice rose so that the whole deck could hear.

"Now about! You can't get me alone if's git her! First move I see made with a gun, I'll give her what that sport there on the lowside just got!"

Without turning or swerving his rifle from the girl, he bade two of his men:

"Andre, you and John go below. Oh the deal, fort out some furs, too, greed fare, six or seven hundred pounds—canvas, mebbe, that's fort. You know what's light and valyble."

The two bandits stepped down and seized one of the crew and bade him take them down the companionway. Coming up presently, they lowered their booty into the two birchbark canoes that bobbed against the side of the steamer.

As though every man aboard realized that the bandits held the whip-hand, that no one dared stir, that retribution must come from elsewhere, a wa ager started, spontaneously, from a dozen points at once:

"Ashes! Ahm Ashes! Sergt. Ahm Ashes!"

The whisper went from neighbor to neighbor, from group to group; and men smiled grimly as they heard the mere mention of a man's name:

"Ashes? Sergt. Ahm Ashes—at Fort Endurance."

Another of the bandits protected by that rifle pointing at Margaret Forester's breast, vaulted down and among the passengers; and securing a fire ax, he went from boat to boat on deck, smashing their frail sides so that there could be no pursuit, no retribution, if the two canoes could only get out of rifle range of the steamer.

Seeing now that the threat to Margaret Forester's life had checked all attempt at a rush, Father Cheverly walked toward the stack of wolfskins, crossing himself as he stopped over the dark streams of blood that trickled slowly toward a scupper. Bending, he picked up the little Mounted-girl, who was looking with wide, unwavering eyes at the body of her father. Mechanically taking her away from there, he walked over to the rail, holding the little tot as if she could not look back.

The man beside him said in a low voice: "Look at that devil smashing the boats! They must have planned that 'coulee aforehand, if we couldn't chase 'em. But don't that big red-haired devil know we'll be right after them?"

The whisper spread. . . . . "What? Wait'll they start savvy. . . . " then folded their arms, and waited quietly, hiding their cries of vengeance.

And then, when the canoes were loaded with their booty, the red-haired leader played his last and best card. Pleasing his gun at Margaret Forester, he ordered her:

"Git down into one of them canoes, sister. We're going to carry you a couple miles up this Big Akonda here and not you off on a bar, see? We ain't meaning to harm you at all. Just start sashing over and climbing down into a boat. . . . That's right; that's a sensible girl. . . ."

He raised his voice so that every one could hear; he spoke to Margaret Forester, but his words were intended for the men aboard:

"Some of the fellows is figuring to shoot 3—I out of us ashore ve e's git clean gone, see? But they'd better think twice about that. And I guess they will. First hunk of lead that whistles our direction, you'll git a bullet cquin' stream them pretty spun, sister!"

(To Be Continued.)

Provisit, pale, restless, and sickly children are their condition is improved. Minard's Liniment Manufacturer will relieve them and restore health.

Four children acting as detectives paid their way to a moving picture show at Perth, Scotland, being admitted without receiving stamped tickets, and as a result the proprietor was fined for trying to escape the tax.

ANNOUNCEMENT

Conditions as they are today are changing about as fast as ever and we have been a considerable study of the CHERRY SYSTEM. We are absolutely convinced that by our taking full advantage of such discounts in buying our supplies, we are able to save considerable. It is only fair that the savings we make in this way be passed on to our customers, but, in order for us to be able to buy for cash, we must necessarily have the cash for our goods. Our firm has therefore decided to go on a STRICTLY CASH basis on and after DECEMBER 1st.

You will find our new cash prices very attractive.

Long credits which have been extended in the past, are not a benefit, but a serious detriment in time of depression, and we are sure you will agree that the above policy is the most even method for both the purchaser and seller.

We trust that you will continue to make our store your headquarters for hardware requirements, and we wish to take this opportunity of thanking you for your past generous patronage.

Members of the British Israel Society held a lecture with lantern slides in the Empress Theatre on Tuesday evening.

The history of "The Great Pyramid" was the topic of the lecture. A small crowd turned out to hear the speaker.

Hall for Overseas

Parcel mail in connect with Duchess of Bedford, sailing from St. John should be mail from Fort Saskatchewan not later than Dec. 2.

Letters to connect with S. S. Montclare should be mailed not later than Dec. 6th. This is the latest despatch for delivery to Great Britain before Christmas.

You still have time to order your Personal Greeting Cards. Do so today and with every two dozen purchased a box of note paper will be given free.

The Fort Saskatchewan United Church Sunday School will hold their Christmas Concert in the Empress Theatre, Fort Saskatchewan, on Tuesday, December 23rd, at 8 o'clock.

When Waterloo Bridge in London, England, was built 126 years ago several coppers were buried in a block of granite forming part of it. When this bridge is pulled down each of these sovereigns will be worth 270 bd. when minted, but had they been invested each of them would now be worth about 100 pounds.

(Continued from Page 1)

is why it is that though the odd individual may for a time be out of debt, in the long run everybody is trying to live a so-called civilized existence even on the bank money either directly or indirectly. (It brings me back to the old days of Monte Carlo).

Of what value is the remedy proffered in this editorial?—Frugal living practical economics and painstaking work. I am living frugally. I've got to. I am practising economy. My clothes are all patched, so are my housekeeping socks. Most tradesmen are poorer bankrupt every day because they can't sell the everyblings I need and don't need—badly. As to painstaking work, I still get enough exercise in sleep well of a night. Please show me what work I may take more pains with and I'll do it. If it will pay off my indebtedness. I'll do my field work by daylight and my chores by lamplight. I'll get problems more grain, feed more pure and milk more cows to further plot an already glutted market. Not because no one needs what I produce, but I don't have none of the medium of exchange. It seems they would have an like Pharaoh had the Israelites working all day making bricks, and all night gathering the straw for the same. (Here I take Josephus as my authority), not the Pentateuch, it always seemed strange to me that Pharaoh would wish an inferior article made, but to those (authority). But there was a mess that led them out of Bondage and Pharaoh and all his host were destroyed.

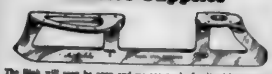
The best cure I can see for things under the present financial system is for a group of individuals to issue and put in circulation billions and millions of unbelievable counterfeit bank notes of all countries. They wouldn't be able to distinguish them and though it might cause the collapse of some of the banks the country would be so prosperous that the out of work bank employees would be easily absorbed in other occupations, and the bankers themselves would still have their palatial yachts and estates to sail, and while I have no great desire to sit under my own fig tree, I might have the satisfaction of sitting on the seat of a binder I could call my own.

While the above is more or less the ravings of my addled head, in all seriousness I believe it an sound a cure as the one offered.

P. S.—Trusting this will not take up too much space, and that those who think my views are all wet will correct me kindly, and that those who agree in principle will back me up, and lastly hoping that this will detract some of the interest from your otherwise interesting sheet, believe me.

Yours,
Henry J. Braaten.

Skaters Supplies



The Rink will soon be open and we are ready for it with some real bargains on SKATES, also have a couple of bargains on Second Hand Skates and Boots.

Fort Saskatchewan Record

VOL. 11 NO. [illegible] FORT SASKATCHEWAN, ALBERTA WEDNESDAY, NOV. 26, 1930 $1.50 PER YEAR IN ADVANCE

YPR[illegible] VALLEY

Mrs. Penrose of Edmonton is visiting at the home of her son Mr. W. E. Penrose.

Mrs. D. Cranston held a Whist Drive, carriage being the prizes. Ypres Valley friends brought home five.

The lucky winners were: Mrs. Art Irwin, Mrs. Clark, Mr. Jot Irwin, Mr. Carl Dittrich, Mr. D. Gunn, and Mrs. D Gunn brought home a duck.

A. T. A. LOCAL MEETS

The Fort Saskatchewan local of the Alberta Teachers' Alliance met at the local school on the evening of Tuesday, Nov. 18th. The attendance from the country districts was good.

With Mr. Griffen in the chair, the meeting resolved itself into a discussion of promotion schemes. H. Lambley of Partridge Hill gave an able talk on a scheme based on that of civil servants.

It was decided, on the kind invitation of the president, to meet again at 7:30 p.m. on Tues. Dec. 9th at Josephburg.

Fort Saskatchewan Club Holds Enjoyable Dance

The Fort Saskatchewan Badminton Club wish to thank everyone attending their whist drive which was held on Friday, November 28th, and who assisted in making it one of the most successful dances of the season. We believe everyone thoroughly enjoyed themselves. Snappy music was furnished by the home town orchestra. A dainty lunch was served, Mrs. Looker being responsible for the abundance of good eats being supplied.

Once a week would not be too often, we believe, to have a real social evening such as this, in Fort Saskatchewan during the winter months.

We are sure the Badminton Club members will co-operate in making the next dance, sponsored by the Women's Institute, in the Memorial Hall on Dec. 9th another enjoyable evening for all who attend.

LETTERS TO THE EDITOR

Editor of The Record,

Dear Sir:

When my letter had escaped publication for two issues after mailing, I was beginning to think that the Editor had shown better judgment about printing it, than I had in writing it. However this morning (Nov. 25th) a gentleman of Fort Saskatchewan called me up and told me he had read my letter, and pointed out a part, which if taken the way he read it, seemed unnecessary and cast a slur on a very honourable and public spirited group of people,—the Sunday School teachers.

On reflection, I believe that were I to write the letter again I would not use the allusion I did as there are many others much more apt. However in defence, I ask, that if any part of my letter be taken seriously, let it be that part. There was no element of sarcasm intended whatever, and my only excuse for using that allusion or comparison, was that it was an actual experience of my own at about the age of eight, in a S.S. class under a teacher of about 16 years of age.

What angered me, was that the editorial in question built up a case on the basis of the individual prodigal who must now be forced to work to pay his debts as his substance is gone (still to my mind a fitting ask. just for the Sabbath School) and then applied it to world conditions today.

I do not wish to take up more space, as you have already been generous, other than then I sincerely regret any hurt I may have caused to any of a truly noble calling, and to assure them that such was far from my intent.

Yours truly,
Henry J. Braaten.

Local Curling Club Has Large Membership

On Wednesday, Nov. 23 a meeting of the Fort Saskatchewan Curling Club was held in the "Lounge Room" at the rink for the purpose of electing ships and allocating rinks. From the turnout present it is evident there will be much enthusiasm in the Roaring Game this season and we hope for a most enjoyable time.

The rinks were drawn up as follows:—

J. S. Wright, Skip.
F. Collins, F. Rowland, R. Adamson.
A. M. Carscadden, Skip.
W. J. Anderson, R. E. Carvell, G. Mann.
W. A. Graham, Skip.

OBITUARY

MARY ANN (FORD) MAGEE

The funeral of Mrs. Mary Ann (Ford) Magee, beloved wife of Thomas Magee Sr. of Good Hope who passed away at her home on November 21st. aged 77 years, was held on Wednesday, November 24th at 2:30 o'clock from the Standard Church at Good Hope. The Rev. D.W. Parks officiated assisted by the Rev. J. Holst. Beautiful floral tributes were received from relatives and friends. Interment was made in the local cemetery. The pallbearers were, R. Johnson, H. Ashton, F. Block, T. Johnston, G. Millenbacker and A. Magee, the late Mrs. Magee was born in Carlton County, Ontario, and while still young moved with her parents and their family to Johnson, Parry Sound district. There she met with and married Mr. Magee where a family of seven children were born to them. In 1902 they moved to the Fort Saskatchewan district and about 1906 settled at Good Hope, where they have resided ever since.

She leaves to mourn her loss besides her husband, one sister Mrs. Wm. Carruthers of Ontario, one brother James of Rose Creek, four daughters, Mrs. E. Magee, Mrs. J. C. Cripps, Mrs. D. S. Whitson, and Mrs. A. Burnett, and three sons, Joseph, Thomas and William all of the Fort Saskatchewan district; also thirty-four grand children, and seventeen great-grand-children.

Howard & McBride funeral directors.

R.C.M.P. PALLBEARERS

Last Tributes are Paid to Albert Peebles, Pioneer Of West

Attended by prominent old timers and others the funeral of Albert Peebles, Alberta pioneer and former member of the Royal North-West Mounted police, was held Sunday.

After a short prayer service at the family residence, 10033 93 ave., the funeral service was held in the Anglican church, Fort Saskatchewan, at 2:30 p.m. Six members of the R.C.M.P. acted as pallbearers.

They were: Corporal E. Winn and Constables L. W. Broadway, J. G. G. Scully, R. C. Wilson, W. H. Herron, R. S. Macdonald, T. E. Stenhouse.

Interment took place in the R.N. W.M.P. plot in Fort Saskatchewan.

The late Mr. A. Peebles was well known in this district where he farmed for many years.

Mergers have hit the crossroads. In Big Pine, California, a large sign announces: "Permanent Waving and Fish Worms."

10 YEARS AGO TODAY

Taken from the Files

10 Years Ago Today

Thursday, Nov. 27, 1919

A meeting of the electors was held on Monday evening, Nov. 24.

Local Hockey Club secures admission to the Northern division of the Alberta Hockey Association.

Mr. Harry Attwood and Miss Josephine Lawrence, were married at Partridge Hill at noon on Wednesday, Nov. 19th.

D. Simmons shot a fine Caribou in the woods with the editor and staff had a fine stash.

James McLean brought what was probably the largest load of coal to town this winter, not weight being less, 1610 lbs.

Now that the plasters are finished the carpenters have been laying the floors and the Williamson block will be occupied before long.

At the annual meeting of the Curlers held, the following officers were elected:— Hon. President, Insp. Cuthbert. Hon. Vic.-Pres. Major R. O. Jones. Vice- President, A. M. Carscadden. Sec.-Treas. W. J. Bowden.

W. M. Corbett and Jos. Anderson are making arrangements for their trip to the old country.

Pains Around Her Heart

Tired Out After Doing Housework

Mrs. [illegible], Bend, Mixed Lake, Alta., writes:—"Last fall I had bad pains around my heart, and such nursing, after doing a little housework, I would get out of breath and feel so tired out.

Seeing that Milburn's Heart and Nerve Pills were good for these troubles I sent for a box, and after taking the Pills for a few days felt a whole lot better. Before I had used the return of the fairy spells and pains around the heart."

For sale at all drug and general stores, post up early by the T. Milburn Co., Ltd., Toronto, Ont.

British-U. S. War Debts.

At the time this article is written, President Hoover and President-elect Roosevelt are in conference giving consideration to applications made by the British French and other Governments which are indebted to the United States for loans made by the latter during the war, for an extension of the nine-year moratorium covering repayments granted last year, and generally for a revision of the terms of settlement of such debts.

Inasmuch as these enormous international war debts are admittedly one cause of the existing financial and economic depression affecting all nations, whether they are directly concerned as debtors or creditors or not, it is well that the general position in regard to these debts should be understood in its broad outlines.

The war debts of the nations of Europe to the United States total approximately $22,163,529,000, of which amount Great Britain owed $11,165,-000,000, and has paid on account $2,090,000,000; France owed $6,047,074,000 and has paid $548,453,000). Italy owed $2,407,077,000 and has paid $97,864,425, while the smaller nations owing varying amounts. Repayment of these huge amounts were to be made within a period of approximately 60 years.

On the other hand, Germany was obligated to pay these allied European nations the sum of $30,377,000,000 during a like period of time. In other words, as Germany paid her debts to the Allies, they in turn could pay the United States. But Germany cannot pay. the whole world now recognizes that fact. So at the Lausanne Conference last June, Great Britain and the other nations agreed to let Germany off for $714,000,000 instead of $30,000,-000,000, provided the United States would radically reduce or cancel the war debts due to that country. The United States has thus far refused to do.

The Allies carried on the war against Germany for three years before the United States entered the conflict. Some of them had completely exhausted their credit in those three years and would have collapsed, the result of which might easily have been a German victory. Great Britain came to their rescue.

But while Great Britain could have continued to finance all her own stupendous war expenditures, she could not do so and at the same time finance her allies. So Great Britain borrowed from the United States and, in turn, financed these other allied countries. They cannot repay Great Britain, nevertheless Great Britain is obligated to repay the United States, and, as the above figures indicate, has been doing so. As a result Great Britain was drained of gold, had to go off the gold standard; and now, because of failure of Germany to pay her, or pay other European nations which are so heavily indebted to Great Britain, it is no longer possible for Britain to continue paying out to the United States when others are not, because they cannot pay her.

Furthermore, in the huge borrowings by Britain and other countries from the United States, the latter country did not actually lend them gold. What the United States Government did was to advance them credit wherewith to buy food supplies, munitions, raw materials and manufactures of all kinds in the United States. In other words, the money was practically all spent in the United States in enormously high war prices for farm products, in war-time wages to workers, in war-time profits to manufacturers and people generally. The people of the United States prospered while Europe was impoverished.

With the ending of the war, and the necessity of paying off these huge credits the United States Government demanded payment in gold. The United States, we repeat, did not lend gold but huge credits of all kinds on credit; then they refused to take supplies back in repayment but demanded gold. In order to prevent repayment in supplies they raised their tar ff to prohibitive heights and shut out foreign goods. In so doing they killed off the export trade of the debtor nations, thus making it still harder, in fact impossible, for them to pay.

Great Britain has never defaulted in payment of its obligations in any on say time. Repudiation of obligations has never been countenanced by Great Britain, although it has been the victim of such practices by other countries, including several of the States of the United States. Britain has no desire to default now, and years ago offered to write off the debts owing to her if her own debts, created by borrowings to prosecute the war, were similarly written off. The world's financial and economic troubles today are not due to Great Britain, and had her advice and example been followed after 1918 there would be no trouble.

If the United States still remains adamant, if it refuses to cancel or very substantially reduce the amounts owing to that Government, and continues to insist on payment in gold, then, in our humble opinion, the stand to be taken by the British Government should be this: Payment in gold being impossible, and in view of the fact that the debt was created through the supply of goods produced or manufactured in the United States, thus creating employment and wealth in the United States, Britain should now offer to repay the United States by exactly the same method,—that is, by supplying the United States with goods produced or manufactured in Great Britain, or through services, such as shipping which Britain can render, thus providing employment for Britain's unemployed, and producing wealth for Britain's over-taxed people and institutions.

Until the United States is prepared to accept such British credits in exchange for the credits extended to Britain, that is, to accept British goods and services in payment for the United States goods and services supplied, Great Britain, while not repudiating anything, would refrain from making any further payments in gold, and let the United States wait for any further settlement until that country is prepared to accept the same treatment from Britain that, in the hour of the world's extremity, the United States accorded to Britain. Could anything be fairer?

Boost Woollen Trade

Reciprocal New Trade Agreement With Britain Will Be Beneficial

Both Canadian and British woollen manufacturers should enjoy greater business in the Canadian market, as the long run, as a result of the change in the textile tariffs effected by agreements at the Imperial Conference, declared H. Barrett, of Toronto, in his presidential address to the annual meeting of the Canadian Woollen and Knit Goods Manufacturers Association.

Addressing the members who had gathered from all parts of Canada, Mr Barrett described the greater portion of his address to the Imperial Conference and its effects on the woollen industry.

"The imp ovement of Great Britain's position in the Canadian market," he said, "will be partly at the expense of employment in the Canadian mills and partly at the expense of mills in non-empire countries that find a preference on our primary products become effective the market in Canada for woollen products slowly increases and that total effect should be to increase business done in Canada by both Canadian and British mills."

Whistling Pigeons

Birds Used By Greeks to Overwhelm Air Power To Carry Messages

Travellers in the north woods of Ontario next summer may be astonished when they hear and see what they may take to be a new species of bird, and into their heads may pop visions of whistling swans and wild pigeons. They may see the hobo, real pigeons, and hear the whistle, but the two are separate entities, intead it is the whistle that sets for a space and then to carry out an idea.

Next spring, after a period of training, instead of homing pigeons will be transported in various fire patrol points where communication by wireless is now difficult or impossible, and when forest fires are discovered messages and important messages may be relayed by the use of these birds to the headquarters of the Provincial Air Force. The whistle! That is to scare away hawks and other predatory birds that might attack the pigeons, and is attached to their legs along with identification tags.

Foreign Rules Invulnerable to the whole family To the mother, a fourteen old to loveliness. To the child a big brother. And to Dad, a couple of all kinds of the father, a splendid hair fixative and cooling shaving lotion. Persian Balm lotion and refreshes the skin. Makes shave delightful. Persian Balm is also indispensable to dainty women. A little rubbing and it is absorbed by the tissues, leaving the skin fresh, velvet-like texture.

Decide To Advertise

Brazil Wakes Up to Best Way To Sales Coffee Problem

Having failed to solve the coffee problem in Brazil by destroying the surplus crop, and by trying out numerous schemes, the Coffee Council of Brazil has finally decided the best thing to do is to advertise the coffee and it is.

One million dollars has been set aside for an intensive advertising campaign in North America. They're no better way to move goods than to advertise them. Successful business men discovered that long ago.

Useful In Camp—Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Eclectric Oil very useful in camp. When the feet and legs are sore, and cold it is well to rub them freely with the Oil and the results will be the prevention of pains in the muscles, and should a cut, or bruise, or sprain be sustained, nothing could be better at its command or bottles.

The Rebirth In Popular Popularity of the "delicious fruit" apples grown in Canada is evident from the fact that the whole of the year's crop grown in Western Canada has already been marketed. More than 100,000 cases of apples have been shipped to the domestic and export markets.—Department of Agriculture.

Brazil is requiring all gold miners to sell their product to the government.

W. N. U. 1979

The Newest Shooting Club

Banana Alives Criminals Practice Shooting At Cardboard Policemen

A shooting club for criminals where they could practice firing at cardboard figures of policemen was discovered by authorities at Buenos Aires with the arrest of one of the band. A letter from the woman proprietor of the club, found in the cup bearer's pocket, prevented the location of the range.

On reading the house the police found a 90 ft. underground shooting range and three gunners assiduously practicing their marksmanship. The range was lined with soundproof boarding and fitted with the latest appliances. Nine cardboard figures of policemen, both moving and stationary formed the targets. The scores of the shooter were kept in a card index.

Well Reared For Kindness

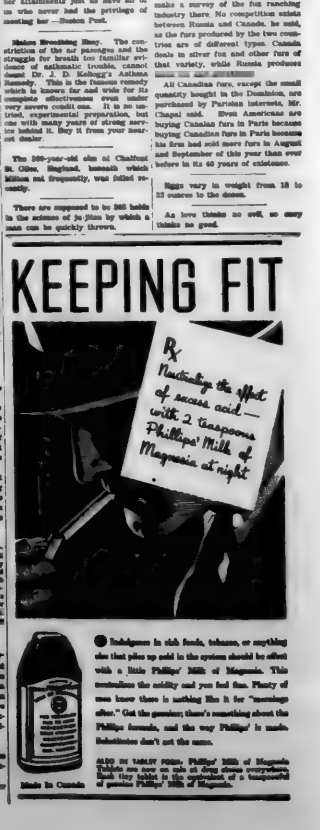
King George and Queen Mary Enjoyed Meeting Helen Keller

Their kindly suggestion of England, the King and Queen, never performed a more graceful act than when they received informally Helen Keller; the marvelous deaf and dumb and blind American woman, who has surmounted her terrible handicaps in such a wonderful manner. And their kindness was well repaid, for after conversing with Miss Keller, they marveled at her attainments just as have all of us who never had the privilege of meeting her.—Boston Post.

Modern Wrestling Story. The contortions of the Ar gentine and the struggle for breath too familiar evidence of asthmatic trouble, cannot daunt Dr. J. D. Kellogg's Asthma Remedy. This is the famous remedy which is known far and wide for its complete effectiveness even under very severe conditions. It is no untried, experimental preparation, but one with many years of strong service behind it. Buy it from your nearest dealer.

The 500-year-old elm of Chalfont St. Giles, England, beneath which Milton sat frequently, was felled recently.

There are supposed to be 365 holes in the scheme of golf by which a man can be quickly thrown.



Indigestion in old foods, tobacco, or anything else that piles up acid in the system should be offset with a little Phillips' Milk of Magnesia. This combines the acidity and you feel fine. Plenty of men know there is nothing like it for "morning after." Get the genuine; there's something about the Phillips formula, and the way Phillips' is made. Substitutes don't set the same.

ALSO IN TABLET FORM. Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

Thinks Canadian Fox Ranch Will Disappear

Fur Importers Predicts Its Merging With Commercial Farms

Complete disappearance of the fox ranch in Canada is predicted by Leon Chapal, managing director of Les Magazins Generaux de Marche Francais, fur importers. Mr Chapal feels that fur farming will become merged with general farming, as there is not sufficient market to make it worth while for a man to devote his whole time to it, while it fits in admirably with mixed farming.

Mr Chapal was in Montreal en route to Prince Edward Island to make a survey of the fox ranching industry there. No competition exists between Russia and Canada, he said, as the furs produced by the two countries are of different types. Canada deals in silver fox and other furs of that variety, while Russia produces mainly white furs.

All Canadian furs, except the small quantity bought in the Dominion, are purchased by Parisian interests, Mr. Chapal said. Even Americans are buying Canadian furs in Paris because buying Canadian furs in Paris because his firm had sold more furs in August and September of this year than ever before in its 65 years of existence.

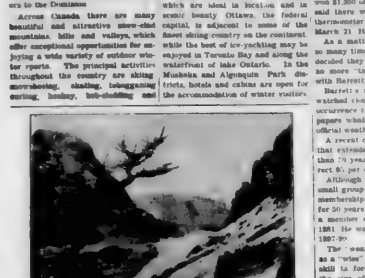
Eggs vary in weight from 18 to 32 ounces to the dozen.

As love thinks so evil, so envy thinks so good.

Winter Sports In Canada Are Attracting Increasing Numbers Of Visitors To Dominion

The invigorating climate of a typical Canadian winter, now regarded as an advantage rather than a hardship, owing to the unusual variety of healthful and appealing sports, is attracting increasing numbers of visitors to the Dominion

Across Canada there are many beautiful and attractive snow-clad mountains, hills and valleys, which offer exceptional opportunities for enjoying a wide variety of outdoor winter sports. The principal activities throughout the country are skiing, snowshoeing, skating, tobogganing, curling, hockey, bob-sledding and



dog derbies, all of which may be thoroughly enjoyed, under ideal conditions. With the exception of an occasional day during mid-winter, the temperature is not too cold for participating in outdoor sports.

While motor travel is met general during the winter season, there are many long stretches of highway which are kept conditioned throughout the winter months. The traveller will always find trains across a modern and luxurious means of transportation. Hotels in many of the leading centres remain open throughout the year round, providing good accommodation for those wishing to participate in local winter events.

Brief descriptions of winter attractions more or less peculiar to its own particular surroundings Practically all forms of winter sport are available in the Maritime Provinces,

but a preference is shown for hockey and curling. In the province of Quebec the major sport events centre in and around Montreal Quebec City Murray Bay and the Laurentian Mountains, all of which offer sports well and vast territories in Ontario, which are ideal in location and in scenic beauty Ottawa, the federal capital is adjacent to some of the finest skiing country on the continent, while the best of ice-yachting may be enjoyed in Toronto Bay and along the waterfront of lake Ontario. In the Muskoka and Algonquin Park districts, hotels and cabins are open for the accommodation of winter visitors.

In Manitoba the Winnipeg bonspiel also the winter carnival held at The Pas, are annual events of international interest, while in Alberta and the southern Canadian Rockies in Alberta, is one of the most important centres for winter sports. Record performances in ski-jumping have been witnessed at Revelstoke. The islands and mainland of the southern coast of British Columbia also offer golf, tennis and other summer sports for the visitor visitor.

Information concerning winter sports in Canada may be obtained from the National Development Bureau, Department of the Interior at Ottawa. Letters to Ottawa should state, if possible, the particular district or districts in which they are interested, in order that the most complete data may be supplied.

Weather Forecaster Dead

Prophecies Of Chicago Man Caused Many Wagers

The familiar phrase "no bets with Barrett" will no longer be heard on the Chicago Board of Trade The portentous John F Barrett is dead.

Barrett commanded the city's most accurate amateur long-distance" weather forecaster, died recently after a brief illness.

He won numerous bets from his friends on the board by his successful weather forecasting In 1931, he won $1,200 on his prediction Barrett said there would be no zero on the thermometer from December 1 to March 21 He was right.

As a matter of fact he was right so many times that the "smart boys" decided they were behind There were no more "takers" and the "no bets with Barrett" was frequently aired.

Barrett's weather prophecies were watched closely. It was a frequent occurrence to note in local newspapers what Barrett Chicago's unofficial weather-man, predicted

A favorable upset in his forecasts that extended over a [illegible] more than 20 years shows that he correct 85 per cent of the time

Although 73, Barrett was one of a small group who had held continuous membership on the Board of Trade for 50 years or longer having become a member of the exchange April 1, 1881 He was a director of the board 1927-29.

The weather prophet was known as a "wise" buyer of cash grain His skill in foretelling the weather and the size of the future grain crops [illegible] holdings

While many grain operators looked to Barrett for "tips" on the weather, there were a few who figured his forecasts only lucky. A few bets however, convinced them otherwise.

Barrett's success was attained by developing a system of observing the course of the wind on October week, a period in the Catholic Church Calendar.

Prominent Shooting

Accidents During Hunting Season Each Year Are Appalling

Has any man any right to fire a shot without knowing what he is firing at? The tragedy which has haunted the woods this Fall is almost unbelievable in its magnitude and its carelessness. A man is shot, the shooter taking him for a partridge A man is shot, the hunter mistaking the glint of hammer foils is loosened.

A little charcoal laid at the bottom of the case inside the lower front panel is a good protection from damp. Moths in the hammer felt can be guarded against by hanging little bags of camphor or cedar chips inside.

Ivory keys turn yellow if the keyboard remains shut up. so leave them exposed to the air as much as possible They may be whitened by rubbing them with a soft rag dipped in lemon juice Soiled keys are easily cleaned with methylated spirit.

Don't put up with a squeaky pedal; a touch of blackleed will cure this.

Cross Of Lorlie Day

Nesting Wire Amazing Fastine and Shuttle Was Expensive

This being a knitting era so far as necessities and luxuries are concerned, it reminds one of an earlier day when the craze was netting. The shuttle, or netting needle, was very expensive in the 18th century, and the pastime an amusing one. Women used this dainty tool in making a kind of narrow lace known as netting. Today we would call it footing.

The gave fashionable women an excellent opportunity to display ability and bejewelled hands. Enamelled netting needles cost as much as $40 in some cases. The Marquise de Pompadour had a pair that cost $37.50, and the Comtesse de Provence gave Mme. de Beaumont a gold netting-needle decorated with an mixture paintings worth a fabulous sum. The estate of the Duke of Lorraine was found to contain. on his death. in 1781, seventeen netting-needles in amber, rock-crystal, gold, mother-of-pearl, agate, petrified wood—all set in gold.

British Polar Year Party Tells Of Work Accomplished At Their Bear Lake Station

Interesting Old Records

British House Of Commons Has Wonderful Rediovoice Library

The library of the British House of Commons today is well stocked with history, political biographical and law books one of the best reference libraries of its kind in the world

Yet 100 years ago, two years before the Palace of Westminster, the old Houses of Parliament, was burned down, a committee was appointed to look into the affairs of the library and found it "very imperfect" Among other things, they discovered a "post office bag of unopened letters of the year 1690 So much for constituents who wrote to their members in those days For the rest not even a copy of the Acts was housed in the library and valuable space was given up to books which had no bearing on politics

The library contains some interesting old records saved from the fire Among them the official journals records of debates and procedure, which until 1743 when they were [illegible] were presented written in the recording clerk's hand. There is the record of Cromwell's famous dissolution speech when he described the "Rump," and another records the visit of Charles I to arrest the five members. Both these entries are in shaky a hand as to indicate plainly the clerk's agitation

Advice For Piano Owners

Tone and Condition Depend On Where It Is Placed

In deciding where to put the piano, both tone and condition have to be considered. A rug under a piano tends to deaden the tone. If possible, it should stand on bare boards, or if the rug goes all over the room, woodenmaterial set under the castors.

Tone is also lost when an upright piano stands back against a wall, but it at an angle, or pull it out two or three inches from the wall.

Special precautions must be taken against damp. A piano should be kept in a warm, well-aired room. Placed close to a window, or against an outside wall, a piano is exposed to damp air. Strings become rusted and the glue of hammer felts is loosened.

Writing from Fort Rae North West Territories, J M Stagg, leader of the British Polar Year expedition party, has sent out a description of the arrival of the party and their work during the first few weeks on the studies on Great Bear Lake The party will study among other phenomena, the Aurora Borealis or northern lights

The British party were interested to see the Canadian Airways Services taking prospecting parties up to the recent finds of pitchblende gold and silver on the southeast shore of Bear Lake. 200 miles further north than Fort Rae But the British party gave the novel thrill to the Indians of seeing up balloons daily. As it happened that they had an unusually long radium period in August, the Indians connected it with the occult influence of the balloons and when a thunderstorm came with a lightning flash to ground near the settlement, nearer than they had ever seen one before, the Indians were confirmed in their belief that the strange whites were practitioners of magic.

Looking forward to being frozen in for about nine months with a vast programme of scientific investigation mapped out for them. the party carried a lot of impedimenta Their instruments and food equipment for a men was in over 600 cases They were specially provided with living quarters by the Hudson's Bay Company and the Royal Canadian Mounted Police, but they had to turn discarded Indian [illegible] into laboratories and [illegible] tories The shack had to be made light-proof, heat-insulated and mechanically to house the photographically recording magnetic instruments A boiler had to be made to supply the main meteorological observatory and office

As early as July the investigators had the pleasure of noticing the aurora and during August there was a display every night. All of the magnetic recorders had been put in working order, observations were made from the start and Mr Stagg writes with evident gratification. "Rae must be near, if not actually inside the zone of maximum aurora activity."

Dry Canadian Snow

Season Of Winter Are Dry, Soft, and Fluffy

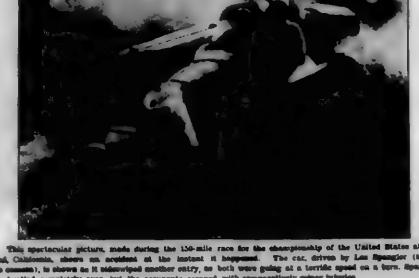
Some sections of the world profess to have such a climate that their rains are dry rains and for the most people a statement of this nature is hard to believe Canadian snow, however, will be a treat to those only familiar with flakes that fall and immediately turn to a dull grey and a sodden mass. In the greater part of the Dominion the snows of winter are dry soft and fluffy do not cling to one's garments, and even after a day of play in the open country or strolling on Nature's white carpet a slight shake or brushing removes all traces the dry is the result that it is impossible to mould the crystals into a snowball.

Kandy Kreeguard

The ropes in the English navy, from the greatest to the smallest are so twisted that a scarlet thread runs through them from end to end, which cannot be extracted without unlaying the whole, and by which the smallest piece may be recognized as belonging to the Crown.

The blonde lotus is truly a marvelous thing. It starts working the minute you wake up and never stops until you get to the office.

Aviation in all its forms is popular in Germany this year.



This spectacular picture, made during the 150-mile race for the championship of the United States at Oakland, California, shows an accident at the instant it happened. The car, driven by Lee Spangler (centre of the caravan), is shown as it telescoped another entry, as both were going at a terrific speed on a turn. Spangler's car bursted completely over, but the occupants escaped with comparatively minor injuries.

HAPPY TO BE 136 Lbs

Lost 30 Lbs. — More To Follow

Most women would be alarmed if their weight showed 136 lbs. But not this one. You see she was 174 lbs. and she has found a way to take off that disfiguring overweight.

She writes: Six months ago, when my weight was 174 lbs., I started to take Kruschen and have gradually got down to 136 lbs. and am still going down. I have not altered my diet at all, and I only take a half-teaspoonful of Kruschen in a glass of hot water every morning. I also find Kruschen very good for bilk-ness, for which I used to suffer a great deal. But it has completely left me now. In fact, I feel a different person, and have only to thank those wonderful Kruschen Salts. (Mrs.) M. K.

Taken every morning Kruschen effects a perfect, natural clearance of undigested food substances and all excessive watery waste matter. Unless this wastage is regularly expelled, Nature will eventually store it up out of the way in the form of ugly fat.

One bottle is enough to prove to you that Kruschen will make you feel younger, more active, energetic—you'll enjoy life every minute of it.

Complete Moth Collection

Manitoba Man Proud Possessor Of Many Kinds

Manitoba has discovered herself the home of two of the greatest butterfly and moth collections in the world. They are owned by Hannibal, Winnipeg, and Jack Mayor of Riding Mountain Park.

Comprising insects of varying size and design the two collections are representative of the entire world's entomological phenomena.

The "Hannibal" is so called, is the Collingwamus of Canadian South America, with its perfect name six on his back, ranging 10 inches from a death's head on its back, and still another a pair of owl's eyes. The specimens are from the Great Lakes come moth with a wing spread of eleven inches to others that are so tiny they can be hardly seen with the naked eye.

Miller's Worm Powders will not only expel worms from the system but will induce healthful conditions of the system under which worms can no longer thrive. Worms keep a child in a continual state of restlessness and pain, and there can be no comfort for the little one until the cause of suffering be removed, which can be easily done by the use of these powders, which are very effective

In chemical mythology, elysium meant the place where the souls of the good dwell after death.

A gun, if fired under water, will generally explode.

DECEMBER 4

LIVING WITH PEOPLE OF OTHER RACES

Golden Text: Of a truth I perceive that God is no respecter of persons. Acts 10:34.

Lesson: I Kings 8:41-43. Luke 10: 25-37. John 4:5-10. Acts 10:9-19, 28-35. I Cor. 9:19-22.

Devotional Reading: Luke 10:30-37.

Explanations and Comments

Jesus Was No Respecter Of Persons. John 4:5-10. We have in this incident the example of Jesus in dealing with a representative of another race. This was our text for the Fourth Lesson of the First Quarter, and Explanations and Comments there may be found.

The world menace of interracial friction and antagonisms constitutes the supreme concrete challenge to the Christian belief that all men are the children of God.—Basil Matthews.

The Lesson Peter Learned About Other Nations. Acts 10:9-35. While praying on a house top in Joppa, Peter had a vision of a receptacle descending a great sheet let down from heaven by four corners, and in it all manner of four-footed beasts and creeping things and birds and he heard a voice bidding him kill and eat. Horrified at the thought Peter exclaimed "Not so, Lord, for I have never eaten anything that is common or unclean." The Levitical law prescribed what animals could be eaten and how they should be slaughtered, and all else was held to be unclean.

What God hath cleansed, make not thou common." were the words Peter afterward to the astonished Peter. What God had made and given was good in His sight. Apart from the symbolic meaning of the vision, it was important for Peter and all his brothers to recognize the fact that the distinction of meats held by the Jews in the past must now be given up, in order that Jews and Gentiles might eat together, associating on terms of equality.

Peter was pondering the meaning of the vision when messengers arrived from Cornelius, a Roman centurion at Cæsarea, a man of devout and generous to the poor. They were sent by another vision whose nature Peter would have called unclean." So with his misgivings stilled Peter went with them and lodged them over night. The next day he accompanied them on their return to Cornelius' house. The proclamation to take with him six brethren as witnesses, for he felt that he was doing a venture-some thing. Cornelius told Peter of the vision he had had in which he was directed to send for the latter, and said that he and his friends and kinsmen were all present "in the sight of the Lord" to hear what God had commanded Peter to tell them.

Steamers Missed Rock Through Good Luck

Found Near Surface In Channel Off Vancouver Coast

Lady Luck has been standing on the bridge of every steamer that has navigated Retlly's Cove, Chuyquot Sound West Coast of Vancouver Island, because in the dead centre of the channel there is a pinnacle of rock that had less than fifteen feet of water over it at low water.

This pinnacle was located by the Dominion hydrographic steamer "Lillooet in the course of her charting work and a pot of mariners are shaking hands with themselves at getting over that dangerous spot without mishap.

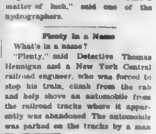
Now ships missed piling up on this rock is explained by the hydrographers that none happened to be in the neighborhood at low water. "Just a matter of luck," said one of the hydrographers.

Plenty in a Name

What's in a name?

"Plenty," said Detective Thomas Hemigran and a New York Central railroad engineer, who was forced to stop his train, climb from the cab and help shove an automobile from the railroad tracks where it apparently was abandoned The automobile was parked on the tracks by a man named Plenty.

Seeds from water lily pods are used by Indians as food, and taste like popcorn when roasted.



"I've just thrown out all my dust cloths

—because I've found how to do the work better, easier and quicker.

"I use Aquaford Wonder Paper now. You buy it in a neat package that tucks away handily in a table drawer. Twenty-five large sheets for a quarter. When you use it, you simply crumple a sheet into a ball and go over whatever needs attention.

"I've never seen anything like Wonder Paper. It really does clean and polish at the same time. It takes up dirt like magic, and so easily. And you can use both sides.

"What I used to bustle about during the the bother of bringing out dusters and dust cloths. I always used rolls and rolls of old shirts and the like—and it seemed to me I was eternally washing them. It worried me just to throw them away. I hate or neglected. They seemed so valuable.

"The beauty of Wonder Paper is that you throw it away when you're through with it.

"I am positive that you'll like Wonder Paper. It gives you time for things very much more interesting and exciting."

Special Offer

WONDER PAPER is made by the makers of the famous PARA-SANI Heavy Waxed Paper for Grease Set. Most grocery, hardware and department stores have Aquaford Wonder Paper in stock. If yours doesn't, send us the coupon below and we'll give you a booklet entitled "Labor-ers," containing one hundred recipes, as a premium for your trouble.

LOCAL NEWS

The Fort Badminton Club held one of the most enjoyable dances of the present season on Friday evening, Nov. 25th, in the Badminton Hall.

A fine crowd attended and at midnight a tasty luncheon was served by members of the club.

Fred Berg's Orchestra supplied the music for dancing.

The two sheets of ice at the curling rink are ready for use. At the meeting held by the Curling Club last Wednesday evening draws were made for this week starting Monday evening.

The present mild spell will not do the ice any good, games scheduled for Monday and Tuesday were postponed, and it is doubtful whether any games can be played before Thursday. But a day or so of snappy weather and the boys will be away to a good start.

THE BUSHELL REMEDIES

Hon. George Hoadley, provincial minister of agriculture, paid a tribute to the weekly newspapers of the province this week when he stated that these newspapers were one of the best means of distributing information on agricultural topics. This statement was made during a discussion on methods for giving publicity to agricultural extension work.

Hon. Mr. Hoadley is right. There is no better means for distributing information to the agricultural sections of the province than through the country weeklies. This has been proven many times. It is about time some recognition of the value of the country press was made.

Big daily newspapers printed in the cities have a special field of their own. They provide the general news, the sensational and outstanding things that occur from day to day. They have reached a high state of perfection. They have large editions filled with news, articles and advertising. But they lack the intimacy of the weekly newspaper, which deals with home matters and is read from beginning to end. The weekly newspaper is a home newspaper. Nothing can quite take its place.

The weekly press deals with homely things. A baby born, a home painted, a road graded, a good crop, a social gathering at a farm home, the minutes of a council meeting, a school report, a U.F.A. meeting, a baseball game, friends dropping in for Sunday —all that is grist for the weekly newspaper's news mill. What daily newspaper could bother with such happenings? But that's the stuff a country newspaper thrives on.

The weekly newspaper fights valiantly for its district, records complaints and strives mightily with its editorial pen. It may lack the polish or sophistry of the high and mighty dailies, but it has something no daily could take from it—a local interest and local loyalty that is beyond price.—Hanna Herald.

HEAVY SUGAR BEET CROP

The sugar beet crop being harvested in the irrigation districts in Southern Alberta has proven heavier than expected. More than 140,000 tons, possibly 150,000 tons, will be dug, according to reports, from which nearly 30,000,000 lbs. of sugar will be made by the factory at Raymond.

China has always been a silver-standard country, since it possesses only a negligible quantity of gold.

DIFFERENTIA FARM FACTS

According to the census taken last year, there are more than 67,000 of the 97,000 farms in Alberta which reported having milch cows. More than 72,000 of the farms reported having poultry, and 70,000 farms reported having horses.

Norway has passed a law prohibiting smoking while driving an automobile.

Phone 123 for WOOL P. A. Robinson

Here and There

Over 100,000 lbs. of nuts are exported annually from Canada, principally to Germany and the United States. They are caught along the lower St. Lawrence River and off the Atlantic Coast.

A total of $44,129 radio receiving licenses have been issued by the Department of Government Radio Branch from April 1 to September 30, 1932, or approximately one in every eighteen persons of the population of the Dominion.

A movie theatre has been installed on the H. R. Gormand on its Australasian run and passengers had the first entertainment in that line on a recent voyage This is the first ship to cross the Atlantic carrying sound movie equipment.

China's first woman barrister, Mrs. Lo Soon Kim Tao, was among the passengers aboard the Empress of Russia, recently sailing from Vancouver. Mrs Soon obtained her legal training in England and is attached to the Hong Kong bar.

The Canadian people seem to have developed a considerable taste for Americana vermicelli, spaghetti and the like Italian food preparations. Output of 16 Canadian factories in 1931 was 30,311,423 pounds as compared with 16,138,525 lbs. in 1926.

With Remembrance Day in our minds, it is timely to recall the brief epitome of Canada's part in the war inscribed on a tablet in the House of Parliament at Ottawa: — "Six hundred twenty-eight thousand, six hundred forty-two bore the badge of Canada in the Great War; sixty thousand six hundred and nine met death and passed on."

Good hunting is reported from the Indian Camp, near Matagama, Ontario, on the main line of the Canadian Pacific Railway, seventy miles east of Sudbury. Moose and deer are very numerous close to the camp and in one morning a couple of G. S. hunters secured their full moose and a deer. They killed to the limit of their licenses within a few days.

A free scholarship to be held at L'Ecole Polytechnique of the University of Montreal, offered by the Canadian Pacific Railway to minor sons of employees of the railway, was awarded to J. P. Lecavalier, 18-year-old son of Ephrem Lecavalier, chief clerk at the Ville End station. The award entitles to five years study proceeding to the degree of Bachelor of Civil Engineering.

Canadian Pacific Railway low rate return bargain excursions, a highly popular feature of the railway's operation since February last, have been and will be well maintained up to the end of the year. Outstanding recently have been the trip to Chicago from Montreal and the shorter trips to and out of the major cities from and to the surrounding provinces. The rate and a quarter fare for return trips during the Remembrance Day holiday was well patronized and this concession is again to be offered for the Christmas and New Year holidays. (276)

PRAIRIE ISSUES TO LOOM LARGE IN PARLIAMENT

Ottawa, Ont.—Questions affecting the grain-growing districts of western Canada will loom large in the coming session of parliament which opens on March 12. Western members are beginning to arrive in Ottawa. They prophesy a very spirited debate and that prairie members will take a conspicuous part in it. They see no probability of the debate on the address in reply to the Speech from the Throne being wound up in a day, as has been the practice in recent sessions.

Behind the arguments for emergency relief, such as criticism of the credit policies of the banks in relation to the needs of western Canada, special freight rates, in view of the low price of wheat, and suggestions for bonuses on wheat, is the fundamental question of just how to carry on in the future, in the opinion of the westerners. Can Canada successfully raise wheat in competition with the Russian five-year plan of big publicity monsigned farms?

"I see no reason why Russia will not be able to carry out its five-year project," said Hon. W. R. Motherwell, former minister of agriculture, one of the early arrivals. "The Russian people are deeply in earnest about this and are willing to wear their trousers bare to see it through. I can see no silver lining to the cloud. Whether the efficiency they are showing in their five-year wheat growing plan can be kept up indefinitely is doubtful. I shall get some pretty direct information from Russia, however, and I am convinced they will put through the five-year plan.

"We have come out of every other depression and no doubt we will come out of this one." Mr. Motherwell added, but he could not see just how. "Of course it is up to the government," he declared. "The people of Canada entitled to a new doctor last July."

Many westerners have expressed the opinion that if Canada is successfully to compete with Russia in wheat growing, it will have to be by big farms, privately owned. H. E. Spencer, United Farmers of Alberta member for Battle River, who was in Ottawa this week, expressed the view that the day of the small farmer in the West would soon be over. He forecast an active election, with the U.F.A. group leading a vigorous attack on the government. He emphasized that large sections of the west were not suitable for livestock.

Mr. Motherwell, on the other hand, thought the small farmer would stand a good show in the future. "Large farms have not been a great success as a rule in the West," he said. "The alternative plan of a number of farmers co-operating in the ownership of combines and their expensive farm machinery has never been a success. Friction always develops. In the first you cannot standardize the size of farms nay more than you can standardize the capacity of men to manage them. Some men have only the capacity to manage small farms and some maths a man-ager of big-wheat farms.

The West will have to go on ploughing and take its chances," Mr. Motherwell continued. "You cannot close up a farm like a theatre. Some way will have to be found. This should be an interesting session of parliament."

Gasoline Trade Low

Montreal, Quebec.—When a prominent lawyer driven past a "stop" sign and is hauled into court, he may make unexpected moves. J. A. R. Dion, K.C., summoned, challenged the city's right to enforce the by-law, saying it was unfounded neither by city charter nor provincial motor vehicle act. He applied for a writ of certiorari and in Superior Court will seek to prove the by-law null, illegal and ultra-vires.

Federal Radio Rights

Rights Of Provinces and Province To Be Restored To Supreme Court

Ottawa, Ont. The respective rights of the Dominion and the provinces on radio broadcasting will be the subject of a reference to the Supreme Court of Canada, it was officially stated recently. Preparation of the questions to be contained in the reference is under way

No decision has been made by the Dumin on Government as to whether or not it will be represented at the hearings being initiated in the Quebec courts by the Taschereau government on radio broadcasting. It is quite possible that the Dominion will not be represented at the proceedings started by the Quebec government, but will proceed to bring its own reference before the courts

From all indications the matter of introducing legislation at the coming session of parliament will be dispensed. Charles, special freight rates, in view of the low price of wheat, and suggestions for bonuses on wheat, is the fundamental question of just how to carry on in the future, in the opinion of the westerners. Can Canada successfully raise wheat in competition with the Russian five-year plan of big publicity monsigned farms?

The whole subject of radio broadcasting, involving the question of jurisdiction, is now under government consideration. Premier Taschereau of Quebec, though, participated in the Ottawa conference with the Dominion control within that province, and early this month the Quebec premier announced that his government was submitting a series of questions to the superior court of Quebec. The controversy over broadcasting control has recently been the subject of public utterances by Mr. Taschereau and members of the Dominion government.

Grain Growing Countries May Hold Conference

Might Be Advantageous Says Retiring Chairman Of Ed. Farm Loans Board

Ottawa, Ontario.—Representations have been made to the Dominion Government, it was stated here, that a conference be held in which Russia, Australia, Argentina and Canada would participate to discuss the wheat situation. It is understood that so far the government does not take kindly to such a conference.

Dispatches from Washington quote Alexander Legge, retiring chairman of the United States Farm Loan Board, as stating a conference of wheat producing countries might be advantageous. It might disclose on Russia's part a willingness to enter a more orderly marketing that would give better prices to all producing countries.

The Sunshine City

Calgary, Alberta.—Calgary claims the unlimited title of the sunshine city of Canada, as a result of the monthly report of the Dominion meteorological service for January. During that month this city enjoyed 186 hours of sunshine. The nearest figure to this was St. John with a total of 121 hours. Fredericton was third with 120 hours, while a few cities, particularly in the prairie provinces and Quebec, averaged between 110 and 118 hours.

Higher Rates On Rums

Ottawa, Ont.—Exercising power delegated to him at the last session of Parliament, Hon. H. H. Stevens, Minister of Railways and Canals, has set a value of three and a half cents a pound for duty purposes on dried fruit, he knows. This would not apply to imports under the British preference to the departmental order specifying that it had to do only with the intercostelia and general tariff.

Re-Election Blocked

Toronto, Ont.—"There is an economics movement in Western Canada," said F. W. Turnbull, M.P., Regina, in the course of an interview here, "that you hear about is merely the agitation of a very small few, noisy individuals anxious to attract attention to themselves and succeeded in attracting that attention everywhere but where they are. The West pays no real attention to them."

Mr. Thomas White former finance minister of Canada, who proposes a convention of all interested nations and a remonetization or revision of all war debts.

Duty Is Remitted

Old Clothes From England For Saskatchewan Farmers Charge Duty Paid

Ottawa, Ont.—Northern Saskatchewan farmers have applied to relatives in the Old Country for old clothes. The appeal having been heard the customs officials in Canada, however, have been holding up the shipments for payment of duty of 35 per cent in some cases the officials made the duty higher than the value of the clothing in London.

A farmer at Chandler, north of Lloydminster, has appealed to Ottawa, claiming the farmers were penniless and too poor just now to pay even the duty on secondhand clothing. It has been ascertained that there is a clause in the Customs Act providing for the remission of duties on secondhand clothing when an affidavit is made that the recipients were not in a position to pay. Customs officials at Lloydminster, where the clothing has been held up, have been notified of the regulation and ordered to deliver the clothing on receipt of the affidavits.

Asking Amendment To Criminal Code

Reward Offer Disapproved By Chief Constable Macmillan

Winnipeg, Manitoba. - - Numerous changes additions and amendments to the Criminal Code of Canada were asked for, when the legislative committee of the Chief Constables' Association met the minister of justice and other law enforcement officials at Ottawa.

Chief of Police Chris. H. Newton, of Winnipeg, who is secretary of the association, attended.

The legislative committee urged the use of telegraphic warrants, recommends to the Vagrancy Act, and discussed deportation of undesirables and problems of handling unlawful gatherings.

New Ministry For Spain

New Regime Expected To Restore Legal and Political Stability

Madrid, Spain Spain now has a new government, peacefully formed, and is looking forward to at least a period of calm after the political turmoil of the last few days

Admiral Juna Bautista Amar, staunch Royalist and political neutral, heads the ministry formed by King Alfonso in a successful effort to head off another military dictatorship like that of Miguel Primo de Rivera

The King called for co-operation on the part of Left Socialist and Republican elements and their attitude remained problematic. The public generally however seemed to be waiting quietly until the program and policies of the new government could be formulated and put into effect

The cabinet that replaces that of Damaso Berenguer which resigned because of widespread opposition to Premier Berenguer's plans for parliamentary elections in March is chiefly Berenguer himself and the Count of Romanones and the Marquis of Alhucemas, the men most responsible for his overthrow.

It is formed of Right Monarchists with Liberal Conservative and Catalan Independent party representation and according to its chief the heart of its program will be the restoration of legal and political stability

To Open Parliament

Justice Duff Will Officiate At Ceremony On March Twelfth

Ottawa, Ont. Parliament will be opened on March 12 by Mr Justice Duff of the Supreme Court of Canada The ceremony will be performed, it is officially stated by Mr Justice Duff in his capacity as administrator

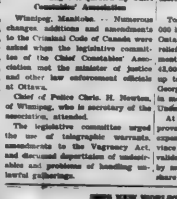
Canada's new governor-general, the Earl of Bessborough, will not arrive in Canada until April 2 or 3. Chief Justice Anglin, who is now in the West Indies, will not return to this country until April 28. The chief justice will join the official party to the Buenos Aires exhibition when they reach Trinidad on March 3 to proceed to Buenos Aires.

Aid For Unemployed

More Than $15,000,000 Has Been Spent In Ontario

Toronto, Ont More than $15 000,000 has been spent in the province of Ontario in providing employment and relief since the Dominion Unemployment Relief Act came into force, and 43,000 men were given employment up to the end of January, Premier George S. Henry told the legislature in moving second reading of his Unemployment Relief bill.

At a brief sitting the House approved the bill, which authorizes the expenditure of $4,000,000 by the province on unemployment relief and validates certain debentures issued by municipalities to finance their share of the relief programme.



HERE'S NEW WORLD'S RECORD

Capt. Malcolm Campbell, British speed driver, who set up a new world's speed record on land of 245 miles an hour.

RELIEF PAYMENTS TO PENSIONERS WILL CONTINUE

Ottawa, Ont.—Relief payments to pensioners will be continued by the Dominion Government at the same rate as heretofore Official announcement to this effect by Premier R H Bennett will be received with widespread approval by pensioners affected throughout the Dominion

Payments already made for relief purposes to pensioners had exhausted the appropriation by parliament the prime minister explained and in addition a substantial sum secured through governor-general's warrant The law provides that governor-general's warrants can only be issued in cases of urgent necessity

The minister of pensions and national health has been investigating the situation and being now satisfied of the great urgency of the case additional relief has been issued by the administration and relief payments to pensioners will be continued at the same rate as heretofore There was no decision much less intention to cause hardship to those who had been receiving relief

Schedule of monthly allowances for unemployed pensioners, which Premier Bennett announced will be continued is as follows Single men $30 married men with no children $45, married men with children $57 married men with two or more children $67

Maximum of pension obtainable for unemployed pensioners has been $67 monthly From this amount is deducted the pension the man was receiving and the difference was paid in the form of a voucher to be used in the purchase of the necessities of life

Questions Cost Money

Many Queries Regarding Russia Come To British Parliament

London, England- "Cost of 1,600 questions addressed to me since I took office, 863 or approximately nine-third, have related to Soviet Russia," said Rt. Hon. Arthur Henderson, secretary for foreign affairs, in reply to a question from Miss Ellen Wilkinson, Labor, East Middlesbrough, in parliament.

The foreign secretary said he was unable to give any estimate of the cost of ascertaining the information that had been given, but the cost of issuing three official statements on Soviet legislation, religion, and labor was about $700.

Miss Wilkinson quoted the estimate of a member of the previous Conservative government, that average cost of ascertaining a reply to an official question was $35, and suggested the opposition might make a move in the direction of national economy in this respect.

School Act Amendment

Use Of French Language For First Year In Saskatchewan Public Schools To Be Abolished

Moose Jaw, Sask.—A School Act amendment which will abolish the use of the French language in public schools will be brought down before the present session of the legislature, Premier Anderson announced before the Saskatchewan School Trustees' convention.

It had been the practice, he said, as minister of education, to allow a French child in the province of Saskatchewan to receive instruction in the schools during the first year in French, and this meant that at the end of 10 months a child might know no English. This innovation is planned, he said, not because he did not respect the French or their cultures, but because the system as at present was not pedagogically sound.

Train Wreck In China

Hankow, China.—Thirty were killed and 72 injured in a train wreck, near Shuyang, 100 miles north of here on the Peiping-Hankow Railway. Because of heavy snowfall, which crippled wire and rail communications, the report reached here February 15.

U. S. IS AGAINST MOVE FOR DEBT CANCELLATION

Washington.—Obtaining a rapidly moving picture of war debt discussion, President Herbert Hoover launched with the knowledge of President-elect Franklin D Roosevelt —a request that foreign debtors meet the December 15 payments on their war debts to the United States

Simultaneously and in the face of congressional opposition, he pigeonholed the implication of an agency to review international financial pledges in connection with world economic and disarmament problems

In view of determined objections made on Capitol Hill, especially by Democratic powers in the House there seems little chance for such a United States commission

Only a few minutes before Mr Roosevelt left Washington and shortly after an extraordinary conclave of congressional leaders at the White House, Mr. Hoover issued a lengthy formal statement declaring flatly against debt cancellation but suggesting certain forms of tangible compensation than cash"

Immediately there followed a chorus of mixed approbation and opposition. One prominent Democrat said after another declared against a commission to review the debts The same men, however, expressed approval of Mr Hoover s stand against further moratorium or cancellation.

Some congressional leaders told President Hoover at the White House conference that he already had power to negotiate or set up a commission such as proposed to negotiate with Great Britain, France and other European powers The same view was echoed later by other prominent members of congress who did not attend the meeting, but in administration quarters it was held the executive had no such power.

Speaker John Nance Garner, the vice-president-elect, who and the Democratic contingent into the conference at the White House, and later into parley with Mr. Roosevelt, reiterated in public a belief expressed by several at both meetings.

"Let them default," he exclaimed in answer to questions, "What could they would default ? They won't."

Relief On Mortgage Payments Is Sought

Gins For Cent, Interest Cut Asked By Prairie Provinces

Ottawa, Ont.—Efforts to free prairie farmers for one year from mortgage interest and to persuade mortgage companies to reduce interest rates by one per cent., were put forward last week by western provincial treasurers in an interview with officials of those companies.

The interview, it is understood, took place at Toronto and the reply given the treasurers is not known here.

It is understood, however, that the companies pointed out that few if any foreclosures are being sought for arrears of interest, and that the companies are taking a generously with farmer debtors on the prairies.

Church Union

Australian Mounting Body Of Church Union Spoken Of In Canada

Ottawa, Ont.—"I don't think there is any chance of stopping union," declared Lieut.-Col. the Rev. A. T. Holden, D.D., presbyterian moderator of the General Conference of the Australian Methodist Church, and chaplain-general of the Australian military forces, who was a visitor in Ottawa. Col. Holden is making a trip across Canada for the sole purpose of studying church union as it exists in this country, so that he can put forth proposals in his own country for the union of churches.

During the months from January to September, 1932, Saskatchewan coal mines produced approximately 900,000 tons.

Many Questions On Beauharnois Project

Motion To Again Go Ottawa House Order Paper

Ottawa, Ont - The Beauharnois power project again figures in questions placed on the order paper of the House of Commons R. J. Cardiad, United Farmer member for Bow River has a dozen queries on the order paper with a view to obtaining further information in respect to the financing of the undertaking

Mr Cardiad first asks for the tabling of copies of any arrangements which have been entered into by the government in respect to the Beauharnois project He wishes to know the total amount of money advanced by the government to date of consideration with the constitution and complet on of the enterprise

What security has the government been given for the money advanced?" he asks

The member for Bow River asks if the government has obtained any legal opinion regarding the legal right of the Beauharnois Heat and Power Company to transmit electrical energy beyond the limits and boundaries of the province of Quebec

"Did the minister of finance or the prime minister approve of loans estimated at $6,500,000 made by the Royal Bank of Canada, the Bank of Montreal, and the Canadian Bank of Commerce to the enterprise?" he asks. Are such loans permissible under the Canadian Bank Act?"

Attack Duff Report

Labor Makes Attack On Its Recommendations

Ottawa, Ont Thousands of railwaymen throughout Canada will be thrown into the ranks of the unemployed if the Duff commission's report is adopted, the House of Commons was told when Labor made the initial attack on its recommendations.

Humphrey Mitchell, Labor, Hamilton East, estimated 30,000 railwaymen would lose jobs. Hon. Peter Heenan, who returned to overalls and a locomotive cab when he left the portfolio of Labor in the King cabinet, placed the number at "many thousands and thousands."

Branch railway lines would be scrapped, said the former minister of Services would be dropped and curtailed. The Canadian National and Canadian Pacific Railways would be drawn into closer co-operation. Competition would disappear.

May Demand Provincial Election In Ontario

Progressive Leader Will Introduce Amendment When House Opens

Toronto, Ont.—A demand for a provincial election next summer will be made immediately after the opening of the legislature in February by H. C. Nixon, Progressive Leader, who was in Toronto.

He declared he would introduce an amendment to the moving and seconding of the adoption of the Speech from the Throne demanding the immediate dissolution of the house with reasonable speed and an election clled for June next.

Alberta Deficit

Increased Revenues Shown In Provincial Treasurer's Report

Edmonton, Alberta Deficit of $3,-153,056 in Alberta provincial finances for the fiscal year ended March 31, 1932, is shown in public accounts recently tabled by R. O. Reid, provincial treasurer. This compares with a deficit of $2,936,581 for the previous fiscal year, 1930-31.

Revenue for the year which had been estimated at $18,641,457 actually yielded $13,682,400, a shrinkage of nearly five millions, expenditures were estimated at $18,838,798, but were cut to $16,848,481.

Record Lumber Shipments

Toronto, Ont.—Announcing a high-er quality of lumber hog suitable to the demand of the Great British consumer, Hon. Robert Weir, Dominion Minister of Agriculture, addressed several hundred farmers and exhibitors of the Royal Winter Fair luncheon recently.

NEW AMBASSADOR

Here Von Hoesch, new German Ambassador to Great Britain, is shown above as he arrived in the British Capital

New Stamp Issue

Bears Profile Of King Engraved In Medallion Style

Ottawa, Ont A new stamp issue, in denominations of one, two, three, four and eight cents was placed on sale by the post office department on December 1

The new issue bears the profile of the King, engraved in medallion style, and is similar in design to the 3-cent stamp issued to commemorate the Imperial Economic Conference.

At the same time a new 13-cent stamp will be issued replacing the current 12-cent stamp that bears the view of the Quebec capital. The design of the new stamp will be the same as that of the 13-cents issue, but its colour will be violet.

Reducing Liquor Prices

Victoria, B.C Reductions in liquor prices on all save continental European brands, ranging from 10 cents to 60 cents a bottle went into effect in British Columbia December 1, Hon. R. M. Pooley, attorney-general, announced. Government approval has been given the new price list prepared by the liquor control board.

For Better Understanding

Makes Plea For Closer Union Between Britain and U.S.

London, Eng Speaking at a Pilgrims' Society luncheon in honor of Robert Frazer, the new United States consul-general, Lord Hailsham, Secretary for War, made a plea for closer union between Great Britain and the United States for the economic salvation of the world

"Never has there been a time when it was more important that our two peoples should understand one another," he said "We stood together in arms to protect civilization from violent destruction I believe that today we, the two great creditor nations of the world, must stand together to protect the world from economic disaster I believe that the hope of civilization lies in fuller understanding between Great Britain and the United States."

Talked Over Light Beam

Scientists Make Longest Narrow-Casting Experiment On Record

Schenectady, N.Y.—A group of scientists at Schenectady talked with another group at Lake Desolation, 34 miles away, over a light beam projected across the lower Adirondack mountains.

It was the longest narrow-casting experiment on record. During a part of the experiment John Bellamy Taylor, who developed the method of transmitting sound over light waves, was interviewed by Heywood Broun, newspaper columnist, who was at Schenectady, while Taylor was at Lake Desolation.

A searchlight mounted on a building at the General Electric Company's plant projected its beam upon a Bishop mirror which was part of the receiving apparatus at Lake Desolation.

No Jobless In Jerusalem

Not One Man Unemployed Statement Of Jewish Leaders

New York.—Three Jewish leaders from Palestine, arrived on the "Saturnia" on their way to a convention of the American Mizrachi Organization in Buffalo, boasted that their city is the one place in the world that has not one unemployed man.

One of them, Aron Ha-Hum, said the Jewish population in Jerusalem has grown from 55,000 in 1917 to 220,000 today.

ITALY PASSES TENTH MILESTONE UNDER FASCISM

FASCISTI ON ROAD TO ROME

Since that October day, ten years ago, when the black-shirted legion, led by an almost unknown agitator, Benito Mussolini, marched into the Eternal City and started Italy on its comeback to greatness, many changes have taken place in the land of the Caesars and Popes. The most remarkable of these changes, to the looker-on, has been the climb to power of Mussolini. His word is law in every corner of the country. He is hated by many, feared by many, adored by many—but obeyed by all. Fascists claim that Il Duce has built up the economic structure of Italy to a position it has not enjoyed for

MORE DIVERSITY OF PRODUCTION ON THE FARM

Toronto, Ont.—Radical changes are required in western Canadian agricultural practices before the prairie provinces' economic picture is again bright, in the opinion of a prominent Toronto banking official quoted by the "Mail and Empire"

Just returned from a month's intimate study of conditions and prospects in the west, the banker advocated turning the bulk of Manitoba's wheat lands into grass for cattle. That he suggested, would permit Saskatchewan areas suitable for wheat alone to retain this as a major crop without congesting the market.

All'erta, he stated, already was well on the way toward a more balanced production. However greater interprovincial co-operation was required before the problem finally could be solved.

There must, in the banker's opinion, be greater curtailment of wheat acreage in western Canada, and he suggested the best method of attaining it would be through interprovincial co-operative measures leading toward a planned and co-ordinated diversity of production, allocating to each area the new or restored types of livestock it was best fitted to produce.

Western Canada could not get along with general comfort through-out all its sections so long as wheat prices at Port William were less than 50 cents a bushel. Manufacturers already made had placed the average farmer in the position of being as well off with wheat at 60 to 65 cents as he was three years ago when it was selling at $2

Some communities and individuals had so organized their production they were doing well with 50-cent wheat, the banker stated Others in much areas as southeastern Saskatchewan had not yet exhausted their crash surpluses from former years. Thus, there was by no means a uniform condition throughout the west. Bright spots were sufficient in number and variety to mitigate the gloom cast by others.

New Bacon Policy Will Benefit Canada

British Statistic Here Open Them Ever For Product

Toronto, Ont.—Canada will benefit substantially in the new policy by reason of the 280,000,000 pounds of bacon per year," declared A. E. McLean, of Canada Packers, Limited, in commenting on Great Britain's policy with regard to bacon restrictions which are now in effect.

"Her market will now be more open than ever to receive this Canadian bacon, which will take care of about 30 000 hogs a week," he said.

Great Britain has started cutting down on her imports of bacon from foreign countries. She is doing this essentially as a preliminary to building up her production."

Oil From Oklahoma

Thousand Of Crude Oil Leaves Seminole For Region

Seminole, Okla.- A trainload of 60 cars of crude oil will leave here for the Imperial Oil Company, Regina, Sask.

The train will provide 120 work-ing days for railway employees in Canada and the United States The railroad men call it the "King George Special." It is the first trainload of Seminole crude oil to be shipped to Canada in months. There used to be three a week.

Seen Better Times

Toronto, Ont. - President Frank A. Ralph told the annual meeting of the shareholders of the Imperial Bank of Canada here today there is a greater feeling of optimism throughout the country than there has been for two years, that opportunit es are offered for developing business due to the imperial economic conference, and that further stabilization may be expected from the coming world economic conference.

English Heirlooms

Royal Commission on National Museums Duty Taking Inventory

If there are any who imagine that the auction rooms have made a clearance of the historic treasures of England they may reassure themselves. Prodigious as the sales have been in recent years, they have but scratched the surface of the United Kingdom's savings from the centuries. Ample evidence of this is furnished in the inventory, so far as it has proceeded, of the royal commission on historical monuments. Appointed by King Edward 24 years ago the commission has to date made a survey only of London and of five counties. The war and the lean Lates following are in part responsible for the seeming slowness of progress, but [illegible] has been well [illegible] care taken by the commission in every detail of its work.

Roman camps and earthworks, churches and castles, cottages and manor houses, monasteries and market halls nothing small or great in building or furnishings which was in existence before the year 1714 has escaped minute inspection. Charged to discover "those things which most merit worthy of preservation," the commissioners of Edward VII. and George V in thoroughness and energy put to the blush the commissioners of Henry VIII. who made a mere minister visitation of England's abbeys and monasteries.

Fifteen substantial volumes in quarto record the results achieved so far. Even the omission of the hundreds of photographs in a work of art like this must mean that the amount of material which annual commission may be gathered from the fact that it was necessary to devote an entire volume to Westminster Abbey alone. Roman remains in London took another volume, a third was devoted to the city proper, a fourth and fifth to east and west London, Essex, Buckinghamshire, Northumberland and Herefordshire are considered in other volumes. Some of these are already out of print.

There has been published the report upon east Herefordshire. One of the most striking of the English shires, its relics of the past comprise a now under notice range between a beacon camp on "Malvern's lonely height" constructed when the Crusaders were fresh out of the fair Palestine - and the market house at Ross, one of the most interesting specimens of a public building of three centuries back. Even more picturesque is the half-timbered market hall of Ledbury.

The churches of east Herefordshire, of course, have yielded an abundance of material. Consider alone their monolithic possessions, and one is tempted to speculate admittedly an ungenerous speculation on what they would "fetch" if they found their way to Christie's! Fonts in which infants were being dipped ("decently and warily," let us hope), when Bede et was alive in Norbury Cathedral's Cormorian cups and flagons in use when the 39 articles were drawn up; pulpits occupied by preachers who had talked with Archbishop Laud; beds which rang the alarm of the Spanish Armada; richly carved stalls trodden by children of men who fought at Agincourt; oaken doors of manor houses which opened to gay cavaliers and to Cromwell's Ironsides! This England still holds for herself a vast treasure of the past in amply demonstrated even when one venture to spend.

The chairman of the royal commission is the Earl of Crawford and Balcarres

Quality Is Assured

One of the important safeguards of value for the farmer is the tag which appears on each bag of fertilizer sold in Canada showing the name and address of the manufacturer, the brand name, the registration number, and the guaranteed analysis. The administration of the Fertilizer Act by the Dominion Seed Branch provides for recourse to the farmer that he is getting real value in fertilizer.

Berlin has introduced traveling grocery stores which stop at specified places for housewives to make their purchases.

BRITISH LAWN TENNIS TEAM LEAVES FOR AFRICA

Here are the members of the British Lawn Tennis team leaving London, England, for South Africa. They are left to right: Fred J. Perry, G. P. Hughes, Miss Betty Nuthall, Mrs. Fearnley Whittingstall (formerly Eileen Bennett); Miss Mary Heeley and H. G. N. Lee.

Need Ask For Judges

Trusting Legality Of Will Made 100 Years Ago.

Judges of the Chile Supreme Court will determine the legality of the 100-year-old will of Daniel Miles, whose countrie title forms the struggle of Henry VIII. who made a mere minister visitation of England's abbeys and monasteries.

Fifteen substantial volumes in quarto record the results achieved so far. Even the omission of the hundreds of photographs in a work of art like this must mean that the amount of material which annual commission may be gathered from the fact that it was necessary to devote an entire volume to Westminster Abbey alone. Roman remains in London took another volume, a third was devoted to the city proper, a fourth and fifth to east and west London, Essex, Buckinghamshire, Northumberland and Herefordshire are considered in other volumes. Some of these are already out of print.

Berlin has introduced traveling grocery stores which stop at specified places for housewives to make their purchases.

Clouds Are Depressing

Most People Feel Disappointed When Sun Does Not Shine

Everyone had the blues this morning. The sky classed it, for when the first awoke that cutting was overcast with a dim grayish mist that filtered the wan sunlight weakly and stingily.

The moment on the comforter was the customary greeting as I came to the office. The elevator boy in our building looked his usual smile. The salesmen on their daily rounds were listless in their efforts, and I myself felt my head heavy and clouded.

And then, about noontime, there came a rift in the sullen clouds overhead, and suddenly the sun came through the gloom and flooded the streets below. And with its coming our little world sprang into sudden activity. The figures in the street seemed to move more energetically; the music of city traffic began to make itself heard; and here and there I caught the sound of laughter. When I went to lunch the elevator boy grinned at me. The newsboy on the corner called a cheerful greeting as I passed. And the world came back to life again.

I thought later—how little it takes to melt us mortals into the depths of despondency. The sun refuses to come out in the morning; a few milli cloud; a shadowless depression descends upon hearts—and phft! we are lost in despair!

But, sooner or later, the sun is sure to break through the clouds of doubt and worriment. And we are all going to wonder, then, how it was that we allowed ourselves to become so discouragable and morbid.

Cheer up! In a very short while it will seem very funny that for a short time the sun forgot to smile.—Hubert H. Buell.

The city of Omsk, in Siberia, following the example of Peter the Great, imposed a tax on beards in 1920.

On the world's longest air-line run in Japan, a distance of 9,000 miles, the fare is £150 10s

Second Hand Airplanes

British Demand Reported In England For Three Machines

Though it is certainly a sign that aviation is becoming part of the humdrum life of the country, flying enthusiasts may not be quite elated to know that second-hand airplanes are now for the first time coming on the market. The majority of these machines are light two-seater type and probably cost when new anything up to £800 each. They are now offered second-hand, but apparently in perfectly good trim, for anything between £200 and £400. Most of these machines are being put on the second-hand market by owners who have either found that the running and maintenance costs were greater than they anticipated, or whose first enthusiasm for aviation as a private hobby has waned somewhat after a brief trial. A few cases there may be of course, where a bigger machine is desired, I hear there is a brisk demand for these second-hand machines. —London Cor. Ottawa Journal.

Progress In Mixed Farming

Dairy Products and Cattle Help To Balance Budget

The great lesson of the crisis is the utter condemnation of one-crop cultivation. If the objection be made that houses, poultry and dairy products are not fetching a better price than wheat, they do at least contribute to good measure to balance the farm budget by reducing the expense account. Our young population must learn to be self-supporting. The immense progress achieved in this direction will be very profitable and may avert other crises of the kind through which we are now passing.—Le Lavoro, Winnipeg.

Alaska's great piedmont glacier, the Malaspina, consists of ice over a thousand feet thick.

India, isn't the only country with its monsoons. Just try to borrow a five-spot from a friend these days.

FANCIFUL FABLES

Mental Patients

Apparent Decrease Due To Greater Per Centage Of Discharges

Increase in patients in Canadian mental institutions during 1931 was less than the increase during the previous year, according to figures issued by the Canadian National Committee for mental hygiene. Total number of patients on the books of all Canadian institutions on December 31, 1931, was [illegible] as against [illegible] during 1930. This apparent decrease in the number of mentally ill [illegible] orders, was not due however to fewer cases arriving at the hospitals, but rather to a greater percentage of discharges," the committee reports. "As a matter of fact, there were more admissions in 1931 than in 1930. There were 10 000 persons admitted to mental institutions in 1931, while in 1930 the number was only 9,000. Discharges numbered 5,440 in 1931, as against 5,222 in 1930. For every 100 patients admitted in 1931, 59.1 were discharged, and for every 100 patients discharged 36.5 were discharged as recovered.

"The chronic condition of overcrowding, which is a constant feature of mental institutions, is of course, aggravated more greatly by the fact 1,611 additional persons have been forced into them, while the total number of new beds provided is probably less than 300. Serious consequences are bound to follow unless governments take immediate steps to supply accommodation equal at least to the annual increase in institution populations."

Expedition To Jericho

Scientists To Explore Studies Of Royal Palace

Professor John Garstang and Mr. Charles Marston are to continue their excavation of Jericho this winter to ascertain further facts about ancient Jericho in the Bible.

Professor Garstang will depart for Palestine this month Sir Charles may accompany him, or go later. They have had four expeditions to Jericho in the last four years.

"The royal palace is the most important building on the whole site," says Sir Charles This will be their objective this time.

"The mound walls rise 60 feet above the surrounding ruins. We have already explored some of its storerooms and have found bags of grain still preserved.

"It is significant that the whole palace was destroyed by fire when it was still in its prime. This was that of Joshua and our discoveries agree with the Bible story. The forthcoming expedition is going to work particularly in the hope of finding some cuneiform tablets which may be stored away in the cellars.

"The same city of Jericho, part of the excavations of Jericho have shown that when the city was captured and burned, it was not plundered. And this is exactly as described in the Book of Joshua.

Few people can realize the difficulty of this spade work at Jericho. The heat is terrific and reminds one of a cold Turkish bath.

"Owing to the splendid road built by the armies in the World War, Jericho can now be reached by car in an hour from Jerusalem. The journey starts at 2,000 feet above sea level and finishes at 1,000 feet below sea level."

Even Rodents Adore

A modest Scotchman, in speaking of his family, said:

"The Douglas family is a verra, verra auld Scotch family. The fine rim ones' back into antiquity. We disna boa hae far back it rins, but it's a long, long way back, and the history of the Douglas family is recorded in five volumes. In almost the middle of the third volume, in a marginal note, we read, 'About this time the world was crushed.'"

Hair will stretch one-fourth of its length and retract nearly to its original length.

CHAPTER 11.

A Northern Man

At Fort Endurance, in his big three-roomed office overlooking the rest of the post, Alan Baker was changing uniform and making himself regimental again, after a four-day patrol in a camp of drunken Huns.

Just turned thirty, tall and lanky and powerful of body, Baker had a shaken of the last vestige of an unhappy boyhood and his three harrowing years Across. He was in the prime of virile and hardened manhood. Coming here to Endurance as a corporal seven years ago, with Jimmy Montgomery and Curt Spaulding as his constable, he had speedily showed his worth as a "northern man" and a determined leader able to cope with frontier problems. To him it was like coming into his own. In his boyhood he had daydreamed of hunting big game; and here, at this post just beneath the Arctic circle, these daydreams had been realized, though in a strange way. For here he had hunted the biggest of big game—human game that had intelligence to match against his; that carried a rifle in its hands, and were a hell-ping, and must be captured alive, at risk of his own life.

During the years that he had been officer commanding here, he had built up an enviable reputation. With his gradually increasing pack of northern men he had successfully brought a big trading territory through Indian t ca-ins and epidemics, and had smashed those lawless elements that came in with the oil-prospecting rushes farther south.

With a record like that and with Superintendent Williamson as his friend, Alan had expected to get his commission last fall when the post was raised to an inspectorship. No one in all the Three Rivers country d oubted that Baker would be the chosen man. To them, to Alan, the blow came unexpectedly. A political appointee named Haskell, a newcomer to the Force, a worse than raw newcomer to the North, got the inspectorship and command of the coveted detachment.

In these last months Alan had been very thoughtful about his future. Here, at thirty, he found himself in a blind alley, a non-com on meagre pay, with no hope of promotion. He had turned down the opportunity of going into a big mining company that was prospecting by planes through Athabasca country. He had refused half a dozen offers that held prospect of advancement and fine money. And then the Force that he had given such loyalty to had betrayed him. Worst of all, most stinging of all, he was forced to manage this new boss still, straightening up the office records and making the arrogance of the man who had got the place he himself had earned.

As he brushed his sandy hair and dressed quickly, Alan's glance strayed down the slope to Mrs. Drummond's flower garden. Elizabeth Spaulding, his fiancee, the sister of his dead partner, was there.

And inspector Haskell was there with her . . . that blue and gold of his uniform, through the shrubbery

Alan wondered how many hours Haskell had spent with Elizabeth in these last four days.

Commanding all the other buildings at Fort Endurance, Alan's cabin, which he and Curt Spaulding had built for themselves [illegible] was light and airy, homelike with fireplace, bookshelves, Indian, Bower pelts on the floor, and comfortable with good furniture which Jimmy Montgomery had turned over to him when Jimmy's young wife died. But in spite of its comforts after barrack life, the cabin was lonely to Alan. Eighteen months ruling by land had made him more than a little partner. Every log and every nail in the building held some memory of Curt Spaulding; and Curt's grave, with Jimmy's big empty gun, were poignant remembers of that fatal patrol a year ago last January. . . .

It was he finished dressing. Alan stepped over to a deep alcove, a sort of nursery and study—a tiny niche for a man six foot tall and lanky. Here the work table hung a shelf of dog-eared books and three pictures framed in carved walrus ivory. One was of Elizabeth Spaulding taken many years ago when she came down north to see the Waterways country to live with Curt, the other Amelia Earhart and Jimmy Montgomery in jaunty "walking-out" uniforms, taken before Jimmy got his rear end from the Arctic and married Amelia. The third was of Curt Spaulding.

And that picture, framed with the cheerrons and the last-gun, made Alan momentarily then even the other two, as though, with that face always in front of him, Alan felt less lonely in the cabin. Curt's portrait would imagine Curt here in this cabin still.

In Curt's death he had lost the best and truest friend he had ever had, or ever would have, and he knew that through all the years of his life he would be lonely for that strong hand-clasp, that cheery, boyish laugh.

From a pigeonhole between two logs—a secret stuffed for himself and his hard-working partner—Alan took a letter from Curt, penned by Curt's own hand. He had so much of Curt's writing memorized that he could repeat the words, but he enjoyed the reason was not that. It was something deeper and more lasting.

With those words Father Cloven by had seen Alan's face commingled with Joyce brook up and had watched the engagement come about. He saw that Elizabeth was a wise, cool-headed girl, very immune at imagining romantic nonsense for her own ends in the good priest's opinion the marriage of that cool-headed, calculating girl to a man so sincere and warm-hearted, would be a sorry, sorry pass.

When Elizabeth came to the door, Alan merely handed to Alan's warm greeting. In her precise tones she said:

"I want to talk to you, Alan, about something very important to us both. Unless you're too busy . . . ."

Her rebuff hurt Alan. Her coldness, her lack of any passion, were always [illegible] to Alan.

Waiting, passfully aware he could never answer her argument, his glanced out the window at the river and the shimmering pine hills. A mile down the broad Mackenzie a canoe, a small patrol craft with outboard motor, came whupping around a headland.

Alan thought: "That's Bill Murdoch coming. And coming wide open. Something's happened."

Elizabeth saw the craft, too. She she glanced only once at it, entirely uninterested. Father work—patrols, arrests, map surveys, treaty money, pain to be stamped, bickering Indians —all the bored her, now that the memory of it had worn off.

She loved Alan—with reservations. She admired his natural-born leadership over other men; admired his rugged honesty, especially in contrast to Haskell's lack of it. In their life together Alan would always be loyal to her; she could always depend upon Alan Baker. And he could get her what she wanted of life. Much better

"If I Should Ever Marry"

By Lydia E. Pinkham's Vegetable Compound

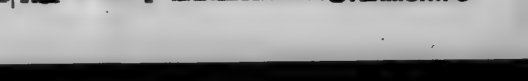
Marriage ... circles under her eyes. If she would only try Lydia E. Pinkham's Vegetable Compound to tablet-form, she could be strong and happy again.

"IT'S LOVER THAT MAKES YOU FEEL SO WRETCHED"

Wake up your Liver Bile

—No Calomel necessary

Don't be fooled into buying calomel because you need a liver regulator. Ask for Dr. Edwards' Olive Tablets. They are purely vegetable and act more surely and gently on the liver. You will know the reason why when they make you feel like a new person. Take one or two nights and note how much better you feel and look. Dr. Edwards' Olive Tablets are sold only in sealed packages at 30c and 60c. Ask your druggist for them.



Over the Islands of your youth to the old home town that you left so long ago, your ever and you will be sure to see the friendly welcome there is in store for you.

WEDDING

A quiet wedding was solemnized in the Roman Catholic Church, Fort Saskatchewan on Tuesday, Nov. 29th, when Mr. Joseph Durocher and Miss Louise Mary LaPage both of Fort Saskatchewan were united in marriage. Mr. and Mrs. Durocher will make their home in town.

ANNOUNCEMENT

We have decided to start an Exchange Column. We feel that at this time many of our readers have articles for which they have no further need, but that might be useful to someone else. These articles may be of small value but at present, one dollar is very much one dollar.

The odd table in the attic might better be represented by half a dozen nice chickens ready for consumption. Willie's last year's boots and skates, now too small, might better adorn some other small boys' feet than be lying around the house.

Our charge will be 25 cents per insertion paid in advance, of not more than two articles. Every insertion will bear a number, and interested parties may be put in touch with one another by applying at The Record.

For Example:
No 1 Baby Cot and Buggy. Practically new. Will exchange for Grammaphone

This is just an example, but with an authentic ad. for the small sum of 25 cents The Record would put the owner of the grammaphone in touch with the person who had no further use for a baby buggy.

Our column starts next week. Bring in your entries.

Festival Association Hold Important Meeting

The Central Association of Schools and Musical Festivals held a very important meeting in the parlor room of the Corona Hotel, Edmonton from 1 to 5 Dec. 4.

Six of eight of the inspectorates of the association were represented by: Camrose, Mr. C. McLeary; Vermilion, Mr. West and Mr. Hecklert; Vegreville, Mr. MacCrae and Mr. Dmentiz; Wainwright, Mr. L. Woods; Lamont, Mr. C. H. Robinson and Mr. Hambly; Wetaskiwin, Miss Cone; St. Paul and Hardisty were not represented.

It was decided by this Association to have the festivals run on an itinerary program commencing with Wainwright, Tuesday, May 2; Wetaskiwin, May 5th; Camrose May 6; Vermilion, May 9; Mayville, May 10; Vegreville, May 11; Lamont, May 12; and St. Paul, May 13.

The advantage of belonging to this particular association is that an amount of $60 is taken from the Carnegie Fund to pay for musical adjudicators to such inspectorate.

The Association agreed upon a pooling of expenses in connection with the traveling faves of those two adjudicators plus recitation and dramatization adjudicators if necessary.

The primary reason for the calling of the meeting was to discuss the program arranged by the various local festival committees. The Vermilion festival executive arranged the musical program which after a few changes was adopted. The Camrose executive arranged the recitation program which will soon be in the hands of other local executives. A discussion of various other matters followed and settled after which the meeting was adjourned.

NEW CAR LICENSE PLATES
TO BE BLUE AND YELLOW

Alberta' 1933 auto license plates will be cobalt blue figures on a lemon background. No definite announcement has been made by the Provincial Government regarding the reduction in the fee has been made.

Saskatchewan has reduced their auto fee lately and Alberta was on the same basis as Saskatchewan last year.

St. George's W. A.

The Annual meeting of this Society was held at the home of Mrs. Wallis on Thursday, Dec. 1st 1932, the President, Mrs. Taylor in the chair. The Year being closed with the "Pie" the President opened the meeting.

The Secretary, Mrs. W. A. Graham, submitted a most interesting and comprehensive report of the years work, showing that in spite of a trying and depressed period, the results of their work had been very good indeed.

The Treasurer, Mrs. Wethe gave all the financial details in her also good report, showing a satisfactory balance.

After a hearty vote of thanks to retiring officers, especially Mrs. Taylor the elections for the coming year proceeded. Result as follows:

Hon. President, Mrs. C. Reed.
Hon. Vic-Pres. Mrs. Wallis.
Hon. Vic-Pres. (2nd) Mrs. Magor.
President, Mrs. Wethe.
Vic.-President, Mrs. Taylor.
Secretary, Mrs. W. A. Graham.
Treasurer, Mrs. A. M. Connolloe.
Dorcas Secretary, Mrs. L. D. Vellfland.
Living Message Sec. Mrs. Magor.
Dept. of Juniors, Mrs. Reed.

Tea was then served by the hostesses Mrs. Wallis and Mrs. Reed, whose names are a guarantee of quality and quantity.

The announcement of a new "bumpometer" or road meter which registers every bump or dip in a paved highway surface, leads one motorist to remark that he frequently has considered these such devices—with vocal attachments—in the back seat.

Partridge Hill

Mrs. Wilmot Alton entertained the W. M. S. and the Ladies Aid last Thursday, when an enjoyable program had been prepared. The tea tables were lovely in Autumn colors and Red Maple leaves in their rich coloring lending their beauty for the occasion.

Lists of officers for 1933 gives the following slate:—

President, Mrs. W. Alton.
Vic.-Pres. Mrs. George Ouboldenton.
Sec.-Treas. Mrs. R. Warring.
Pastal Sec. Mrs. Violet Lawrence.
M. M. Mrs. J. Smith.

oooo

Mr. Lambly and pupils are working hard at the Christmas concert program for Friday, Dec. 23rd. A short "Wooing under Difficulty" will be given by the following cast; Bill Underwood, Gladys Ouboldenton, Mamie Gardner, Alex Bushnell, Cecil Rye, Bessie Alton, and Leslie Gordon.

oooo

A former neighbor, Jim Larson has returned to live amongst us again. Mr. and Mrs. Larson, no Mr. Marshall of Dunbow, Alberta, will be welcomed residents at the George Ouboldenton house.

oooo

On Monday afternoon, Mrs. W. Attwell, Mrs. R. Lawrence and Mrs. W. Alton entertained at a shower for Mrs. Raymond shares, on the eve of her departure for her new home in Drayton Valley. A number of lovely gifts were received. Five tables of court whist being played, the honors going to Mrs. G. Ouboldenton and Mrs. G. Lawrence.

We regret to report that Mr. Wm. Gillies is not able to leave the Royal Alex. hospital, where he has been a patient for the past four weeks, undergoing treatment following an accident to his eyes.

oooo

Farmers in the Partridge Hill district are preparing a skating rink on the recreation grounds, under the direction of Mr. Lambly.

Taken from the Files
10 Years Ago Today

Thursday, Dec. 6th, 1918

Members of the Fort Lodge No. 14, I.O.O.F., presented Mr. E. Kelterborn, with a handsome cut glass water service and an oak tea tray. Mr. J. W. Kidney, P. G. made the presentation.

Curling is in full swing, and at almost anytime one hears "put the broom, or let her curl".

We notice a great deal of rushing driving by boosters in and about the Fort. Only Tuesday a man driving a team he could hardly manage nearly ran over three of our estimable ladies.

The following gentlemen were nominated on Monday for councillors, L. J. Whitaker, T. S. McClellan, E. E. Simmons, and E. Clark. For school trustees—E. Willmott and W. G. McIntyre.

On Wednesday afternoon at the home of Mrs. van Ilfland some members of the W.A. and the choir of the Anglican Church gathered in honor of Mrs. Wm. Keary, who expects to join Sergt.-Major Keary in Belgium about the end of the week.

HOW MANY MILES PER BUSHEL

To convert the low-priced surplus of wheat and corn and other grain crops into ethyl alcohol and use this as motor car fuel is the ambition of certain Illinois farmers after recent practical demonstrations. These farmers distilled corn and mixed the resultant ethyl alcohol with gasoline. Using six types of automobiles, without special adjustments, the experimenters drove over hilly roads at a variety of speeds without being troubled by knock or undue heating. They say if every farmer now using ordinary fuel were to use ten per cent mixture of alcohol the entire surplus of farm products would disappear in less than two years. If the oil companies wanted badly enough to conserve the natural supplies of petroleum, the farmers could demand them in the profitable supply of "crude" grain.

United Church Ladies Aid Elect Officers for 1933

At the last regular monthly meeting of the United Church Ladies Aid held at the home of Mrs. W. J. Foster last Thursday the following officers were elected for the year of 1933 Hon.-President, Mrs. D. C. Ramsay, and Mrs. Johnston.

President, Mrs. J. D. McLean.
1st. Vic.-Pres., Mrs. W. J. Foster
2nd Vic.-Pres., Mrs. Geo. Mosher
3rd. Vic.-Pres., Mrs. A. S. O'Brien.
Secretary, Mrs. F. Bailey
Treasurer, Mrs. F. E. Murray.

Reports of the retiring officers were received and showed good results considering the depressed condition of the past year.

Much Business Done At School Board Meeting

Minutes of a regular meeting of the Fort Saskatchewan School Board held in the Council Chambers on Monday, 5th. December, 1932, at 7:30 p.m.

Present:—Mr. F. Atkinson, Chairman, Trustees, Mr. R. Todd, Mr. R. A. Brown, Dr. Grunert and Dr. Calhoun.

The minutes of the last meeting held were read and adopted on the motion of Mr. Brown.

Reports were submitted by the principal and caretaker regarding trial order of coal placed with G. A. Cranston, which was accepted on the motion of Dr. Calhoun. It was then moved by Mr. Brown, and adopted, that—G. A. Cranston be given the contract for coal, for the current year, at $3.85 per ton, Stirrgrove coal from Sherwin mine, double screen, nine weigh tickets to be handed to caretaker.

The Secretary was instructed to purchase 1 bot of paper towels from the Hotel Supt. & Supply Co., the same as last.

The School will be closed for the Christmas vacation from the 24th. December to the 2 nd. day of January, both days inclusive, it was decided by the Board.

It was moved by Mr. Brown and adopted that this Board desires to express its good wishes at this season to the Teachers, pupils and parents, and to express its appreciation of their help and co-operation during the year.

The Principal was present and submitted a list of High School students who received less than 65 per cent. in any subject in the November examinations. With regard to this report it was moved by Dr. Calhoun and adopted that the Board views with disappointment the standing of grades in High School as shown; That the Board would summons the November marks with the next report submitted.

Mr. Anderson also submitted the November attendance report and explained other matters to the trustees.

The next regular meeting will be held on the 9th of January instead of the 2nd.

The following accounts were passed for payment on the motion of Dr. Calhoun:—G. A. Cranston, coal $83.—30; C. A. Brown, $9.60; A. M. Carondelon repairs etc. $14.65; Beaver Lumber (Northern) Ltd., $9.70; Jones, Graham & O'Brien, etc.

The meeting adjourned on the motion of Mr. Brown.

The World's Great Meat Is Cheese—Show points by Admonish-ing.

Hockey News

The Fort Hockey Team have been practising every night lately in preparation for their strenuous league schedule, which opens on Wednesday, (tonight) against Lamont. With the new forward pass in effect, the game has been speeded up considerably and the locals are paying considerable attention to getting this new play down pat.

The following new players have been signed up by the local management: Charles Mann formerly of Montreal, Reed Scarborough with the Edmonton Imperials last year, Arabic ball formerly of Edmonton.

These three men along with Henry, Stanley, Lane, Gauf Flintoff, Pocock, Karras, Lamoureux, Kelterborn, Kingsley, make up the squad. This will be added to from time to time as new men and juniors round into shape.

"It's rad," said the sentimental landlady at the table, "to think this poor lamb should be slaughtered in the flower of his youth just to satisfy our appetites."

"Yes," agreed the cynical boarder, "and Reed Scarborough with the "it is tough".

What You Can Do With Wall Board

We have this in the Plaster Board and the Paper Pulp Board.

It can be used for many purposes besides lining up walls and ceilings. Such as:—Black Boards for Schools or family, Partitions, Coverings for Screen Doors, Cutting out figures for toys or other designs.

Are you installing any Storm Sash or doors this winter. Let us give you a price. It may surprise you.

Municipal and school board elections are over for another year throughout Canada's western provinces. Reports indicate that, generally speaking, the elections this year were contested with a vigor surpassing that which usually characterizes such contests. This, no doubt, is but another result of the difficult and critical times through which the world is passing. the inevitable outcome of which is discontent, dissatisfaction with whatever is done, no matter what its nature may be, or who may be responsible for the doing of it. Another factor accounting for the keenness of many contests was the entry of a political party in Provincial and Federal affairs into the realm of municipal affairs. This introduced a new element, and in some cases a new bitterness, into municipal and school board elections.

It is no doubt true that at no time can men and women, clothed with responsibility by their fellow citizens to direct public policies and manage public affairs, please all classes. No matter what they may do, or may have undone, certain people will be dissatisfied This, however, is especially true at a time like the present when all governing bodies are confronted with the two-fold task of exercising the strictest economy on the one hand, and of being faced with the necessity of making extraordinary expenditures on the other hand. Both these things must be done. the first because of failing revenues resulting from the inability of many people to pay taxes, and the second because prevailing conditions make it obligatory to provide for the relief for countless numbers of people. The result is a demand for more and more so-called "free" services on the part of governments, for people who have not the means to obtain these services for themselves, at a time when governments cannot possibly get the money to pay for the aforesaid "free" services.

Dissatisfaction and discontent, ending in unreasonableness on the part of many, is the inevitable result. Those things which many people are demanding, if granted, mean the imposition of still heavier burdens on others who are making a valiant struggle to keep their own heads above water and not become charges on the community Those whom the citizenship made responsible for administration of public policies and affairs thus found themselves between two fires, and, with their heads tied financially, making it impossible for them to do many of the things they undoubtedly would have been glad to do were it only possible.

Some experienced and conscientious public servants have, as a result of this general dissatisfaction, been defeated, their places on public bodies being taken by others, some of whom, aggrieved at their defeat, have popular fancy and support as a result of more or less sweeping promises which they will soon discover they, too, with all the best intention in the world, will be unable to fulfill.

Service on municipal councils, school boards, and other public bodies is, at best and under the most favorable circumstances, a more or less thankless task, while under present prevailing adverse conditions it is even more so, involving, as it does, little but abuse, misrepresentation of motives and acts, and loss of whatever popularity a person may have possessed. Such service also involves no small sacrifice on the part of the person accepting public office. In these days it requires every moment of one's time and energy to keep their own personal business matters in solvent shape, regardless of these means disaster.

But service on public bodies is a public duty. It is a duty that must be discharged by some one, and those who are willing to undertake it are deserving of the thanks and cordial goodwill of their fellow citizens, regardless of the fact that their every act may not meet with approval.

Therefore, now that the smoke of our municipal and school board battles has cleared away, now that the dissatisfied of the majority have been rendered, it behooves all citizens of good will, and loyal to the democratic institutions of this country, to get behind their representatives whoever they may be, and, irrespective of the fact whether they were their personal choice or not, give them a helping hand. Let carping criticism now cease. Let all personalities be forgotten. Rather, let one and all stand unitedly in support of those elected representatives and work harmoniously together with one single purpose of doing the best possible under existing circumstances, helping each other, and thereby helping all.

And in so doing greater consideration may well be given to this important fact too many people are rather inclined to think from time to time to forget, namely, that more can be learned from the experience of the past than from all the text books of theories or the idealistic visions of inexperienced and visionaries. What is good in the past we should retain, while that which, through experience, we have learned to be worth and found should be remodelled or disregarded, being substituted by what that same experience has shown to be needed, rather than to invoke some purely theoretical idea which, when put to the test of practical operation, is more likely than not to lead us in a deeper morass than the one from which we are striving to extricate ourselves.

The chemist's magic produces Him scent for perfume from turpentine oil.

In the eighth and ninth centuries, Persia was the centre of the rose water industry.

January is named from the Latin god, janus, god of gates and doors; janua, of beginnings.

Do the right—not merely praise it.

Has So Short of Breath
Could Not Lie Down to Sleep
Mrs. P. J. Chenoff, Shoreacres, B.C., writes:—"I had been so troubled with short of breath I could not lie down to sleep.
I couldn't do my hard work, or climb the stairs, and had nervous and smothering feelings, and dizziness very much.
I tried all kinds of medicine, but could get no relief until after I had taken three boxes of Milburn's Heart and Nerve Pills, and since then I have felt better in every way."
Price 50 cents per box, or 3 boxes for $1.25, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Women Is Honored By French Legion

Old Tradition Has Been Shattered For Second Time

An old tradition which dates back to Napoleon and which kept French women from rising in grade in the Legion of Honor has been shattered by the award of the rank of Commander of the Legion to a woman, for the second time in history

Mme. Philippe de Villmorin, millionaire business woman and one of the world's greatest dealers in seeds and grains, has been promoted from Officer to Commander joining in that rank Countess de Noailles, poetess, the only other woman Commander in the Legion's history.

The promotion came in the distribution of 600 ribbons and rosettes of the Legion of Honor to reward services rendered towards the success of the Colonial Exposition. Madame de Vilmorin had created the floral decoration of the exposition grounds.

Widowed during the war, Mme. de Vilmorin left the front, where she had won citations as a war nurse, and took charge of the 300-year-old grain firm.

She travelled through Africa, Indo-China, Java, Egypt, Australia and the Orient, in order to improve the seeds of tobacco, rice, coffee, peanuts, and other colonial crops She operates agricultural stations in Algeria and is largely responsible for saving the French cut-flower industry from ruinous Dutch and Italian competition.

Perfume Hints the peerless aid to loveliness. Delightfully fragrant. Delicate to use. Leaves no trace. A little gentle rubbing and it is swiftly absorbed by the skin. Tonic in effect. Soothes and dispels roughness and chapping. Gives satin soft and velvet-textured Unrivalled for charm, distinction and refinement. Used by discriminating women everywhere to preserve and enhance their natural beauty

Shanghai Has German Paper

City Now Boasts Wide Variety In Daily Newspapers

Into the babel of Shanghai's already complex newspaper world still another foreign languages daily has made its debut. It is the German language Deutsches Shanghai Zeitung. Perhaps no other city in the world boasts of so many different kinds of daily papers.

Published in the English language there is the old established English journal, the North China Daily News, so-called because at its founding most foreigners lived in Canton, to which Shanghai was then North China, although it is far from that geographically speaking. Then the American daily, the China Press in the morning line and the Shanghai Evening Post and Mercury afternoon paper, vie with the third, the Shanghai Times, which has an English editor, although it is not of that nationality as to capital.

An excellent protection against worms is Mother Graves' Worm Powders. They render the stomach and intestines untenable to them. They kill the worms, and the worms come outboard by the attacks of the purgative. Nothing can withstand the strength of the child that has been exterminated by the dynamite that Mother Graves have made upon it, and their operation is altogether health-giving.

Trap For Smugglers

"Wall Of Invisible Rays" On Germany's Western Frontier

An invisible wall which nobody can penetrate unnoticed will soon be erected on the western frontier of Germany's eastern frontier as the latest device against smugglers.

It is a "wall of invisible rays" which would be seen or felt; but whenever penetration this wall starts an alarm in the Customs office. There an indicator promptly announces the spot where the intruder has crossed the frontier. A special device informs the officers of "blind alarms" by buzz, flags or door.

Plan In Hereby Phrase

The National Railway Construction Federation has submitted a plan to the ministry of railways to convert the ancient Great Wall of China into a system of motor highways, but it is hard for outsiders to conjecture such a motor road. For hundreds of miles the Wall climbs over mensels passes

For you
and your pipe

If you "roll your own", use Ogden's fine cut and Ogden's cigarette papers

Bidding For Foreign Markets

Germany Plans To Send Out Flashing Industrial "Fair"

In an endeavour to regain some of the foreign markets Germany lost as a result of the world war, an association of German manufacturers of Hagen, Westphalia, plan to send out a floating industrial "fair" early next year on a trade crusade to South America and the Far East according to commerce department advices from Consul J H Brutes at Hamburg

The 14,000-ton Hamburg-South American liner S.S Cap Norte has been chartered for the "fair" It will visit more than 70 foreign ports of the world, leaving Hamburg or Bremen shortly after the first of the year and remaining away 18 months.

"It will sail first to South American ports, later visiting British East India, China and Japan," the consul's report said.

The "Floating Fair" has been so organized that even small firms may take part in this piece of practical trade promotion. It will offer for sale and will exhibit a great range of German industrial products, especially hardware and tools."

Reproduction Of Old Temple

Tomb Centuries To Build But Engineers Took Sixty Days

The Chicago World's Fair broke ground for the great Maya temple that is to be a dominating feature. It reproduces the temple at Uxmal Yucatan built more than 1,000 years ago by the most enlightened aborigines of North America. The original was generations in building; the duplicate goes up in 60 days. With electric cutting tools the grotesque head of a Mayan god can be turned out in a few hours, but the original Maya, who did not even know how to harden copper spent a lifetime in bringing a face out of a column into form. This temple alone will serve all the ends of a world's fair—it will be a replica of the rise of man.—Christian Science Monitor.

A sale and cure medicine for a child troubled with worms is Mother Graves' Worm Exterminator.

Many Methods Used

Almost every known method of survey has been made use of in the work of surveying the international boundary between Canada and the United States. In its length of 3,500 miles, the boundary passes through country greatly varying in nature—through arms of the sea, through the great lakes, through rivers, lakes and forests and over plains, mountains, glaciers and mountains.

No Place For Candy Shop

New Orleans Woman Would Open Store In Ahlavih

In New Orleans, La., a certain woman is thirsting for knowledge of Canada's far north. She also seeks knowledge of the Dominion's currency.

The woman, whose name was not revealed, wrote a tourist agency at Calgary for the information as she apparently wanted to open a store in Ahlavih, which rests in Canada's Indian sub-Arctic.

The agency, however, told her there were not railways to the shore coast of the Arctic ocean and that it would be doubtful if the candy and medicine business would be very profitable in that district. They also told her Canadian money was in dollars and cents not pounds and shillings as she believed.

Aussie Up-To-Date

A young man who had spent a week-end motoring was relating his experience to an elderly aunt.

"It was a jolly fine week-end, my dear aunt, when I remembered a thing or two," he said.

"Oh!" said the aunt severely, "I presume——or—pin your thoughts to your tires!"

Insect pests destroy enough food plants in the British Empire alone to feed 40,000,000 people.

Good Progress Being Made With History Of The World War Now Being Compiled In Britain

With twenty-nine of the probable forty volumes of the history of the world war now completed, Great Britain is well ahead of all the other belligerent powers in the preparation of an official story of the events of the years 1914-1918 for the benefit of the living as well as of posterity It is thought that the last volume will be ready twenty years hence, but that is only more of a guess than a certainty

From the historical section of the committee of Imperial Defence, under Sir Sidney Sapia Britain's comprehensive memorial of the past and guide for the future is being prepared. this correspondent has just obtained a detailed account of how this herculean task is being handled So far it has cost 200,000 pounds sterling though that total includes the cost of much royal work which would have to be done anyway

Of the histories completed there are Naval Operations, 5 volumes, Merchant Navy, 3; Sea-borne Trade, 1, Gallipoli Campaign, 2, Egypt Palestine, 2, Mesopotamia, 4, and Togoland and Cameroons, 1. In addition to there 20 volumes there have also been published five of the contemplated twelve dealing with the western front, three of the five dealing with the war in the air, and another —in diary form—entitled "Principal Events of the War."

At the outset of the war the British navy service numbered 625 vessels of all kinds. But by November, 1918, this force had been increased to 5,081. Hmsh unit kept exact records of the events and movements of every hour of the day in their logs, which never numbered fewer than six in current use, and often as many as fourteen in a flagship.

It is estimated that the total number of naval logs kept during the war approximated 1,500. But enough in the preparation of narratives of the major service resources to not had to these original documents. Only the salient points in each have been entered on cards for more easy reference. It has to be remembered, too, that telegrams passing in and out of the admiralty amounted to at least 1,000 daily, or 1,750,000 during the war. There were, besides, countless reports and Admiralty papers.

The records of the air service are only less formidable than those of the admiralty.

This vast mass of material at the disposal of the official historians has to be arranged, collated, and put in form of archival exports, one of whom finds is to discard tons of papers dealing with matters of no permanent historical importance.

The authors appointed have the assistance of a small staff of technical specialists, including cartographers. The forty-volume history will be illustrated by hundreds of maps, plans, diagrams, sketches and charts, apart from photographs of the scenes themselves of war without which it would be almost impossible to visualize the types of country in which the operations took place.

When once the narrative is committed to paper in chapter form it undergoes the minutest checking Hundreds of copies are dispatched to officers who took part in the particular action dealt with, and after their criticisms and suggestions have been considered and, in many instances, adopted, the chapters are forwarded to the appropriate service departments for remarks In one instance a chapter was submitted to 573 officers

No other belligerent nation, it is asserted, can show such progress with their histories, although many are said to employ far larger staffs at much greater cost. Those who carp at the cost of the work are reminded that to date the expenditure represents, roughly, half an hour's expenditure by the British in warfare during the last year of the conflict. Besides producing this colossal war story, the historical section has to deal with thousands of inquiries from other department, regimental historians, staff colleges and the war graves commission, many of which require protected reference to the records. The circulation of draft chapters of the history entails alone the writing of 4,000 letters.

It was explained to this correspondent that even in 1914 steps were taken to collect and arrange the records as they were received for the subsequent compilation of the official histories, and the actual writing was begun in 1916 The number of records which have to be consulted is stupendous On the military side alone the historians have immediately at hand at least 30,000,000 sheets of documents and 50,000 maps All of these are from the theatre of operations and do not include any of the multitude of "home" papers, such as war office files and the unfinished accumulation of other records

Specialist Declares Tuberculosis Curable
Sufferers Can Hope For Re-Himself Has Recovered
Tuberculosis is a curable disease, visiting doctors were told by Dr Frank Miller, of Los Angeles a specialist in lung diseases speaking before the Southwest Clinical Conference at Kansas City.
Dr Miller said he spoke from experience when he told victims of this disease to look into the future with hope as he himself has been cured of the disease.
The great majority of cases were amenable to treatment he said, if the patient is willing to submit to the necessary treatment and to live carefully And no one has he declared persons who have been pronounced cured of the disease are just as good risks, if not better, for life insurance companies than other persons. This Dr Miller said was because once having been stricken by poor health they have learned how to care for themselves and will not abuse their bodies in the strains other persons will
Dr Miller does not put considerable stress on hereditary nature of the disease
"Fifty per cent of all persons have some kind of tuberculosis infection," he said "but only about one-third of these ever become clinical cases"
The most important aid to successful treatment, he said, was to find the early recognition of the symptoms, and prompt systematic treatment

Specialist Declares Tuberculosis Curable

Sufferers Can Hope For Re-Himself Has Recovered

Tuberculosis is a curable disease, visiting doctors were told by Dr Frank Miller, of Los Angeles a specialist in lung diseases speaking before the Southwest Clinical Conference at Kansas City.

Dr Miller said he spoke from experience when he told victims of this disease to look into the future with hope as he himself has been cured of the disease.

The great majority of cases were amenable to treatment, he said, if the patient is willing to submit to the necessary treatment and to live carefully And moreover he declared persons who have been pronounced cured of the disease are just as good risks, if not better, for life insurance companies than other persons. This Dr Miller said was because once having been stricken by poor health they have learned how to care for themselves and will not abuse their bodies in the strains other persons will

Dr Miller does not put considerable stress on hereditary nature of the disease

"Fifty per cent of all persons have some kind of tuberculosis infection," he said "but only about one-third of these ever become clinical cases"

The most important aid to successful treatment, he said, was to find the early recognition of the symptoms, and prompt systematic treatment

After once having been cured a person may live whomever he pleases, Dr Miller said.

Famous Cow Path

Valuable Property In Chicago Can Be Used For No Other Purpose

A cow and her calf actually went down the world's most famous cow path in Chicago recently.

While puzzled citizens wondered what it was all about, busy and her offspring posed for photographers in the cow-catcher path under a skyscraper at 160 West Monroe Street. The cow and the calf did their stunt in advance of the International Live-stock Exposition

The path in 177 feet long, 16 feet wide, and worth $177,000.

When Chicago laid out the surrounding tract in 1833, he reserved the right to use the path for his cows. He made his reservations as he knew that the path remains, even though no cow had trod it for 50 years. A 22-story building is on the site, utilizing air rights above the path.

A rainbow is a "rain circle" if seen from an airplane.

Tree Planting Car Of The Canadian Forestry Association Completes Season's Work

Completing its season's work which during the past six months has taken it over 1,500 miles on the Canadian Pacific Railway Lines, in both Alberta and Saskatchewan, the tree planning car of the Canadian Forestry Association arrived in Regina recently where the car will remain for the winter months.

Travelling over a large area of both southern Alberta and Saskatchewan, the car visited large districts where nature has not been kind during the past three, and even four years, to others where conditions have been none nothing to beautify or protect their homes, stated their intention of making a start Two from points widely apart, one on the Bow Branch, the other near Outlook, had been in these districts 20 years, and had made no attempt to build up a permanent shelter belt around a bit of land on both said, but next year a start will be made

For a month the car travelled through the southern border of the parkland zone, and here been interest was shown, at every stop Information regarding the best trees to plant in cutting, and on other lines of cooperation of this native growth. Into so-called many districts, just a few years ago deemed unsuitable for shelter trees, that the farming people surrounding, having lost their protection, are now planning to suffer from many of the troubles of the southern Prairie Farmer. Strange as it may sound, many areas, which when settled was bush country, soil-drift is becoming a major problem Most of these people, are now, well aware of their mistake, and are now using to a considerable planting, but allowing, very wisely, trees to again take over large numbers of uncultivated land.

The last three, and even four years, in many districts, has not been kind to the planting of trees. During this time, it is said, there has been a difficulty to keep many of our older trees alive, and almost impossible to get out new ones, and those for them to grow But it is under just such conditions, that we have been having, that trees can do so much for us. It is not surprising at all, that in these districts, we have lost large numbers of trees, but absolutely amazing the large numbers that are still alive. As the car travelled between Shaunavon and Assiniboia many fine belts of trees to be seen, in which no loss of life had taken place, and which spoke so to many town plantings. That trees have come through, under conditions which have made it impossible for the farmer to raise one blade of wheat and wheat is well known for its hardiness proves that we have trees that can stand the hardest knocks the Prairie has to offer The ones which died out in such large numbers have been the willows, poplar and maple, quick growing trees, but ones that are unable to withstand our periodic severe conditions These trees have their place, for quick protection for fuel, and fence-posts, and planting around low spots, or dug-outs, but have no place in planting for shade, as elm and the evergreens, and of course caragana, have come through with flying colours. Not only have they been able to live, but in even the worst drought areas, they have even been able to grow That we have trees of this type, places trees a planting for the future on a very sound basis The future planter may use them with complete confidence The future success of tree planting on the Prairies is assured.

Long Distance Vision

From an altitude of 21 000 feet, an aerial photograph was made recently which covers 200 miles of territory The picture was taken from a point 10 miles south of the Golden Gate, and shows both San Francisco and Oakland Bay which are 40 miles apart, says Popular Mechanics Magazine It was made by army air corps photographers who utilized the multiple motor-ized flight through a special filter.

The temperature of Venus is thought to be about 10 degrees above zero. Fahrenheit, both day and night

Do You Know?

THAT in certain sections of rural Quebec in the summer time it is customary to do their baking in primitive ovens built in the yard or by the road side? The photograph, made near Sorel in the Lower St. Lawrence district, shows a housewife taking a pan of bread from such an oven.

RUNS UPSTAIRS AT 82

Daughter's Pride In Active Father

"I feel in duty bound," writes Mrs. A J W, "to express my gratitude for the marvellous results my father has obtained from Kruschen Salts. They should really be called 'Health.' He is ninety-two years old, and is as fit as a fiddle. He can only shout, and run up and down stairs. His friends marvel why it is he is always alert, and never feels sick. He always tells them the reason. "My regular daily dose of Kruschen Salts every morning." We always recommend Kruschen Salts to all our friends. To any one his health should be without it."

(Mrs.) A J W

Most people grow old long before their time because they neglect one vital point of health the need for internal cleanliness. Eventually they elect the healthy Kruschen habit. Then they start getting rid every day of all noxious matter from the system. Poor, healthy blood goes coursing through the veins. And almost immediately they feel their youth has returned: they feel young, energetic and happy. In a word, they've got that famous 'Kruschen Feeling.'

WORLD HAPPENINGS BRIEFLY TOLD

Robert Sloane Gourley, 81, piano manufacturer and for years one of Toronto's outstanding business men, died recently in this city of cancer.

A resolution urging the Dominion government to restore the old rate of relief for returned men, rather than the month pension, was passed at a meeting of the Disabled Veterans' Association at Vancouver.

Plans for a solo flight from England to Cape Town in two and one-half days are being made by Victor Smith, 19-year-old South African flyer, who recently completed a flight to London from Cape Town.

Between Calgary and Red Deer in the north about 60 per cent of this year's wheat crop remains unthreshed due to winter's early advent. This wheat still remains in stook.

For the first time in history New Zealand will have no Rhodes scholars to send to Oxford this year. The selection committee examined five possible candidates but concluded by making no awards.

Ten weeks of motorcycling in which he covered 17,000 miles and crossed Canada from Montreal to Vancouver, ended at Montreal as J. Graham Coles, motorcyclist, extraordinary from the Isle of Man, prepared to return home.

Pressure has been dropping at an alarming rate in Turner Valley gas field, according to a member of the Alberta gas conservation board which has considered tests in the area with a view to reducing production and thereby prolonging the field's life.

Premier Herriot and Ambassador Dovgalevsky of Soviet Russia, have signed the new Franco-Russian pact of non-aggression and conciliation. This is the first such treaty which it has completed with one of the great powers.

New Cause Synthetic Ivory

For centuries billiard balls have been laboriously turned by hand from natural ivory. Few workmen could produce accurate spheres. Billiard balls of synthetic ivory, which are made with mathematical accuracy, were exhibited this year at the Leipzig fair and are claimed to be superior to the old form. They assure more accurate play, besides being fracture proof and indestructible.

A Business Revival

Railway Improved Organization Sees Improved Conditions

"A business revival is actually in the making. The present low-water mark of business activity cannot long endure. You will be well on the road to recovery before the great mass of people realize it," was the message brought to Canadian business men by Ralph B. Wilson, vice president of the Railway Statistical Organization.

Canadian business has struck bottom. Mr Wilson said, pointing to a dozen or so charts of different phases in Canadian business. He particularly emphasized the activity as such have motors as car haulings electric power, newsprint production, gold mining a large wheat crop a slight increase in wholesale commodity prices and a favorable balance of trade

The total volume of Canadian business should be greater in 1932 than in 1932. Furthermore, he said, "because the readjustment has been so drastic it is not unreasonable to expect the volume of business to reach normal by the close of 1933 or early in 1934. If this forecast is even approximately true, there is better business ahead of the Dominion for several years to come.

"I am not saying that Canadian business should be greater in 1933 than in 1932. Furthermore, he said, "because the readjustment has been so drastic it is not unreasonable to expect the volume of business to reach normal by the close of 1933 or early in 1934. If this forecast is even approximately true, there is better business ahead of the Dominion for several years to come.

"I am not saying that Canadian business in on the high road to prosperity in 1933. There is plenty of hard work ahead. I am saying that 1933 is pointing the way out—that the depression has sent its deepest point and that slow but certain improvement has started," Mr. Wilson concluded.

Confirm Fattening Information Source

Calgary Women Come To Conclusion In Isolated Places

A petite, silver-haired, bright-eyed lady, who is guide, philosopher and friend to the real farmer in the west, the not-beyond farmer women of Canada is in England, studying our library methods, says a writer in the London Daily Mail. She is Miss Adelaide F. Montgomery, librarian of the library division of the department of extension in the University of Alberta, who has a stronger library and confidence a more fascinating information source than any of her professional colleagues in this country.

Her task includes choosing and sending out of parcels of books to be read in the far-away huts of the pioneers and by men plunged for many months in the Arctic Circle night. And she puts love stories in the Canadian wives in the solitude of farms 50 miles from a village. In an interview Miss Montgomery discovered how she reached women from the basement of these desolate farmsteads, asking: "What is the best way to feed my miserable—old husband? Is it too young for men?" "How shall I best preserve my fruit?" "Please send me some patterns for making a gown."

"I answer hundreds of them," she said simply. "When the 11,000 books of my 'Travelling' camp library each one is checked—and out of them tumble sacs of wheat and oats from the trappers in which embossed wrappers have been reading them on some jolting journey. A box of books may travel 1,000 miles and be away for months, for great is the space between and over that they come back sooner very often than if someone in the next road had borrowed them for a day or two. The men in the lumber camps like adventure stories. They are like 100 per cent. he-men, I suppose, and they like a good red-blooded story. A few prefer love stories, but they will not have the highbrow modern sex problem novel at any price."

A Real Sport

If man want to have his photograph taken "Mounted or otherwise?" asked the photographer.

"Otter," I'll have it taken mounted," replied the man: "but I don't know what my wife will say else's never seen me on a horse before."

The woman with aspirations (slightly): "My husband is merely a subscriber of wants-books. It means such a prosy occupation."

Unappreciated Poet: "On the contrary, mum is much poetry in wants-books."

W. N. U. 2093

Trying Unusual Plan For Growing Celery

Canadian Seedlings Shipped To Bermuda Come Back Full Grown

Eugene W. Osterbridge, president of E. Wenzel Osterbridge Company, Bermuda, has been in Halifax outlining an experiment with which he hopes to head the celery market by about three months.

He is growing seedlings in Canada, shipping them to Bermuda for replanting, and then shipping the full-grown celery to Canada.

"The winter," he said, "you will be given an opportunity to buy celery three months or more before the usual Bermuda product is on the market.

Mr Osterbridge was in Picton, Nova Scotia, superintending the packing of seedlings for shipment to Bermuda. Last year he experimented in a small way with such success that he had made extensive plantings at Picton and at Montreal.

Two shipments, totalling 150,000 seedlings, were made from Montreal to Bermuda during October. The second shipment from Nova Scotia, L-S-M-S, 900,000 seedlings, left Halifax on November 1.

"The Canadian National Steamships have co-operated in every way with me to land these shipments in Bermuda in perfect condition," said Mr. Osterbridge, "and I believe this project will mean a huge increase of much-needed foreign dollar inf..."

Ordinarily, Bermuda celery seed is planted early in October and transplanted during January and February. It is shipped north to Canada during April, May and June. The Canada climate will not permit outdoor planting because of the hot summer.

The seedlings now being transplanted in Bermuda have already had the coddling months of the Great White winter. In the words of General J. C. Smuts, now-time Canadian cavalry commander, "possibly dedicated the whole course of history."

General Smuts in a recent speech told the members how Lieutenant Flowerdew of the Royal Canadian Dragoons, commanding he might win the Victoria Cross, led his detachment on an important German position at Marsay Ridge, capturing it in the face of heavy fire.

Flowerdew, he said, was hit and his horse collapsed under him. Then, as he lay dying, he managed to rise and shouted, "Carry on, boys, we have won."

Those interested down the Gorbal's fame as he told the story. He quoted from the official report of Flowerdew's deed, which said:

"It was a return to the days when battles were decided by the strength of men's arms, and the fury of the charge was more than the German could face." They fled and fled whilst the cavalry, still spitting in the wrath, bearing a cluster of heads before them. Then the Germans surrendered, and their rearguard was annihilated."

Conductor of school band: "Now we will play 'Rule Britannia' for our second number."

Schoolboy with trumpet (whispering nervously to boy next him): "My hat, I just played that!"

MEMORIAL TO AVIATORS UNVEILED IN POLAND

Above is a picture of the striking monument erected in Warsaw, Poland, to commemorate the 300 Polish aviators killed on active service on the Great War. The memorial is a striking piece of sculpturing by Professor Edward Wittig. The photograph was taken at the moment of the unveiling

Boston Of Young Canadian

Lieutenant Flowerdew's Sacrifice In War Possibly Changed History

Members of the Authors' Club in London, England, were told the story of a young Canadian's heroism during the closing months of the Great War, which, in the words of General J. C. Smuts, now-time Canadian cavalry commander, "possibly dedicated the whole course of history."

General Smuts in a recent speech told the members how Lieutenant Flowerdew of the Royal Canadian Dragoons, commanding he might win the Victoria Cross, led his detachment on an important German position at Marsay Ridge, capturing it in the face of heavy fire.

Flowerdew, he said, was hit and his horse collapsed under him. Then, as he lay dying, he managed to rise and shouted, "Carry on, boys, we have won."

Those interested down the Gorbal's fame as he told the story. He quoted from the official report of Flowerdew's deed, which said:

"It was a return to the days when battles were decided by the strength of men's arms, and the fury of the charge was more than the German could face." They fled and fled whilst the cavalry, still spitting in the wrath, bearing a cluster of heads before them. Then the Germans surrendered, and their rearguard was annihilated."

Substitute For Hardtack

Americans Forest Rangers Will Have Canned Brown Bread

Rations for Uncle Sam's forest service employees in all parts of the United States and Hawaii, parked at Missoula, Montana each year for distribution, will contain no hardtack for the coming year, officials have announced.

The "army ration," formerly used by the rangers, will be replaced by canned brown bread, increasing the calory content of the foods packed for the forest workers. The can in which the bread is packed will be used as a coffee pot after its contents have been removed, lightening the rangers' equipment. Cans of hash, pork and beans, roast beef, fruit, coffee, and a bar of candy will be placed in each ranger's pack with the bread.

Officials said that 32,000 pounds of the bread would be required.

Good Rule To Follow

Be Satisfied Instead Of Buying Something Out Of Others

Toronto is searching for the perfect baby. The quietest way to make the change was more than the Canadian could face." They fled and fled whilst the cavalry, still spitting in the wrath, bearing a cluster of heads before them. Then the Germans surrendered, and their rearguard was annihilated."

Conductor of school band: "Now we will play 'Rule Britannia' for our second number."

Schoolboy with trumpet (whispering nervously to boy next him): "My hat, I just played that!"

◆ FANCIFUL FABLES ◆

Finishing Bacon Hogs

Information Gained Through Experiments At Nappan, Nova Scotia

The low price of pork and pork products very often results in the marketing of unfinished hogs. This in turn forces the market to even lower prices and "glutts" to many cases, in order to the producer, whereas the sale of a finished product would have shown a profit in these times of depression the advantages of finishing only superior quality products are more evident and important than when prices are high. For example, in 1929 when hogs were selling for 13 cents per pound or more the premium on a select hog was $1 or an increase in the value of a 200 pound hog of 4.17 per cent. In 1932, with a price of 4 cents per pound the increase in value on a select hog is 12.5 per cent. Similarly the percentage discharge on grades below select is increased with a decrease in hog prices.

The Dominion Experimental Farm at Nappan, Nova Scotia, has been conducting various experiments over a period of years comparing various feeds for growing and finishing bacon hogs. Space does not permit a detailed account of all these experiments, but they include comparisons of skim-milk tankage and fish meal, tankage and cereals for grown feed, corn and barley, and oats, middlings and wheat.

The results in general show that home grown feeds such as barley are equal to imported feeds for finishing also that corn meal is a valuable substitute for skim-milk, and when the price is not too high, can be used to advantage.

One point brought out during these tests is the value of having an early maturing strain of hogs to start with. For example, in 1930 two groups of hogs by the same sire from the different sows were fed alike. One group showed an average daily gain of 1.32 pounds and the other 1.11 pounds per day and cost 7.16 cents per pound.

Proper feeding, also cleanliness finish, commands a premium on the open market, and any increase in our bacon production must be along these points if progress is to be made.

Exhibits Are Unrivalled

British Maintains Her Ascendency At Air Show In Paris

Britain's contribution to the international aircraft show in Paris, though smaller than in some earlier years, worthily maintains its ascendency. SIR AORD worthily maintains Britian ascendency in the aeronautical world, says a staff aircraft machines The aeroplanes, aero engines, materials and accessory equipment sent to represent this country provide sufficient evidence in the exhibition hall of the high standards of design and workmanship which have made Great Britain in the van of the world's aircraft export trade since the end of 1926; at Le Bourget aerodrome, near Paris, some of the latest types of British war planes confirm and emphasize that impression.

British exhibits at Paris include examples of military aircraft that are unrivalled in speed and general flying efficiency by any standard craft built elsewhere, zero engines ranging in power output from 140 to 980 h.p., a model, on public view for the first time, of the secretary service known as the "automatic pilot," and many of the essential component parts and materials that go to the making up of a modern British flying machine.

An Editor's Success

How One Won Able To Retire With a Fortune

This was sent to encourage the Sun.

"However, cheer up! I just heard of an editor of a country newspaper who retired with a fortune. When asked the secret of his success he replied: "I attribute my ability to retire with a $100,000 bank balance after 30 years in the country newspaper field to close application to duty, pursuing a policy of strict honesty, allowing practising vigorous rules of economy, and to the most desire of my uncle who left me $50,000. — Farmer's Sun.

Down on the river bank Bill Hazelnut came skimming full-tilt up to the landing, reserved the canoe around in a complete circle to stop it, leaped out upon the planking, tossed the painter to a sleepy Loneheon. He did not seem to notice Inspector Haskell only a couple rods away. At a leap he headed up the terrace, straight for Alan's cabin, as though Alan was the man to hear his news.

"If you had nothing to turn in," Elizabeth persisted, "it would be a little different. But you've got a position waiting, at four times your present salary, with advancement sure, with a chance to make even more on the side." She broke off. "But what's the use going over and over these arguments? We've gone over them a dozen times. I didn't come for that."

She paused a second to emphasize her next words. "If you intend to stay in the Mounted, I wish you would tell me so frankly, so that I can plan. . . ."

It was an ultimatum. She meant it, so Alan understood it so. But she saw too that it had antagonized him a little. Though she must be firm now, she must head off any antagonism.

Dropping her coldness, she got up and stood beside him where he sat on the corner of the table.

"Alan! Don't you realize how intolerable it is for me—not being with you two hours in a whole week? And if we were married, be Haskell—I mean Inspector Haskell would be even worse. You know why he's sending you out on these patrols and letting you be here just long enough to manage the post. When you're gone he forces his company on me. If I'd require him, he'd—he'd take it out on you! I've got to let him—"

A slow red crept into Alan's face and his fist doubled. He had considered, sometimes with nameless suspicions, why she allowed Haskell to be so much in her company. Him

Alan Was Not the Fool to Believe Elizabeth Cared

Drummond and others had hinted about it to him, implying it was not very honest of her. Here was the reason! It had never occurred to him that Elizabeth had been permitting it for his sake.

He thought: "I can't blame her for not wanting to live here in the North. She's a good deal like me; she hasn't any friends; these folks don't understand her. If she wants to live in a city, that's as natural, as much her right, as my wanting to live in this North country. She'd like to have pleasures, clothes; I've my standard craft built elsewhere, zero engines ranging in power output from 140 to 980 h.p., a model, on public view for the first time, of the secretary service known as the "automatic pilot," and many of the essential component parts and materials that go to the making up of a modern British flying machine.

CHAPTER II.—Continued

She said, "You know what I want to talk about." She asked pointedly, "When your term is up next month, are you going to re-enlist or not?"

Alan knew that Elizabeth was determined, heart and soul, that he should get out of the Mounted and take a good salaried position down in Victoria which Colonel Steele, commander of his regiment in the World War, had promised him in secret. But he was loath to take a job on a friendship basis; he preferred to stand on the more self-respecting ground of honest work honestly performed. And to leave this land where he had found freedom and happiness was an intolerable prospect. He loved this northern Mackenzie country as intensely as he hated the hectic stifling oppression of city life; and his comradeship with men like Bill Hardsock was precious to him.

If he torn himself away from all this, if he became a mere cog in an industrial machine, he would be uprooted and miserably unhappy.

But as things stood, he was in a blind alley. Haskell was riding him hard for personal reasons; a rank injustice had been done him. . . . There were a dozen powerful arguments on [illegible]

After a moment he said slowly: "I suppose I ought'n't to sign on again. But it's hard to decide, Elizabeth."

"What is there to decide about? How can you tolerate this situation you're in? You're a subordinate, taking orders; you're liable to be demoted any day; you're compelled to do another man's work for him! You don't think your situation is going to change? You aren't expecting a commission any more now, I hope? Then why under heaven do you want to stay?"

Alan started to answer, but he checked the words. His reasons were deep and intangible things his friendships, the freedom he'd found here, the sense of being rooted in the country; his manifold duties that held him with invisible bonds, his unwillingness to desert comrades when they sorely needed him, his reluctance to give the impression of having quit just because a commission was not forthcoming.

Sir Lyle C. Fletcher's Optimistic Comment

Too "Worn-Out" to go

Another dear broken . . . Couldn't carry on for her 3 months' hunger! Lydia E. Pinkham's Vegetable Compound always relieves cramps. Try it next month.

W. N. U. 1971

She half-whispered, running her fingers through his hair. "You've been here less than an hour, we've had just time to exchange a few words, and now—now something else happens and you'll be gone again." She kissed him quickly and turned away.

But Bill Hardsock stamped into the cabin he burst out: "Oh Lord, Alan, Sammy-boy has just popped down river! The Midnight Sun, bringing up a raft of furs from the Rampants country, and gold dust, too, a whole wad of it from the Peel and Arctic Red Rivers. . . . Down there, south of the Big Alaska, when she was taking on wood, half a dozen men bounced her in broad daylight, and robbed her there, right this close to us."

"Robbed her? Why ain't—"

"That's what they did. They came over the side like as if they were ord'nary trappers, they got a clear drop on the crowd, and had the run of the boat for better'n half an hour!"

Alan leaped to the all-important question. "They didn't escape, Bill? They didn't get by with a trick like that?"

Scarcely hearing him, Bill kept pouring out his news. "They took more'n three hundred pounds of dust, and sorted out half a dozen packs of the best and lightest furs Alan, they shot and killed Jimmy Montgomery! He was the only one that dreamed a gun against 'em, and a rifle got him cold."

Alan's face went pale. The news of the robbery had been dazing enough to him; but now, this crushing shock of Jimmy's death . . . His lips fashioned silently, "They killed Jimmy! . . . A rifle bullet. . . . He was the only one who drew a gun—" But he could not speak; he could only stare at Bill.

And if Father Cheverly hadn't stepped in and helped stop a rush, Alan, they'd have shot up the whole deck. They slung the dust and furs into their canoes, and . . . Did they get away? What brought me hunting up the river? I hope they did—damn, stickers a whistle!"

In the pause then, Alan fought to shake off his daze. He had to make the plans, fling out a patrol, get into action. It was all in his hands—the pursuit, the capture, the whole heavy responsibility.

He demanded: "Who were they? Trappers, did you say?"

"I'n't know who, Alan. But strangers. Five whites and one 'breed."

"Strangers? Can't be! Not in this country."

"But that's what they were. Nobody on the boat had ever seen a single one of 'em."

Alan did not believe this, but for the moment he passed it up.

"Which way did they go? Have motors on their canoes?"

"No. Paddle craft. They whipped up the Big Alaska."

For a little space Alan stood thinking. Why had these bandits staged their robbery there at the mouth of the Alaska, instead of farther down north, at some lonely reach along the Mackenzie? In an instant he saw the answer to that question. They had chosen with an eye to a quick escape, an escape to the best hiding place in all Mackenzie territory.

As he imagined them whipping up the Big Alaska, they would reach the lonely spruce-buried river past MacMillan's trading post, his thoughts leaped to Joyce, and a fear came into his eyes.

Echoing this very fear, Bill said: "They'll have to pass MacMillan's place, Alan. Joyce and her father—Dave's gone out somewhere after spring poultry and Joyce is there all by herself."

But maybe they won't stop," Alan argued. His words were more a prayer for Joyce. "They'll probably try to . . . . The bridge is out past. . . . "Bill, go down to barracks, find Fed, tell him to get the launch in shape to travel. While you're doing that, I'll go tell Haskell."

Halfway down the slope Alan came upon Constable Larry Youngs, who was industriously washing and clothing on the grassy terrace in sun.

An older man, past forty, a native of this Waterways country, Larry had been for beyond years living with Cress and Chipewyans; and by easy odds he was the best bush detective in the whole division. He had a genius for discipline he was worse than Bill Hardsock, for he was older, more set in his ways, more resentful of personal affront. Months ago Haskell had busted him from a corporal; and by humiliating him with orderly duties, he had been trying to make Larry knuckle under. Waiting for another month's pay so he could buy out of the Mounted, Larry was going about his "squawwork" with stoical Sam, chalking up his personal score against the day when he would be out of service and could settle with Haskell in his no-man fashion.

Alan bade him: "Larry, drop that. Go and help Bill out. He'll tell you what's up."

. . . . . .

It was rare that Inspector Haskell allowed his temper to get the upper hand. He had fostered self-control in the hard army school, and he considered that any exhibition of temper was a poisonous thing. Bill swore and Blaine came into the cabin, Haskell was thoroughly and hotly angered.

Constable Larry Youngs' humored this morning to irritate him. Constable Whipple, his stool pigeon, a thin clerkish recruit whom he had brought with him from Endurance, had provided several infuriating jokes about him which the men were tossing back and forth in barracks. A few minutes ago Bill Hardcock, plainly carrying important news, had brushed past him as though he had not existed, and had gone on to confer with Alan Blaine or. And just now through the open door he had seen Baker order Larry Youngs to drop beyond years living with Cress and Chipewyans; and by easy odds he was the best bush detective in the whole division. He had a genius for discipline he was worse than Bill Hardcock, for he was older, more set in his ways, more resentful of per-

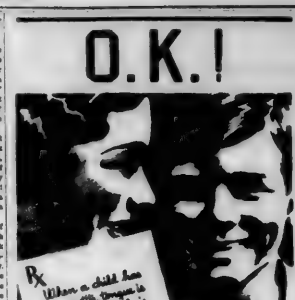
"I always use BABY'S OWN TABLETS to break up my baby's colds," writes Mrs. Wilbert Colborne, Sturgeon Falls, Ont.

"When I see a cold coming on, it is to BABY'S OWN TABLETS that I turn," writes Mrs. Robert Chambers, Philipville, Ont.

Mothers everywhere report in like vein of the sale, sure results that follow the use of BABY'S OWN TABLETS in treating children's colds, simple fevers, disordered stomach, colic, constipation. 25 cents the package at your druggist or by mail from The Catarrhozone Co., Montreal.

BABY'S OWN TABLETS

O.K.!



Made In Canada

Children's sluggish spells and other little upsets just vanish overnight when they get Phillips' Milk of Magnesia. A gentle anti-acid and mild laxative like this is ideal to give a child of any age, including infants. The genuine preparation—in the blue-wrapped bottle that says Phillips'—has complete directions and dosage covering many important uses for adults and children.

ALSO IN TABLET FORM. Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

Little Helps For This Week

"And the Lord shall guide thee continually, and satisfy thy soul in drought."—Isaiah 58:11.

Wherever He may guide me
He must will turn me back;
My shepherd is beside me,
And nothing can I lack.
His wisdom ever waiteth,
His sight is never dim...
He knows the way He taketh,
And I will walk with Him.

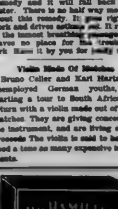
—A. L. Waring.

Abandon yourself to His care and guidance, as a sheep in the care of a shepherd, and trust him entirely. No matter though you may seem to yourself to be in the midst of a desert with nothing green about you, and may think you will have to make a long journey before you can get into the green pastures. Our Shepherd will turn that very place where you are into green pastures, for He has power to make the desert rejoice and blossom as the rose.—E. W. S.

A Pre To Autumn. Give Autumn half a chance and it gathers ground rapidly. Hint give it repeated treatments of Dr J. D. Kellogg's Asthmador. Read it and it will fall back even faster. There is no half way measure about this remedy. It goes right to work and drives asthma out. It results on the honest principle of relief and leaves no place for the trouble to lurk. Name it by you for really use.

Violin Made Of Medicine

Bruno Celler and Karl Hartmann, unemployed German youths, are starting a tour to South Africa and return with a violin made out of 5,000 matches. They are giving concerts on the instrument, and are living on the proceeds The violin is said to have no good a tone as many expensive instruments.



Remedy Begin

Remedy is seen as a rival of vapor by chemists of the Louisiana State University.

VOL. [illegible] No. 32 FORT SASKATCHEWAN, ALBERTA WEDNESDAY, DEC. 14, 1932 $1.50 PER YEAR IN ADVANCE

Regular Meeting Of The Town Council

A regular meeting of the Town Council of the Town of Fort Saskatchewan was held in the Council Chambers last Thursday night, with Mayor Montgomery, Councillors Bannerman, Geof, Lalonde and Fillmore present.

The minutes of the last meeting held were read and adopted. A communication from the Fort Saskatchewan branch of the Canadian Legion of the British Empire Service League, signed by the treasurer and president desiring to terminate the lease of the Memorial Hall was submitted, and, after consideration, a motion was passed by the Council complying with their request. Change to take effect immediately.

November report of Dr. Mason, the Medical Health Officer read and filed.

One application for relief was received and approved by the Council, and referred to the Department.

The Council decided to take advantage of the offer of the Alberta Government Telephones by paying telephone rental one year in advance, and obtain the discount of 5 per cent.

The application of Georgye Fraser to rent Town house on lots 26, 27, block 23, plan 33 was authorized.

The following accounts were passed:—W. A. Graham $13.80; Alberta Pacific Grain Co., $4.56; Fort Hardware Co., $94.80 for 12 Sanitary buckets and $7.35 for repairs done to roof of Fire Hall; The Record $6.00; Alberta Gov't Telephones $7.51; Jones, Graham & O'Brien $20.00 for relief in November.

—I Pause of Christmas Suggestions this week.

Fort and Chipman Play Rugged Game Here

The local senior hockey team and Chipman played a much disputed game of hockey at the local rink last Monday evening, before a good crowd of spectators.

The fans were treated to some fine hockey in the beginning of the first period, Chipman scoring one goal, but this didn't last, towards the end of the first period, when a long shot entered the goal, or bit the corner goal post we do not know, but the goal judge called it a goal, the referee agreed, centering at the blue line, Stanley got the puck and neared against Chipman. This caused Chipman to have the ice in protest. After much arguing, Chipman consented to play if allowed two goals and the Fort team, this was done.

In the second period both teams played good hockey, with Lane on a brilliant solo rush neared for the Fort and Rutherford with an assist from French neared for Chipman. Making the score 3 to 1 for the visitors.

Daniel three, Keay and Two took the puck down in snappy rushes to score two more goals. Chipman after much play back and forth neared one goal.

At one minute to go in the last period, referee Carroll sent a Chipman player off, which he refused to do, resulting in the visitors leaving the ice again, defaulting the game to the Fort.

What the animal cause was we still wonder.

"Not Guilty or Santa Acquitted", presented by the United Church Sunday School on Tuesday, Dec. 20 at 8 p.m. in the Empress Theatre.

Fort Women's Institute Elects Officers

The Annual meeting of the Fort Saskatchewan Women's Institute was held at the home of Mrs. Rogers on Thursday afternoon, Dec. 8th. The result of the election of officers is as follows:

President, Mrs. Grenert.
1st. Vice-Pres. Mrs. Truby.
2nd. Vice-Pres. Mrs. Ashton.
Secretary, Mrs. Wicks.
Treasurer, Mrs. Arley.
Directors Mrs. Dennis, Mrs. A. Carscadden, Mrs. Evans, Mrs. Walton.
Cemetery Committee Mrs. Rogers and Mrs. McLean.
Flower Committee: Mrs. W. Graham and Mrs. Murray.

Five tables of bridge were in play, and the exchange of Christmas gifts, made a delightful meeting.

The Fort Badminton Club Wins From Vegreville

Dr. Henry and Warden McLean transported a number of Fort Badminton players to Vegreville on last Saturday. A tournament was engaged in, the Fort players excelling themselves, having won seventy-five percent of the events, The local players who participated will not forget, in a long while, the very warm welcome extended to them by the Vegreville Club. We trust the same warm welcome will be given Vegreville members when they visit us.

We wish to remind these successful players, some of whom have been rather delinquent in practice since, that there is always room for improvement. Keep up the good work.

FORT RED CROSS

Will those who can send gifts of toys or useful articles for the Christmas Hampers this year, please send them to Mrs. H. Staples, in time for 10 o'clock.

And if any have not been canvassed, but would like to help this charitable work, please send subscriptions to Mrs. C. Read, Secretary-Treasurer ,Fort Red Cross.

Women's Institute Hold Enjoyable Dance

The Fort Saskatchewan Women's Institute held their annual dance in the memorial hall on Friday evening, December 9th.

Despite of a large number of people down with the flue, a fine crowd attended the dance.

Fred Berg and his Orchestra supplied the music for dancing and at midnight delicious refreshments were served in the buffet room.

FORMER EDITOR IN THE FORT WILL RUN WAINWRIGHT STAR

Arrangements were completed last week, whereby John Johnston, editor of the Alliance Times, for the past 14 years, will, on January 1st, 1933, take over the printing plant, business and the modern five proof presses, of the Wainwright Star. Mr. Johnston published a newspaper in Fort Saskatchewan for a time before going to Alliance.

MARRIED

Miss Jessie Geof, the daughter of Mr. and Mrs. J. R. Geof of Fort Saskatchewan, and Mr. Clarence H. Thomlinson, the second son of Mr. and Mrs. C. Thomlinson of Clover Bar district, were quietly married in Edmonton on Wednesday, Dec. 7th.

The reception was held afterwards at the home of Mr. and Mrs. J. R. Geof.

Miss Geof for the past five years was employed at the local branch of the Alberta Telephones.

Mr. and Mrs. C. Thomlinson will take up their residence at the groom's farm in the Clover Bar district.

—Men's All Wool Heavy Jumbo Knit Sweater Coats, Good warm coats for sportsmen or rough out-door work, in colors Maroon, Fawn, and Black.

Christmas Price **$2.95**

We are featuring many lines of Goods specially suitable for Xmas Gifts, at prices to suit the times.

Jones, Graham & O'Brien's

To Keep One's Balance

In the years prior to the great market crash in the Fall of 1929, when practically everyone was employed and wages high, crops good and prices high, both import and export trade at a record high level, railways busy, and activity manifest in every line of business, any person who gave voice to a note of warning, who urged a slowing up of the pace at which goods were being produced and sold on the instalment plan, who offered criticism of the reckless manner in which people of all classes were going into debt, became overnight very, very unpopular. He expressed the opinion that our industrial structure was being expanded far beyond the needs of the country. such a person was regarded as a confirmed pessimist, a "back number," non-progressive, almost stamped as a citizen because his viewpoint and attitude was regarded as detrimental to the advancement and welfare of the country

In those short years the attitude of the general public has swung to the other extreme. Because hundreds of thousands are out of work, wages have been sharply reduced, crops have failed or been reduced in volume, prices have dropped below costs of production, the trade of the country has been cut about in two and imports and exports cut in half, with the railways all but in the doldrums, with every industry and business struggling to keep going, and with the mass of the people now confronted with the obligation of paying those debts they so cheerfully contracted only a few short years ago because of these things any person who may now sound a note of courage who declares that the depression is, after all, only temporary in charac ter, that business will revive, workers again to employed, good crops and better prices come, and prosperity be again enjoyed, is laughed at as a hopeless optimist, a dreamer of dreams, or he is decried as an upholder of Capitalism, one who is incapable of learning anything, who is opposed to advancing and improvement in methods, and who looks all sympathy with those who are suffering at the present time. In a word, it is the person who now looks to the future with hope and courage that is regarded almost as lacking in patriotism.

This swinging from one extreme to another is characteristic of people. So many of us have what has been termed "a one-track mind." We follow the crowd, fail to think for ourselves and assert our individuality, are swayed by the psychology of the mass. We fade to be thought of as "queer" or "different," and pointed at as a pessimistic crank at one time or an optimistic crank at another time, when, as a matter of fact, we are but remaining normal human beings, refusing to be stampeded one way or another.

When public opinion does swing on amuse to one extreme or another, the inevitable effect in any democracy is that governments are forced into the taking of actions which the majority of the members of the people do not approve of, actions which they would oppose; which even a majority of the people would oppose in their calmer moments, and which they later do oppose and blame the governments they themselves forced into the taking of such actions. People individually and collectively can be protected and safeguarded to a large extent from making mistakes, but they cannot be prevented from making them. Once made they must pay the price of their mistakes. Nobody and nothing can save them from the effects of their folly.

So it is that at the present time, when masses of the people refuse to see any light ahead, any hope for the future, and are obsessed with the idea that the present depression is not a temporary, an abnormal condition, but that it has become a chronic and will continue as a permanent condition unless everything is torn up by the roots and a new start made all over again, politicians are being advocated and demands made in the light of existing difficulties as if they were, in truth and fact, 4-5 permanently established conditions.

Such an assumption is false, and politics grounded in a false assumption in time can have but one result,—the wrecking of democracy. Whether it is going to be there is grave doubt. Times are dubious, but that does not mean they will permanently remain so. Problems calling for solution are many and great, but they are not insurmountable. Changes are necessary, but they are being made. Changes always have been and always will be necessary. this is an ever-changing world. Redress of many kinds are called for, and they, too, are being effected. Changed conditions create the necessity for reforms. They have always been effected. There are periods in the world's history when the cause of reform seems to lag, almost stop, but it never stops. The movement is ever onward and the direction is ever upward.

Fixing the danger of being termed an optimistic crank, we have no hesitation in saying that the present condition is not a permanent condition, that it is not a normal one. We go further and say that for people to regard the existing condition as a normal condition, and to adopt policies based on such a false assumption, would be just about the greatest blunder they could possibly make. They would find out, when it was too late, that they had made a mistake greater and more serious in its results than those other mistakes which have landed the world in its present state.

If the democratic ship of state has sprung a leak, we must man the pumps and close up the leaks; not run the ship on to the rocks and smash it up.

If our social and economic structure has developed weaknesses, if cracks have appeared in its foundation and walls, it has not been destroyed out of hand. we simply have the leaks, the ability, the energy to repair the damage wrought, and are not forced to the extremity of blowing up to the whole structure or tearing it to pieces.

And because we were all too optimistic three, four and five years ago,—and entered upon policies we now realize were mistaken,—are we not just as apt to be making the second mistake of being too pessimistic now and again embarking upon equally mistaken policies, but more serious in their results because they are of a destructive, rather than of a constructive, character?

Conditions are not normal. Because they are not normal, our outlook on life is not normal. And when conditions become normal again we will have the most powerful thing to double vital issues silencing our whole future.

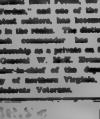
Famous Canadian Now A Private

Admiral Henri Pelletier, the "Hunter" of Verdun," and one of the world's greatest soldiers, has become a private in the ranks. The distinguished French commander has accepted membership as a private on the staff of General W. McK. Brent, commander-in-chief of the Department army of northern Virginia, United Confederate Veterans.

Bloodsuckers and Hazy Spells Serves In Bad Condition

Mr. Rod Campbell, Bloodsucker, Ont., writes:—"I suffered terribly with hazy spells and bad condition of the blood. I was unable to get a good night's sleep. I was also troubled with headaches and dizzy spells.

"I tried many different remedies, but they did not seem to give me any relief. Then I decided to try Dr. Chase's Nerve Food and Blood Tonic, and I am happy to say that the change they had made in my condition."



Dr. Chase's Nerve Food and Blood Tonic, 50 cents a box, at all dealers or Edmanson, Bates & Co., Toronto.

Machine Is Discard

Airplanes Replacing Dog Teaming Out On the Pan

Dog poison accepted at The Pas, Manitoba, to a new low level when Canadian Airways, Ltd., put two planes between and Aimhoon and, sold for $75. There were two dogs in the team. They were the property of the provincial police, and were sold "on the hoof."

They were bought by the Western Trading Company for a trapper at Church-it.

Three years ago this team would have been worth $1,000. Today it would be more than possibly nonetheless. Dog teaming out of The Pas is now confining to an end. The railways have practically put an end to freighting with dogs.

At present all eggs point to great activity in the God's Lake gold country to the northeast. In other years many dog teams would have been put into service to handle freight and supplies.

So far this winter there have been only a few calls for dogs. Prospectors have come to the city of staking claims.

The trip from Pelle 137 Hudson Bay Railway to God's Lake will occupy eight days with dog team. An airplane will do the same trip in a couple of hours. Its dogs go into the discard.

Pension Rules—the one billed requisite for the payment of pensions to Dalgleish to use. Leaves no sticksome. Swiftly absorbed by the system. Definitely ingrained. Imparts a velvety loveliness to the complexion. Tones up the skin. Soothes and heals. Idles all unpleasant roughness or clouding caused by wind and other irritations. Makes hands soft and white. Creates an elusive, sweetly lasting fragrance. Delightful to use. Indispensable to women of refinement.

Sovereign For Fuel

Discount For Before As Fuel Also Practically Coaled.

One of the interesting effects of the present low prices for grains is shown in the fact that screenings which during periods of high prices found sale even in the export trade, are now being used for fuel. Demand for rather screenings as fuel has practically stopped the export trade in these and the bulky and fast accumulating material was quite a problem for the elevators until a market was found for it. It is now being easily procurable and extremely cheap in price, no one should be without a bottle of it.

The average age of the ant is ten years. Unfortunately its instinct is mixed pieces unlavished is hereditary.

Coffee grown at Grand Comoro Island, off South Africa, is said to contain no caffeine.

Missionary Believes Dwarfs Disappearing

Tiny Race Now Under Dependency Of African Negroes

Returning to England from a lengthy study of the pygmy race in equatorial Africa, Father Louis Sheboats, noted Austrian missionary believes this tiny race will disappear entirely.

According to Father Sheboats, there are not more than 20,000 pure pygmies left in Central Africa and these, together with semi-pygmies called Bobimbos, totaling some 80,000 inhabit a territory covering some 200,000 square miles limited by the Nile, Lendu and Lindi rivers and district limited among some 30 tribes.

Little by little, he says these dwarf tribes have come under the dependency of negro tribes with whom they exchange game against cereals, fruits and arms.

The negro has come to look upon the pygmy as an inferior race and consequently the white man has rendered the pygmy familiar with alcohol and infectious diseases.

Nothing short of governmental or private institution is able, in the opinion of Father Sheboats, to halt the downward trend of the dwarf races, which science and civilization are equally interested in preserving.

Deceased For War Service

Twice Were Wounded In Some Battle During War

For 43 years, William S. and Joseph Sebastian, twins, have been doing interesting things together.

Born at Lynchburg, Tenn., they went to the Civil war together, were initiated in Company B, 116th Infantry, 30th Division, in 1917.

They sailed for France on the same ship, were wounded in the same battle and returned home on the same ship.

Recently, the War Department decorated them with the Order of the Purple Heart for "military merit." The twins are automobile workers in Detroit.

Changes of all Gin.—Considering the qualities of Dr. Cassar's Diabetic Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada from coast to coast and all countries. Manufactured by the well known merchants Imay & Imay & Co., Ltd., being easily procurable and extremely moderate in price, no one should be without a bottle of it.

Puzzle For Customs Officer

Age Of Old Masonry Seems Question For Expert

Papers in London printed pictures of an Egyptian mummified cat guarded by a customs officer, which has been held up at Croydon pending proof it is more than 100 years old, and so entitled to be admitted free of duty.

The animal, pictures show, is seated on its haunches, and appears about 15 inches in height. It is entirely stripped of its wrappings, and so appears in natural state, with whiskers and ears in perfect condition. The Cairo agent who sent the mummy alleges it is the most perfect specimen ever taken from an Egyptian tomb, and it is, at least 2,000 years old.

Customs officials admit they are not sufficiently versed in the burial ritual of ancient Egypt, and it will take an expert from the treasury to determine the age of the mummy—at least to determine whether it is before or above the century mark.

Protection Against Forgers

Paris Banks Think Performing Dragons Would Help

Banks in Paris have just taken up the idea of performing as well as crossing cheques as a protection against forgers. One of the private members' bill tabled for the consideration of the new Chamber of Deputies provides for such a measure. There have been many cases in France in which thieves have, by means of chemicals, removed the two diagonal lines and cashed the stolen cheque. The bill states that perforation will prevent this.

Miller's Worm Powders will clear the stomach and bowels of worms, so that the child will no more be troubled by their ravages. The powders are sweet to the taste and no child will object to taking them. They are made by experts in their compounding, and while in some cases they may cause nauseating, that need not be taken as a sign that they are nauseating, but as an indication of their effective use.

Building Giant Bridge

Largest One In Europe Will Be Constructed Over Danube

Demolition is preparing to construct what is believed to be the largest bridge in Europe. It will span the Danube-Save canal (Great Stream) between Zimlund and the island of Feldar, and will be used by railways and vehicles. The total length will be 10,627 feet and the height 35 feet. The cost will total approximately $6,725,000. Work will be started immediately and the structure is to be completed in 1936. It is the first link in the proposed route between Copenhagen and Hamburg.

Efforts Being Made To Develop Reward Wheat to Replace Garnet And Retain Milling Qualities

The great victory won by Herman Trelle in the Chicago grain shows with his strain of Reward wheat, may be another milestone in Canada's effort to produce a wheat that will surpass all other blends in meeting the needs of the farmers in the northern portions of the prairie provinces. But winning of this coveted prize does not in itself settle the question, it was explained by crereal experts at Ottawa.

What the west wants is a wheat that will be as early ripening as Garnet, as prolific as Garnet, and have as good milling qualities as Marquis. There is no doubt about the milling qualities of Reward.

It has everything in the way of quality, cerealists agree. For two or three years it has been right up near the top or at the top in appearance and milling qualities. In some districts where it has been grown in the west it has ripened about as early as Garnet, but other districts have made the latter so popular where crops run the danger of early frosts.

The productivity of Reward may in spots have been equal to Garnet, but not on the average, and farmers want to get as many bushels as possible per acre. That is the reason why Garnet has been so popular, despite the fact that it cannot grade as No. 1, humming of milling qualities.

For over a year the threat has hung over Garnet wheat that it should be graded separately, so that Reward millers would not be misled into thinking they are buying No. 1 Marquis and getting Garnet.

Only a short time ago the announcement came from Winnipeg that Garnet would be graded separately next crop year. So far the growers of Garnet have fought this move, and a particularly intense struggle was staged in the commons agricultural committee at Ottawa last spring, which resulted in a decision in the matter being postponed until next year.

In the meantime intense efforts have been made to breed a Reward that will have the yield of Garnet, the colors its great milling qualities. The experimental farms, under the direction of H. S. Archibald, have supported the efforts of L. H. Newman, Dominion cerealist, in the search after such a super wheat, and in this great quest Mr. Newman-Trelle has contributed no small part.

Used To Figuring Odds

Bookmaker Suddenly Solves Problem Which Took Professor Six Hours

The university mathematics professor is fond and clever at figures, of course, but it takes a bookmaker for real speed.

A magazine at Louisville, Kentucky, querying at random, asked: "What are the odds if a cutter wagers to turn an ace, jack or queen in three coins at a 10-cent bet?" Many answers were given, ranging from 9 to 4 in favor to 13 to 9 against.

A bookmaker suddenly solved the problem and 9 to 4. Several hours later he submitted a 600-word answer showing the odds at 1.297 to 1,000.

The city office of the government is the only one in the province that is modernized. Said the photo a while ago. "There is a book to-print "1,297 to 1,000."

"Now, it wasn't hard," the bookmaker explained. "My figure odds like that a dozen times a day."

"Ah, if you are going to throw I mean, if you are going to make bets. It is indeed the art what has a number of keys back in the drawer, but the needs of that kind of talent."

Seven of the sons of Monday Ismail, emperor of Morocco from 1672 to 1727, assumed the title of emperor.

Doctor: "Now is it your hands are so dirty?"

Apprentice: "Nobody had a shampoo today."

W. N. U. 1971

Learning To Fly

Must Learn To Operate Machine In Full Flight Before Obtaining Art of Landing

It may seem rather like putting the cart before the horse that the pupil is flying is taught thoroughly how to handle a machine in full flight before he even knows how to take off or to land written Mr. Alan Warwick, in Pearson's Magazine. The point is, of course, that at present Command feet in the air covers a far greater number of feet than 100 with impunity. There is ample time for the pupil to correct them or, if he gets himself tied up into knots, the instructor can straighten things out. Landing a machine, or taking-off on the other hand gives no such solitude. The machine is very near the hard, hard ground. Wherefore, into these phases of flying an aeroplane does particularity the landing call for a precision of judgment that the pupil obviously cannot possess until he has become thoroughly familiar with the controls a familiarity he only acquires in mid-air.

To the beginner it may well seem that the landing work of getting a machine achieving the ideal three-point landing. (tail skid and two wheels getting gently on the ground) is a matter of chance, or how d'ficult for him ever to accomplish. But as his lessons proceed he becomes confident in his touch. Such is the confidence and self-reliance he acquires that, when at last he comes to mastering the take off and landing, all control-column has become a part of himself, and he finds they are problems well within his compass.

Taking the London Aeroplane Club 'A.' license, the new pilot must have flown at least three hours solo. The tests themselves, in addition to showing flying skill, include a simple medical examination. The additional questions put by the medical examiner are nourishing enough.

The qualifying pilot must also display knowledge of the elementary rules relating to air traffic. For instance, he must know the correct method of approaching a landing ground, and what he has to do when meeting another machine in mid-air.

As one quickly realizes, the 'rule of the road' in mid-air is as important for the safety of aircraft as are rules and regulations for road traffic. Being of a three-dimensional nature they are rather more complicated.

England A Clean Country

England is the cleanest country in Europe, according to statistics published recently in Prague, Czecho-Slovakia. The figures show the amount of soap used. English people use 22 pounds per capita a year. Germans are second with 13 pounds per person. People of Czecho-Slovakia are third with 11 pounds per head.

"Can anyone in the class give me a more elegant rendering of "the say rises'?"

"The hosh gets out of bed."

Grasshopper Pest

Predicted Hoppers Will Be Worse Next Year Than Now

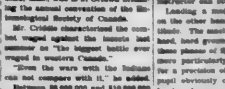
Warning that the grasshopper pest in the prairies is going to be worse next year than it was this summer was voiced by Norman Criddle, of the entomological laboratory, Treasbank, Man., who is in Ottawa attending the annual convention of the Entomological Society of Canada.

Mr. Criddle characterized the combat waged against the insects last summer as "the biggest battle ever staged in western Canada."

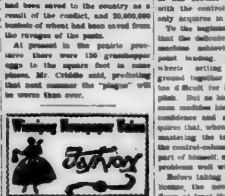
"Even the wars with the Indians can not compare with it," he added.

Between $6,000,000 and $10,000,000 had been saved to the country as a result of the conflict, and 20,000,000 bushels of wheat had been saved from the ravages of the pest.

At present in the prairie provinces there were 130 grasshopper eggs to the square foot in many places, Mr. Criddle said, predicting that next summer the "plague" will be worse than ever.



By Ruth Rogers



THE NEW YOGURINE BERET AND SCARF OF WHICH PARIS IS RAVING

Match your scarf to your beret, if you want to appear smart this season.

The scarf may be worn in two fashionable ways, tied in smart style or knotted in bow effect at the shoulder.

The beret is quite one-sided which makes it an utterly flattering model.

It is a lovely set for travel, for resort and for the college mite for early fall wear.

Both models are smart.

Style No. 979 comes in sizes 31, 33 and 35 inches bust measure. Size 33 requires 1 yard of 54-inch cloth and ½ yard of 39-inch contrasting material.

Price of pattern: 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

"What is your occupation?"

"It isn't an occupation, it's a pastime. I'm a bill collector."

The shortest railroad distance from New York to San Francisco is 3,130 miles.

Dutch Guiana's sugar crop this year is the largest on record.

Interesting Experiment Carried On by Department of Interior in Preserving Wild Life of Canada

What's In A Name

New Words For Occupations Be Not Afraid Efficiency

Was there a scientific name in a Command-ment of fact that this impression is no longer held by agents but by "scientific conservationists"? For two years the Dominion observers of that century animals, the buffalo, have been derived unfailing encouragement from his attempts at verbal beauty.

Undertakers have become morticians, real estate agents have become realtors, press agents have become publicists, and plumbers have become sanitary engineers, and in general nothing has been left with the controls a familiarity it only acquires in mid-air.

To the beginner it may well seem that the landing work of getting a machine achieving the ideal three-point landing. (tail skid and two wheels getting gently on the ground) is a matter of chance, or how d'ficult for him ever to accomplish. But as his lessons proceed he becomes confident in his touch. Such is the confidence and self-reliance he acquires that, when at last he comes to mastering the take off and landing, all control-column has become a part of himself, and he finds they are problems well within his compass.

Taking the London Aeroplane Club 'A.' license, the new pilot must have flown at least three hours solo. The tests themselves, in addition to showing flying skill, include a simple medical examination. The additional questions put by the medical examiner are nourishing enough.

The qualifying pilot must also display knowledge of the elementary rules relating to air traffic. For instance, he must know the correct method of approaching a landing ground, and what he has to do when meeting another machine in mid-air.

As one quickly realizes, the 'rule of the road' in mid-air is as important for the safety of aircraft as are rules and regulations for road traffic. Being of a three-dimensional nature they are rather more complicated.

England A Clean Country

England is the cleanest country in Europe, according to statistics published recently in Prague, Czecho-Slovakia. The figures show the amount of soap used. English people use 22 pounds per capita a year. Germans are second with 13 pounds per person. People of Czecho-Slovakia are third with 11 pounds per head.

"Can anyone in the class give me a more elegant rendering of "the say rises'?"

"The hosh gets out of bed."

Grasshopper Pest

Predicted Hoppers Will Be Worse Next Year Than Now

Warning that the grasshopper pest in the prairies is going to be worse next year than it was this summer was voiced by Norman Criddle, of the entomological laboratory, Treasbank, Man., who is in Ottawa attending the annual convention of the Entomological Society of Canada.

Mr. Criddle characterized the combat waged against the insects last summer as "the biggest battle ever staged in western Canada."

"Even the wars with the Indians can not compare with it," he added.

Between $6,000,000 and $10,000,000 had been saved to the country as a result of the conflict, and 20,000,000 bushels of wheat had been saved from the ravages of the pest.

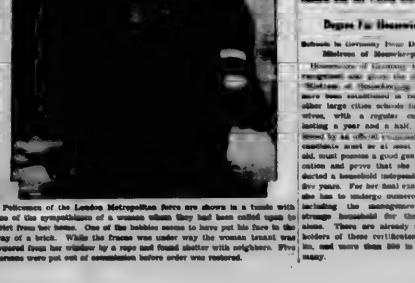
At present in the prairie provinces there were 130 grasshopper eggs to the square foot in many places, Mr. Criddle said, predicting that next summer the "plague" will be worse than ever.

Venice Was Ideal Target

But City Escaped Damage From Bombs Dropped During War

The Prince of Wales's remark when he was taken round Venice this year was: "All this is very different from when I was here during the war!" In 1917 Venice was endangered to the roofs as protection from the bombs of Austrian airmen. Of its 160,000 inhabitants less than 50,000 remained, and they were cut off from the rest of Italy. Nearly every night they gathered for safety in the entrance halls of the magnificently-furnished palaces, waiting in fear while enemy aeroplanes roared went back and came again with their cargoes of bombs. The damage done by the Austrian air-raids, however, was extraordinarily small. Only a few hundred of bombs dropped upon the city fell into the canals and did no harm. Yet, when one considered how short a target Venice was, one realized it was a mass in the centre of the shining, mosaic lagoon—it is surprising that anything was left.

Common sense is frequently uncommon wisdom.



Policemen of the London Metropolitan force are shown in a tussle with one of the sympathizers of a woman whom they had been called upon to evict from her home. One of the bobbies seems to have put his face in the way of a brick. While the fracas was under way the woman tenant was lowered from her window by a rope and found shelter with neighbors. Five persons were put out of commission before order was restored.

What's In A Name

New Words For Occupations Be Not Afraid Efficiency

Was there a scientific name in a Command-ment of fact that this impression is no longer held by agents but by "scientific conservationists"? For two years the Dominion observers of that century animals, the buffalo, have been derived unfailing encouragement from his attempts at verbal beauty.

Undertakers have become morticians, real estate agents have become realtors, press agents have become publicists, and plumbers have become sanitary engineers, and in general nothing has been left with the controls a familiarity it only acquires in mid-air.

To the beginner it may well seem that the landing work of getting a machine achieving the ideal three-point landing. (tail skid and two wheels getting gently on the ground) is a matter of chance, or how d'ficult for him ever to accomplish. But as his lessons proceed he becomes confident in his touch. Such is the confidence and self-reliance he acquires that, when at last he comes to mastering the take off and landing, all control-column has become a part of himself, and he finds they are problems well within his compass.

Taking the London Aeroplane Club 'A.' license, the new pilot must have flown at least three hours solo. The tests themselves, in addition to showing flying skill, include a simple medical examination. The additional questions put by the medical examiner are nourishing enough.

The qualifying pilot must also display knowledge of the elementary rules relating to air traffic. For instance, he must know the correct method of approaching a landing ground, and what he has to do when meeting another machine in mid-air.

As one quickly realizes, the 'rule of the road' in mid-air is as important for the safety of aircraft as are rules and regulations for road traffic. Being of a three-dimensional nature they are rather more complicated.

Interesting Experiment Carried On by Department of Interior in Preserving Wild Life of Canada

With the establishment of a small band of twenty-five wapiti (commonly known as elk) from Buffalo National Park, Alberta, in the Pembroke (Crown Game Preserve of that Province, public attention is directed to a pioneering experiment in preserving one of the game animals of the country.

The importance of the interior's success with the elk to a continuation of its achievements in other lines of wild life conservation. The twenty-five animals, five males and twenty females placed in the Ontario government's preserve are descendants of seven fawns from a band of over 700 in Buffalo National Park, Alberta, administered by the National Parks of Canada, department of the interior. The success of that herd from a band of about half a dozen which, with a few deer and moose, were found entering the park when it was established, is a gratifying summer By 1916 there were over 100 head in the park, while by 1925 the herd had grown and risen to almost 300. Buffalo park now contains a herd of elk numbering over 900, in addition to over 6,000 buffalo, 2,000 mule deer, and numerous other species of mammalian wild life.

A small outlet for surplus stock is provided by the head of gift to conservation societies or governments of one or more individuals of those species, contingents of suitable areas for their introduction having been secured. The Pembroke Reserve, located in the county of Renfrew, Ontario, was created by the government of Ontario as a bird, fish, and game preserve and nominates an area of about 200 acres surrounded by a strong wire fence.

The wapiti or elk was once the most widely distributed of the deer family in North America but in common with many other species of big game it has suffered the inevitable result of territorial development and unprovident killing. Thousand of these handsome animals were slain merely for the sake of their teeth which were used for purposes of adornment. The range of the elk at one time occupied the greater part of the central region of the North American continent, including the southern parts of Ontario and Quebec, but today only scattered herds exist outside the national parks of Canada and the United States.

Began Fa Housewive

Refused In Germany Some Degree Of Mistress of Housekeeping

Housewives of Germany have now recognized who shows the standard of "Mistress of Housekeeping." There have been established in Berlin and other large cities schools for housewives, with a regular course in studying a year and a half, and followed by an official examination. The candidate must be at least 25 years old, must possess a good general education and prove that she has conducted a household independently or five years. For her final examination she has to undergo numerous tests including the management of a strange household for three days alone. There are already about 15 holders of these certificates in Berlin, and more than 500 in all Germany.

WORLD BATTERIES SIMPLY TOLD

Lawrence B. Jack, honor graduate of the University of British Columbia, has been selected as the 1932 Rhodes scholar for British Columbia.

J. Arthur Dupont, director of radio station CKAC in Montreal, has been "borrowed" by the Canadian broadcasting commission, to act as director of French language programmes.

William Blake, 11, of Lowell, Mass., dared his father for $100 changing and won his case. The boy had been injured by an automobile driven by the latter's friend.

Seventeen carloads of frozen turkeys from Manitoba and Saskatchewan were shipped from Saint John for export. It was the first time such a large quantity had passed through that port.

British Columbia's income by forest dues this year amounted to $671,400, it was reported by Hon. E. D. Lougheed, Minister of Lands. Last year the dues was $4,477,181, and in 1930 it was $5,000,000.

Single unemployed men from the cities who have been placed on Manitoba farms for the winter under the $2-a-month relief scheme total 900 since November 15, Arthur MacNamara, of the relief commission, reported to the Manitoba government.

Prof Auguste Piccard pioneer of the stratosphere has been in Paris arranging passage to North America for a balloon tour. While he is there, he said, he will investigate the possibilities of a balloon ascension in Canada.

There is little blindness in the western section of the Trans-Canada Highway will be completed within the next few years, J. H. Wardle, chief engineer of the national parks of Canada declared in an address at Calgary.

One of the unexplained mysteries Dr Robert A. Millikan found in his extensive aerial, cosmic and terrestrial observations of cosmic rays at Lake Claremont, Minn., and other places on the continent this year is that the radiation is slightly more intense during the night

Eleven of the 30 aeroplanes which will participate in a flight from Italy to the Virginia exposition next June, returned to their base after a successful test flight of 1,500 miles. The transatlantic flight is to be made in formation by way of Iceland, Greenland and probably Canada.

Receives Copley Medal

Royal Society of London Confers Recognition on Cuthbertson

Advice has been received that the Royal Society of London has awarded the Copley medal, highest distinction offered by England for scientific research to Dr George E. Hale, of the Mount Wilson (Cal.) observatory.

The first American to receive it was Benjamin Franklin, to whom it was awarded in 1753 for his "curious experiments and observations on electricity."

The present award was for researchers in the magnetic field of the sun. From magnetic phenomena detected outside the earth were the magnetic fields in sun spots, discovered at the Mount Wilson observatory in Lakes, with the 100 foot tower telescope on Mount Wilson, the active sun was found to be a magnet, with a magnetic field stronger than that of the earth but much weaker than the intense fields in sun spots.

Vikings Were Short Lived

Bard Believes Span Of Thirty And Forty, Says Professor

Vikings who settled in Greenland a thousand years ago were senile and worn out at 40, in the belief of Professor P. C. C. Hansen, leading Danish archaeologist.

He is now dissecting the frozen remains of vikings brought back to Denmark by the Mourland expedition to southeastern Greenland. They indicate the men were probably of sturdy build, but not very tall and that they died between ages of 30 and 40 years. They suffered greatly from gout and rheumatism, the professor believes.

944

SIMPLE DRESS WITH SMART LINES MUST BE MADE ANY LITTLE SCHOOL GIRL HAPPY

The wide bat plait effect from neck to hem increases it so distinctive.

A novelty rayon tweed-like mixture made the original. The white pique collar and cuffs are so neat and trim. Has stationary view—the pattern also provides for Peter Pan collar.

It's so easily made and so fascinating when finished. And it will cost you next to nothing.

Daughter will love it.

Wool crepe in luscious brown with greasy-red wool crepe trim and matching leather belt is smart for early fall.

Style No. 944 is designed for sizes 4, 6, 8, 10 and 14 years.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Recipes For This Week

(By Betty Barclay)

GINGER PUDDING

1 Junket tablet
1 pint milk
1 tablespoon cold water
3 tablespoons sugar
½ teaspoon lemon flavoring
½ cup whipping cream
Ginger cookies

Break a small ginger cookie (or left-over cake) into each dessert dish. Dissolve junket tablet in 1 tablespoon cold water. Add sugar to milk, also lemon flavoring. Warm to lukewarm (120 degrees Fahrenheit—not hot and remove from stove. Add dissolved junket tablet. Stir a few seconds, and pour over cake or ginger cookies. Chill in refrigerator. Serve with whipped cream and a bit of grated preserved ginger.

CUMBERLAND SAUCE FOR DUCK

(Serves 6-8)

¼ cup orange juice
¼ cup lemon juice
1 cup powdered sugar
7 tablespoons currant jelly
Grated rind 1 orange
Grated rind 1 lemon
1 tablespoon grated horseradish
Mix ingredients; heat thoroughly; heat and serve.

When a man can't do anything else, he can develop into a chronic kicker.

Most Wonderful Man

Famous German Biographer Says, Silence Did Such Genius and Character

Who are the world's greatest living men?

It's a hard question, but Emil Ludwig, famous German biographer of history's giants in mind and action, tried to answer it during his recent visit to London.

Although unable to give definite opinions as to the world's greatest, he admitted with reservations that Mussolini, Shaw and President Masaryck, head of the Czechoslovakian government, had traits of greatness from different angles.

When asked who was the greatest man he had ever met, Ludwig replied without hesitation, Edison. He was the most wonderful man I have ever known. Not only was he a great inventor, but he was truly great in spirit and personality.

The famous German biographer is now writing a book on the contemporary great men of Europe. He has lived in intimate contact with many of them for months. Recently he spent two weeks with Mussolini in order to study the complete problem of his personality.

But when it came to a great Englishman for inclusion in his work, no one could suggest a man for the distinction, a fact which caused Herr Ludwig considerable pain and disappointment.

Ludwig has a formula for greatness. Unlike the standard of greatness employed by the world, he goes deeper than the mere accomplishment of prodigious feats. He studies a man's character and his relationships with others before he affixes the epithet great.

"It is impossible to pretend to give more than a general definition," he declared. "My own personal view is that real greatness depends on two things: genius and character. In the case of genius, what is really great or not I study his character as much as his deed. It is not enough to know how he has acted at certain historical moments. I wish to know if he is vain, if he likes animals, if he is fond of music. His personal letters, his face, are as important to me as any acts of statesmanship."

Ludwig believes that there is a physical law about greatness. Men are born with physical and mental traits which inevitably single them out for fame, he says.

He pronounces Mussolini great because he combines energy with imagination. He attaches much significance to the love of music and points out that Lincoln, Masaryck and Napoleon all loved music.

SUNDAY SCHOOL LESSON

INTERNATIONAL

ISRAEL OF THE TRUE CHRISTIAN

Golden Text: "If any man will come after me, let him deny himself, and take up his cross daily, and follow me." Luke 9:23.

Devotional Reading: Philippians 3:8-14.

Explanations and Comments

The Christian's Devotional Life. Many cares and hard work thronged the last summer months had so used up the strength and nerves of a Christian woman that she found herself doing and saying things that amazed her. She consulted the family physician. "Just what is the trouble?" she asked. "Your nerves seem unnerving," was the reply

"If you want to be on the safe side you would better renew those bathtonics right away." he continued. "And don't forget that you have two cell batteries. You have a physical and a spiritual store of cells that need renewing. Neither set will do its work unless you live. Satisfy the mind of being for you a day of rest and worship, has always been your busiest day, and I know that you have had no time for meditation and important matters. If you do not feed the body, and the soul may starve and wear out just as the body may. Nothing has gone wrong with your body or soul but what can be righted. Your body needs rest and your soul needs to feed in the green pastures and to lie by the still waters with the Good Shepherd."—Adapted from The Youth's Companion.

The Christian in the Home. To be a real Christian in a home often means costly self-renunciation. One troubled temper, decent demeanor no matter how you feel, a radiant spirit even under irritating circumstances —upon such simple elements of the Christian home life are not easy. Only did not master that much self-denial in his relationships with his wife. "Ah, if I only had five minutes with her," he said after her death, 'if only to assure her that I loved her through all that."

And often the demands of self-renunciation in a home go deeper than poverty must be faced together, when sickness falls, the tragedy of which all share, when children are sent to college by parents who cannot afford it, when disasters like which nevertheless love will not give up how intimate, exciting, and contemporary are the practical bestowals of a true home!

The most beautiful possession on earth which man has ever imagined or achieved is a Christian home.—Harry Emerson in The Message of Service.

Church Shipped In Crates

A complete church, packed in 200 crates, was shipped to the Solomon Islands from Sydney. When erected it will be 85 feet long and 55 feet wide. It is a gift from Alfred C. Hoge, of Victoria, as a memorial to his son, the Rev. Charles C. Hoge, a missionary.

Do You Know?

Photograph, Canadian National Railways

What is the Botanical Gardens, Trinidad, British West Indies, there is a tree known as the Screw Pine of the Cocos Islands? It gets its name from the shape and size of the fruit which grows in the form of a cone and resembles a large pine cone. The tree grows to a height of from 15 to 20 feet and is used extensively in landscape.

Reduce Working Hours To Aid Unemployment

Twenty-Five Million Workless Create World Crisis For League Solution

Proposals for reduction in hours of labor throughout the world have been laid before the International Labor organization of the League of Nations according to word received by the League of Nations Society in Toronto.

With 25,000,000 people unemployed [illegible] of a crisis demanding immediate action, and at the recent Madrid conference it was decided to place the matter before the Tripartite Preparatory Conference in January. There was some opposition but the Canadian delegates, Tom Moore and Dr [illegible], voted for immediate action.

The League conceived a 40-hour week proposal in 1919, but a further reduction, it is believed might spread out present employment and help relieve the situation. The 1919 proposal was a permanent measure. The [illegible] suggestion is now that the reduction should be temporary, to meet the present crisis.

A German representative urged immediate action. His country was spending three thousand million marks on unemployment relief. A French delegate asserted there was intense anxiety in all countries with respect to unemployment.

The wage reduction question as a concomitant to the reduction of hours will be considered. The British government announced its adherency of a full examination of the reduction problem so long as the standard of living of the wage-earning population was not reduced.

Had Double Grievance

Woman Lost Hat And Was Fined For Disorderly Train

Everybody must have been tempted at some mad moment to pull a train [illegible] and it is thus [illegible] that the latest [illegible] but [illegible] more official.

Even when a train is stopped there is rarely a very good reason, so that a recent case on the Scottish express is all the more worth quoting.

A woman passenger was leaning out of a window when her hat blew off. She pulled the cord, and the train stopped.

When she explained her awful loss to the guard, however, he most unfeelingly refused to let the train go back for the hat—and, to add to her sense of injury, the passenger had to pay the £5 penalty.

Where Horses Are Cheap

One Sold At Quebec Fair For Thirty-Five Cents

Whether the site of the Quebec Horse Fair, held this year in the vicinity of St. Charles cemetery, had any effect on the price of the horses or not, the fact remains that the inhabitants of the district paid much less for their "nags" than did their forefathers.

Formerly held in the heart of the city, the fair has grown so popular that it has been forced into the outskirts. This year there were about 800 dealers and some 2,000 spectators. One horse sold for a price of millions, another for a watch, and a third for 35 cents. The prevailing price appeared to be from $10 to $20 and anyone asking more went home with the same number of equines as he arrived with.

Base Bullion Prices Rise

Production of gold in British Columbia is expected to exceed $4,000,000 this year, according to figures issued by the Department of Mines. The base gold increase will be 20 per cent. over the previous year, and is estimated at $3,800,000. Placer gold, worth $201,000 last year, will [illegible] this year.

A man at the North Pole is about 12 inches nearer the center of the earth than one at the equator.

Arms Conference

United States Representative Davis Says Nation Is Willing To Make Drastic Sacrifices

Geneva.—Norman H. Davis, United States representative at the disarmament conference, in an address which is expected temporarily to [illegible] Arms of the delegation, broke [illegible]

1. Reduction in the size of land forces.

2. Definition of the term "land defense troops" as apart from regular troops.

3. Abolition of mobile artillery larger than 155 centimetres in [illegible].

4. Limitation of the tonnage [illegible] of tanks.

5. Limitation of the number, and size of military aeroplanes and [illegible] publicity regarding the [illegible] and type.

6. Complete abolition of chemical warfare.

7. A naval treaty between France and Italy.

8. Recognition of the principle of state supervision of the manufacture of and the trade in arms, which would lead to prosperity in the Dominions and increase their capacity to absorb immigrants from the country.

Mr Davis said he hoped the return of prosperity in the Dominions was not far distant and that when it came the problem of migration would be revived

World Trade Wanes

Three-Fifths Of Trade Is Destroyed Since 1929

Toronto.—Three-fifths of the world's trade has been destroyed since 1929, and the destruction is still going on, J. A. McLeod, general manager of the Bank of Nova Scotia, said recently.

In a statement outlining a study of world trade conditions made by the bank, Mr McLeod pointed out while Canada has no direct interest in the present discussions regarding war debts, her indirect interest is enormous because of her position among the great trading nations. Canada, he said, did not need to borrow from 1917 onward in the United States to finance war expenditure.

Statistics from 20 nations, including Canada, the United Kingdom and United States, mentioned Mr. McLeod's statement, show that for the 12 months ending September 30, 1929, aggregate gold value of all merchandise exports was $37,500,000,000 of the 12 months ending September 30, 1932, the figure for combined exports was $19,500,000,000, a loss of $14,000,000,000, or 63 per cent.

Trade Treaty Approved

Irish Free State Guarantees Lowest Tariff Duties To Canada

Dublin, Irish Free State.—The Dail Eireann has given its approval to the Irish Free State's Ottawa conference trade pact with Canada.

Ottawa.—Canada's trade treaty with the Irish Free State was one of the four negotiated by this country at the Imperial Economic Conference. It guarantees to Canada the lowest tariff duties imposed by the Free State against any country. In return Canada grants to the Free State the same applicable to goods from the United Kingdom. Canada ratified the treaty 10 days ago.

Grain Movement Helps

Heavy Rail Orders Have Been Given Work In Maritimes

Halifax, N.S.—More than 300 railroad workers in the maritimes have been given employment since grain and other commodities started to roll eastward toward Halifax from upper and western Canada. Grain is still pouring into the bins at the elevators as fast as it can be handled. Five special trains pulled into Halifax within 24 hours and more are scheduled to arrive shortly.

BRITAIN TALKS OF IMMIGRATION TO DOMINIONS

London, Eng.—The House of Commons passed a resolution urging the government to take immediate steps looking toward co-operation with the Dominions in comprehensive schemes for migration within the British Empire.

Several members who urged the government consider new migration schemes asked what had been done under this head at the Ottawa Economic Conference last summer.

Sir J. Henderson-Stewart, Conservative, reiterated the frequently repeated assertion that numerous persons deported from Canada had to become criminals in order to be sent back to the United Kingdom.

J. H. Thomas, Dominions Secretary, replied to the resolution by saying dominions to the Ottawa conference had been busy hammering out schemes for improvement of trade which would lead to prosperity in the Dominions and increase their capacity to absorb immigrants from this country

Mr Thomas said he hoped the return of prosperity in the Dominions was not far distant and that when it came the problem of migration would be revived

Saskatchewan Game Act May Have Amendment

To Prohibit Ride Use For Shooting Deer

Saskatoon.—Sask. Prohibition of the shooting of game birds with rifles by any except the holders of shotgun and bird and League through amendment of the Saskatchewan Game Act, it was stated by A. E. Bence, deputy minister of the game.

Mr Bence said he had received numerous complaints from farmers over the province requesting that legislation preventing the destruction of game birds by rifle fire be sought at the next session of the legislature.

It was pointed out by Mr. Bence that whole coveys of prairie chicken and sharp-tail partridge can be picked off with a rifle, which it would be impossible to shoot with a shotgun.

Farmers, according to Mr Bence, are fearful that the pheasant crop raised last year will be practically wiped out unless some provision against rifle shooting of game birds is inserted in the act.

Trapper Is Murdered

Coroner's Jury Exonerates Manitoba Victim Met With Foul Play

Pine River, Man.—A coroner's jury investigating the death of John Dhuhmik, 37-year-old trapper, who was found riddled with gunshots lying in a snowbank along his trap lines early Tuesday, December 6, has decided he was murdered by some person or persons unknown.

The jury heard evidence of the young man's relatives who found him not far from his parents' home after he had been missing from home all night. He died before regaining consciousness and Royal Canadian Mounted Police have been unable so far to discover any trace of the murderer

Industrial Insurance

Would Provide Fund To Pay Cost Of Unemployment Relief

Winnipeg, Man.—Enactment of legislation to provide some form of industrial insurance to provide a fund to pay the cost of unemployment relief was recommended to the provincial government at a convention of the Union of Manitoba Municipalities. Resolutions favoring the insurance scheme and a reduction of interest charged on loans to municipalities received unanimous support. W. C. Fetch, of Elkhorn, Man., was re-elected president of the union.

Golfer Escapes Bandits

British Resident Of China Loses Golf Clubs With T-Ring Effect

Victoria, B.C.—Wilson W. N. Hansell, British resident of Manchuria, was playing a round of golf on the Harbin course, he was attacked by bandits, he thought at first, and held him for ransom, but he fought them off with his clubs

His assailants, however did not flee before they had wounded him in the arm

With his wounded arm in splints and suspended by a sling, Mr Hansell reached here aboard the "Empress of Canada," en route to London with his wife and daughter

The golfer put up unexpected resistance and used his steel golf clubs with telling effect on the heads of the bandits as they closed in upon him. The attention of others on the course was attracted and so help was in sight the bandits made off

Western Winter Fairs

Dates Are Set At a Meeting Held In Regina

Saskatoon, Sask.—Saskatoon's winter fair will be held this year during the week beginning March 27, it was announced by Manager R. W. Johns. The dates for all class "A" fairs in western Canada were set at a meeting held in Regina recently.

The Saskatoon fair will start March 28, running for six days. Regina's winter fair will open on March 28, while the Calgary winter fair will be in operation during the same week as the Saskatoon fair. Edmonton's winter show will open on April 3.

Bandit Captured

Bank Manager At Vancouver Overtakes Man Who Held Up Employees

Vancouver, B.C.—G. E. Devereaux, manager of the Royal Bank of Canada branch at 1023 Avenue and Oak Street boarded a street-car to capture at gun point a man who had just held up the bank and taken $270. The man gave the name of Harold Knight, 24 and was later charged with robbery with violence

"I'll drop this little bottle of nitroglycerin if you don't hand over the money," the man said to Devereaux, as he held up the branch. Seizing the money as it was passed over to him by W. C. Scott, teller, the bandit ran out and caught an eastbound street car which had just swung around on 10th Avenue. Devereaux followed him with a gun and stopped the street car as it was moving away

Knight was on the front platform and Devereaux took him off at gun point, lined him up against the outside wall of the bank, keeping his gun at the man's ribs and ordered him to keep his hands high. Constable Albert Barker arrived within a few minutes and handcuffed the prisoner.

Three Wounded In Explosion

Discarded Souvenir Bomb Cause Of Accident In Toronto

Toronto, Ont.—Explosion of a discarded German war souvenir bomb sent three men to hospital here seriously wounded, two of them lifted six feet by the explosion, and the third, 40 feet away, struck by a flying piece of shrapnel. A flash of flame and a shower of debris accompanied the explosion.

Harry Bolhuis, 17, and John Mykituk 39, his stepfather, were combing a dump for bottles and rags when the youth picked up a rusty-looking object, unscrewed the cap and saw a ring underneath. He pulled the ring and a few seconds later a terrific explosion blew him and his stepfather into the air.

Agriculture Must Be On Profitable Basis

One Of Greatest Essentials To Revival Of Business

Chicago.—President Henry Harriman of the United States Chamber of Commerce described indications of reviving business, but said the restoration of agriculture "to a self-respecting and profitable basis" was one of the essentials if prices and employment were to increase.

Mr Harriman brought the viewpoint of business before the annual convention of the American Farm Bureau Federation.

HOOVER MUST BOOST TAXES TO BALANCE BUDGET

Washington.—Slashed $560,000,000 and more below this year's appropriations, but depending upon taxes and economies to "offset deficits," congress has firmly refused to augment the final budget to be drawn up by outgoing President Herbert Hoover was submitted recently.

To meet a deficit in 1934, the president told congress, it would be necessary to impose a general manufacturers' sales tax of 2½ per cent.; and government salaries 11 per cent. more than now; slash compensation and pensions to veterans, and retain the gasoline tax of one cent a gallon.

The present fiscal year, he said, will end with a deficit now estimated at more than $1,100,000,000.

The only way he could see to balance next year's budget, after the departments had completed cuts notching $367,553,000 for savings, was to enact legislation to save $183,000,000 more and to raise $492,000,000 additional revenue.

The president was silent on war debts and made no mention of prohibition or of beer. The latter was not estimated in the administration's annual revenue receipts of the treasury.

Congress received the new budget yesterday. The message was read and the message were read and then the bulk document was referred to the appropriations committees. The chairmen of both the house appropriations Committee said most of the reduction made by the budget was in unemployment relief benefits.

Women In Public Life

Lady Nancy Astor Talks To Women Members Of U.S. Congress

Washington.—Vivacious Lady Nancy Astor, British M.P., talked to international guests of the United States House Foreign Affairs Committee, but she did forgather, in the interests of feminism, with all the women members of congress

A greater place for women in public life was her theme. She also urged more attention to legislation benefiting women and put in a plea for the federal children's bureau.

The plan for a quiet appearance of Lord and Lady Astor before the committee convened with House legislation touching on foreign matters was nipped when it attracted international attention

Use Canadian Wood

Lumber From Canada To Be Used In British Buildings

London, Eng.—Announcement was made in the House of Commons that Canadian soft woods are to be used in place of European pine in 1 million building contracts that come under the supervision of the commissioner of works.

W. Ormsby-Gore, commissioner of works, told the House he had been advised that there would shortly be available supplies of Canadian soft products that would be used for carpentry, internal joinery and general building purposes.

Alberta Coal Output

Edmonton, Alberta.—Increase of 304,676 tons in coal production in Alberta from 3,438,901 tons in the first ten months of 1931 to 3,739,573 tons for the ten months of 1932 ended October 31 was shown in a report issued by Hon. R. C. Reid, Alberta Minister of Lands and Mines. The output for October, 1932, was 386,731 tons, an increase of 168,699 tons over October, 1931.

Boy Accused By Chum

Detroit.—Gilbert Stuart, 13 years old, who had convinced authorities that shot which killed his father was accidental, was back in the juvenile detention home accused by a schoolmate of having planned to rob his father of his week's pay and embark on a career of crime.

ANOTHER STAR REMEMBERS GOOD ADVICE

It won't be long now until the festive season is upon us. At this time one can offer no more sound advice than to repeat the old slogan: "Do your Christmas shopping early." Here is lovely Marion Nixon, screen star, who believes in being well ahead of schedule. Not only has she done her buying, but already she has dispatched most of her presents. She is shown about to dispose of another one.

READY TO FLY COAST

Hon. R. A. Rigg, Minister of Education for the province of Manitoba, who testifying before a commission enquiring into $1,000,000 shortage in college endowment, placed full responsibility for control of University of Manitoba finances on the board of governors

Hoover Extends Credit

Loans Totalling $2,000,000 Made To Canadian Wheat Pool

Washington.—Loans totalling $2,000,000 to the Canadian Wheat Pool were announced by the reconstruction finance corporation.

The loans were made to the Canadian Wheat Pool, Inc., a Delaware corporation, and to the Canadian Wheat Pool, Inc., a Minnesota corporation, both of which are subsidiaries of the Canadian Wheat Pool, Ltd., a Canadian corporation.

Editors Notes

INFLATION AND THE FARMERS

Most of the farmers in Western Canada are in debt. Either they bought their places on a time basis and then assumed an obligation which is covered by a mortgage, or else they have been compelled or persuaded to borrow money in order to continue or expand their operations. At any rate, the debt obligations of western farmers run into the hundreds of millions of dollars.

When most of this debt was contracted, the price of wheat was one dollar or more per bushel and every dollar of debt represented one bushel of wheat. But the dollar which the farmer borrowed, and which he must pay back in principal and interest, is four times as valuable, judged by the Farmer's standard, as it was when he borrowed it. He contracted to pay something that was worth one bushel of wheat; he has to pay back something that is worth four bushels of wheat.

There are some people, even some farmers, who look with calmness at any suggestion of inflation of money. They say, what difference will it make if we have more money if the things we have to buy are dearer. But, as Stuart Chase has recently pointed out in an article in an American magazine, inflation makes all the difference in the world to the creditor and debtor.

Commenting on the question of inflation the Calgary Herald quotes the monthly letter of the National City Bank of New York, in opposition to the scheme. But the interests of the National City Bank and other creditor organizations are diametrically opposed to the interests of the farmers who owe money. Chase shows that the money-lending class loses by inflation and gains by deflation. But the producing class, which has to borrow money to carry on, loses by deflation and gains by inflation. Suppose prices did rise following inflation: the new dollar would have to be accepted by the creditors as payment of principal and interest on loans. Nominally the creditor would gain just to the extent that inflation took place. But somebody says that would not be playing square with the creditor. Nonsense! The dollar could be inflated four-fold right now and the creditor would still be getting back what he loaned. He borrowed something worth one bushel of wheat. That is all he is entitled to get back.

THE BUSINESS OF BEING A NEWSPAPERMAN

Newspapermen are notorious for their generalizations. How could it be otherwise? A reporter cannot be an expert in everything. He may be called upon in the morning to report the opening of a Chiropractors' convention, in the afternoon to interview an Arctic explorer on the advantages or otherwise of "round" money, and in the evening to take a lecture on the royal and ancient art of embroidering—or mumming. To give an expert analysis of the various subjects, epidemics and events with which he comes in contact the average newspaperman would need to combine in his makeup the qualities of an Adam Smith or Karl Marx, the technical knowledge of a Henry Ford or Rockefeller and the historical, political and religious understanding of the philosophers of all the ages. As a matter of fact there is no such super-individual, and if there were he'd be doing something more profitable than publishing a newspaper. But your newspaperman is trained to do something that has a distinct social and educational value, and he does his job, on the average, just about as well as his fellow toiler in any other occupation. (Us scriveners must hang together!)

—Alberta Labor News

DO YOUR CHRISTMAS SHOPPING IN THE PORT

We wish to thank the stores in town who made it possible to publish the three pages of Christmas Suggestions this week, and hope that the readers will derive benefits from the advertisements, also may we ask the readers to buy in the Port, and help keep Port people working.

Patronize the advertisers in the paper this week, they have many new Christmas Gifts, to offer a remarkable low prices.

PATRONIZE YOUR NEWSPAPER

It is significant that while commercial advertising has temporarily declined, the retailers are recognizing the value of advertising, and possibly, being just a little more newspaper space. And by doing so, they are showing their wisdom. Why should they not? Business men! The press is one of the most powerful of all influences upon public opinion and the life of the nation. Without advertising, newspaper cannot exist and the merchant who in this way solicits patronage is sure of results.

(CHAPTER II Continued.

To be so plainly ignored by his own men when any matter of importance came up, made him appear a nobody. To have Baker issuing orders and getting a patrol ready without first consulting him, seemed to him a gross violation of discipline. He had formerly been forced to let Baker have his way in managing the post; but now, shocked at realizing how very little he himself amounted to here, and humiliated that his six months of experience made him capable of running the detachment himself, he had sworn he was going to come down on these men and come down hard.

But the secret and real source of his anger was a deep smoldering jealousy of Baker because of Ellen both Spaulding. Since clearly at every talk with her, he saw she trusted Baker, liked him, and was going to marry him. Her cool inaccessibility maddened Haskell; and her comparison between him and a ninety-a-month sergeant cut his pride to the quick.

Pretty, cool, a trifle haughty, she was just the kind of girl who suited him, and was the only person here at Endurance whom he cared to associate with. His admiration had amounted, it had quickened with possession, it had become a fire in his blood - the first and only passionate affection he had ever known. His life, formerly so leisurely and purposeless, had taken on an aim, a goal. That goal was to consult her engagement and wrest her away from Baker.

As Alan now hurried into the cabin, Haskell swung on him:

"Don't you know better than to come bursting into an officer's quarters without knocking and asking permission? Go out and try it again."

His words went past Alan unheeded. Alan's mind was too much in turmoil. . . . Jimmy murdered. Joyce alone there on the lonely savage Alaska, those six bandit strangers escaping with their loot. . . . That was but one thought in his mind—to overhead those two canoes before they were lost beyond all pursuit.

Forgetting even his salute, he came across to the desk. As though checked by the look on his face, Haskell did not repeat the reprimand. Instead he listened silently while Alan reported the robbery, murder, escape.

"They're heading up the Big Alaska—learned a running country type; back there in the Northeast," Alan explained quickly. "It's called the Thal-Annah, the Land of Many Waters. It's a thousand square miles of criss-cross waterways: lakes, channels, slow creek, and scrub-thin bog all covered with flags and willows. They're heading for the Thal-Annah. That's why they staged the robbery at the Alaska mouth so they'd have a straight shoot into that country. If they reach it we might never get them. I'm going to take the launch and the five men I've got. . . ."

Haskell stiffened. In sarcastic tones he interrupted: "You've got." Just a second, Baker. It would be a little better form to give your report and possibly make suggestions, and then allow me, as officer commanding here, to issue orders."

Alan stared at him in surprise. After all the long months of the winter past when he had initiated every patrol that went out, he was totally unprepared for this tart reprimand. An anger rose in him at Haskell's choosing to bandy personalities just now when those two canoes were whipping up the Alaska.

Trying to fight down his impatience, he said: "Maybe it was tactless of me. But all along I've been . . ."

"Yes, certainly acting as though you were O. C. around here. You didn't appreciate tolerance when you had it. You can take that back, sir, or you haven't got it. I'll issue the orders about this patrol."

Abruptly he turned swayin the wall map where a map of the Endurance country was tacked up. A big six-foot-square mosaic, it was the meticulous, even handiwork of a system of government reports, explorers' sketches and unreliable Indian accounts. Though a few of the larger details were correct, in Alan's eyes it was a clumsy and ridiculous piece of charting.

As he waited, swearing at this loss of precious minutes, Alan happened to see Constable Whipple over in a corner, making inventory, entries at a table. He said:

"Whipple, you'd better knock off on that and get into fatigue clothes. We'll need all the men on the patrol."

Whipple did not obey him, or else, but waited for the inspector's orders.

Alan later remembered, to his heavy cost and sorrow, how Whipple had sat there in the corner, industriously scratching away with a pen, while Bill and Larry and Pedmenzit were down at the wharf hurriedly making ready.

In helpless exasperation at Haskell he thought: "Good Lord, aren't you ever going to get through studying that county d—d map?" Much of this change in Haskell, this angry decision to run Endurance according to his own notions, Alan sensed an ugly hostility against him personally. He was quite well aware of the cause of that bad blood. He had not been blind when last winter; he knew Haskell was madly in love with Elizabeth.

Presently, turning around from his map, Haskell said:

"I see that the Big Alaska, about a hundred miles northeast from its mouth, divides into two branches."

To hurry this talk up, Alan stepped around behind the desk, and pointed at the map as he spoke.

"Yes, that forks is called Big Loon-tags. But it's farther east than your map shows; it's nearer two hundred miles. Here's MacMinn's trading post. Here's the Forks. The right branch leads southeast through the . . . It should be named timber country. The left branch goes north-east into the big muskeg. About here is where the Thal-Annah should be marked. They're heading up this left branch for the Thal-Annah—"

Interrupting, Haskell demanded, "How do you know they're doing that?"

"I don't know, but it's a sensible guess. The Thal-Annah is a hiding place made to order, and they're surely breaking for it."

"Humph! Maybe." Haskell lit a cigarette, and went on studying the map. Turning, he ordered:

"You'll take the launch and the five men, Baker, and go up the Alaska. If you don't ever take those bandits before reaching the Forks, leave the launch there, split your party, three men each, and follow up both those branches."

Alan objected: "But three men against six, the six who pulled a trick like that! Corporal Dyment ought to be able to handle them. They've got scarcer charges over them, they've got a fortune in their possession. They're going to put up a finish fight."

"Three men can handle them. Three more with the law behind them—"

"A city cop may be a squad by himself," Alan interrupted, "but in the bush a man is a man. A legal bullet don't hit any deader than an outlaw bullet. Men who'd head up a big steamer in broad daylight and who face the gallows if caught, aren't going to be put by the sight of a uniform. I believe my party shouldn't split. We ought to stick together and whip up that left branch. That's the fork they'll take."

"You're merely guessing," Haskell said coldly. "You don't know which branch they'll take. By my pals you'd be sure to overtake them on one branch or other!"

"Yes, and have half my men shot up. I'm responsible for them. I know what that kind of responsibility means. You're bug-lying me with orders I know are dead wrong."

Haskell tapped the table with his pencil. "I've given you my reasons, Baker, and listened to yours. If you refuse to obey orders, you'll step here at the post, and I'll put Corporal Murdoch in charge of this detail. Take your choice."

Alan was not the fool to believe Haskell was bluffing. The man would keep him here and demote him for refusing to obey a command. He had been waiting months for just such a chance. It was a question of holding out against those ignorant instructions or getting away with the men and making the best of it. Perhaps, after all, the devils would catch up with the bandits before they reached the Forks.

Beaten, weary of arguing, he gave in. "All right, inspector. I'll follow both branches."

To cut off further delay he whirled abruptly on his heel and strode out.

Response came down from barracks. A little later Whipple came and timidly took his seat in the launch. Alan and Bill and Youngo were storing aboard guns, tent, grub and blankets. On the terrace above, with a book in her lap, Elizabeth Spaulding watched them.

Then Frank Pedmenzit, demonic driver of the powerful launch, slipped the wheel and shipped in the gears; and headed north, down the Mackenzie.

They were at last away on the pursuit.

But all Alan's ardor had gone. All his leaping urge to be on the chase had gone. Premonition whispered, and its whisper chilled him. As he glanced around at his men, at the comrades

CHILDREN'S COLDS

Accomplishments Of Prince

Heir To British Throne Is An Expert Cabinet

Few people know the full extent of the Prince of Wales' accomplishments. His ability as a dancer is, of course, widely known, but he laments that he seldom finds a partner who can "tango" with the intricate rhythm so necessary for the full enjoyment of the dance. The Prince is also a past-master in the art of conjuring, and, in fact, had lessons from a world-famed magician a few years ago. Such tricks as turning a handkerchief into a flag and producing rabbits from a hat are small try to the Prince. His ambition in this line, however, is to be able to do the famous "needle-swallowing" trick. Several needles are swallowed (dis), then a reel of cotton, and a glass of water. With the ejaculation of these very magic words, "hey, presto," the needles are taken out of the mouth all nicely threaded together!

Colic Pains

"I found that BABY'S OWN TABLETS relieve colic pains almost at once", writes Mrs. Mildred Noddle, Long Creek, N.B. Many other Mothers report equally happy benefits from giving their children these Tablets.

BABY'S OWN TABLETS are recommended by Mothers for teething troubles, upset stomach, indigestion, colic, simple fevers, constipation.

There is no need for YOUR child to suffer. BABY'S OWN TABLETS can be given with absolute safety—see druggist's certificate in each 25c package.

Dr. Williams' 200
BABY'S OWN TABLETS

THE RHYMING OPTIMIST

By Allan Mackenzie

ESCAPE

When life has vanquished me and bailed, whipped, I quit. Where granite walls of misery Rise high on either hand, Do I in weakness bow? My head to better fate, And weep for every broken vase, Each pillaged hope's estate?

When life would crush and rend, I have a secret stair By which my spirit can ascend, The still, white way of prayer! And up and up I climb From out my prison-place, Until I walk in realms sublime Before Love's shining Face!

Life cannot shut me in Its dungeons of despair, For I spy new escape ways Along the way of prayer!

Plane With Robot Pilot

"Flying Laboratory" Is Being Tested By Frank Hawks

A "flying laboratory with a robot relief pilot built into its mechanism, has been completed at Los Angeles and is ready for trial flights by Lieut. Commander Frank Hawks, speed pilot. The low-wing 350-mile an hour monoplane is equipped with a mechanism which enables it to relieve the pilot, which through air pressure devices, will fly the ship while Hawks makes notes and records the craft's behavior.

Life cannot shut me in
Its dungeons of despair,
For I spy new escape ways
Along the way of prayer!

Asthma Caused Last when the greatest of all asthma specifics is used. Dr. J. D. Kellogg's Asthma Remedy generally deserves the praise entitled this. It has to its credit thousands of cases in which other preparations had failed to benefit. It brings help to even the most severe cases and brings the patient to a condition of blessed relief. Surely suffering from asthma needless when a remedy like this is so easily secured.

Sounded Final

"I do not love you!" said a young woman who knew her own mind. "But," persisted the young man, "couldn't you learn to love me?" "No," she replied; "I have learned a good many difficult things, but they all were dreams than things that I wanted to learn!"

One of the commonest complaints of infants is worms, and the most effective application for them is Mother Graves' Worm Exterminator.

Sure To Be Searched

When a bail goes ting-a-ling at the St. Louis jail, or a certain light flashes on, persons visiting prisoners there might as well line up to be searched. An apparatus known as a "detectograph" has been installed at the jail door to give the alarm when anyone is attempting to smuggle weapons, saws or files into the prison. The metal attracts the electrical apparatus.

Small farms and gardens for the unemployed are being opened in Duluth, Minn.

CANADIAN WOMEN FIND DUSTING DISTASTEFUL

Dust cloths going into domestic Unpleasant to use; a bother to Wash

APPLEFORD WONDER PAPER HAS GREAT VOGUE

Of all household tasks, that of dusting's the least appealing to the majority of women.

However, this condition, like many another connected with housework, is undergoing radical change. In a great many Canadian homes the woman has discarding dust cloths entirely, and now using Appleford Wonder Paper instead, because it actually does—as it claims—go to cobwebs, doing a better and much quicker job than the old hand cloth ever did.

This new, and extremely modern Wonder Paper, is made from clean rags, and dust cloth in fact, treated in such a way that it gets a high-grade furniture polish; and absorbs dirt instead of scattering it.

Appleford Wonder Paper comes in handy-size packages twenty-five large sheets for twenty-five cents. To dust, simply shake into a soft wad and go over the surfaces requiring attention. Then when one side is soiled or worn, turn the Wonder Paper inside out. After you have given a quick and lasting finish to furniture and woodwork, you can roll up Wonder Paper on the floors, if you wish.

And when you are through, there's no old dusty or dirty cloth to wash. Throw the soiled Wonder Paper away and your responsibility is ended. Dusting by this treatment is half the time and effort of the old-style.

Wonder Paper is made by the makers of the famous PARA-SANI Sheep Wool Paper in the Green Box.

Useful Offer

Most grocery, hardware and department stores have Appleford Wonder Paper in stock. If yours hasn't, you'll be glad to supply you from the factory. Just fill in and mail the coupon.

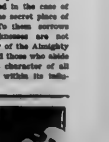
Little Helps For This Week

"He that dwelleth in the secret place of the Most High shall abide under the shadow of the Almighty."
—Psalm 91:1.

They who on the Lord rely,
Safely dwell though danger's nigh;
Ps. His sheltering wings are spread
O'er each faithful servant's head.
When they wake or when they sleep,
Angel guards their rights keep;
Death and danger may be near,
Faith and love have nought to fear.
—Harriet Auber.

"There shall no evil befall thee, neither shall any plague come nigh thy dwelling," is a promise to the fullest extent verified in the case of all "who dwell in the secret place of the Most High." To them sorrows are not evils, sickness are not plagues; the shadow of the Almighty extending far around those who abide under it, alters the character of all things which come within its influence.—Anon.

ALMOST FLAT ON HER BACK



Aching back! Will it never stop? She's nearly desperate. Lydia E. Pinkham's Vegetable Compound has relieved "backache troubles" for over 50 years.

Smith's Drug Store

LOCAL NEWS

We are sorry to hear that Mr. Wm. Simmons is very ill.

The Fort Saskatchewan Curling Club will hold a dance on Friday, Jan. 20. Watch for further announcements.

The Women's Missionary Society of the United Church are holding their Annual Birthday tea in the Church rooms of the United Church on Thursday, Dec. 15th. Tea, Chicken Salad and Cake will be served from 5 to 6 p.m.

Our exchange column is going almost by leaps and bounds, but there are many people who have something to exchange but haven't advertised them in this column. Do you know that we are willing to exchange also, just let us know and we'll trade.

The regular meeting of the United Church W.M.S. will be held at the home of Mrs. D. C. Ramsay on Tuesday, Dec. 20th, at 3:30 p.m.

Mr. A. H. Gibson was taken sick on Sunday and was removed to an Edmonton Hospital.

"Santa Claus is Jail". Come and see the Christmas concert in the Empress Theatre on Tuesday night.

Mr. Wm. Gibbs-o, is expected to return home this week, after 4 months stay in the Royal Alex. hospital, Edmonton due to a injury to his eye. It is not known for sure just to what extent his eye has been injured.

He received the damage while operating a calculating machine with fine wire, with a disk-factant, when the needle coming off suddenly sent some of the mixture into his eyes.

Mrs. Les. Thomas was a patient in the Millcreek Hospital last week.

Mr. Philip K. Mohr is laid up due to sickness.

Born to—Mr. and Mrs. Geo. F. Mohr of Josephburg on Friday, Dec. 9th, at the Millcreek Hospital, a daughter.

Look up our trade column there may be something you want.

To All A Very Merry Christmas

Fort Hockey Team Loses To Chipman and Lamont

After a fine start off in the new league by winning the first two games from Lamont and Chipman respectively the Fort Senior Hockey team dropped two games on their road trip last week, losing to Chipman by 5 to 3 last Friday and losing to Lamont by a score of 4 to 1 last Monday evening. Both of these games were hard fought battles but the local boys bowed low of men from the 'Flu' and tough breaks were decisively defeated in both cases.

There was considerable talk about referee when the Chipman team played at the Fort, the Chipman team leaving the ice when one of their men was penalized for holding the puck to the fence in the last five minutes of play. That was poor sportsmanship on the part of the Chipman boys. The fans who accompanied the locals to Chipman are proud of their team. The boys played a game against odds all the way. The local players received 18 penalties while only one Chipman player received a penalty. Only one of these penalties against our players was justified, yet there was not a whimper heard nor any attempt to dispute the game made and if it had not been for one very disastrous second period when Chipman capitalized on Fort penalties to score 5 well made goals the local team would have left the ice victorious for they held the opposing team scoreless in both the first and third periods.

NO CHANGE IN C. N. R. TRAINS

The C.N.R. staff have had several enquiries during the past few days regarding change of train service through Fort Saskatchewan. The Westbound Train No. 8 leaves Fort Saskatchewan 5:06 a.m. daily, and the Eastbound Train No. 6 leaves Fort Saskatchewan 10:02 p.m. daily, as usual

When the passenger train service through Fort Saskatchewan is changed, the public will be notified through the columns of the local newspaper, also on display notices. We ask the public to please pay no attention to the misleading information which is being circulated from time to time by pipe-dreamers and would-be fortunetellers of the future.

At Lamont on Monday night the locals ran up against a 'snag', when the Lamont team showed a complete revival of form from the time they played here. Under the generalship of Captain Fred Jakes the Lamont team completely took away the play from the Fort Boys with their smart forward pass system. They also certainly developed this pass system as it should be and will make the rest of the teams step from now on. We have to hand it to Lamont they certainly put it over on that time and we are offering no alibis.

The results of other games last week are as follows:—

Lamont at Bruderheim 8-0 Lamont
Bruderheim at Lamont 4-2 Lamont.

Next game will be played on the local ice on Friday night when the Chipman boys play here again. This game should be interesting.

Vegreville and Alberta Ave. Rinks Play Here

The Fort sent down a rink to Vegreville last week and on Thursday evening Vegreville returned the game here, when a rink comprising of T. Carson, Dick Rennie, C. H. Ballantyne and H. H. Hacker played against a rink with Earl Graham, skip, Josh Wrights, Fred Smith and James Graham.

The game was close throughout, the Fort coming out far two on the last end.

After the game lights refreshments were partaken by the curlers at a local cafe.

Two rinks from the Alberta Ave Community Curling Club motored to the Fort on Thursday afternoon and played two hurriedly got to-gether games. Note

The games were hotely contested throughout and some very brilliant curls were thrown. At the end of the 12th end both rinks were tie. M. Fife and Bill Graham with a score of 8-8, and J Barker and A. Simmons with a score of 11-11. The Barker-Simmons rink played one more end, with the visitors getting a count of two, making the score 13-11. The Fife-Graham rink finished with a score of 11-11.

The personal of the visiting rinks were:—J. W. Barker, skip, Jos Allen, A. Hudson, M. Wilson; M. W. Fife, skip, F. R. Whitel. J. McFarland and Robt. Rae.

PROVINCIAL SEED FAIR

Some of the finest seed grain in the world will be on exhibition in Edmonton during the week of the annual provincial seed fair, January 10-13, inclusive. During the same week the annual meeting of the Alberta Seed Growers' Association will be held, together with the annual agricultural short course at the University.

As was the case last year, prize winners in wheat and oats at Toronto and Chicago will not be allowed to come into competition with other exhibitors in these classes, but will be placed in a class by themselves, a so-called "professional" class. Special premiums are offered in both wheat and oats for this class by the provincial department of agriculture.

Grand champion ribbons will be awarded the best sample of wheat and oats at the fair, all exhibitors in these grains being eligible.

Many special prizes are being offered by banks and other firms. Entries close January 2nd.

Large Crowd Attends Christmas Concert

With a large crowd in attendance, the United Church Sunday School presented their annual Christmas concert in the local theatre on Tuesday evening. It consisted of a two act Cantata "Santa Secures" followed by a short play by the Bible Class "The Pinkbottle Literary Society"

It was a happy autumn and much credit is due to the members taking part in it and to those responsible for the directing. One needed only to hear and see this concert to realize the talent that is in this district.

We could eulogize greatly on this performance, but we believe it fair to say that all did real well and we hope that the splendid work will be carried on in the future.

The Fort Curling Club will hold a DANCE in the SIMMONS HALL on FRIDAY, DEC 30th. Good music. Dancing 9 till 2. Refreshments.

Greetings

The Undersigned extends to every Citizen of Fort Saskatchewan a sincere wish for a Happy Christmas and a Prosperous New Year.

G. T. Montgomery, Mayor

Jones, Graham & O'Brien's

Palpitation of the Heart Nerves Bad - Could Not Sleep

Mrs. Fred Hopkins, South Cornwall, Ont., writes: "For long months I suffered with palpitation of the heart, and my nerves were so bad I could not sleep.

"I was getting desperate and doubted my trouble to a friend who recommended me to use Milburn's Heart and Nerve Pills. I purchased a box and after using them for a short time I noticed a good change in all the ways I troubled as I was."

Price 50c. a box, at all dealers and general stores, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

What Really Counts?

What is the thing that really counts in your life?

Many people who had always accepted what life brought to them from day to day without giving much thought to the matter are finding out, as a result of experiences through which they or relatives and close friends are passing, or as the outcome of their reading and observation, to be compelled by the very largest and terrible of present conditions to set each out themselves what, after all, is the thing that really counts in any life?

Take the case of a man known to the writer. Nearing for more than a quarter of a century held responsible positions in one of our Western Provinces, and received a very gratifying salary, he succeeded in saving, during years ago thrown out of his employment, it was then he has had no assured position but has employed his energies in various ways and in return for such remuneration as it was possible to obtain.

Today his income is at its lowest point yet touched. He is aware it may further shrink if not entirely disappear, as has been the experience of so many.

During these past three years this man has seen the value of most property as he possessed reduced to fifty cents on the dollar of his former value, and it is presently unsalesable at such a reduced figure. Such reserves as he was able to build up are steadily disappearing, and he is now approaching three score years in age.

Has he become discouraged, embittered, rolling at his fate, and ready to turn and rend somebody else, or some institution or corporation, or the whole system of economics and government under which he has existed, which he himself helped to build up, and under which he is now sustaining loss where formerly he profited? That is, does he regard material things as the things that really count? No. Although he cannot see light ahead at the end of the tunnel through which the world is passing, he is not discouraged nor embittered. He has not the slightest desire "to take it out" on somebody else. While recognizing that every observant person and student of affairs realizes that changes and reforms are urgently required in our social, economic and political structure, he also recognizes that he must accept his full share of the responsibility for the mistakes of the past, and that, instead of throwing all the blame on the system, or on those who were associated to places in positions of authority to administer that system, some of that blame must be apportioned to himself. If others made mistakes, so did he, and he is fair enough to admit it. He realizes that he made mistakes, not deliberately, but in the belief that he was doing the wise thing, but mistakes nevertheless. Why then lay all the blame on the system he helped to create and develop, which for years has been operated by others in charge of that system and struggling against an accumulation of past mistakes, his own included, -as well as the mistakes of others in far-distant lands over which they had no control but whose mistakes re-act upon us, so ours re-act upon them?

This man is no high idealist. He has a healthy respect for the purely material things of life. He enjoyed them in the past; he acutely misses them now; he hopes to enjoy them again. But he has learned to realize that, after all, they are not what really count in life. He has health, and when he sees others in sickness, possibly suffering and slowly dying of an incurable disease, he is thankful for something far exceeding great riches.

If he alone had suffered loss, he might feel embittered. But when he sees countless thousands who have sustained similar, possibly greater losses, he feels no bitterness, but a new and greater sympathy with everybody else. He did indifference in many quarters before this time, and sense to give of his time, talents and energy to their solution, has passed away. He is not 'so busy' now, with his own selfish concerns that he has no time to devote to public and community affairs, with the discovering there is something bigger and infinitely more important than himself and his personal affairs.

He may not weather the storm of the depression in which he, with so many others, is engulfed, although he is not the type to give up. But while a loser in one sense, he is a gainer in another, and the whole world is the gainer too. The universal experience of losing something, is having a humbling effect not only on this man, but on hundreds of men and women. Founded as they may be in present conditions, the youth of today will be stronger than those of the past generation who were cradled in the lap of prosperity, if, indeed, not of luxury.

From the experiences of the present is it not possible that we all may learn that it is not what happens to us but what happens within us in times of storm that determines whether we are defeated or victorious; that whether we or fate does not matter so much, but rather how we bear the battle through?

Hard On the Fleas

Pittsburg Issues Triplicate Ticket For Violation Of Traffic

Something new in "tags" for traffic violations—a ticket which authorities say "can't be fixed" has been introduced in Pittsburgh. The new tag is issued in triplicate, one copy going to the offender another to the traffic court, and a third to the controller, who will be obliged to check back on every ticket issued. "Now," said one traffic officer, "we'll see if the fleas and their politician friends can get around this one."

How Dead Money Lies

British Mint Fires Drops £347,000 On Bridge Contract

For companies of any size have engaged like the Mint many losses in the last year or two. An outstanding case is that of the Dorman, Long Company of London, England, one of the foremost iron and steel companies in the world. Contracting for the construction of the great bridge over the harbor of Sydney, Australia, the company admits dropping £347,000 on a £4,500,000 project. Depreciation, during the four years construction period, and adverse exchange rates, are said to have contributed largely to the loss.

Worlds Without Gallery

A battleship flashlight has been put on the market. It has a small searchlight in its base. A four frames of the latest produces enough energy to set the bulb glowing and, when the light diminishes, all one has to do is to turn the base again.

Buy Dividend From Wheat Any Way

Young Kitchener Inventor Claims He Has Discovered Method

Two years of experiment by have resulted in his discovery of a method to transmit electric power long distances without wires, is the claim of 23-year-old Frank Fody of Kitchener, Ontario.

Fody, a former insurance agent said he demonstrated his equipment for engineers, and declared that after his apparatus functioned perfectly Power broadcast from his transmitting station was picked up two months distant.

An engineer, who was in Kitchener from Toronto admitted that the experiment showed promise of something." The young inventor is going to Montreal to demonstrate there He remained a consulting transmitting station in Kitchener, which would broadcast electrical energy to heat and light homes in the city and in the surrounding country, for a radius of 100 miles.

An aerial on the roof of a house, he declared in an interview would take the power from the air

A receiving outfit could be manufactured for about $25 to $30, the inventor said. He added he has secured financial backing in Toronto to the extent of $30,000.

For two years after he graduated from St. Jerome's College at Kitchener, Fody worked as insurance agent, but he gave that up to continue his experiment in the privacy of his boarding house bedroom. He is single, still in his twenties, not deliberately, but in the belief that he was doing the wise thing, but mistakes nevertheless. Why then lay all the blame on the system he helped to create and develop, which for years has been operated by others in charge of that system and struggling against an accumulation of past mistakes, his own included, -as well as the mistakes of others in far-distant lands over which they had no control but whose mistakes re-act upon us, so ours re-act upon them?

A Strange Story

Family Living Near Chicago Has Never Seen Street Cars, Moving Pictures Or Radio

The strangest story of an isolation so complete that none of a family of nine children has ever seen a moving picture, a street car, or a radio, although they have lived all their lives near Chicago, came to light recently.

They are the children of Joseph Graff, 60, a farmer of Wheeling, Ill., who came to the United States 30 years ago from Russia.

The strange case was revealed when Graff appealed to police to find his eldest child, Mary, aged 20, who fled from her home. The authorities were puzzled at first because a girl who lived in her head and she regarded this as an evil omen. She later was found at the home of a neighbor.

Deputies Brynolen Lindstrom is a quaint, curious romance of Maud Bel and Thrush. Poor or few opportunities are usually enough.

Talk Of Life In Russia

Communists Small Percentage Of Population Says B.C. Engineer

Expressing a lack of faith in the Russian five-year plan and voicing the opinion "there is probably as big a percentage of Communists in Vancouver as in Russia," J. A. McLachlan, British Columbian mining engineer who recently returned from a two years' residence in Russia, told Vancouver Board of Trade members of life as he found it in that country.

"You have to realize that there are only about 3,000,000 Communists in Russia, a country of 165,000,000 people. The Communist Central Committee is an complete control. The political police have the authority and people live in terror of them, he said.

Mr. McLaughlin went to Russia as engineer on a copper mine development proposition for which the five year plan called for production of 50,000 tons refined copper annually. But in two years only 600 tons of metal were produced.

Celebrates Anniversary

Lethbridge Herald Completes 25 Years As Daily Newspaper

Rounding out a quarter century of continuous publication as a daily newspaper, the Lethbridge Herald is the special 25th anniversary edition issued recently in which appeared many congratulatory messages from Canadian public men and newspaper publishers to Senator W. A. Buchanan publisher.

The Herald was first established as a weekly paper in the autumn of 1905 by F. F. Bumpsed, of Cranbrook, B.C., and W. A. Buchanan came from St. Thomas, Ont., and purchased a half interest Later he acquired the entire property and, on December 31, 1907, launched the Herald as a daily newspaper.

Members of the Western Associated Press from its inception and later of the Canadian Press when co-operative news services were merged, the Herald has received a full leased wire press service since 1917

Official Fertilizer Guide

Helping the Farmer To Select Best Combination Of Plant Food

One of the most important functions of the Fertilizer Division of the Dominion Seed Branch at Ottawa is the inspection and analysis of fertilizers sold in Canada under the Fertilizers Act These analyses are available in printed form for the use of farmers throughout the Dominion, and are valuable in helping the farmer to select the fertilizer, or combination of plant food, best suited to his particular purpose. Copies may be had without charge by simply writing to the Publications Branch of the Department of Agriculture at Ottawa.

Struggled With Asthma

In the early stages that asthma may be reduced from an attack of this distressing trouble. The relief from Dr. J. D. Kellogg's Asthma Remedy is prompt measure. Where all was suffering before comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleansed. This unequalled remedy is worth many times its price to all who use it.

No Time For Drilling

Unity Of Effort Should Be Aim Of Every Statesman

Over from Baghdad to join his wife in the United States, Viscount Astor says "We must do something definite, or there will be trouble."

One of the main obstacles in that whenever any State leader suggests anything, all his political enemies join forces to hoot him down. It is time the so-called statesmen realized the folly of that course. This is an hour when unity of effort should be made, even if it does involve the sacrifice of some temporary political advantage.

Not Greatly Impressed

An American in England was giving some illustrations of the size of his country.

"You can board a train in the State of Texas at dawn," he said, "travel slowly, and twenty-four hours later you'll be in Texas!

"Yes," said one of his English listeners, with feeling, "we've got trains like that here, too."

Bank's Warning on Currency Inflation

BANK OF MONTREAL MEETING

The annual meeting of the shareholders of the Bank of Montreal, held at the Bank's Headquarters, was largely attended The report and statement of account, particulars of which have already been published were unanimously adopted, and the retiring directors were unanimously re-elected.

Sir Charles Gordon, the president, said that during the year they had been confronted with declining trade, dislocated foreign exchanges, lessened demand for banking accommodation and low rates of interest on the world's monetary centres, yet the Bank had managed to earn fair profits, to preserve a strong liquid position and to meet the legitimate requirements of their customers.

W. A. Bog, joint general manager with Jackson Webb, said in part:

Your Bank has come through the period with undiminished prestige for it can be claimed without exaggeration that events have only served to emphasize the important and outstanding position which it occupies in the financial affairs of this country."

Both the President and the General Manager came out strongly against any inflation of currency in Canada, and had been advocated in some quarters in connection with a slight relaxation of a national central bank Sir Charles Gordon said that for 18 years, under the provisions of the Finance Act Canada had had all the advantages which might come from a central bank, the legislation having admirably performed that purpose in this respect Monopoly of note issues by the Government he declared would not increase by a single dollar the amount of currency in the hands of the public unless the notes were made irredeemable and recklessly emitted From the time of the French Revolution in the 18th century, he said, the shore of history was strewn with the wrecks of ventures in irredeemable paper money, and if there was one fact in finance more firmly established than another it was the certainty that the unrestricted issue of paper money culminated in disaster.

"I may point out moreover, that even in Canada we do not suffer from inadequate credit or inadequate currency. Other banks are always borrowers to whom they can safely lend, and as trustees of depositors from whom their banking resources are derived, banks ought not to lend on any other condition. So far as our banking system is concerned, it is well to remember that the single depositor has had to wait for a moment to get his money from the Canadian banks during the past year, while tens of thousands of depositors in the United States have had to wait in line, only to be told finally that their bank had closed its doors, the fact in one argument that will appeal to most people."

World Problems

The return of prosperity to Britain and all other countries, depends first and foremost on the achievement of sane international agreements to restore trade and the increase of armaments to remove the incubus of debts, to remedy the causes which have thrown the currencies of half the world into the melting pot and to cut the bonds which strangle international trade.

Simple and Sure. Dr Thomas' Eclectric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a drenching to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

Something Else Needed

An English scientist has developed a chemical which will rid a football field of snow, ice and frost in fifteen minutes, at a cost of $100. Unfortunately, however, nobody has thought of a way to warm up the atmosphere the spectators have to sit in

The Stratosphere Holds Secrets Of Many Things Which Are Puzzling Scientists

How far one must penetrate into the upper air?

The stratosphere, as the upper reaches of the atmosphere are called, begins at a height of ten kilometres, or about six and a quarter miles above sea-level. At the moment the highest point reached by man is 61,673 feet, or just over ten miles, which was attained by Professor Piccard in his second balloon ascent.

But the exploration of the stratosphere is only beginning It holds the secrets of many things which puzzle the scientists, and Professor Piccard believes that to uncover these secrets many more ascents must be made

One of them, he thinks, should be undertaken in the Arctic regions, and he has suggested the Northern Bay district as a suitable starting-point Probably none of the aeronauts now engaged in "Polar Year" researches, would be the best men to make the attempt. They have the necessary scientific training, but at the same time are equipped with knowledge of the Arctic regions, and could find for themselves in the event of the balloon coming down far from civilization in the midst of the polar regions.

Aeroplanes also can penetrate the recently won the aeroplane altitude stratosphere, and Capt. C. P Uwins record for Britain by surpassing in this respect Monopoly of note issues by the Government he declared would not increase by a single dollar the amount of currency in the hands of the public unless the notes were made irredeemable and recklessly emitted From the time of the French Revolution in the 18th century, he said, the shore of history was strewn with the wrecks of ventures in irredeemable paper money, and if there was one fact in finance more firmly established than another it was the certainty that the unrestricted issue of paper money culminated in disaster.

"I may point out moreover, that even in Canada we do not suffer from inadequate credit or inadequate currency. Other banks are always borrowers to whom they can safely lend, and as trustees of depositors from whom their banking resources are derived, banks ought not to lend on any other condition. So far as our banking system is concerned, it is well to remember that the single depositor has had to wait for a moment to get his money from the Canadian banks during the past year, while tens of thousands of depositors in the United States have had to wait in line, only to be told finally that their bank had closed its doors, the fact in one argument that will appeal to most people."

World Problems

The return of prosperity to Britain and all other countries, depends first and foremost on the achievement of sane international agreements to restore trade and the increase of armaments to remove the incubus of debts, to remedy the causes which have thrown the currencies of half the world into the melting pot and to cut the bonds which strangle international trade.

Simple and Sure. Dr Thomas' Eclectric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a drenching to apply. The directions are so plain and unmistakable that they are readily understood by young or old.

Something Else Needed

An English scientist has developed a chemical which will rid a football field of snow, ice and frost in fifteen minutes, at a cost of $100. Unfortunately, however, nobody has thought of a way to warm up the atmosphere the spectators have to sit in

Why Jury Duty Is Unpopular

Harvey Or Death Only Reasons Accepted For Exemption

An Ontario judge refused to grant request made by a young man, who explained that if he had to serve 22 men working for him would be thrown out of employment temporarily Jury service said the judge, is necessarily called for sacrifice, and only illness or death could be advanced as legitimate reasons for liberation from such service

It seems to us the judge in this incident took a highly technical and not wholly practical view of the situation There was but one man who could replace the 22 at work, and no doubt many men were available who would have served the cause of justice equally well as a member of this jury. Under the present law the theoretical obligation of all citizens to do jury duty when called upon might have been tempered by the urgent importance of permitting men to earn wages when they can find work.

Jury duty would be less unpopular if courts had a little more consideration for the comfort and convenience of those compelled to serve at a financial sacrifice. They are guarded like prisoners reprimanded publicly if late for duty, kept together for days at a time in impromptu criminal cases. No doubt all this is necessary, justified by experience But often men have been fined and compelled to remain within call when they might be released for a day or two, or, as in the case we have mentioned, forced to serve when there is excellent reason for release. A little more thought for the individual would make for better citizenship and for greater respect for the judicial machine.—Ottawa Journal.

New Radio Policy

Will Likely Follow Plan Adopted By British Broadcasting Company

The radio commission of Canada will probably follow the policy adopted by the British Broadcasting Company in connection with the handling of election speeches, Hector Charlesworth, chairman of the newly-formed body, declared in the United Kingdom, he explained, leaders and organizers of political parties are requested to agree on certain periods for broadcasting their speeches so that other programmes are not seriously interfered with.

The rule confining advertising content to five per cent, of each programme would be rigidly adhered to, Mr. Charlesworth declared. "The amount of necessity allow some time to Canadian advertisers; if not, they would be placed at an unfair advantage with U.S. advertisers. My idea with regard to the situation is that no Canadian station shall broadcast advertising matter exceeding five per cent. that is not Canadian, or at least the product of a branch factory in this country."

Principles Of Grading

Investing To Consistently Possess Which Brings Better Prices

The grading of farm products as carried out under the administration of the Dominion Live Stock Branch is based on the principle that it is sound business to classify live stock and live stock products in such a way that the producer will be able to prepare and purchase quality products, and that the price premium which the consumer will pay for the better grading should be returned to the producer of them. Practice has proven the value of the theory involved in the grading principle. Grading activities have been a tremendous incentive to quality production, with resultant price benefits to producers.

Motor accidents in the United States cost American insurance companies $300,000,000 last year.

CANADIAN AND AUSTRALIAN MILK GIVES UDGE CAUTION

The serious situation arising in the League of Nations Assembly over the Japanese-Chinese deadlock caused Right Hon. Stanley Bruce of Australia (left) and Hon. C. H. Cahan of Canada (right), to urge the League not to do anything which would be offensive to Japan and create a war in the Far East.

All Efforts Made By Australia To Exterminate Rabbit Pest Have So Far Proved Unavailing

Literature On Brown Goods

Poor Quality Of Books Now Being Published

There never was a better time than the present for aspiring young authors but they seem to be coming forward slowly in the opinion of Money L. Meechen, noted author and editor

Giving his views on the literary state of the United States he pointed out half a dozen books of excellent quality have been published during the last year. "But certainly there has been no much upsurging of reading first rate newcomers as we now in the first years of the century, and again in the first years of the war," Mr. Meechen added.

The American novel is in a very shaky condition and American poetry is almost dead, he thinks. The best things have been dropped by the wayside matter Publishers are turning out many books the same as ever but most of these are bad A fault, he does not attribute to the publishers They would print better ones if they could get them.

Smallest Quantity Of Light Measured

Apparatus Utilizes Flow Of Three Electron Streams Per Minute

The smallest quantity of light ever detected electrically that of the flow of three electrons every minute has been caught and measured at Rice Institute, Houston, Texas

The apparatus reaches further out into the invisible than previous instruments by combining a photoelectric cell with a cosmic ray counter It was described in the physical review by Gordon L. Locher of the Institute and of the Bartol Research Foundation of Franklin Institute, Philadelphia

Its sighting is by way in visualized from the fact that the ordinary dull red glow of a radio tube is the flow of about 100,000 electrons not in a minute, but in a second.

Who Gets the Fees?

Matter Of Discount On Canadian Dollar In Cushioning

Some confusion is apt to arise from the varying quotations on New York funds and the Canadian dollar At times the quotation is given as premium on New York funds and at other times it is the discount on the Canadian dollar A Canadian who goes to New York with $100 and asks for United States money for his own may find the discount on his funds as high as 20 per cent and he receives $80 if he returns home without spending his $80 of American money and the rate is the same, he receives only $96 in Canadian funds. In order to get back his full $100 the premium would have to be 25 per cent Who gets the other $4?

Twelves Farm Cross

The famous cross of snow in the Holy Cross National Forest of Colorado is formed by two snow-filled crevices on the side of the mountain. The cross is visible for miles.

Small Quantity Of Rabbits Have So Far Proved Unavailing

"The problem facing Australia at this time is the great army of rabbits with which the continent is infested," said the Hon. T. S Gordon, of Sydney, passing through New York on his way to England with his daughter, Miss V. E. Gordon. "We are trying in every way to cut down their great numbers but they multiply so quickly that our efforts to decimate them make no noticeable reduction in the Furry tribe There are still hundreds of millions of them. A pair of rabbits will produce six litters of young ones in a year and each litter will average five rabbits. As soon as the bunnies are six months old they begin to breed. In five years a single pair of rabbits will increase to ten million pairs Seven rabbits eat daily as much food as would keep one sheep

Rabbits were first brought to Australia by a farmer near Melbourne, according to Mr. Gordon. He wanted something to remind him of home and the good old English sport of chasing the hare. He sent to England for a pair of rabbits and in due course they arrived He turned them loose in a year or so he could go hunting with considerable success. He soon found however, that the rabbits multiplied so rapidly that his section was overrun His pasture disappeared He brought in wire fences and they increased by hundreds then by thousands There was nothing left for his stock to feed on, so he had to get rid of it, many of the rabbits settling on the bare fields subdued to the earth by the rabbits Then rabbits ate him out of house and home

Passengers on the "Carinthia" cruise around the world via the Southern Hemisphere which leaves New York next January will be driven to the country sections outside Sydney where they may view rabbits by the million at the moment being employed to destroy them. Poisoned food and water kill many of them. Rabbits killed in this manner are skinned and then the bodies are burned One dry year as many as three million rabbits were killed by means of one water hole. The payment of bounties proves effective and gives a good living to many men.

Rabbit proof fences are proving successful Some of these fences are hundreds of miles long with gates at intervals of a mile or more There is a heavy penalty for leaving one of these gates open The rabbit fences of Australia would reach several times around the earth

Two hundred rats free of rabbits were turned loose in Western Australia to combat the pest in that part of the country The rats materialized with the rabbits, living with them on the friendliest of terms Foxes were introduced with the same purpose in view but they multiplied and killed sheep instead of rabbits. The foxes were fenced against

New South Wales once offered a reward of $123,000 to any one who would suggest or invent a means for the extermination of rabbits throughout that state. It was never claimed

Present Day Opportunities

Goods At Prices Now Prevailing Should Sell Readily

The low prices now prevailing on practically all kinds of goods represent a wonderful buying opportunity for our people The idea that goods could be sold at such prices would have seemed preposterous three years ago. It may seem equally impossible three years from now that goods were sold in 1932 at these figures

The people are making a mistake if they do not buy freely when such bargains are offered But the public will not fully realize the value of these opportunities unless the dictates of facts about them are constantly told through advertising Goods at present prices ought to sell readily

Oranges were first grown in California in 1818

The voting age for men and women in England is now 21 years.

W. N. U. 1695

WORLD HAPPENINGS BRIEFLY TOLD

Seventy-two-hour-a-week freight rates of Christmas trees have this year been shipped from Vancouver bound to all parts of the United States.

A Japanese government spokesman declared that resumption of diplomatic relations between Russia and China was most unwelcome to Japan.

For the first time Canada will be host to 31 countries which participate in the Pan-Pacific women's congress in the summer of 1932.

St Nicholas the traditional original of Santa Claus, was feted through-out Italy December 6, on the 1600th anniversary of his death.

Documents indicating that the North American continent was discovered in 1482 by the Portuguese navigator, Pedro Vasquez de la Mouton, have been discovered.

The lamp has two firsts and a second prize with three-year-old red poined heifers at the annual pre-Christmas fat cattle show at Norwich, England.

Finding test cattle hides could not even be given away, a Ulster-born settlement in Alberta plans to establish a tannery and a shoe factory in the near future, C. W. Bilovich told an audience at Winnipeg.

The board of railway commissioners has no jurisdiction to make restrictions from the grade crossing fund to municipalities, but said counties crossing itself, the supreme court of Canada has decided.

Somewhat resembling a mortarboard, but similar in being considered by the Alberta Government to aid farmer debtors, it is learned. It is reported the legislation will be placed before the legislature when it opens some time in January.

Disregarding friendly advice of Great Britain, Japan instructed its delegation at Geneva to reject the proposal that an international conciliation commission be created to attempt a settlement of the China-Japanese controversy over Manchuria.

New Uniform

British Tommy To Be Clothed In More Comfortable Fashion

The Dominion troops not an example to the Old Country during the year of uniforms giving utility and comfort rather than parade ground smartness. The new uniforms intended for the British army which were shown in London by the war office are more easy wearing than anything conceived of before. They suggest Boy Scouts and week-end hikers more than the old-style of His Majesty's regiments.

The cap is not the stiff, peaked variety, it is a tam with wide brim, giving shade to eyes and neck and it is of a soft, waterfall and can be rolled up and put in the pocket. It has no chin strap or other kind of fastener and one imagines that if a line of soldiers are on parade every last will be at a different angle and every brim will be flapping in the wind.

Instead of the tight tunic with plain collar fastening close up the neck the new jacket is loose fitting and has an open neck. It has pouch pockets and the buttons are of a dull metal instead of brass which needs to be polished.

Life Has Been Exciting

Former British War Secretary Has Always Lived Hurriedly

Major-General Sir Sidney Rice, former British Secretary of War, of 17,000 Secretary for Air account, as was noted yesterday recently made to the reporter of every paper, especially Parliament, for had always lived hurried lives and had never had enough time to do anything properly. "I have always done everything in a hurry," he said, "and yet never, I am afraid, a job. Facing a hostile rifle at 12 yards, when I was a young lieutenant, or running from a police court when the period had expired of an addition of 4,000 feet, life both of personal adventures makes exciting reading.

Beavers have had vote protection at woods near Hamlet in Norway.

Singing Fiddler Of Lost Hope Valley

Aged Musician From Kentucky To Attend Song Festival At Lambeth

On his way to attend the National Folk Song Festival in Albert Hall, London, England, Isham Roberts, the "singing fiddler of Lost Hope Hollow" will be a featured performer at the festival.

Mr. Roberts, who is now more than seventy years of age was born and lived nearly years. Early in youth he learned to play the violin. Of Kentucky stock, he learned the songs and tunes of kingdom from his parents and other members of his family and has never ceased playing. In his book he has made a specialty of Elizabethan ballads which had been handed down by word of mouth from generation to generation.

A few years ago while S. L. Bethel, "Sing" was journeying through Kentucky, he noted fellows play and was instrumental in bringing him to the attention of the American public. Since then he has been on the air several times, singing his songs and playing his fiddle in a way that has brought delight to thousands of radio listeners.

But recently recovering his sight, the world is all very new to him. He broke forward with keen delight to visit the big metropolis. He is eager to see a "real and lady of friendly bright," a "knight with a milk-white steed and a gilded quest." Has he not sung ballads describe. He expects to see the Queen and daughter of three hundred years ago.

Although unfamiliar with written notes, Mr. Betters is a born musician. He still has been described as including 300 songs with his fiddle as a very unusual accomplishment for a visiting player.

The aged musician inherits his love of music from his grandfather, who was the first wandering music teacher in the mountains of Kentucky.

Some of the ballads are long, but he has any sign of an interruption. He insists on singing a ballad to the end so that "folks will know if the princess was married to wedlock to the love of her heart," or if a cruel lord separated her from the one she loved. He also insists on singing the words and his speech is well-favored.

On his trip to England he will carry his "sewing clothes" in a homemade leather satchel. He will also carry a guard from which he will drink water, even while in the land of brown ales and amber ale. He still carries his fiddle in a cloth poke just as he did years ago when he played for or was led over the high hills of Kentucky, often being the entire evening's entertainment for a barn dance or a house party.

He will be accompanied on his tour by Miss Jean Thomas, of 17 East 8th Street, New York, founder of the American Folk Song Society, and by Percy Mackaye, 104 M. Tarbell, Wilmot Allen White, Stephen Vincent Benet, Otto H. Kahn, Irvin S. Cobb, Hubert Taylor, and Miss Hagen Rice are active members. Miss Thomas had written newspaper articles about Mr. Bethers' powers before he came the attention of "Sing."

When Mr. Betters departs from England he intends to return to his log cabin home amidst the Lost Hope Hollow, in the Kentucky hills, there to ponder over the great curiosities he viewed in the "outside world."

Conquering the Dollar

United States Senator Favors Temporary Suspension Of Gold Standard

United States Senator Milton Smith, Democrat from South Carolina, told newspapermen he favored a "temporary suspension" of the gold standard by the United States to "cheapen the dollar and increase commodity prices."

As an example, he said cotton was selling for 11 cents a pound in Liverpool, but that this meant only five cents in the United States by the time transportation charges were made.

"Conquering the dollar by suspending the gold standard temporarily, which could be restored when commodity prices and the farmer and industry."

Death Takes Editor

Former Publisher Of Vegreville Paper Succumbs To Illness

Edmonton, Dec. 14.—Death claimed the late Arthur Bennett, former publisher of the Vegreville Observer, at the general hospital here yesterday morning. Mr. Bennett had been in poor health for some months and was taken to the hospital about a week ago. He was 57 years of age and is survived by his widow and one son, Arthur Bennett, of Vegreville, and by two brothers, Thomas Bennett, of Edmonton, and Alfred Bennett, of Vegreville.

Mr. Bennett was born in Ontario and came to Alberta in 1903. He was married in Vegreville in 1907 to Miss Mary Ann Hall, who survives him. He was a member of the Masonic lodge at Vegreville.

Relief Commission

Saskatchewan Body To Accept Responsibility For Unemployed Cities

The Saskatchewan relief commission accepts full responsibility for single girls, apparently able to manage positions on farms, once they are placed.

This is the interpretation placed on the agreement forwarded from Ottawa following a series of conferences between provincial government and relief commissioners. The agreement was given by C. B. Daniel, general manager of the Saskatchewan relief commission.

The commission assumes no responsibility for such persons until they are actually placed. They remain a charge on the municipality, town or village until such time.

The commission is empowered, pending placement, to pay in accepted organized one such as municipalities and relief committees, the actual cost of food and shelter for single homeless unemployed men and women, physically fitted to accept work on farms, at the rate of one, to enter a construction camp, providing such aggregate food, clothing and shelter allowance does not exceed 60 cents per man-day.

Ottawa has been wired by the commission sending distribution on the condition as to whether single unemployed girls may be placed in city homes under the government assisted scheme, and also whether the commission may deal here with any institution such as the Y.W.C.A. and pay up to 60 cents per day for their keep.

Watch Returned By Thief

Accusing Victim Has Believed Him Honest Until Caught

For 30 years a watch has lished the guilt of a man of Dusseldorf, Germany. Unable to stand the accusing ticks any longer the thief has sent it to the police anonymously with a note explaining that he had taken the timepiece from the table at the bedside of a sleeping man. He added that he hoped the man was still alive because it was certain that the robbed man would be pleased to get the watch as the wielder was to get rid of it.

Tree Hard On Hens

California is spending $150,000 a year to rid the state of a vine that is a great pest to motorists. It is the "puncture vine," a creeping plant which, when crossing a road sends its sharp spines through an automobile tire.

SUNDAY SCHOOL LESSON

DECEMBER 25

GOD'S GIFT TO MAN—CHRISTMAS LESSON

Golden Text: "For God so loved the world, that He gave His only begotten Son, that whosoever believeth on Him should not perish, but have eternal life." John 3:16.

Lesson Luke 2:1-20.

Devotional Reading: Isaiah 9:6, 7.

Explanations and Comments

The Birth Of Jesus At Bethlehem, verses 1-7. When Cæsar ordered the enrollment of everyone in the Roman kingdom, the people of Palestine went each to "his own city" to be enrolled. Joseph had been the home of David, their ancestor, and therefore Mary and Joseph went from Nazareth of Galilee, where they were living, to Bethlehem to be enrolled. There Jesus was born, and Mary had Him in a manger, because there had been no room for them in the inn.

The Story Of the Shepherds and the Angels, verses 8-14. "He set forth it for behold, I bring you good tidings of great joy which shall be to all the people." were the angel's glad words heard by shepherds who were watching their flocks in the fields near Bethlehem on the night that Jesus was born. And the good tidings were that "There is born to you this day in the City of David a Saviour, who is Christ the Lord." Christ is the title of Jesus as the One consecrated to be the Redeemer of the world. For it means "The Anointed One."

"The Son of God became Son of Man that sons of men might become sons of God."

"And this is the sign unto you: Ye shall find a babe wrapped in swaddling clothes, and lying in a manger." the angel explained. The "sign" was in the unexpected circumstance of the Babe's being cradled in a manger. The swaddling clothes were the bands of cloth which the oriental mother wraps tightly around the body of her babe, confining the legs and arms.

Suddenly a multitude of the heavenly host appeared praising God and saying, "Glory to God in the highest, and on earth peace among men in whom He is well pleased."

The secret of the true Christmas spirit is in forgetting self and finding one's happiness in others' joys. It is the spirit of the heavenly host, their praise-abilities are in the background as they sing their tidings of great joy to the world.

"For somehow, not only at Christmas, but all the long year through,
The joy that you give to others, is the joy that comes back to you."

Must Supply Own Books

Pupils of public schools in Glasgow, Scotland, will not have free school books unless they are too poor to buy them. A sub-committee recommended supplying the books to all pupils next year, but the town council has voted down the plan.

Wireless Telephony

Will It In Time Supplant the Old Morse Code?

Wireless telephony has swept many much of the mechanism of the Morse Code. And now comes the news that its place in the British post office telephone system is being taken by the teleprinter.

But I think it will be a long time before they kill the romance of the Morse code in the public ear.

The first words ever tapped out by Morse were, "What hath God Wrought!" They were sent from Washington to Baltimore on May 24, 1844, by Samuel Morse, whose electromagnetic telegraph was regarded as a wild scheme until he succeeded.

The most important message sent transmitted was from a ship at sea. It was the "S O S" which signalled "Come Quickly, Danger."

But nowadays if an airman is in distress, he does not send out an "S O S." He just sends the word "Mayday" into his wireless telephone. That word is said to be a corruption of the French "M'Aidez" (Help Me).

No Premium On Gold

Vancouver Banker Has Edge On United States Citizen

A United States citizen presented some bills, silver dollars and several gold pieces at the Canadian currency at a Vancouver bank. He got 19 cents premium on the dollar for his bills, another on his silver and nothing on his gold.

He protested against the discrimination against gold in favour of paper. The banker explained: "Any more gold pieces are worth no more to us than Canadian gold pieces of the same face value." They cannot expect us to be content with less." Complete remission of the debts owed to the United Kingdom is dependent on complete remission by the United States. If the Anglo-American discussions resulted for instance in a final settlement of the war debts, capital sum "then our debtors must come and discuss with us on what terms and to what extent they are compelled to make down their payments to us."

And Great Britain, Britain of further payment Thursday, was out of the question, the Chancellor declared. It would have rebounded all over the world. "It would have administered a shock to the moral sense of our people," Mr. Chamberlain went on.

Any further payment would have to be met out of the current revenue and, the Chancellor proceeded, "the taxation in this country is sufficient to prevent any further acquiescence in the payment of inter-governmental debts which leave us with a liability over what we receive."

Warning For Hungry Marchers In Alberta

R.C.M.P. Move Down Strong Body Of Foodless Men

Edmonton, Alberta, Second warning to "hunger marchers" moving on Edmonton from all parts of the province in small groups has been issued by Premier J. E. Brownlee of Alberta.

Any Bolshevist on the part of agitators in carrying out the plan will be construed as a challenge to constituted authorities and will be dealt with as such, the premier declared. He reiterated orders had been issued to Regal Canadian Mounted Police to prevent the march at all points.

Organized allegedly by Communists in the Crows Nest and Red Deer Valley coal fields, the marchers were stated to gather in Calgary from southern Alberta points December 6 and march to Edmonton, joining others at Red Deer, half-way point on the 200-mile stretch to the capital. About half a dozen police information-card, recorded Calgary by truck and headed for Edmonton.

Opening Of B.C. Home

Victoria, B.C.—The British Columbia legislature will open early in February, it was intimated by Premier S. F. Tolmie. The premier will leave for Ottawa about January 10 to attend the unemployment conference of provincial premiers with Prime Minister R. B. Bennett on January 17.

Jobless Live Free Fishing

Unemployed Given Permission To Fish Without Licenses

Edmonton, Alberta.—Unemployed will be given free fishing licenses this winter, it was announced by the provincial game department. Applications will be received at the department's office here.

Fishing will be permitted in all waters except those in which the season is closed. Applicants will be required to produce a certificate from the relief officer in the district in which they live.

Bumper Fruit Crop

British Columbia Shipments Reach Record Figure

Shipments of fruit from British Columbia orchards this season have reached a record figure, it was announced by the provincial department of agriculture. Up to December 1 the total was 3,000,000 boxes, as compared with 2,500,000 boxes for the whole of last year.

Shipments of apples have been particularly heavy, and the total is expected to reach 2,000,000 boxes.

Death Of Senator Ross

Was First Member Elected In Yukon To Dole at Home

Victoria, B.C. James Hamilton Ross, Canadian senator and member of Mount Jan Ross, died at Victoria recently.

Senator Ross was 76 years old. He has resided with his daughter in Victoria for some months.

Hon. J. H. Ross, in celebrating his 78th birthday this year, was reckoned as one of the notable pioneers of the west, especially of his home city of Moose Jaw, which he had watched grow into one of the most important railway centres of the west.

He was the first member elected in Yukon to the Federal House of Commons this honor coming to him after 20 years of residence in the public life of that province, prior to the formation of the province of Alberta and Saskatchewan.

He was elected to the Northwest Assembly in 1888 and remained his seat until 1901. In 1887 he had been an unsuccessful candidate for the Legislative Assembly on the question of West Assiniboia. As a member of the territorial executive council he was treasury commissioner of public works and territorial secretary.

In 1901 he was appointed commissioner of Yukon territory, and in 1902 was nominated by the Liberal party for the Federal Yukon seat. In 1905 he took his seat in the House of Commons and September 30, 1904, was summoned to the senate.

Faith In H.B. Route

Scottish Shipping Interests Have Great Interest In Northern Sea Way

Saskatoon, Saskatchewan. Scottish interests are waiting for Canadians to take the initiative and show faith in the Hudson Bay route and there is a lack of interest in Canada's attitude to the other side of the Atlantic respecting the facilities at Churchill, was the message of Alexander M'Owan, Canadian National Railways agent at Glasgow, and one-time editor of the Saskatoon Phoenix, in an interview here. Mr. M'Owan recently returned to the city from Scotland.

Scottish people have a traditional interest in Hudson Bay, Mr. M'Owan declared, reminding his interviewer of the halcyon days of the great fur company when the bay was the gateway to all western Canada. All vessels faring northwest called at Scots ports and for generations the army of servants of the Hudson's Bay Company were recruited in the northern counties of Scotland's mainland and the island.

Withdraw From League

Mexico Intends To Drop Out Of League Of Nations

Mexico City.—Mexico intends to withdraw from the League of Nations, it was learned from a semi-official source.

Reason for the decision, it was explained, is the necessity for economy. An official declaration is expected from the foreign office.

The cost of membership, ranging from $60,000 to $80,000 a year, is considered too heavy to be borne by Mexico, which is now struggling to balance its budget, the unofficial source said.

British Russia Sentenced

London, Eng. Two of the three bandits who on October 19 slugged a postman into insensibility in front of Euston station and made a daring theft of a bag of registered mail were sentenced in Old Bailey. Henry Hartland, 29, and Ernest Hill were each sentenced to 15 months of hard labour and 12 strokes of the birch, while Frederick Harris, aged 47, was sentenced to six years in penitentiary.

Application Refused

Ottawa, Ont.—Justice A. L. Crockett, of the Supreme Court of Canada, refused an application for a stay of proceedings in connection with the deportation of 10 alleged Communists detained by immigration authorities at Halifax. As the case now stands, the men may be deported before their appeal to the privy council is disposed of.

Recipes For This Week

(By Betty Barclay)

SUGAR COOKIES

2½ cups special cake flour, sifted
2 teaspoons baking powder.
½ teaspoon nutmeg.
½ cup butter or other shortening.
1 cup sugar.
2 eggs, well beaten.
Grated rind 1 lemon.
2 tablespoons cream.

Sift flour once, measure, add baking powder and nutmeg, and sift together twice. Cream butter thoroughly, add sugar gradually, and cream together until light and fluffy. Add eggs, lemon rind, and cream, and beat well. Add flour, a small amount at a time. Beat after each addition until smooth. Roll into thin sheet on slightly floured board. Cut with floured cooky cutter and dredge with sugar. Bake in hot oven (425 degrees Fahrenheit) about 7 minutes. Makes 3½ dozen cookies.

PUMPKIN CUSTARD

½ cup stewed and strained pumpkin.
1¼ cups milk (or 1 cup milk and ¼ cup light cream).
1 package vanilla pudding.
¼ teaspoon cinnamon.
¼ teaspoon ginger.
¼ teaspoon salt.

Mix pumpkin with milk, ginger, and cinnamon; add milk, or milk and cream and stir thoroughly. Place mixture in bakeware. Add package pudding to remaining milk and cook until pudding is thick, stirring constantly. Pour hot pudding over pumpkin mixture. Bake in hot oven (400 degrees Fahrenheit) about 45 minutes. Chill and serve. Whipped cream may be added as topping if desired.

Jobless Live Free Fishing

Unemployed Given Permission To Fish Without Licenses

Edmonton, Alberta.—Unemployed will be given free fishing licenses this winter, it was announced by the provincial game department. Applications will be received at the department's office here.

Fishing will be permitted in all waters except those in which the season is closed. Applicants will be required to produce a certificate from the relief officer in the district in which they live.

Bumper Fruit Crop

British Columbia Shipments Reach Record Figure

Shipments of fruit from British Columbia orchards this season have reached a record figure, it was announced by the provincial department of agriculture. Up to December 1 the total was 3,000,000 boxes, as compared with 2,500,000 boxes for the whole of last year.

Shipments of apples have been particularly heavy, and the total is expected to reach 2,000,000 boxes.

BRITISH DEFICIT RESULTS FROM DEBT PAYMENT

London, Eng. Neville Chamberlain, Chancellor of the Exchequer, told the House of Commons that payment of Great Britain's $95,500,000 debt instalment will involve a budget deficit of approximately £29,500,000.

Opening the debate on war debts he was specific when he said the old regime of war debts and reparations interrupted by the Hoover moratorium was never be revived.

The agreements reached in Lausanne ended the existing system of reparations, he said, and "if the United States had been willing to send a representative to the Lausanne conference a final settlement might have been made on the spot."

The Chancellor argued insistently that Europe's recovery by implication recognized the connection between war debts and reparations because he proposed that all inter-governmental debts be suspended during the moratorium.

"It is an important matter," he said, "because it justified the statement in the recent British note that the initiative taken by the European powers at the Lausanne conference was taken with the cognizance and approval of the United States government."

And Great Britain stands by the policy of the clean slate and the famous Balfour note she does not want to collect the debts explained, any more than she has to pay her creditors.

But and there were cheers as Mr. Chamberlain added: "They cannot expect us to be content with less." Complete remission of the debts owed to the United Kingdom is dependent on complete remission by the United States. If the Anglo-American discussions resulted for instance in a final settlement of the war debts, capital sum "then our debtors must come and discuss with us on what terms and to what extent they are compelled to make down their payments to us."

And Great Britain of further payment Thursday, was out of the question, the Chancellor declared. It would have rebounded all over the world. "It would have administered a shock to the moral sense of our people," Mr. Chamberlain went on.

Any further payment would have to be met out of the current revenue and, the Chancellor proceeded, "the taxation in this country is sufficient to prevent any further acquiescence in the payment of inter-governmental debts which leave us with a liability over what we receive."

Director Of Navy

Vincent Massey, who has been appointed Chief Executive Officer of the Board of Management of the Navy, Army and Air Force Institutes commonly known as NAAFI. He succeeds Lord Irwin who resigned recently.

Fire Follows Explosion

Defective Furnace In Montreal Store Causes Heavy Damage

Montreal, Que. An explosion in the basement of a store followed by fire that swept through a night club and two other establishments caused damage estimated between $50,000 and $75,000

The force of the explosion blew out a wall of the building and left a passage for the flames which spread rapidly. A defective furnace is believed to have caused the blast

Firemen brought the blaze under control after an hour's work Several persons narrowly escaped injury. Traffic on Ste. Catherines Street east was delayed for some time.

Changes Predicted

New Business Methods To Be Developed In the Future

Vancouver, B.C.—The opinion that great changes are coming in business method, by the gradual failure of one system and the building up of another, was expressed by Hon. H. H. Stevens, Minister of Trade and Commerce, in an address under the auspices of the junior chamber of civic affairs. The change would not come by drawing up some blue print plan, but through thinking it out day by day, he said.

Received Third Payment

More Money For Southern Alberta Sugar Beet Growers

Lethbridge, Alberta. Santa Claus has been kind to the sugar beet growers of southern Alberta for on December 20 another payment this will be the third this fall and winter of $175,000 went out to the growers

With this payment the farmers will have received $675,000 for beets. The factory here has made 51,000,000 pounds of sugar to date and will be operating until January 15.

Denies Intention To Murder Ex-Kaiser

Red Letter To Be Inve Claims Man Caught In Castle

Doorn, Holland Heinrich Fuehrer, caught in the former German Kaiser's castle with a loaded revolver and a 12-inch dagger was turned over to German authorities after he had denied any intention to assassinate the ex-ruler.

Fuehrer a native of Neuss-on-Rhine claimed he entered Doorn Wasp to enter to deliver a letter to the ex-kaiser from Adolf Hitler German Fascist leader He armed himself Fuehrer said, as protection against possible attacks from dogs or servants on the premises.

He invaded the grounds by climbing fence, he at six occasions

It was recalled that Germans have frequently made efforts to enter the former kaiser's estate but this is the first time a man has been caught so heavily armed.

It was understood that the guard at the estate is to be strengthened with the additions of at least four men and several more police dogs.

Coal Gas Kills Three

Small Children Include Deadly Fumes From Stove

Ottawa, Ont While their foster mother and her four children slept peacefully in another part of the house three one-year-old children inhaled deadly fumes from a kitchen coal stove and died.

The little tots, all wards of the city, were under the care of Mrs. Malvena Mirouac, who ran a supervised boarding home to supplement the meagre income she received as a charwoman at the Dominion Government Building.

Mrs. Mirouac put her own four children to bed upstairs and went to sleep herself on a couch in the dining room. She was awakened at the usual hours of the morning and noticed a faint smell of gas.

Rushing to the kitchen she found two of the babies dead and called a doctor The third child was rushed to hospital but died soon after its arrival.

Its First Appearance

Canadian Broadcasting Commission Makes Initial Bow Christmas Day

Ottawa, Ont.—The new Canadian Radio Broadcasting commission will make its initial bow on Christmas Day as a purveyor of broadcasting service to the Canadian people. The Canadian section of the Empire broadcast, from London, will be under the direction of the commission. The broadcast will occupy approximately one hour, from 9 to 10 o'clock, 7 a.m. to 8 a.m. mountain standard time

Motorcycle Hits Ry Hotel

Winnipeg, Man. A bullet from a .32 calibre rifle crashed through a street car window and wounded Motorman-Conductor John Wurtbe in the arm.

Christmas Greetings

U. S. AROUSED OVER DEFAULT OF FRENCH DEBT

Washington A chorus of denunciation and a threat of punitive action seemed from the United States congress in response to the French government's decision not to pay its war loan instalment.

Meanwhile, in Belgium note giving notice that default of its $2,125,000 payment could be expected was made public by the state department and a Polish embassy statement indicated that country would not pay its instalment

Senators and representatives in quick succession gave vent to their feelings with remarks about ingratitude and lack of wisdom on the part of France.

Representative Harold Knutson, Minnesota Republican and member of the House of Representatives a resolution which would forbid entry into the United States of securities issued by governments that have defaulted on their debt payments, prohibit their advertisement for sale, and bar the banks of the United States.

Indications were lacking as to whether this or any similar proposal would be advanced any further.

At the state department Secretary Henry L. Stimson (Secretary Stimson's decision not to pay the $2,125 000 instalment, with that country's ambassador, Paul May. What Stimson told him was not made known.

The result of the French default expected here is that pending negotiations for a commercial treaty with that country, trade will come to a standstill. France was definitely regarded both in official, executive and congressional quarters as isolated by the parliamentary action.

Proposal Too Indefinite

U.S. Railway Workers Turn Down Wage Cut Reduction

Chicago. Railway brotherhood delegates rejected the proposal of the U.S. railroad managers that the deadline, next January 31, for the termination of the present temporary 10 per cent. wage reduction of rail employees be extended indefinitely.

Alexander F. Whitney, chairman of the employees' representatives at the joint wage conference, presented the answer of the brotherhoods to the executives at the opening of today's joint session. He made clear that labor would not accept any indefinite extension of the present wages, but would be willing to discuss an extension if a definite termination were fixed.

Hope For Future

Premier Bennett Refers To Benefits From Imperial Conference

London, Eng.—In an earnest plea before an audience of notables, Prime Minister R. B. Bennett of Canada urged that agreements grow ng out of last summer's Ottawa economic conference be considered by leader in the light of the hope they offered for the future than in that of present accomplishments.

Mr. Bennett spoke at an informal dinner in his honor which was presided over by Sir Robert Horne, a former Conservative Chancellor of the Exchequer

Wood For Trade

Calgary Alberta The Alberta relief commission, its chairman, A. A. Mackenzie announced, was willing to provide a sportsmen's club for unemployed youths between 18 and 21 years of age and to allow a portion of the city for educational training Mr Mackenzie said if any public organization took an interest in the boys the special camp would be set up

Schools Need Aid

London, Eng. Unless financial assistance is forthcoming for London's separate schools, the trustees may be forced to ask the board of education to take over the education of Roman Catholic children within a short period, according to an announcement by Albert H. Murphy, chairman of the board separate school board.

Editors Notes

A MERRY CHRISTMAS AND A HAPPY NEW YEAR

ANOTHER YEAR is smiling . . . one of difficulty and business perplexity for all of us. We thank our many friends in the town and the districtround, both old and new, for their loyal co-operation and assistance. At this Season of Peace and Good-Will, let us remember that the Spirit of Christmas is National Co-operation and Confidence—carried throughout the New Year will remove universal barrenness, positively benefit business relationships.

To you, therefore, whose trade and will become us—whose loyalty to us—whose confidence in us has contributed toward another year of publication, we extend our sincere good wishes and our thanks.

May this Christmas be the most joyful you have ever experienced, and the New Year your happiest and most prosperous.

Cordially yours,
THE FORT SASKATCHEWAN RECORD

The happy Christmas Season is at hand, the time for the exchange of tokens of affectionate remembrance. A smile of appreciation, a few words of help or anything that shows consideration for fellow-being is a gift of real value, which is the spirit of the end of life. The ancient Christmas greeting rings in the ears of us all at this holiday time. "Peace on Earth, Good-Will to Men". The message comes to us to-day from the shepherds of old. "Peace on earth", seems still the crazy, but each of us can do a little to hasten the coming of "Will to men. There is not one of us but is heartened by a friendly greeting or a cordial hand grasp and surely the most beautiful emblem is the celebration of the anniversary of the birth of the Prince of Peace in the giving of gifts prompted by a spirit of gratefulness for our many blessings and may His Blessings, Love, Peace and Good-will, abide with each one of our readers this Christmas tide.

We Wish You

A Merry Christmas and A Happy New Year

Hillcrest Hospital

Greetings

Christmas Greetings to you and yours, and may the New Year be bigger and more Prosperous than ever.

CHAPTER III

A Call To Vengeance

During that dash down the Mackenzie, Alan's thoughts were not enviable. . . . "They used Margaret Fourier as a means of making their getaway from the steamer. It worked so well then that they might try the idea again. They might try to capture Joyce and use her as a sort of hostage to protect themselves."

But somehow he did not greatly fear they would do this. He remembered the gun she always carried, his own gift to her on her twentieth birthday. A lean, automatic, a tiny thing like a toy, it nevertheless was blunt and effective as a terrier bulldog. That big red-bearded bandit who had threatened to put a bullet "square a'tween" the eyes of Margaret Fourier, would likely get one between his own if he tried any brutality with Joyce MacMillan.

To Alan it seemed pretty clear that Bill de Vos Kaska and Sandy Sinclair had made a mistake about those men being strangers to every one aboard the steamer. It didn't look possible. They knew this country, knew it intimately. It took years to learn the ins and outs of so huge a region. But they knew.

Alan concluded: "They aren't strangers, of course. Bill just made a mistake."

Half-hidden between two blanket packs Constable Whipple sat fingering his rifle, peering ahead anxiously, as though at any moment he expected to meet the outlaw canoes here on the Mackenzie. Alan watched him with something of scorn in his eyes. Whipple was constantly spying upon the other men, informing with his glances, reporting everything that happened and a lot that did not.

Forty miles below Embarrass, creeping near to shore around a great bend, Alan looked ahead and sighted the Midnight Sun out in midstream, plowing steadily up south. At his gesture Pedneault reserved the launch and sneaked its booming speed, and Bill began unloading one of the canoes. As the two craft drew nearer, Alan rose up and signaled that he wished to come aboard the steamer. The boat stopped, a ladder was let down. Paddling across in the birch-bark, he and Bill hurried up on deck.

Margaret Fourier was safely back on board. Several of the men, hastily patching one of the smashed canoes, had followed up the Akosha a mile and found her on a willow island where the bandits had set her off.

When Alan came on deck, almost his first sight was of Jimmy Montgomery's little girl, perched upon a pile of cargo, showered with care and attention from every one. As he glanced at the tiny golden-haired tot, Alan thought of her mother dying less than a year ago, of her young father out down today by an outlaw's bullet—and he had a swift vision of the blank orphanage, the friendless and homeless life, which lay ahead of her, now that Jimmy was dead. He was not deceived by the attention she was getting now. Every one was all sympathy for her today and that would cool mightily quick. And then she'd be thrown into some orphanage, maybe along with half-breed and Indian children. Alan thought, "She's Jimmy's child; Jimmy was my partner, it's up to me to do something about her."

With nothing more definite than this in mind, he directed Ashnum, the white-haired skipper "You put her off at Embarrass tonight. You hear me, Elizabeth. Say I'll be back in two or three days."

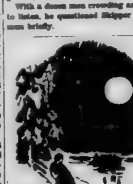
Following up the old captain, he stepped softly, hat in hand, into the well-fitted cabin of the steamer. He remembered Jimmy as a trail partner and a quiet genius and had the most utterly rueless man he had ever known. Steam alone he owned through the berth looking down for the space of half a minute. And at heart, he was thorough. Why had it been Jimmy who was cut down?—a young man, a young father, the best and bravest of them all.

Then like a small whisper in his ears, a thought came, edged with pain in Jimmy and the manner of his death.

"You were the only one who drew a gun. You knew they'd kill you if you did. Jimmy acted at rides; but you stood up and shot. You were always that kind; and so was Curt. Now you've both gone; now I'm alone, of us three—"

The desolation was unbearable. Bill following, he turned and went out of the cabin, into the sunshine of the deck. A grim mood had come over him, a mood shot through with personal and deadly intention. He was no longer merely the stern and official representative of the law. Vengeance, a burning and righteous vengeance, had entered his heart.

With a dozen men crowding around to listen, he questioned Skipper Ashnum briefly.



Joyce Tried to Pray That Alda Was Not Leading This Patrol.

"Bill said these men were strangers. That can't be. Didn't you recognize them at all? Haven't you got some idea who they were?"

Alan, I positively never seen a man of 'em till I looked up and there they stood p'inting their weapons at me. And I was just about everybody that goes up and down the river."

"And they knowed the lay of the land like a book," another man spoke up. "That's the queerest part of it."

Alan was fairly staggered. Bill had reported accurately. The men were strangers.

How under heaven could six men enter this country unknown, unseen? Then, granting they had, granting them strangers, how did they come to know the lay of the land so perfectly? —where to strike, when to strike, how to escape by a straight shoot to their operative refuge, the Thel-Aunah.

In all his years of police service he had never met quite so dark a circumstance as this.

As he and Bill went down the ladder, the rail was lined with people wishing them a quick capture, wishing the criminals a swift and speedy justice. Alan did not hear, did not care. But as he stepped into the [illegible] he saw Joyce MacMillan coming toward the launch, he did hear [illegible] voice warn him the steamer and it rang in his ears like a crash of evil prophecy

"Going after men like them, Alan Baker, you'd better take your luck [illegible]

• • • • • •

At the MacMillan trading post Joyce had lighted candles in the kitchen and trading hall. Though she hardly knew just when her father would return from his run-hopping trip, she had kindled a comfortable fire in the bedroom and had prepared a supper of scones and breaded moosemeat and willow ptarmigan which she herself had shot that morning.

As she stood tiptoe at a pantry shelf, away from the crackle and rough of the cook stove, she heard [illegible] and [illegible] in the night. She went [illegible] low and there heard it more distinctly a faint drone that rose and fell with the ground winds drifting out of the upreach.

The pursuing sound drew louder, plainer. Then suddenly Joyce knew. The police launch! coming up the Big Akosha. Coming slowly because of the treacherous channel, but driving on through the twilight in spite of the [illegible]

That launch went out only on matters of importance. And this patrol must be very important, to bring it down from a perilous river at this hour.

Throwing a cape about her shoulders she ran through the trading hall, out into the sharp pine-scented air; down to the canoe landing at the stone head.

As she stood on the mud-flinted planking, with the whispering breeze molding cape and dress closely about her vigorous young body, Joyce tried to pray that Alan was not leading this patrol. Her girlish pride was crying out that she did not want to see Alan Baker. Her rational mind was warning that it would be better for her if she never saw him again at all. But no pride or rationalizing could beat down the secret throbbing expectancy of meeting Alan, of hearing his voice, of—he was coming—soon.

Through the whole long winter Joyce had been slowly realizing that her return to this northern Waterways country had been a terrible mistake. Once she had been away, free of it all. With the true instinct of colonial Britons for their children, her dad and mother had sent her out to school, a solid old English institution in Ontario. When she finished she quickly hunted up a job for herself, a place with a government bureau, where her knowledge of Indian languages and customs made her uniquely valuable in preparing pamphlets for the far northern agencies. Independent, earning a good salary, with friends and sports and work she liked, she had given up all of it and returned to this isolated fur post on a sub-Arctic river.

Her mother had died, and her father, alone, crushed by the relentless competition of big companies out to "get" him, had morally gone to pieces. Alan in his letters had written her the sorry facts. Her duty, clear as a call, had spoken to her. "If you return, you may be able to stop that; you may help Dad back to where he was." And she had come.

She knew that other folk were surprised at her loyalty, and thought her foolish, and were shrugging shoulders at the hopelessness of a mere girl trying to lift Dave MacMillan above the whisky and Indian-woman life he had made his. But Joyce did not consider it foolish, and she could see no great loyalty about it. Whatever his demoralization now, her father had been the best of fathers to her. Looking at him not as a father but as a man, she could realize, in her own unusual mood, that he had been the best of husbands to her mother. She felt it was her mother's death; the inconsolable tragedy of God withdrawing his hand, which really had broken sturdy Dave MacMillan.

And Joyce was beginning to realize, as the slow months passed, that her patient battle was anything but futile. Slowly, so slowly that only she herself could see it, she was winning her struggle, she was lifting her father out of his bewildered demoralization. If only she were given another season or two, she could salvage his life.

(To Be Continued.)

A Family Of Leaders

Lyttons Have Served Every British Church Since Henry IV.

Not the least interesting point about the Lytton succession's report on Japan's doings in Manchuria is the fact that a Lytton was chairman. Lord Lytton is a member of that older British aristocracy which has always accepted the responsibility and duty of public service that is supplied by authority.

The Lytton family has been serving every British monicon since Henry IV.; each generation has contributed its talents, such as they have been, to the state. And in this it is no different in tradition from such other great governing families as the Cecils, the Stewards, the Sackvilles, the Spencers and the Churchills.

Changes are proposed, are accepted and are finally discarded in favor of other changes. An Indian nation develops into a great empire; that empire, in turn, undergoes profound changes; that empire decides to enter into an experiment in Intercontinental such as the League. Always, with a consistency that is astonishing, these great families continue to produce their share of leaders. It may seem a little extravagant to say so, but we suspect that were revolution to come to Great Britain a Lytton, a Sackville or a Cecil would be found as mechanical adviser to the chief commissar.

THE RHYMING OPTIMIST

By Allen Mackenzie

LATE AFTERNOON

Eastward shades are stealing longer
On the meadows at our feet.
Mist is rising from the water
And the thought of rest is sweet
As the day is growing older.
Lake a rose that slowly fades,
And the creeping shadows, bolder,
Mount above the quiet glades.

Slowly wanes the careless rapture
Of the heart like waning light,
And no longing can recapture
Life's first ardor, youth's delight;
But the joy of youth still lingers
As remembered roses glow
After Time has laid cold fingers
On the garden, crushed the snow.

Though the past's triumphant legions
Now in silence mount retreat,
Peace has touched these twilight regions,
Where the thought of rest is sweet.

War Spirit Exists

The World in Need Of a New Spirit Of Confidence

"What the world needs is a new spirit of understanding and confidence," said Dr. C. W. Gordon (Ralph Connor), on arrival after a visit to Geneva.

"We are still living in the spirit of the war, and though there are hopeful signs that we are awakening to new ideals, we still have a long way to go."

Five weeks of his tour he spent in Geneva, where he followed the League of Nations.

"While the world awaits sensational action on the part of the league, insist questions as the war—Japanese [illegible] in Manchuria," he said, "the statesmen at Geneva are carefully considering the implications of a mere girl trying to lift Dave MacMillan above the whisky and Indian-woman life he had made his. But Joyce did not consider it foolish, and she could see no great loyalty about it. Whatever his demoralization now, her father had been the best of fathers to her. Looking at him not as a father but as a man, she could realize, in her own unusual mood, that he had been the best of husbands to her mother. She felt it was her mother's death; the inconsolable tragedy of God withdrawing his hand, which really had broken sturdy Dave MacMillan.

And Joyce was beginning to realize, as the slow months passed, that her patient battle was anything but futile. Slowly, so slowly that only she

There is NO ODOR from FISH or from Vegetables cooked in CANAPAR

Boiled, or steamed, fish tastes as fine and mild, and vegetables as sweet as they should be, when you cook them over Canapar Paraffinoid. No odor to taint the air, no steam to cause you to clean and disinfect.

And vegetables are simply delicious. Cook 4 times as long as you usually do, if you like the taste just over once. Cook 4 times as long as the recipe says, if you like your cooking just plain overdone. No pan-scraping afterwards.

Canapar costs 25 cents for 2 large sheets. You can cook three dinners, especially fish or vegetables, with that much. Makes a perfect wrapper for sandwiches; it is silky, strong, and doesn't spoil easily.

Special Offer

CANAPAR is made by the makers of the famous PARAFFINE Wax used at Peace in the Green Box, sheet preserving, druggists and dairies. Canapar costs 25 cents per 2 sheet box. Cheaper at 5 cents each but if yours hasn't stocked Canapar, send to the makers direct. We will send you a new and unique book entitled "Leftovers", containing 100 tested and delicious recipes on a budget for your trouble.

Accepted Paper Products, Ltd.
Toronto, Ont.

Enclosed find 25c for which please send me one full size package of CANAPAR COOKERY PARCHMENT and your 100 recipes for "Leftovers".

Little Helps For This Week

"In the morning thou shalt see the glory of the Lord."—Exodus 16:7.

"Serving the Lord; rejoicing in hope."—Romans 12:11.

Every day is a fresh beginning, Every morn is the world made new. You who are weary of sorrow and sighing,
Here is a beautiful hope for you;
A hope for me, and a hope for you.

—Susan Coolidge.

Be patient with every one, but above all with yourself. Do not be disturbed because of your imperfections, and always rise up bravely from a fall. . . . You can make a daily new beginning, and there is no better means of progress in the spiritual life than to be continually beginning afresh, and never to think we have done enough.—Francis De Sales.

Because perseverance is so difficult, even when supported by the grace of God, therein is the value of new beginnings. For new beginnings are the life of perseverance.—H. R. Fussy.

Persian Rains imparts a rare charm and distinction to the women who use it. Fragrant as a flower, delicately cool to the skin, it erases signs of complexion delightfully young and lovely. Indispensable to every dainty woman. As a powder base for any complexion, or as a beautifying lotion, it is unrivaled. Tones and stimulates the skin. Recommended by a nurse and makes the hands flawlessly white. . . .

Abandon Submarine

British Sink M-2 With Nod He Salvaged, Admiralty Decides

Attempts to raise the British submarine M-2, which sank off Portland race, January, 1925, with the loss of 14 lives, finally was abandoned by the admiralty after months of vain toil.

Salvage ships succeeded in getting the stern to the surface, but officials in charge decided they would not be able to bring up the bow. The M-2 will sink back to the bottom of the channel to make her grave in the mud and sand there.

NO INCREASE IN APPLE RATES

Word that the railways will not put into effect higher freight rates on bulk apples from B.C. for another four months has been received by A. Chard, Freight rate supervisor for the Alberta Government.

CARD OF THANKS

Mrs. O. Hunt and family wish to thank their many friends in Fort Saskatchewan and district for the kindness and sympathy shown during their recent bereavement.

OBITUARY

MRS. THOS. CRANSTON

Mrs. Chas. Cranston of Sarnia, Ont. died Tuesday, Dec. 13th, at the age of 69 years. She leaves to mourn her loss, three sons and one daughter Dave, Geo. and Walter Cranston, of Fort Saskatchewan and Mrs. Penney of Fort St. John, B.C., also three daughters and one son of Sarnia, Ont.

FORMERLY RESIDENT HERE

Word has been received that Commander Clifford Howie, Royal Navy, a brother-in-law of Mrs. R. Gordon Fraser died at Torquay, England on November 20th.

The late Commander Howie was one of the few Naval officers who was in the three major engagements of the War of 1914-1918. At the Battle of Helgoland in the early days of the War he was Lieutenant-Commander on the H.M.S. Southampton; at the Battle of the Dogger Bank he was Commander on Admiral Beatty's Flag-ship H.M.S. Lion when she sank the German Battleship Blucher and at the Battle of Jutland he was Commander on the same ship. Mrs. Howie is well-known to a number of local people having spent a lengthy holiday here some years before the outbreak of the war, she then being unmarried.

Commander Howie had been in poor health for some years.

MR. L. D. O. HUNT

We regret to announce the death of Mr. L. D. O. Hunt of Fort Saskatchewan on Friday, December 16th, after a lengthy illness. He is survived by his wife, two daughters, Mrs. Alida Gagnon and Mrs. Steve Lendrum of this neighborhood, two brothers, Henry and John of Minnesota, U.S.A., and one sister Rose, also of the U.S.A. thirteen grandchildren and four great grandchildren.

Mr. Hunt was well known and highly respected in this district, having farmed at Sturgeonville for about 35 years. He has lived in Fort Saskatchewan for the last six years.

The funeral services were conducted by the Reverend Father Clement on Monday, December 19th, at the Roman Catholic Church, Fort Saskatchewan. The interment took place at Lamoureux Cemetery.

Municipal District Holds Busy Council Meeting

On account of the volume of business to be transacted, due in a large measure to the work of the Court of Revision mentioned by the triennial assessment, the Council of the Municipal District of Clover Bar, No. 317, found it necessary to hold two meetings in one month, the 20th and 21st of December.

The Secretary submitted Orders from the Board of Public Utility Commissioners covering the cancellation, in part, of the sub-divisions of College Heights, Hedgeland, Ridgeway Park and Terrace Heights. The Council consented to an exchange of property with Messrs. Hanson Bros., Montreal, in the sub-division of Ridgeway Park as suggested to the Board by the Secretary.

The appeal of the C. P. R. regarding the assessment placed on its Right-of-Way in the District and the water supply scheme at Elk Island was heard by the Court of Revision. The Company's case was argued by Mr. H. L. Pratt, Tax Agent, Winnipeg, and Major Miller. A slight reduction was allowed on the area contained in the Right-of-Way in order to bring the assessment in line with the values placed on adjoining lands. The assessment placed on the pipe line had previously been struck off the assessment roll, and the assessment placed on the dam structure is to go before the Alberta Assessment Commission for decision due to the technical wording of the Act. Considerably time was spent with the appeals of the mine owners. Each mine was represented, with Mr. Reid of Lymburn & Reid as their counsel. Conflicting opinions as to the interpretations placed on the various sections of the Act covering the assessment of improvements, was again the stumbling block. It was finally agreed to compromise on the valuations of each mine to the satisfaction of both parties. A number of appeals against the valuations placed on some twenty quarter sections were heard. Slight reductions were given in a few cases but the majority were disallowed and the assessor's valuation sustained.

Several applications for direct relief were received and the Secretary was instructed to forward same to the Department for consideration.

The financial condition of the District was discussed, particularly regarding school requisition payments. While it did not appear possible to make payment of all amounts before the end of the year satisfaction was expressed at the payment in full of the bank loans for municipal purposes.

Hospital accounts received the usual discussion and payment was authorized in one case.

The Secretary's salary was reduced by fifteen dollars a month, effective 1st January.

With the reading of correspondence and the passing of paysheets and accounts the meeting adjourned.

SHETLAND PONY KILLED WHEN STRUCK BY TRAIN

Tragedy that stalked abroad on Christmas Eve, completely ruined the Yuletide celebrations of the Truby family at Fort Saskatchewan. It was by the cruelest stroke of fate that the popular, faithful and beautiful little Shetland pony of the family was struck and killed by a train while in the performance of duty.

As was her custom, Miss Irene Truby set out with the pony on Saturday evening to deliver Christmas presents. She stopped at a friend's home and went in with a series of parcels.

The pony was left as usual and trotted on to meant for Miss Truby thinking it would do anything but remain where she left it.

However, while she was within, something startled it, as it moved and strayed onto the railway crossing nearby.

Probably fascinated by the approach of a fast freight the pony did not move off the tracks and was struck. being thrown a long distance by the heavy, fast travelling train. Parcels were scattered in all directions.

The little pony is widely mourned, not only by the Truby family, but by most residents of Fort Saskatchewan as well.

With The Curlers

In a few days another popular New Year's Bonspiel will be sponsored by the Curling Club.Each year this get-together has proven a huge success and as well as providing sport and amusement for members and their friends, it affords a great deal of enjoyment for onlookers. January 2nd will see the various rinks battling for supremacy and incidentally the prizes for the occasion. The spiel will be open to all members and their friends who wish to curl. Those desiring to do so have your names in by Friday noon, December 30th.

The following will be planned to hear from you and enter your name. J. S. Wright; R. W. Hodgins; J. E. Graham and J. Lapeaute, (caretaker).

The entry fee will be $1c. Let's get together and make this the best and most enjoyable spiel in the history of the club.

On Friday evening, December 30, will see the Curlers and their friends go into action at the Ball of the season. You can rest assured that in and out-turns, to say nothing of drawing the old narrow part, will be some of the many features of the evening's activities. A delightful evening is promised and everyone can look forward in anticipation of the best dance of the season. All Curlers are urged to get behind this undertaking to make it one rip-roaring success.

Car Totally Damaged By Fire Last Saturday

While using a blow torch to warm up a cold engine, fire started in the Interurban Car owned by N. Beake on Saturday afternoon shortly after 1 o'clock in front of J. Karrass house, where Mr. Beake is visiting.

The car is a total loss and is partly covered with insurance. The Fort fire bridage responded to a call, but due to the inflamable material of the interior of the car it was badly burned before they arrived.

19 Years Ago Today

Thursday, January 1st. 1914

Const. Cecil Ward R.N.W.M.P. returned last Wednesday from a pleasant trip to England.

Harold Jackson, Roy Walton, students in the Alberta University, Gerald Ayton Alberta College, and Burt Walton, are all home for the Christmas holidays

On New Year's the Pennant hockey team of Edmonton met the Fort here in their second league game.

Mr. C. Brenner, "The Mount" Brenner, lost his valuable race horse, Ben More, by distemper, on Christmas Day. Ben More was the Derby of the Edmonton races and was pronounced [illegible] horse in Alberta.

Varsity won from Fort in fast game of hockey on Christmas Day, score being 4-3.

Taken from a newspaper dated Thursday, November, 29th, 1907

During the past week we have been handed two copies of newspapers published in Fort Saskatchewan, one dated Thursday, November, 28th, 1907, and the other Thursday, Dec. 5th, 1911. Tuesday we will endeavor to give to our readers some of the most interesting items that appeared in the copy of Thursday, November 28th, 1907.

The paper was published under the heading of "The Fort Saskatchewan Reporter. With Mr. W. A. Pratten, Editor and Manager.

The Provincial Telephones are connected up and working to Lloydminster.

The Town Council consisted of:—Mayor, H. E. Daniel, and councillors, G. T. Montgomery, E. Simmons, D. Simmons, and G. O. Bates.

Constable Blythe, of the R.N.W.M.P., and Dr. Field down to the scene of the tragedy near Gibbon to investigate the Bolton suicide.

The Fort Curling Club held a meeting last Friday night and elected skips for the coming season as follows:— Major Strickland; J. W. Shera; F. A. Walker; C. H. McAvoy; D. H. McLean; G. O. Bates; M. Donald; and W. A. D. Lees.

Mr. E. Simmons, caretaker at Elk Park, reports feeding 200 buffalos.

Grains prices as follows: No. 1 Northern 84c; Oats 35c; Barley 35c; Hogs were selling at 4 to 4¼ per lb.; Beef 2 to 2½; Butter at 30c Eggs, fresh at 35c; and new potatoes at 60c per bus.

LOCAL NEWS

The Editor and Mrs. Neale spent the Christmas week-end in Edmonton.

oooooo

Mr. and Mrs. F. H. Walton and family spent Christmas Day at the home of Dr. and Mrs. R. A. Walton of Stony Plain.

oooooo

Mr. and Mrs. F. W. Smith spent Christmas at the home of Mr. and Mrs. Scoggs of Clyde, Alberta.

oooooo

Miss Meta and Elsie Graham of Edmonton , spent the Christmas holidays with their parents Mr. and Mrs. Jas. Graham.

Mr. J. C. Beaton and Mr. Adam Dobbie both of Edmonton spent the festive season with Mr. and Mrs. James Graham.

HOCKEY

The Fort Hockey team lost a close game to Lamont on Tuesday last, the score being 5-3, but reversed this score on Chipman on Friday to climb back into second place in the league, one game behind Lamont. Chipman is in 3rd place and Bruderheim holding down the caller position.

The local team tied Lamont at 3-3 in an overtime exhibition game played here on the holiday.

The fans have been turning out more each time a game is played here and the team is certainly playing good hockey.

The locals play an exhibition game with Hudsons Bay of Edmonton, here tonight(Wednesday), then they go on a road trip—playing at Bruderheim on Thursday night and at Lamont and Chipman next week.

The club are negotiating with Markerville and Lacal from the Northern Alberta league for a series of home and home games to show the fans just how their team compares to those in other towns.

CARD OF THANKS

I wish to thank all friends who so kindly helped me win the first prize in the New Doll Contest at Smith's Drug Store.

Marie McClellan.

Paying The War Debt

Great Britain's war debt to the United States was the subject of a recent article in this column in which it was pointed out that that debt was contracted by Britain, not to finance its own war requirements, but in order to enable it to bolster up its Allies who had rendered the end of their financial resources. The fact was further noted that the United States did not lend gold to Britain for this purpose, but extended credit for the purchase of supplies of all kinds in the United States, thus providing employment at high wages for United States workmen and producers, and very large profits to the people of that country out of the high war prices then prevailing. Attention was also drawn to the fact that, following the war, the United States insisted upon repayment of these credits in gold; that it refused to accept goods and services from Britain; and that, to prevent the possibility of repayment being made in goods it raised its tariff to prohibitive heights, thus largely shutting out British goods.

The further fact was noted that Great Britain had made a gallant attempt to meet all its obligations to the United States in gold, even under these almost impossible conditions, impoverishing its own people in so doing, and finally being forced to abandon the gold standard, while at the same time in order to prevent the complete collapse of Europe it agreed to practically wipe out all payments due to Britain by Germany, in consequence, we submitted, that the time had arrived when Great Britain, through her many longer to make payment in gold, should say to the United States that, while it was in no sense repudiating its debt, because of the impossibility of continuing gold payments it would refrain from making any further payments except in the same manner as the United States provided the credit, namely, in goods and services.

The particular article came to the notice of a paper published in Montreal, which reproduced it in full, saying it was more favorable in its presentation of the British viewpoint than others, and that, in many ways the viewpoint expressed was reasonable enough but in other ways unintelligible to the U.S. citizen. Then, in a friendly way, this U.S. paper refers to the fact that "England seems able to devote some 400 millions annually to military purposes yet means pitifully at the thought of paying one-fifth of that sum on her debt over here." It then refers to France's expenditure of 541 millions on her war machine, Italy's 231 millions for a like purpose, etc.

One can, of course, appreciate this point of view on the part of U.S. people, but the fact must not be lost sight of that Great Britain has reduced her military expenditure to a greater extent than any other country, that, with a world-encircling Empire she is spending less, not only proportionately but actually, than the United States, much less than France, and that she is to the foremost advocate of disarmament in the world today. Be it noted, too, that the one-fifth payment mentioned by the U.S. paper has to be met from every six months, therefore it is actually equal to two-fifths of Britain's military expenditures. Furthermore, the military expenditures do not have to be met in payments of gold, but in pay to thousands of soldiers and sailors, clothing, food and equipment for them, thus maintaining thousands of families that would otherwise have to be supported by relief expenditure. But Uncle Sam requires supplies of any and all kinds and demands gold, nothing but gold, which Britain no longer possesses in the quantities required because it is now stored away in vaults in the United States and France.

The U.S. paper says further that people outside the United States are prone to forget that some years ago the United States scaled down the amounts due by all its debtor nations. True, but in the scaling down what happened? We have before us a statement of the amounts owing by all nations to the United States prior to the payments of December 16. It shows that Great Britain owes $4,600,000,000 principal and $6,300,963,000 interest. That is, in its bargain with Britain the U.S. is to collect interest nearly one and one-half times greater than the principal sum. But in the case of France the U.S. asks only $2,523,674,000 interest on a principal debt of 4,025,000,000, vastly in the case of Italy with a principal debt of $2,042,000,000, the U.S. asks only $277,600 in interest.

Or lumping all the debts together, the principal amount is $11,522,354,-000, of which Britain and France each owe approximately one-third, while the interest amounts to $20,021,185,000, of which amount Britain is called upon to pay $11,858,000,000, or over two-thirds of the total. Why, we submit, it may well be asked, is the fairness in such a form of scaling down or of bargaining?

Yet Britain is the one nation that is making the most determined effort to pay. It has not defaulted one payment, or one dollar. It has never even hinted at repudiation. All that was suggested in this column was that the United States give it a chance to pay in goods and services instead of gold, seeing that it is now utterly impossible to continue payments in gold, remembering that the United States did not lend gold to Britain but granted credits for goods and supplies of all kinds purchased in the United States, which business added enormously to the wealth of that country and to the whole republic, and a goodly percentage of which was actually paid to the United States Government in the form of income and other taxes imposed on the wealth thus created by Britain's purchases.

If the United States objects to any revision of the debt refunding agreement made with Britain; if it still persists in a tariff policy which makes it impossible for Britain to pay in goods and services, and insists on gold payments and gold only, then we repeat, Britain will be fully justified in withholding gold payments,—which it is impossible for her to continue to make,—and let the debt stand until such time as the United States changes its policy.

If one man owed another for goods he had obtained from him and found, owing to circumstances entirely beyond his control, that he could not pay in cash but offered to pay in goods or other property he possessed, then every person would say the creditor should accept what the debtor was able and willing to pay; that it was the sensible, the business-like thing to do.

Apple Has Bad Pun

Clingstone—elect F. H. Shermaher, Farmer-Laborite, after 13 years of amateur experimenting—barbanking as he terms it—in his back yard at Appleton, Wis., where he used to live, produced a russet apple with a pun.

Unwillingly Received

Friend: "Why are you so jubilant?"
Country Editor: "I just received unasked free contribution from Farming as he terms it—in his back yard or Brown's pan."
Friend: "Huh! What was it?"
Country Editor: "A fine fat pig on subscription."

Looking For New Job

Lord Mayor's Bread Chef Has Enjoyed Year Of Hard Work

F. G. Bowles, chief of the Mansion House kitchen in London, England, has doffed his tall, white chef's hat and cheery coat and said goodbye to the Mansion House. All through Sir Horatio Bottle' years of office as Lord Mayor, Mr. Bowles has presided over the kitchen. "It has been one of the hardest and happiest years of my life," said Mr. Bowles. "Bottle is only 37, and is looking for fresh cooking worlds to conquer. He pointed to a 350-years-old table in the kitchen and to the huge coal cooking ranges on which, if need be, he can prepare meals for 1,000 people at once. The King and Queen dined on chicken and soft paper pulp, thoroughly impregnated with a bakelite formulae poison, and absorbs dirt instead of spreading it. Appleby-Lowther Paper comes in handsome packages, twenty-five sheets, each as large as a duster. You merely crumple it sheet into a ball, wall, and go over the surfaces requiring attention.

You'll be amazed at the quick and lasting result in Wonder Paper dirt. When one rolls in warm and soiled, simply turn the paper inside out. Just the furniture or woodwork has been gone over you can still use your Wonder Paper on the floors.

And when you're through—throw it away. No duster to shake out or wash. No bother at all. The most obnoxious part of housework is half the fun and with half the effort. Doesn't the idea appeal to you?

Game Warden's Fish Story

Salmon On Fireside Bread Made 10ins Stop Car

Game Warden C. M. Pike, of Vancouver, has a new fish story and he sticks to it. He says that while driving his automobile along the Base Road, near Cloverdale, ten miles east of New Westminster, he had to stop to let a salmon pass.

"I was driving along the flooded section of the road and noticed something coming down the middle of the road ahead of me," related Pike. "I halted the car and waded along through the water to see what it was. Sure enough, it was a big salmon making slow progress along the road. When it saw me, of course, it spurted away, so I couldn't bring it home for supper and evidence."

Thousands of acres in the Fraser Valley are flooded as a result of recent floods. Mild weather melted the early snow above into a mat, wall, and, over the surfaces requiring attention.

You'll be amazed at the quick and lasting result in Wonder Paper dirt. When one rolls in warm and soiled, simply turn the paper inside out. Just the furniture or woodwork has been gone over you can still use your Wonder Paper on the floors.

DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women rule that clothes a nuisance to use and to wash

MUCH PREFER APPLEFORD

Among the many new lines of inquiry which are now being followed at Rothamsted, the oldest and best agricultural station in the world, is the life of the bee; and some very curious facts have been, if not finally discovered, at any rate tested and illustrated. . . . The bees in every hive enjoy progressive employment. They begin as housemaids, they are promoted to be nurse-maids and convert as housekeepers, or at any rate as caterers. The system works very smoothly up to a point; so long as the promotion follow at decent intervals, all goes smoothly; the hive is at peace within itself and social service has no let or hindrance. Trouble makes its appearance only when the supper ranks are filled and promotion is blocked. Unrest is the comes general. Revolt is threatened. Its rumors reach the cosmos of the queen. Perhaps she notices that rival queens are coming on in the hive; she "pipes," listened the cooper and we figure it out—and unpipe booklet entitled "Leftovers," containing one hundred recipes, as a bonus for your trouble.

Wood Preservation Problem

Creosote Treatment Is Subject Of Investigation By Scientific Tests

With the increasing use of wood as a material in extending the life of wood structures, problems are constantly being encountered the importance of which could not have been seen in the early days of the development of this practice. One such problem is the "bleeding" of timbers after impregnation with creosote. By "bleeding" is meant the exudation of creosote to the surface of the timber, sometimes with such excessive flow as to cause the timber to appear covered with oil. In the case of telephone poles on city streets "bleeding" may be a source of considerable annoyance. The Forest Products Laboratories of Canada, Forest Service, Department of the Interior, are investigating this problem, and at present have a large number of poles under observation. These were treated under pressure by several different methods, and it is hoped to be able from these experiments to determine the treatment most effective in preventing "bleeding."

It Will Relieve a Cold—Colds are the commonest ailments of mankind and of neglected many lead to serious conditions. Dr. Thomas' Eclectric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attacks. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

Stands Air Proof Service

Air ferry service will connect the Isle of Wight with the mainland of England beginning this summer. Multi-engined 'planes will be used, and the trip will take only seven minutes. The airports will be at Ryde, Isle of Wight, and Portsmouth, England, and connections will also be made with London. Intervisibility air and rail tickets will be supplied.

Cotton and artificial silk material that cannot crease or wrinkle is now being made by a new manufacturing process.

Many New Lines Of Inquiry Have Brought To Light Curious Facts About The Honey Bee

Poultry Statistics

Average Cost Of Egg Production Per Hen Figured Out

Under normal conditions it takes 57.5 eggs to pay for the cost of feed for a pullet during the pullet year, figures supplied by the Dominion Experimental Station at Lennoxville, Quebec, show. As this figure is arrived at from an average of twelve years' results it is of more than ordinary interest. The number of eggs required to pay the cost of feed per bird varies, of course, with prevailing market prices from year to year. During the period of the report it has ranged from as low as 50 eggs to 1922 to a peak of 69 in 1928, while it took 51 to pay the feed cost in 1931. It is also interesting to note that the same coat study shows that an average of 21 eggs is sufficient to pay the cost of feed per bird during the winter months only.

943

A WHITE SCARF COLLAR THAT YOUTHFULLY BRIGHTENS A BLACK CREPE SILK DRESS

The round yoke and puffed sleeves do even more. They lend that smart Victoria influence so important this season.

Black crepe romaine is adorably smart. Won't you?

And note the youthful sash.

It will cost you a very small sum to make it.

Cretonne-red rough crepe silk with black trim, grey with brown and purple with fuchsia-red are snappy combinations.

Style No. 943 is designed for sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Size 16 requires 3¾ yards 39-inch with ¾ yard 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Losses In Bond Street

Queer Things Would Happen If Free-lumber Exercised Rights

A writer in the London Morning Post tells this one: I met a man today who has just been negotiating for the acquisition of some property in Bond Street. He told me that when he examined the draft lease he discovered to his astonishment that one of the clauses provided that he should give an undertaking to allow the freeholders of Westminster to drive their cattle and herds over the property "without let or hindrance." Similar clauses, I understand, are to be found in the leases of many of the properties in the neighborhood. It would be interesting to see what would happen if one of the freeholders of Westminster decided to exercise his right. The spectacle of somebody poor attempting to drive a flock of rebellious sheep through the front door of a Bond Street beauty parlor could scarcely fail to be a diverting one.

What Insects Eat

Some Are Particular and Others Will Eat Anything

Grasshoppers are vegetarians, but eat almost anything that is vegetable; walking-sticks and crickets are as universal in their tastes as are cockroaches, that weird insect, the praying mantis, is an insect-eater, but will eat any insect even her own mate. The solitary wasps, that provide for their young by leaving a sting-stunned victim in the cell with each egg, have specialists in this connection, though here again we find degrees. Some will take nothing but spiders, others prefer caterpillars, and so only with smooth caterpillars. One species limits herself to queen ants. But there are plenty of wasps that will take and digest almost a wide variety of insects for larva-food.—London Tit-Bits.

Those Pools Are Hot

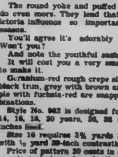
A geyser of steaming water, hot enough to boil corn-on-the-cob, has broken through the earth at San Juan Cozcala, a village on Lake Chapala, in the state of Jalisco, Mexico. Two persons are forcing into the lake from the new pool. There are similar pools about the lake which generate heat at times, and then gradually cool off and die. The district is subject to frequent earthquakes.—World-Wide News Service.

Producer of new musical play (to conductor of orchestra)—That's far too loud.

Conductor—But it calls for forte.

Producer—Never mind that. Make it 88.

CANCER TREATED BY THUNDERBOLT



Above is the apparatus used in the most sensational experiment in the history of science, which was conducted recently in Berlin. The machine generates the synthetic thunderbolt with which scientists sent an electrical charge of 2,500,000 volts through the cancerous arms of a 55-year-old farmhand, in an attempt to cure his disease. The fact that the subject of the "kill or cure" experiment still lives gives scientists hope for their success. Inset is Dr. Fritz Lange, who developed the apparatus, used for splitting atoms, which made the experiment possible.

Causes For Low Prices For Grain Are Reviewed By Prominent Western Grain Expert

Contrary to general belief, the wheat exporting countries of the world, Canada, United States, Argentine, Australia, Russia, the Danube States, India, etc., have not grown more wheat than last crop season than the world normally requires to purchase," said Major H. J. L. Strange, director of the research department of the Searle Grain Company.

"The price of wheat," continued Major Strange, "has seriously declined. Why? The simple reason is that the main importing countries, Great Britain, France, Germany, Belgium, Italy, etc. have enjoyed a larger yield per acre than ever has been recorded in their wheat crop history. This extra yield per acre has amounted to the enormous quantity of 165,000,000 bushels more than they would have produced, had they had only an average crop. This means that they will require to buy considerably less wheat from the exporting countries.

"Last importing year, these and other importing countries purchased 770,000,000 bushels of wheat. The extra large crop they have produced this year means they will purchase probably less than 700,000,000 bushels. This means between the 70,000,000 and the 165,000,000 extra bushels they have produced, will either be fed to live stock, used for extra consumption in the bread per capita, in the displacement of rye and barley, or put into store, as larger reserves for the future. This is a simple and outstanding reason for the decline of prices this last year. Unsentiment of war debt payments unquestionably have been a reason, too, but probably only in a minor degree, compared to the large European wheat crop.

"The bright ray for the export wheat grower in the situation is, that this particular surplus this year is not the result of increased acreage, but only because of fortunate climatic conditions. It would be an extraordinary coincidence and quite unprecedented if anything like the same high yield per acre should occur again next year.

"Canada," continued Major Strange "is making enormous sales of wheat this year. Last crop exporting year between August 1 and December 3 1931, Canada sold approximately 25 per cent. of the world export wheat sales during that time. This year, during the same period Canada has also approximately 80 per cent. of the world's export wheat sales, or, more wheat than all the rest of the exporting countries put together, and more than twice as much as Canada sold last year during the same period. It would not appear from this as though the state of the export countries of any country's currency has anything to do with at least the amount of wheat that is being sold.

"There does not seem to be any reason to suppose that the low purchasing power of European importing countries has lessened to any appreciable degree the amount of wheat they have purchased. The reason probably is that wheat and bread is the cheapest food, and that low purchasing power has curtailed their consumption of more expensive foods, butter, eggs, meats, meat, etc.

"Indeed, figures recently compiled and published by our research department," said Major Strange, "indicate that during this time of depression the world is certainly not consuming less cereal food per capita than it did during the boom times of prosperity. China, for instance, as an example, is consuming more wheat and rice per capita, for its 450,000,000 people than Canada is consuming wheat per capita for its 10,000,000.

"There is much talk of reduction of acreage, so as to cut up the 300,000,000 bushels of wheat surplus in the world that is depressing the wheat market. From my own study, I am of the opinion, for what it may be worth, that the farmers of Australia, Argentine and the United States can much easier and with less loss to themselves, change from wheat production to the production of animals and animal products, than can the Canadian wheat grower, for the simple reason that in the United States they have an enormous home market for these home products, and when the period of increased acreage, slightly increases, there will be a substantially increased demand for Argentine beef. Australian mutton and lamb, wool and wool products with which the Canadian farmer, particularly our wheat growers, will find it almost impossible to compete. Our real business seems to be the producing of wheat, which we can do better and of higher quality than any other country in the world.

"Therefore I see no reason why we should reduce our wheat acreage in Canada, and time will surely bring back a price for wheat that will be better than the cost of production."

Fewer Cars Are Used

Many Canadians Put Old Ones Away During Hard Times

Canadians operated 1,051,836 motor vehicles in the first nine months of this year, one for each 10 persons, the Dominion Bureau of Statistics report. at recently it was a decrease of 7.8 per cent. from last year. Gasoline sales dropped 10 per cent. in the same period.

Motor vehicle figures for Manitoba and Alberta were unavailable for the nine-month period in 1931 and the total for last year was used. New Brunswick had no figures for 1932 or 1931.

The following is the number of motor vehicles in use in the provinces with the decrease from last year in brackets: Prince Edward Island 6,579 (13.2 per cent.); Nova Scotia 57,737 (6.6 per cent.); Quebec 349,917 (7.7 per cent.); Ontario, 517,174 (7.4 per cent.); Manitoba, 64,800 (13.2 per cent.); Saskatchewan, 85,000 (11.7 per cent.); Alberta, 52,933 (11.6 per cent.); and British Columbia, 68,620 (6.9 per cent.)

Charges By the Minute

One barber of Miles, Mich., is charging by the minute for his cuts, as the result of a war. His rate is one cent for each minute the customer spends in the chair and he says that persons without too much hair come off very paying as little as a dime.

A shoe manufacturer of Czecho-Slovakia, has opened 60 retail stores in Poland.

WORLD HAPPENINGS BRIEFLY TOLD

Alberta's sugar beet crop for 1932 is expected to yield nearly 10,000,000 pounds of sugar, a new record for the province.

Both houses of the Bahamas legislature approved the bill ratifying the agreement signed with the United Kingdom during the Imperial Conference at Ottawa.

Freedom by 1946 for the Philippine Islands was voted by the United States Senate in the face of warnings that President Hoover would veto the legislation.

Canada supplied 37.2 per cent. of United Kingdom imports of wheat during the month of October, 1932, or 13,394,439 bushels out of a total of 39,632,646 bushels.

Miss Agnes MacPhail, Progressive member of House of Commons for South East Grey, will adress the United Farmers of Alberta Convention at Calgary late in January.

Due to the fact that Easter falls much later in 1933 than it did in 1932, the next session of the Ontario legislature may not be called until late in February, Premier George S. Henry has intimated.

Dr. W. H. Yen, head of the Chinese delegation at Geneva, who played a part in the resumption of diplomatic relations between Russia and China, has been named Chinese ambassador to Moscow.

The New Zealand Government has decided to re-assume its liability in connection with war debt payments to Great Britain, which were suspended last year by the Hoover moratorium on inter-governmental debts.

Unofficial, but reliable reports obtained at Ottawa, are to the effect that the world economic conference will be held in April. It is understood that world powers have agreed to this date.

About forty pre cent. of Germany's foreign obligations is held in the United States, the remainder being distributed among several countries. Her total foreign indebtedness is $4,812,000,000.

Claire Kinney Vance, 35, veteran air mail pilot, rode to a flaming death against the summit of Rocky Ridge, four miles west of Danville, California. His body was found in the charred wreckage of his plane.

Question Is Unique

Must-ian Court Must Decide If Widow Is Unmarried Woman

"Is a widow an unmarried woman?" as contemplated by the Child Welfare Act. This legal question will shortly be argued in the court of appeal, where the matter was carried from a judgment of Mr. Justice Adamson, who said she was not.

Annie Hemrych, Sky Lake, Man., made claim to certain relief on which an "unmarried woman" would be entitled under the act. Actually she is a widow. The case came before F. A. S. Hamilton, sitting as a magistrate, but before the argument got fairly advanced counsel for the defendant stated the opinion that the magistrate had no jurisdiction because the claimant was a widow.

A prohibition order was granted by Mr. Justice Adamson restraining the magistrate from proceeding further. From that decision an appeal is now pending.

Sons Linguist

A tourist agency inserted an advertisement for a guide who was required to escort parties abroad. A hard-up young man, who desired an easy post, applied and was given an interview.

"Good morning," said the agency official. "Parlez-vous Francais?"

"—er beg your pardon?"

"Parlez-vous Francais?"

"Ah frightfully sorry, but I didn't quite catch."

"Do you speak French?"

The young man smiled easily.

"Oh, you," he said, "fluently."

A rubber company recently built its 250,000,000th tire. Of course the directors celebrated the occasion with a blowout.

Radio Sets In Canada

An Average Of 34 For Each Thousand of Population

Canadians owned 770,486 radio sets in 1931, an average of 76 for each thousand of population, the Canadian Bureau of Statistics reports. There were 69 sets for each thousand people in rural centres, 99 in the urban.

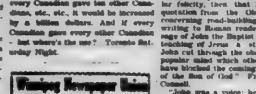
Ontario with 306 led all provinces in the number of sets per thousand of population, British Columbia with 95; Manitoba, 69; Alberta, 61; Saskatchewan, 60; Quebec, 52; Nova Scotia, 50; New Brunswick, 39; Prince Edward Island 35 and Yukon, 17.

Compared to its population, Forest Hill, Ont., a suburb of Toronto, has the largest number of radio sets, followed by Medicine Hat, Alberta; London, Ontario; Hamilton, Ontario; Windsor, Ontario; Brantford, Ontario and Victoria, B.C.

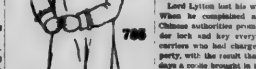
Hoey's a Suggestion

To Increase Circulating Credit Of Canada By Millions

Suggestion for saving the country if every Canadian were to give his other Canadian, for a Christmas present, an I.O.U! for ten dollars payable at Christmas next year, the circulating credit of the country would be increased by one hundred million dollars, at no expense to anybody. If every Canadian gave ten other Canadians, etc., etc., it would be increased by a billion dollars. And if every Canadian gave every other Canadian . . . but where's the use? Toronto Saturday Night.



By Ruth Rogers



A happy wee model that will please the most critical mother and child.

It is one-piece at the front with drop seat back. Don't you think the Peter Pan collar and little pocket cute?

It is the most simple garment to put together You can make it of a good quality fabric for a very small sum.

Striped flannel is darling in pale to deep blue tones. Flannelette in pretty floral or gay dots is another nice choice. Kindergarten prints in the fabrics or cotton are amusing.

Style No. 736 is designed for sizes 2, 4, 6 and 8 years. Size 4 requires 2 yards of 36-inch material with 2 yards of ruffling.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Sunday School Lesson

JANUARY 1

JESUS PREPARES THE WAY FOR JESUS

Golden Text: "Make ye ready the way of the Lord. Make His paths straight."—Mark 1:3.

Lesson: Mark 1:1-11.

Devotional Reading: Isaiah 40 3-11

Explanations and Comments

The Appearance and Preaching Of John the Baptist. The Forerunner Of Jesus (verses 1-3). Note that verses 2-3 are one sentence. Even as it is written. John came to prepare Malachi had cried (3:1). Behold, I send my messenger, he shall prepare the way for Me. And Isaiah had declared (40:3). The voice of one that crieth. Prepare ye in the wilderness the way of Jehovah make level in the desert a highway for our God. Isaiah called upon the exiles of Babylon to prepare a highway for God Mark applies his words to John the Baptist, who was in truth, the "voice" crying in the wilderness. Verse two is applied by Jesus Himself to John (Matthew 11:10 and Luke 7:27).

"We all know that the Romans were mighty road-builders. We have all heard of that golden milestone from which all the most important roads throughout the empire started The Romans had above all things the quality of directness. It went straight heaven is its goal The old road-builder did not trouble himself much about the cost of his highways. Whatever else we be made of, ride as straight as possible It is with singular felicity, then that Mark uses a quotation from the Old Testament reverence for road-building when he is writing to Roman readers. The message of John the Baptist made for the teaching of Jesus a straight road. John cut through the obstacles in the popular mind which other religions have blocked the coming of the truth and Man of God." Francis J Mr. Connell.

"John was a voice; he got a hearing. Right here it would not be a real voice and ends by being a mere whisper, but Jesus made it do heeding the opinions of Pharisees and Sadducees the great people of his day John dared to strike at these people with the same directness with which he struck at the publican and the tax gatherers." Francis J McConnell.

How China Does It

Authorities Take Long Way To Find "Lost" Articles

Anyone who has visited the east knows how easily property gets "lost." Lord Lytton discovered this when he was in China recently. But, being chairman of the Manchurian commission his property was speedily returned.

Lord Lytton lost his walking-stick. When he complained about it the Chinese authorities promptly set under lock and key every one of the carriers who had charge of his property, with the result that within two days a cookie brought in the stick and said he had "found" it.

Eight Islands In Group

The Hawaiian Islands number eight. They are: Hawaii, Maui, Kahoolawe, Lanai, Molokai, Oahu, Kauai and Niihau. There are also a few rocky islets in the group which are not recognized as islands.

National Art Gallery

Contention Is Made That Favorites Has Been Shown.

Charles Comfort, former Winnipeg painter is among the 11 prominent Toronto artists who published a purported refutation of contentions by 118 other Canadian artists that the national gallery of Canada at Ottawa had shown favoritism to a restricted group in the selection of pictures for exhibition and purchase.

The 118 artists, all painters sent a petition to Prime Minister R B Bennett asking an investigation of the gallery's affairs and saying they would boycott the institution until the investigation was held.

In their defence of the gallery, the 11 Toronto artists, some painters, some sculptors two of them members of the Royal Canadian Academy and two members of the Group of Seven, contend the 118 petitioners do not represent the majority opinion of Canadian artists.

Recipes For This Week

(By Betty Barclay)

COCONUT CREAM JUMBLES

3 cups sifted flour
2 teaspoons baking powder.
1 teaspoon salt.
1 cup sugar
1 egg, well beaten.
1 cup heavy cream
½ cup coconut, premium shred.

Sift flour once, measure, add baking powder and salt, and sift again. Add sugar gradually to eggs. Add flour, alternately with cream, mixing well. Add coconut. Chill half an inch thick on slightly floured board and shape with sugar. Cut with large round cutter. Bake in hot oven (425 degrees Fahrenheit) 12 to 15 minutes. Makes 2 dozen 3½ inch jumbles.

LEMON CREAM JUNKET WITH CRANBERRIES

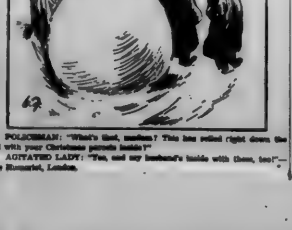
1 package lemon junket powder.
½ pint milk
½ pint light cream.
1 cup cranberries.
½ cup water.
½ cup sugar.

To make cranberry sauce: Boil sugar and water together 5 minutes. Add cranberries and boil without stirring until all the skins pop open (about 5 minutes). Remove from stove, and allow sauce to cool.

To make junket: Prepare according to directions on package, using ½ pint milk and ½ pint cream instead of 1 pint of milk Chill in refrigerator. Immediately after the junket sets, or when ready to serve, put 1 tablespoon of cranberry sauce on each dish of junket.

French angel fish, one of the most beautiful inhabitants of the deep, can live but a month in captivity.

Photographs can be cleaned by wiping lightly with a piece of old flannel dipped in warm ammonia water.



POLICEMAN: "What's that, madam? This bee pelted right down the hill with your Christmas parcels inside?"

AGITATED LADY: "Yes, and my husband's inside with them, too!"—The Humorist, London.

Fruit Growing In Western Canada

Success Attained In Growing Apples On the Prairies

According to the Hon. Jas. F. Bryant, K.C., who is in charge of the Saskatchewan Government fruit growing campaign, a great deal of interest is being taken by farmers and particularly by their wives, in the prospects of growing fruit on their farms and many inquiries are being made by those who are following the Government lead in the matter. Mr. Bryant desires to establish an orchard of their own without investigation was held.

In their defence of the gallery, the 11 Toronto artists, some painters, some sculptors two of them members of the Royal Canadian Academy and two members of the Group of Seven, contend the 118 petitioners do not represent the majority opinion of Canadian artists.

CHAPTER III Continued

Down in Ontario, debating what path to take, Joyce had thought of asking her dad to come and live with her From a money standpoint, considering her good salary, that was the sensible thing to do But she had thrown to return here At that time she had fully realized the secret and irresistible reason of her return. If anyone had told her that reason, she would have denied it hotly But even face to face with a personal tragedy which forced her to distinguished thinking, she looked into her heart and saw there the real motive It was Alan Baker who had drawn her By degrees unknown, unperceived by her, girlhood friendship had deepened into love

She had come back to be near Alan Baker She had come back in the passionate hope that he and she would marry.

There had been an unspoken understanding between herself and Alan that when the road ahead was a little clearer for both of them they would be married. And then Elizabeth had come . . . Alan's engagement to Elizabeth had been a dazing unexpected blow. When Bill, coming past on patrol, awkwardly blurted out the news of it, she had not believed It took days of wretched wakefulness in the woods, weeks of helpless anguished tossing, before the spirited strength and courage that were as great a part of Joyce, fought it out, and she stumbled herself and began to believe.

But even now she did not fully accept That engagement seemed strange to her. Though she knew nothing of Alan's secret motives, she did feel there was something behind it which Alan had told no one. It seemed to her, from what she had observed, that Alan had no pass on ate affection for Elizabeth.

Month after month Joyce had waited for word of his marriage. The word had not come. She wondered . . . What was causing this long delay? She could only guess at possibilities, but during the lengthening months the belief had been born in her that something had arisen as a barrier to the marriage and that the engagement might be broken off.

When she thought of all these things and remembered how intimate and comradely she and Alan had been in one another, Joyce could not kill her lingering hope. As she stood there on the landing now, awaiting the patrol, with her heart thumping at the prospect of seeing Alan and talking to him once more, she knew that tonight she would come a little closer to discovering whether her wild guesses were truth or only wishful hoping.

Down the river a great yellow eye blinked through the trees. Swinging around a bend, it played up across the water. In a few moments more it picked her out, there on the landing-way where she. The great striped spoke the Doc each year as a birthmark and some of these were about as large. The Yellow Transparent is a good size too but the rest would not be much over two inches in diameter. It looks this last few years almost like we could hank on standard apples but I believe the seedling Mandan apples will prove a good thing when we get a test of water. I also believe a little extra water at just the right time will help." Here is an example of around two acres and a half of fruit grown on a little over a two acre orchard in north central Saskatchewan.

I asked Dr. MacNeill, Superintendent of the Saskatoon Mental Hospital to visit the Bechtil farm with his head gardener. He did so and speaking of the new orchard on the Saskatoon Institutional Farm, he said: "You supply us the material We will supply the extra grown."

W. N. U. 3876

Alan Baker did not know or remotely guess her heart interest in him.

With his first question, after their warm handclasp, he asked her:

"Has anybody passed here lately, Joyce?"

Not that I've seen. Nobody in the last four days."

But surely they did! Were you here all day?"

Joyce noticed then a tautness in his voice, and she saw he had brought his mare with him on this patrol It was no routine work, an ordinary pursuit, this time.

"I'm concerned. "I was out hunting this morning, and I slept a couple hours this afternoon. They might have passed then. But they couldn't have gone by while I was here and awake."

"What time were you mushing this afternoon, Joyce?"

"I can't exactly . . . our clock isn't . . . Probably from about four till six."

A man half-turned to Hardsock. "Bill, you heard what Joyce said? They couldn't have reached here this morning. So they must have passed her after four. We're nearer up with them than I figured. We'd better stay here till the deep dark breaks At night this way we can't sight those men on ahead. They'd hear the launch coming and dodge aside into some cover."

He turned again to her. "If it won't be imposing, Joyce, will you give us some food? We've had nothing to eat."

Imposing—an hour of his company, setting a meal for him, learning the truth of his relations with Elizabeth! Joyce nearly nodded and hurried the patrol up to the trading store.

Ahead of the men the two of them went up the path together, Alan shielding her from the brush over-growing the trail; and as they went he told her briefly of the robbery, the flight, the escape up the Almonte.

The news fairly stunned Joyce, or it had him when Bill reported. And now Alan was one added reason for a reason that struck her with sudden fear. Before Alan finished, she was grasping his arm in trembling fright.

"Alan! Alan, you remember? . . . Bringing down some furs. Alan! what if he runs into those men?"

"Good Lord!" Alan breathed to himself. "If they meet Dave . . . They're not the kind to let anything past alive and report their misdeeds!"

For Joyce's sake he tried to be convincingly. "They may not meet him at all. Dave may be ahead of why, they'd hardly shoot a man down wantonly. If for no other reason, it doesn't pay. Dave's got enough guesses were truth or only wishful hoping.

Down the river a great yellow eye blinked through the trees. Swinging around a bend, it played up across the water. In a few moments more it picked her out, there on the landing-way where she. The great striped spoke the Doc each year as a birthmark and some of these were about as large. The Yellow Transparent is a good size too but the rest would not be much over two inches in diameter. It looks this last few years almost like we could hank on standard apples but I believe the seedling Mandan apples will prove a good thing when we get a test of water. I also believe a little extra water at just the right time will help." Here is an example of around two acres and a half of fruit grown on a little over a two acre orchard in north central Saskatchewan.

I asked Dr. MacNeill, Superintendent of the Saskatoon Mental Hospital to visit the Bechtil farm with his head gardener. He did so and speaking of the new orchard on the Saskatoon Institutional Farm, he said: "You supply us the material We will supply the extra grown."

Only Two Icebergs Seen

Hudson Straits Safe For Navigation During Whole Season

Five steamers carried grain over the Churchill route this summer without even having insurance. They experienced no trouble and saw no icebergs During the entire shipping season only one iceberg was sighted in the straits besides the one struck by the "Bright Fan."

Such was the statement of Harvey Adams, engineer in the employ of the federal department of railways and canals, who spent the summer and fall in the north.

He stated that Captain Poole made a trip on the "Ocean Eagle" up to the Foxe Channel and the Foxe Basin before navigation opened up, to see if there was any ice coming down that would enter the Hudson Straits in the latter part of August. On this trip north he discovered that the ice had all gone out of the channels, leaving the straits open for safe navigation. He so reported to the government.

Mr. Ashley also stated that only one vessel, the "Nascopie" owned by the Hudson Bay Company, had left Churchill Harbor for the navigation season.

Mr. Ashley is very enthusiastic over the feasibility of the Churchill route.

AT NIGHTFALL

The blank gale threatens; Sores and shrill
Are its refrains,
And angrily it sweeps field and Mill
Its voice complains.

The wind grows louder now. With storm
Comes dusk today;
Only the arms of love can charm
Fear away.

Only the arms of love to hold
Me warm and near;
The tender arms of love, to fold
And caress here!

About me friendless lands are laid
And wild wind's stress,
But in my shelter crosy night's shade
And love bless.

No warriors' ranks, no monarch's might
Could make fear cease;
Love's arms, alone, can vanquish fright
And bring us peace!

Bullets For New South Wales

Government May Ship Supplies From Walsenight For New Guinea Natives

Canada has offered specimens of the fur-bearing Canadian bullalo to the New South Wales Government by Adidjedem Government to build up the Taronga Zoological Park Trust in the New Zealand province recently and has made known to the Dominion Government that it may be shipped to Canada.

French Officer Grateful

Sends Present To Governor Who Rescued Him During War

After 15 years a head has stretched across no man's land to drive the fear of God into the hour of Hans Scultz, an unemployed laborer.

During 1917 Schultz rescued a French officer who was badly wounded. They exchanged letters as the Frenchman convalescenced in a hospital. Schultz, who has been without work for eight months, recently received a letter from his French friend with 600 francs as a "Christmas present." The officer explained he had just run across the German's name in an old diary and wanted to renew the friendship.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

A ship's captain is empowered to conduct a marriage ceremony on his boat if the occasion arises.

Little Helps For This Week

"Strengthened with all might, according to His glorious power, unto all patience and long-suffering with joyfulness."—Colossian 1:12.

God doth not need
Either man's works or His own gifts who best
Bear His mild yoke, they serve Him best; His state
Is kingly; thousands at His bidding speed
And post o'er land and ocean without rest;
They also serve who only stand and wait.

—J. Milton.

We cannot always be doing a great work, but we can always be doing something that belongs to our condition. To be silent, to suffer, to pray when we cannot act, to sympathize in the misfortunes of a comrade, a brother, a harsh word, an annoyance, a wrong received and endured as in His presence, is worth more than a long prayer said. We do not think of what we bear in love with gentleness and patience, provided the loss was inevitable and was not caused by our own fault.—Fenelon.

Prospectors Make Claims

Ottawan Reports Great Activity in Great Bear Lake Area

According to reports received at Ottawa a number of mineral claims have already been staked in the new adjacent to Great Bear Lake, Northwest Territories, and there is every likelihood that many more will be staked this summer. Some prospectors have already gone in by aeroplane and others are planning to go in by water transport as soon as the ice goes out. In view of this great activity the topographical survey, Department of the Interior, Ottawa, has reprotsed the manual respecting the survey of mineral claims in Dominion lands for the use of Dominion land surveyors who may be called upon to make official surveys of these claims.

Wheat Market Competitors

Australia and Argentina Are Now Harvesting Crops

Marketing of southern hemisphere crops says a wheat review of the Dominion Bureau of Statistics, will undoubtedly present a number of situations that has existed since the beginning of the present crop year. Since August Canada has pretty well dominated the world export market.

For the balance of the crop year, Canada will have two important competitors, Australia and Argentina, in the wheat market, assuming that the United States will not greatly change its present relationship to external trade.

Many Douglas Egyptian Liniment's family. A sure, speedy remedy for burns, sprains, falons, blood poisoning, soft corns, sore throat and hoarseness. Invaluable for inflammation and muscular rheumatism.

Rodeos In Bank

Two Centuries Of Precious Mineral From Great Bear Lake District

Two grammes of radium here been extracted from pitchblende found in the north country around Great Bear Lake and will be placed on the market soon, the first Great Bear Lake radium product. This is the report brought to Calgary by H. H. Montgomery and Pete Davidson, prominent northland prospectors, who have just completed months of work at Great Bear Lake silver and pitchblende fields.

A coil survey of Saskatchewan, which was commenced in 1931, is now nearing completion.

There are 209 rooms in Buckingham Palace.

FORT SASKATCHEWAN RECORD
Published Every Wednesday G. Neale, Editor and Publisher
WEDNESDAY, DEC. 28th, 1932

Editors Notes

You will notice that in this current issue, there appears local news taken from a newspaper published in the Fort twenty-five years ago. This was made possible by a local man keeping the paper along with others as a keepsake and no doubt to be able to look back and think of days long ago. We are indebted to the owner of these old relics for being able to publish some of the items of that time and take this opportunity to thank him.

MUNICIPAL ELECTIONS

Municipal elections will be on shortly. This is a matter that should receive our deepest thought, as the near future is very uncertain, we should therefore choose men who can grasp large things to represent the town.

The next council will have various important matters to deal with and will have to be on their toes if they intend to keep the mill rate anywhere near where it is at the present time.

The business done during the past year has been done in an economical manner and the personal council deserves credit for the careful work they have done and the time they have voluntarily given, which is not always appreciated as it should be by the ratepayers.

The business man who will not help boost the interest of the town, does not deserve to have the townspeople help boost his business.

THE ELECTRIC EYE

It seems that industry is finding many uses for the "Electric Eye," and just what effect this may have in the future is problematical. Some look upon its introduction as a menace and there is a possibility that it will permit the replacing of skilled men in some businesses. If this be true, then we are facing serious industrial conditions. To those who have not taken time to study the principle of the "Electric Eye," or see it demonstrated, almost anything seems possible when they reflect what has been accomplished so far. In terms of its application this principle seems almost uncanny, yet it is simple.

The so-called Electric Eye works on the principle of focussing a ray of light on to a photo-electric cell which generates energy, which in turn is stepped up to greater strength, and use to then made of this power in different ways in accordance with what is to be accomplished. When this ray of light in the electric cell is interfered with or when it is allowed to suddenly play on the photo-electric cell, then action of some kind is brought about. For instance, it may stop a newspaper press in case of a web break.

In fact, it is reported that the Electric Eye is now being used in fourteen operations in newspaper plants. It is used to cut type, regulate and stop presses, to match colors, to effect register on multi-color machines, to make photo-engravings at high speed, etc.

Certain ones interested in the introduction of this principle have claimed great things for the Electric Eye and naturally it has been easy to put these claims over because the Electric Eye is a marvelous little idea in many ways. The fact of the matter though is that its application has not always been so successful as to claimed. It has its limitations but nevertheless there are possibilities that it may distress our industry to an appreciable extent.

HOCKEY

The Fort Hockey team journeyed to Chipman on Friday for a league game and were victorious by a score of 5-3 thereby clinching second place in the league standing. Lamont at the same time forged farther to the fore by downing Chipman twice last week.

Last Monday evening the Fort Boys went to Lamont for an exhibition game and though greatly handicapped on account of having no spares they held Lamont to a 7-7 draw in overtime. It was a hard fought struggle and the fans present were treated to the most exciting and best played game on Lamont ice this season.

Each one of the Fort players figured in the scoring with Harvey Lamoureux making the most sensational play of the evening on his second goal of the evening. Breaking up a two man rush at his own blue line, he circled his way around the Lamont forwards and crashed the defence. In crossing the defence he broke the blade of his stick, but with the handle alone he pushed and batted the puck toward the Lamont goal, drew the goalie astide and batted the rubber into the home. It was a "Scandinger" this effort and Harvey received round after round of applause from the crowd present.

In the last 5 games the locals have played they have suffered many a one defeat. They have won three of the games and five other games were overtime draws-both by the way with Lamont.

The next league game is Friday of this week, when the Fort plays at Chipman. This will be a hard fought contest and the results are very important to each team. A win for the Fort will advance them to within one game of Lamont-whereas a win for Chipman will deadlock the Fort and Chipman for 2nd place in the standing.

The City of Calgary has refused to pay the difference in exchange demanded by the City bondholders. Many of the obligations of the city are payable in New York funds and the discount on the Canadian dollar makes the payment about 15 per cent. greater.

Calgary demands that the Dominion government make up the difference.

At present the situation is at a more or less of a standstill and no doubt many other cities and towns are waiting the outcome of the Calgary situation.

Fort Junior Hockey Team Wins Two Games in a Row

Earl Lane's young band of puckchasers opened the Junior Hockey season by defeating Lamont Jrs., by 2. The boys showed up well for their first appearance after a few grueling practices. R. Whitson passed out in front of the Lamont goal and the puck was deflected from a Lamont player's stick for the first count. Whitson scored again for a 2-0 count. H Wooston made it 3-0 on a rush with Whitson. Shires and Coon then banged Lamonts' 2 goals in the 2nd record period. O. Kolterbeen then secured a couple of counters and the game ended 5-2 for the Fort

On Friday, Dec. 29, Brudderheim Juniors motored to the Fort but were disappointed when the locals let them back by a score of 6-0. The local boys showed improvement over their first game getting the forward pass and combination plays in fine shape. Whitson as in the former game was credited with another counter, when his shot was blocked by Rosmus but in a scramble was pushed into the goal by the classy young goalie from Brudderheim.

Kingsley and Whitson teamed up for the second goal, Kingsley carried the puck to the opposing defence and then slipped the rubber to Whitson who gave Rosmus no chance to save.

Wooston made it 3 to 0 when he scored from a mix-up near the Brudderheim goal.

A. Flintoff began to click in the final period and raced around till he got two counters, boosting the score to 5-0. The boys wanting to show their class never let up and O. Kolterbeen made the score 6-0 when he scored on a solo rush.

The Brudderheim boys have some good prospects but with a little more practice may make our boys work a bit harder for their goals.

Rosmus and Lisiuk played fine goal tending for their respective teams and only for their brilliant work the score might have been much greater.

Come out folks and give the kids a hand. Teams don't click without support. Watch for the next game here and come out and cheer these young fellows along.

FINAL TRIBUTE TO RICHARD FIELD TO BE PAID TUESDAY

A funeral service for Richard Field, 83, who died Thursday at the home of his son, Lieut.-Col. R. Field, officer commanding the Royal Canadian Mounted Police, Winnipeg, 35 Guelph street, will be conducted at Thomson's mortuary, Tuesday afternoon, at 2 p. m. o'clock, Canon C. Carruthers, rector of Holy Trinity church, assisted by Archbishop I. O. Stringer, will officiate. Burial will made in St. John's cemetery.

The death of Mr. Field followed a paralytic stroke, suffered recently, the first attack of a serious character this veteran ever had. Besides his son in Winnipeg, there are two surviving daughters, Mrs. F. R. Reed and Mrs. C. Shaw, both residents of Fort Saskatchewan, Alta. One brother lives in India.

Mr. Field was born in Ireland, and when a young man he entered the civil service in India. He came to Canada in 1862, after 35 years in the distant Indian possession, and went to the Edmonton district, Alberta, where he farmed for 39 years. Since 1914 he made his home with his son Col. Field, who has been stationed at several points in western Canada in the course of his duties in the Mounted Police.

—Edmonton Papers please Copy.

The league standing is as follows:

	W.	L.	D.	P.
Lamont	6	1		12
Fort	4	3		8
Chipman	3	4		6
Brudderheim	0	5		0

Mr. J. W. Handley of Winnipeg, spent the holiday week-end with his sister here, Mrs. E. S. Taylor.

With The Curlers

The benefit on New Year's Monday was a great attraction for the Fort. Mr. Jas. Graham's rink won three games in a row, one after another to win five prize, with R. H. Ray's rink second The waiting room was at all times filled with eager spectators and show-hangers and the game was not finished until near midnight.

Eight rinks entered the spell, starting to play at 9 a.m. and continued throughout the day.

*****

Curlers and Friends heartily enjoyed themselves at the annual curlers dance held here in the Masonic hall last Friday evening

The hall was decorated with curling rocks and brooms for the occasion

At midnight refreshments were served to the large crowd of dancers by the Fort Lodge Curling Club.

During the evening Mr. J. D. McLean announced the winner of the "Scotland Pony" given away by the Fort Junior Hockey Club. Mrs. Young of Ind., U. S. A. held the lucky number.

The "Puppy Pals", a local orchestra supplied the music for dancing, with circle two-steps being the most popular dances of the evening.

COMING EVENTS

Dr. Mildred Fidlenbo Newell will address the next meeting of the Fort Saskatchewan Women's Institute on January 12th; meeting beginning at 2 p.m. in the Union Hall. As this is the month the hearty fare are due, there will be no tea collection. All those intending to be members this year, are urged to attend this meeting or if unable to attend, will they please notify one of the executive.

New members welcome.

ORIGIN OF THE WOMEN'S INSTITUTE

The first Women's Institute was organized in Saltfleet Township Wentworth County, Ontario on the 19th of February, 1897 with a view to meeting the expressed desire to acquire information which would secure greater efficiency on the part of the women in rural sections in those varied responsibilities resting upon them in the home and as citizens. The original branch is now known as the Stoney Creek Women's Institute.

Since that time the movement has spread throughout Canada, overseas to Great Britain, to the Continent, to South Africa and even to India.

When the Women's Institutes of the World met in Convention in Antwerp, Belgium, in 1913, there were over forty countries represented, England alone has 6000 branches and 300,000 members. We in Canada have 2536 branches with 60,000 members.

The regular monthly meeting of the United Church Ladies Aid will be held at the home of Mrs. McAdie on Thursday, January 9th at 2:30 o'clock.

Dorothy Oppelt wishes to thank all those who have voted for her and have helped her to win the sixth prize in the new doll contest at Smith's Drug Store.

PLANNING THE NEW YEAR

We hope we may assist you in planning the work for the New Year, in anything that may include the use of building supplies.

It may be only the installing of a shelf, putting down a new floor, some little change in the interior of your home, or the erecting of a new building.

We are here to help you with service and material.

"Fresh from the Gardens"

Opportunity Knocks In 1933.

Another year has gone, carrying with it into the limbo of the past an overful load of troubles, difficulties, losses and grief, but leaving behind a goodly store of experience to be carried into, and, we trust to be in a very large measure, solved in the new year. We can well afford to bid a lasting good-bye to all the unpleasantnesses and worries of the old year, bidding an early to those lessons which have come to us out of the experiences of the past.

Our theme are more not to the future; our thoughts and our planning shall be of it and for it. A calendar for 1933 hangs on the wall before us as we write. Three hundred and sixty-five days! What are we going to make of them? What are we going to do with them?

Conditions, happenings, circumstances altogether beyond our power to control will, of course, affect the trend of world events and of our lives. Things we must meet as they come. It is over them not, it will continue to be true, in this age it is perhaps true to a greater extent than ever before, because men, through his own God-given genius have brought the whole world and world influences, more closely into our individual lives. But, even so, the fact remains that, as individuals, we still remain the greatest factor in the making or marring of our lives. We will start the new year right if we remember this great truth.

So, what now we going to do with and make of the year 1933? Are we entering it in a spirit of hopelessness and despair sensing failure at the end? Or are we undertaking it with gladness as presenting a new opportunity, a new hope, animated by a new confidence that substantial measure of success will reward our efforts in the direction of individual, national and world betterment?

Are we bowed down by a fatalistic idea that nothing could be worse than what is, and therefore recklessly prepared to go to any length in the adoption of anything advanced as a remedy no matter how desperate it may be? Or do we still retain confidence in ourselves, in our abilities and powers, to remedy the mistakes of the past, banish the evils, right the wrongs, and apply our individual intelligence and energies to the solution of the problems now confronting us?

In this new year it will not be so much existing institutions, political and economic, that will be on trial, as it will be ourselves, you and I as individuals, citizens of a great Dominion, of a greater Commonwealth of Nations, of a still greater world. These institutions have developed weaknesses, that is universally admitted,—reforms are called for and must be effected. But these weaknesses can only be overcome, these reforms brought about, by us, first, as individuals, and secondly as individuals working cooperatively together

The errors resulting in present difficulties are man-made errors; it is the human factor that has failed to function properly, rather than the systems and machines. And it is the human factor, that is you and I individually and collectively, who are mainly at fault. It is in ourselves, in our way and manner of thinking and living, in our ambitions, that weaknesses have developed. It is in ourselves that reform is most urgently needed. It is upon us that the responsibility rests to so direct our systems and govern machines that they will work and not be thrown out of gear.

This thought brings us back to our original question. What are we going to do with the 365 new days now presented to us? Are we going to grasp them, bend them to our will, make every minute of every one of them work to our immediate and mutual advantage? Or are we about to throw up our hands in despair, and say: What's the use? Are we going to fight a gallant battle, or ignominously surrender and admit defeat? Are we to depend on God-given intellects and powers, our dearly bought birthright of individual liberty and freedom, and be content to forego our responsibilities and become mere cogs in a machine?

Rather, does not this new year beckon us to a resurrection of our individuality, to a new application of our powers to our own problems? As we look back for a moment over the past years, can we not discover that we enjoyed the greatest happiness, entertained a greater self-respect, you felt a greater satisfaction in life and reaped a richer reward therefrom, when we fought our own battles and relied upon our own efforts than in those later years when so many have depended upon others to help them out and have made no extra effort to help themselves? Did we not feel more like men when we shouldered our own burdens, and gave a lift to others more heavily burdened than ourselves, than we possibly can feel in giving up the fight and slatting our burdens on to others, even though the "others" be the community and nation as a whole?

Canadians are a self-reliant people. They have fought a good fight during the past three years of depression. It has been a hard fight, a fight against heavy odds, and, in many respects, against factors beyond our own control, and the battle is not yet ended. But it will end, and end in victory if we do not weaken. Factors undreamed of a few years ago are coming to our aid as reinforcements because the depression has fought the world insane it would never have learned in years of prosperity. Those lessons are along constructive lines, and the destructive proposals which always are advanced when people are perplexed and in trouble. This year we must go forward along the road to victory if we use it aright. And the right way to use it is to apply our individuality to the problems that lie at our hands, just as did the pioneers of old, and not give heed to the wailing Jeremiahs of despair.

The use of live decoys for duck hunting is illegal in Alberta.

Icebergs have been known to take as long as 300 years to melt.

Nerves—Could Not Sleep
Tired Out All The Time

Mrs. Geo. Gerbrey, Mooshjawuk, N.B., writes:—"I was so very nervous I could not sleep at night, and felt tired out all the time.

A neighbor told me about Milburn's Heart and Nerve Pills, and as she was using them at the time she gave me some to try. I found they were doing me so much good I procured some more and they proved of wonderful help to me."

For sale at all drug and general stores, put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Investigate Cosmic Rays

Prof. Piccard Plans Balloon Ascension in Modern Day Aero

Plans for balloon ascensions in Belgium next summer and in northern Canada in 1934 have been announced by Prof. Auguste Piccard, who has made the farthest trip from the earth on record.

It was not certain whether he himself would participate in the flights

Prof. Piccard plans to call in the near future for Canada where he will study possibilities of an ascension in the vicinity of the north magnetic pole on Boothian peninsula in the Canadian Arctic.

A new ascension, Prof Piccard said, was necessary to clear up the question of whether cosmic rays originate from stars or galactic nebulae.

If the former be true, he said, the secondary "soft" rays deviated by the earth's magnetic field ought to host be detected at high altitudes near the magnetic pole in the Hudson Bay region.

He said that the power of the cosmic rays was such that, previous to their striking the atmosphere, a drop of water under these influences would be equal to 1,000 pulverizing machines used to provide New York with several hours of light.

Works On a System

French Statesmen Always Organize Time To Do Business

M. Herriot, who is much in the public eye just now, was recently described by the Matin of the World as easily the most picturesque figure in French politics today Short and stout, mellow complexioned, with a deep, hearty, dark eyebrows, he is as active as a schoolboy, and has a schoolboy's high spirits. He is also one of the many French statesmen who are devoted to pipe-smoking He was the son of a widowed mother in poor circumstances, and by dint of hard study he became a professor of history and literature at one of the universities. He is still a prodigious worker and has written many books on politics, music, and literature. When asked how he has managed to indulge his literary cravings in addition to fulfilling his heavy administrative duties he has been Mayor of Lyons for 20 years she says, "I do not system." His organizes his time to the minute. It was his excellent work at Lyons that brought him his post Government appointment as that of Director of Revictualling during the war and since then he has never been far from the centre of French politics.

Cannot Be Duplicated

Valuable Mah Jong Set Belonged To Chinese Governor

Ethyen Hamilton, of Montreal, has returned to New York from the Orient with what he believes is the most superb mah jong set in existence. Hamilton, who is a collector of curios, in the recent economics sections of the museum in the Rockefeller residence, has on display set belonged to the Governor of Shantung and the money with which the violinist bought it helped to pay for the Governor's funeral. It is said that 1,000 diamonds were needed for the elegant funeral necessary for such a dignitary, and the stones given in the set of an extremely beautiful type of agate. In each piece the proper figures are carved and the indentations are inlaid with precious stones. The mah jong scheme is daunting The violinist understands that his mah jong set is priceless, for it is the last and that it cannot be duplicated today.

Java's New Currency

Merchants Accept Cigarette Coupons In Payment For Anything

They're using cigarette coupons for money in Java. A fad roll of these "greenbacks" and yellowbacks will buy anything from soup to nuts and you have Carl H. Boehringer's word for it Coupons are being used as tender to buy meals, clothing, photographs records and even motor cars.

Boehringer who is Assistant Trade Commissioner at Batavia, in cabling the Department of Commerce at Washington about Java's financial problems didn't say how many cigarettes will produce a bill of sale for an automobile, but hinted that business in this "paper" is no native that various enterprising individuals are now carrying on a brokerage business in them.

Fifty the poor Javanese dissent are getting fewer and fewer. For some time past, said Boehringer, actual money among the natives has become increasingly scarce and during the recent rice harvest laborers were paid not in money but in kind

This scarcity of money has not diminished, despite the fact that the situation is aggravated by the fact that the opportunity for work on the large estates is being reduced while wages are being consistently scaled downward Natives, although receiving less money, found no difficulty in the need for it, as land taxes, back debts and purchase of fertilizer had to be maintained.

Recipes For This Week

(By Betty Barclay)

MOCHA COOKIES

1 cup shortening.
1 cup sugar.
1 cup molasses.
½ cup coffee.
4½ cups flour.
2 eggs.
1 teaspoons soda.
3 teaspoons cinnamon.
1½ teaspoons ginger.
1 teaspoon ground cloves.
1 teaspoon salt.

Cream shortening and sugar. Add well beaten eggs, and coffee mixed with soda and molasses. Sift all spices with flour and add to mixture, making a soft dough. Drop on cookie pan, a tablespoonful for each cookie.

CONNECTICUT STEW

1½ pounds fresh, lean pork,
2 pints hot water,
3 cups diced parsnip,
1 tablespoon finely chopped parsley,
1 cup diced onion,
2 tablespoons flour,
1 teaspoon sugar,
Salt and pepper.

Cut the pork into small pieces, Brown in a frying pan. Add the water and simmer until the meat is nearly tender. Add the vegetables and seasonings, cook for fifteen or twenty minutes. Mix the flour with a small quantity of cold water. Add to the meat and vegetables. Cook until thickened. Sprinkle parsley on top of stew before serving to the table.

On Wheat Committee

Prof. Allen Of Saskatchewan University Added To Board With Premiers

Professor Allen, of the University of Saskatchewan, has been added to Premier J. T. M. Anderson to accept a place on the wheat problems committee, which is to be the subject of a two-day inter-provincial conference in Winnipeg.

Premiers of the prairie provinces are members of the committee, and so is Professor N. C. Grant, of the University of Manitoba. The latter will attend the Chicamauli conference, at which the plan featured by the United States to limit production will be discussed.

EGGS GAVE HER INDIGESTION

When this woman of 73 years found it necessary for her indigestion, it proved to be one her 70 year-old brother was already using to keep him "a perfect picture of health." She writes:

"For years I had suffered with indigestion and simply could not eat an egg or a potato. I took an aperient regularly, but still I suffered. I began this year taking a small dose of Kruschen Salts. Now I can eat eggs and potatoes, and enjoy them without any after trouble.

"Mother Seigel is a perfect picture of health and a splendid advertisement for Kruschen Salts. He is always bright and happy. He never forgets his morning dose. Kruschen Salts is the most valuable aperient for old people. I recommend it to all my friends."

Kruschen Salts at Kruschen standards and time up the body functions from a number of different angles. Your first bottle will convince you that the most reliable benefit. You forget digestion troubles and depression in a new feeling of physical and mental invigoration.

Soviet State Farms Not Delivering Grain

Have Fallen Down Badly In Deliveries To State

The state farms to which Soviet government looks to obtain a harvest approximately one-seventh of its grain resources but also to set an example for collective and individual peasants, were pictured as having fallen down badly in their deliveries of grain to the state

It was announced that this branch of agriculture had fulfilled only 77.8 per cent of the collections assessed against it during December 15, the newly-created commissariat for grain and cattle breeding state farms issued stringent orders for prosecution of improvement in the situation, which it described as "shameful."

It complained those farms in Siberia, Eastern Siberia, Western Siberia and the Urals as most backward, directing attention to the fact that the West Siberian trust had the worst showing, with only 56 per cent of the collections completed.

Placing responsibility directly on the shoulders of the individual directors of the state farms, the orders threatened them with arrest and trial unless effective measures are taken to complete collections forthwith.

American Farmers In Bad Way

About Forty Per Cent. Of Farm Mortgages Under Mortgage

Approximately 40 per cent. of the farm lands in the United States are under mortgage.

This, the first estimate of Eric Englund, assistant chief of the Bureau of Agricultural Economics, to the House appropriations sub-committee at hearings on the annual agricultural department supply bill.

About five per cent. of these farms, Englund said, were mortgaged for debt in excess of their value; about 10 per cent. debts from 75 to 100 per cent. their values and 25 per cent. debts from 50 to 75 per cent.

Much of this indebtedness is being wiped out through the drastic foreclosure method, he said.

Manitoba Gold Area

Increasing Mining Engineer Impressed With Richness Of God's Lake Gold Country

God's Lake country is bigger than anything in the United States. This is the statement of W. M. Hardinge, mining engineer of Chicago, who has spent more than a month in locating properties 200 air miles northeast of The Pas.

"I have spent 30 years going over gold properties in the west and east, but I never saw anything as big as this district. You also and extent of the formation, and the high gold values is what is apparently uninteresting staff, often great possibilities," said Mr. Hardinge.

Figures Are Still Dropping

Liquor Sales Have Fallen Off Heavily In England

Englishmen have established a record for sobriety in the last year.

With the exception of 1916, when millions of men were at war there were fewer cases of drunkenness than at any other time in the English history. They numbered only 12,200, compared with 189,000 in 1913.

Not only drunkenness, but drinking itself has decreased to a marked degree in the last two decades, chiefly because of the steadily rising cost of liquor and the huge taxes. In the last year which saw the country prosperous, there was a decrease of almost seven million gallons in the amount beer consumed.

The fresh air movement is to be nationalized, and a revised orientation was important. There must be absence of interference at any rate from the noxious surroundings of Mr. Thrift, even in the winning of the new perspective. The vision must be transferred into ordinary life, and there must be no "studying about" from the classroom while the real thing goes on. Liverpool for example, has had 11,894 cases of tuberculosis, and 10,000 dead within 2,161 last year.

Has Faith In Canada

American Financial Magnate Says Dominion To Lead Way Back To Prosperity

Dublin Bulls a financial magnate of New York financial circles, has returned from a business trip to Canada, firm in the belief that the road of prosperity will shine on the Dominion independently and in advance of the United States.

The financial spoke in terms of the good he believes will accrue to Canadians in general from the campaign preparations going up at the recent imperial conference. He said the unbounded mineral resources of the country, his growing importance in manufacturing and his great agricultural regions, the yet undeveloped potential markets for many of her products made Canada ripe for progress, while wringed thoughts which come to us through God, with cheer and comfort, when we are downcast." Robert F. Horton.

"The opposition of wild beasts and angels is a half-tone engraving of the common experience of temptation."

Something To Be Proud Of

Shorthorn Calf Made Good Record At Winter Fair

He was just a little red and white Shorthorn calf, but under his velvety hide he must have carried an efficient beef-making plant, because he had made exceptionally good use of his time. He was born in Jan. 5, 1932, and he went on the scales at the Royal Winter Fair at 860 pounds. This means that, including birth weight, he had put on approximately 800 pounds in nearly three pounds of weight for every day of his short life. At the Royal Winter Fair, Toronto, he was reserve grand champion steer of the show, but at the Provincial Winter Fair, Guelph, he was made grand champion over all breeds, an exceptional performance for a junior calf.

At the Royal sale of fat cattle he was sold at the modest price of 10 cents per pound, but he was the second animal sold, following immediately after the grand champion, which is a decidedly bad place to occupy at a sale. His selling price, plus prize money, netted his owners, R. Sproule & Sons, Tweedale, Ont., at least $285, which is not bad for a steer calf about eleven months old, in times like these.

Bull Of Many Prizes

Has Been Sold For $1,000 To Go To Saskatchewan

A bull of many prizes has been sold for $1,000 to go to Saskatchewan. He is Sir Ormsby Segis, a Holstein, and he has won 17 first prizes, 11 championships and 11 reserve championships. He was sold by Sir Ormsby Segis Farms, Ltd., Oshawa, Ont., to Mr. Hall, Indian Head, Sask.

Cheese Exports Increase

Shipments For Month Of December Are Larger Than Last Year

Cheese exports for December were 1,000,000 pounds, as compared with 1,000,000 pounds for December, 1931, according to the Dominion Dairy Commissioner's report.

Exports for the month of December, 1931, were 1,000,000 pounds, as compared with 1,000,000 pounds for December, 1930.

SUNDAY SCHOOL LESSON

JANUARY 8

JESUS BEGINS HIS WORK

Golden Text: "The time is fulfilled, and the Kingdom of God is at hand: repent ye, and believe in the gospel." Mark 1:15.

Lesson: Mark 1:15-20.

Devotional Reading: Isaiah 11:1-9

Explanations and Comments

Jesus' Temptation in the Wilderness, verses 12, 13. Straightway. Immediately, implying that the ministry commenced at once after the baptism. Driveth him into the wilderness. Think out the course before Him. The Spirit spoke to Him and, The voice, through impulsion, commanding and He obeyed it, behaved.

There had been a tremendous experience. There was a new sense of life Everything was changed, the whole earth in tumult and turmoil. The fresh life needed to be sustained, and a revised orientation was important. There must be absence of interference at any rate from the noxious surroundings of Mr. Thrift, even in the winning of the new perspective. The vision must be transferred into ordinary life, and there must be no "studying about" from the classroom while the real thing goes on. Liverpool for example, has had 11,894 cases of tuberculosis, and 10,000 dead within 2,161 last year.

Preparing For Future War

Scientists Believed To Be Working On Poison Gases

John Drinkwater, British poet and playwright, believes poison gases and disease germs probably are being prepared on a large scale for war use.

Addressing the Institute of Arts and Sciences of Columbia University, Mr. Drinkwater asserted destruction of cities by these means in the next ten years is regarded as a possibility not grounded on "irresponsible pessimism."

"The scientist who is using his talents for such ends is an anti-social menace of the most contemptible kind and should be treated as such. Here is a campaign for the press to undertake that would bring it overwhelming honor.

"If there is the smallest margin of doubt on this dreadful issue, a general condemnation by the governments of such methods, and even an understanding not to employ them is not enough.

No asserted governments should ascertain where such work is being done and "stamp it out as they would stamp out a nest of gunmen."

Demand Is Growing

Canadian Canned Vegetables Being Shipped To the United Kingdom

Canned goods received by the Department of Agriculture at Ottawa from the Empire Marketing Board indicates that the demand for canned vegetables in the United Kingdom is expanding rapidly. During the season just closed a number of full carloads were canned products of fruit, and have moved directly from Canadian lake ports to the British market. The principal demand is for baked beans, peas and tomatoes, while asparagus is becoming known. Other vegetables now appearing in British markets are sweet corn, green and kidney beans, spinach, carrots, celery, turnips, beets, onions, parsnips, potatoes, cabbages, brussels sprouts, cauliflower and artichokes.

Australia Has Problem

Kangaroos Eating Sheep and Lose Fortable Their Destruction

Two thousand kangaroos have not up a kangaroo" on sheep and about 3,000 acres, 18 miles from Mount, in Western Victoria, Australia.

They are starving the sheep out, mastering through fences, and hovering over lambs with flying feet and swinging tails that stun them as effectively as a bludgeon.

It is unlawful to take the lives of kangaroos in Victoria, yet they have become a definite menace.

The chief secretary, Mr. MacFarlane, is being appealed to in an effort to have the ban lifted.

The farmers of the nearby district say that they will be ruined if action is not taken.

Italy Reclaims Land

Lake Which Covered 1,700 Acres Has Been Drained

Lake Area began disappearing some weeks ago from the map of the Istrian Peninsula in Italy, in an engineering project of outstanding importance.

Twenty-four huge dynamite mines were touched off simultaneously to create a channel of rock and permit the water from the lake to flow into the sea.

The water passed through a tunnel that had to be dug beneath Cherasco Mountain and proceeded to the Gulf of Carnaro by means of an artificial canal. Within ten days the lake, which covers about 1,700 acres had disappeared, and the land and surrounding bogs were reclaimed.

Glorified Safety Pin

Modern mankind's first ornament the safety pin—has been glorified by Paris designers into a smart piece of costume jewelry. Several versions of this well known nursery and household necessity have been devised. One pattern is simply a safety pin, three inches long, in copper, gold or silver finish. Others, likewise large, have knots or cross bars linking the two sides of the pin. And lastly the pin glitters and sparkles with rhinestones.

Some New Light Is Thrown On Constitutional Development As It Applies To The Dominions

At the last annual meeting of the Royal Institute of International Affairs in London, England, the report of which has just been received in Canada, Hon. W. W. Kenzel, K.C., president of the Canadian Institute of International Affairs, referred to the fact that when the new Spanish Republic was recognized by the British Empire six different instruments of recognition, instead of one as heretofore were deposited one for each of the nations comprising the British Commonwealth Mr Kenzel went on to say

"As a result of the constitutional development of the past twenty-five years, and particularly of the past ten years, the relations between the Mother Country and the Dominions have fundamentally altered, and now we have six nations, all owing allegiance to a common sovereign, each entitled to conduct its own foreign policy to negotiate its own treaties, and to deal generally with foreign affairs affecting it along the lines agreed upon in the resolutions of the Imperial Conference. That raises very important and fundamental issues. How is it possible to maintain essential agreement in matters of foreign policy with six governments conducting foreign affairs? How is it possible to conduct the foreign relations of the empire under these conditions and still preserve that measure of unity essential to insure that the strength and security of the whole? How is it possible under these conditions so to conduct interempire relations that peace and harmony will prevail among the different countries composing the Commonwealth? How is it possible to settle disputes arising between members of the Commonwealth in such a way as will avoid conflict and controversy and maintain a good understanding between them? These questions of fundamental importance upon the satisfactory solution of which the future existence of the empire depends without their solution no one can foretell what the future of the Empire will be."

The farm which British recognition of the Spanish Republic took threw light on constitutional development and problems of the British Empire. The recognition of the Spanish Republic itself throws light on constitutional problems associated with the inter-relations of all nations. The recent meeting in Madrid of the Governing Body of the International Labour Organization, attended by Canadian delegates, has been a public reminder. Into the very constitution of Spain have been written the Spanish obligations under the League of Nations and the International Labour Organization. The more or less automatic ratification of International Labour Conventions, for instance, is provided for. At the meeting referred to Spain was congratulated upon having the record in the matter of these ratifications, having ratified and carried into Spanish law, all of the thirty-one enough one. There have been fourteen ratifications since April.

Incidentally, because of federal constitutional difficulties Canada has but four ratifications to her credit, the Irish Free State leading the British Commonwealth with twenty-one.

Camden Export Cattle

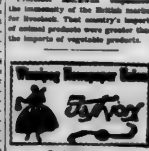
Great Britain Prefers Fresh Meat To Chilled Meat

Great Britain prefers fresh meat to chilled meat and is willing to pay a premium for it. Professor J. W. G. Macmillan, who has recently returned from a visit to Great Britain, where he passed a shipment of cattle from the University of Saskatchewan to Smithfield market, London, made this statement to a gathering of the North Saskatchewan branch of the Canadian Society of Technical Agriculturists at Saskatoon. He decided against Canada competing with the Argentine in the chilled beef trade.

Though the expenses of shipping live cattle was higher the dressed beef fresh proved chilled that. The shipment from Saskatoon topped the Smithfield market, equalling the best Scotch cattle.

One objection that buyers made was that the supply was not continuous. They did not wish to recommend to their customers an article of which they could not guarantee a steady supply.

Professor MacEwan emphasized the immensity of the British market for livestock. That country's imports of animal products were greater than the imports of vegetable products.



By Ruth Rogers

FOR DAINTY WEE MAIDS

Here are French undies that are very practical.

A cunning slip—a one-piece affair, that brother will especially like.

It's so easily made and so easily laundered. It opens at the centre-back so no daughter can slip into it easily.

The panties have elastic inserted at the waistline and at the legs.

You can make this practical outfit in a very small outlay.

Lawn, batiste, cambric and crepe de chine are suitable

Style No. 714 is designed for sizes 1, 3, 5 and 7 years.

Size 4 requires 1½ yards of 36-inch material with 3½ yards of lace edging.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

On Cost Basis

Directors Of Provincial Election Bibliothèque Story Association Are Elected

M. E. Tracy, in the New York World-Telegram says:

It takes about one year to nominate, elect and install a President of the United States. That is ridiculous. It fails utterly to square with the American idea of progress through action.

Without warning or preparation England can order a general election, and within six weeks can organize and get a new administration under way within six weeks. As our elections are held at regular intervals and as everybody knows when they will occur, we ought to do as well, if not better. Instead we take more time than our grandchildren did when they had to depend on ox-carts and gravels.

For people who can't bear to ride under forty miles an hour, who prefer the telephone to mail and who want everything broadcast over the radio the moment it occurs, we take our politics with amazing patience. Is it because we enjoy the game, or lack the ability to improve public affairs in an efficient manner?

Apparently, the trouble goes back to a habit of thought which perhaps is an inheritance from the Constitution is involved. We just can't stand the idea of removing anything from that sacred document, no matter how antiquated or unworkable it may be."

Trades For Jobless

B.C. Minister Of Labor Sends Relief Proposal To Ottawa

Hon. F. W. Burke, British Columbia Minister of Public Works, has forwarded to Hon. W. A. Gordon, Dominion Minister of Labor a plan intended to relieve care of large bodies of young men in industry and trades.

The plan would be to secure the co-operation of industrial and business concerns in taking young men between 19 and 24 out of unemployment lines and starting them at learning a trade.

The $12 a month now spent in their maintenance in camps would be turned over to the employer, who would be asked to contribute a like sum for wages. The $24 a month should enable a youth to keep a home, at the same time that they were learning a useful occupation and retaining their morale.

More than $30,000,000 will be spent in transporting Australia's present wool crop to Europe.

Unbridling which, when cloned, resembles a horse with flowers, are a fashion novelty in Paris.

Northern Manitoba Can Boast Of The Largest Experiment In Muskrat Farming In The World

An Important Animal

Ottawa's Largest Fur Of Letters, Email Hand Tan

A cow, its ownership in money records, is the cause of the largest collection of correspondence in Parliament Hill. Its death led to thousands of letters.

Many years ago in Manitoba a cow was killed by August Swanson, a Swedish immigrant. Law suits followed and when Swanson threw over the ordered seized he wrote his first letter to Ottawa. A few days later Ottawa replied. Swanson wrote again. Ottawa answered. Swanson replied in fact he wrote every day for weeks.

Fifteen years later the Swanson file of letters and replies weighed several hundred pounds. And 25 years after the cow was killed the file stands 52 ft. 6 inches. The man's suicide put an end to the correspondence but to this day Ottawa has retained every one of his letters. Why, no one knows, he knows.

One of the prize exhibits in the old warehouse where the stuff is stored, is a letter signed "a soldier's darling," received late in the year by a cabinet minister. The government was considering a demand that all survivors of the first contingent be returned to Canada. The soldier's darling wrote: "Why should my lover have to remain four years in the trenches when you fat old guys sit full of beer in Ottawa and do nothing." Now put on your thinking cap for one of those days I will be down there and give you birds the once-over."

Helping London Hospitals

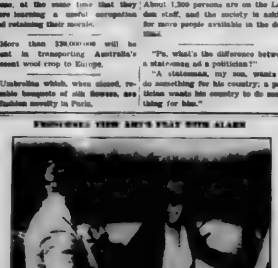
Increase 24 Hours For Blood Transfusion Service Growing

In the first half of this year the blood transfusion service of the British Red Cross Society supplied 1,199 voluntary donors to London hospitals and institutions, compared with 991 for the corresponding period of 1931. In June, 344 calls were answered, breaking the previous monthly record. About 1,300 persons are on the London staff, and the society is adding the more people available in the daytime.

"Ps, what's the difference between a statesman and a politician?"

"A statesman, my son, wants to do something for his country; a politician usually wants his country to do something for him."

Famous Cell Tree Lives That Both Alarm



Amy Johnson Mollom's recent record-breaking flights between London and Cape Town have brought only grudging praise from Frenchmen, who are concerned over the possibility of French women becoming infected with the virus of feminine athletic fever. According to reports from Paris, a prominent Frenchman, J. H. Homey, feels that such performances as Mrs. Mollom's would endanger a French woman's feminine charm. "Emculations of the woman," he writes, "is against the dictates of nature and organized society." Here we see Amy, and the local perturbed about the "emancipation" she has created by her prowess, being welcomed in Cape Town after her remarkable flight from England. She has since returned to England and established a new record for the homeward journey.

Northern Manitoba now boasts the largest muskrat farm of its kind in the world. It is a one-mile ranch and a special order in council has made it possible

The Hudson Bay Company of the Hudson's seal coats and muskrat wraps nearly cost the Hudson Bay Railway regions No best bit of fur But now fur farming has started in a big way

In 1927 nearly 1,000,000 rats were shipped out of The Pas trading post. In 1928 the number had dwindled to 40,000 So Tom Lamb, Moose Lake district, 125 miles east of The Pas, decided that something had to be done Lamb's trading post is situated on the edge of the Saskatchewan swamps, thousands of square miles of [illegible] and almost every [illegible] is [illegible] muskrat.

It occurred to Lamb that the muskrat was a valuable animal. He counted the rats by the thousands and the men who follow the fur

Tom Lamb decided to create a big ranch in the centre of his territory He selected an island bounded by the Summerberry and the Mond rivers. The island contained 640 acres of 53,920 acres or roughly 81 square miles These are 124 lakes on the island. They range from 10 to 2,000 acres. The lake shores, like the creeks, give him 241 miles of trap lines

When the trader placed his request for the island before the Government he found that the law stated that no license could be given for more than 2,000 acres But when he explained his proposition, the Manitoba Government passed special legislation to give him a trial. The substance of this deal brings out some unique points which may have an important bearing on the future of the fur industry in the North.

The rat population of the island is [illegible] and if not [illegible] there number in three years will reach 30,000. A few years ago the rodents were numbered in tens of thousands.

Lamb has guaranteed to establish buildings and construct dams to conserve animals and protect them from the elements, their natural enemies, and from poachers.

He has guaranteed to carry out research work on the life and habits of the rats, to employ Indian labor, and thus protect the natives in the district against hunger. He has undertaken to sow wild rice and wild celery for the rats. He has promised to co-operate in establishing a bird sanctuary on the island. He will place 1,000 sign warning persons against infringements against the Game Act. He is selling no stock. He is doing all this out of his own pocket, and is paying the Government for the privilege.

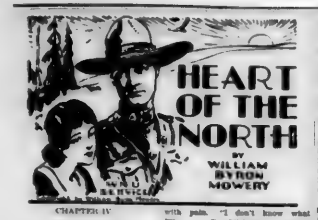
The Government permitted him to start rat ranching with the understanding that he pay 2 cents per acre per year for the first five years. After that, if the Government is satisfied, the lease will be renewed on terms which will then be decided upon. No rats will be taken in the first three years, as it will be necessary to let them breed and increase their numbers. So the Government secures rental on marsh land, royalties on fur after the third year, an assured livelihood for a number of Indians and the value of an experiment that may be the beginning of bringing fur back into the Far North.

A Forty Inch Mirror

For Telescope To Be Installed By U.S. Naval Observatory

Designed for a photographic telescope to be installed in the Naval Observatory, Washington, D.C., a mirror 40 inches in diameter has been made, says Popular Mechanics Magazine. The telescope will have a range of approximately ten million light years, each representing over 6 trillion times the distance from the earth to the sun, and will be one of the world's most powerful instruments.

That talking iodine into the system would prevent goiter was known to the Chinese fifteen centuries B.C., as well as to the Greeks and Romans.



CHAPTER IV

Rides In the Prow

During the meal, as Joyce sat at the head of the table pouring coffee and watching a pan of biscuits in the stove, Alan kept studying her, wondering how any girl could stand the isolation and poverty and lonely battle she was enduring Two whole years here, five years out of her young womanhood, the choice time of her life, sacrificed at this isolated trading post, giving up everything that a girl holds dear! She was too fine to be leading a life like this She ought to get out of it There was a limit to her bravery and spirited strength.

As the men were pushing back their chairs and reaching for pipes he felt some one pushing him with a boot under the table Looking up, he saw Larry elevate an eyebrow at him.

Wants to talk to me alone Alan surmised; and he gave Larry a slight nod To the other men he said rather sharply: "You men, put away your pipes and police up these dishes Don't leave a stack like this for Joyce Bill, you see to that"

Casually going outside a few moments later, he glanced around and saw Larry waiting for him a dozen yards away, over near the storage shed Sauntering across, he asked quietly:

"What's up now, Larry?"

Larry flipped his cigarette aside "Come in here with me, Alan. I want to show you something."

Producing a pocket flash, he played a yellow shaft upon a pack of furs on a low shelf.

"Alan, you see that wolf skin they're wrapped in? That's what caught my eye. It's a Yukon animal, probably from the Kayukuk headwaters in the Endicott mountains. It made me curious, so I pried into the pack and saw these dark otter. They came from the Yukon, too. I thought to myself, there's no wolf or otter like them in Dave MacMillan's territory." But say, Alan, look here! See the flash a minute; look here." Larry pulled out several of the rich, dark-gleaming otter pelts and rolled back the fur at the brand end "Take a good look at them blue stamp marks."

Alan bent close and he suddenly gasped.

"Good Lord! They're D. & H. furs! What're they doing here, Larry in Dave MacMillan's possession?"

"Stolen! What else" What's more to me, Alan, I checked on them serial numbers, and this bunch is one of the packs stolen from the Midnight Sun!" He added quietly: "Maybe we don't know yet who them skin smugglers are, but now we sure'n h—l know who's directing 'em!"

In low tones, there in the darkness, they talked the situation over.

Finally Larry asked: "You're going to arrest him, Alan? An accomplice that way, even if he didn't have a hand in the actual killing, they'll give him the limit IT'll be h—l on Joyce."

Alan shrewd. His voice was torn with pain. "I don't know what I'll do . . . But I'll have to do something about it."

After a little silence he directed Larry, you go down and relieve Paul Don't tell these other men anything about this yet."

When Larry had gone, Alan left the moonlit-mottled shed, and started up along the side of the trading hall to Joyce's window As he came up, purposely cracking a stick, he had a glimpse of her whole room. Its furniture was a dresser, a chair originally straight back with a pair of rockers fitted to it, a sheet-iron stove with woodbox against the wall, and a bed which he knew had been a condemned barrack cot But Joyce had somehow lifted the bleak room almost to [illegible] These were birch-bird crests of green-purred violets and Arctic primulas and adder's-tongue on the dresser, some sprigs of brighteyed berries above it, a wolf-rug across the floor at the bed, and on the dresser a picture of himself, of her former employer down in Ottawa, of all her people.

She had heard him and turned toward the window and recognized him in the weak light.

He said: "Joyce, I've got to talk with you. Maybe you'd better come out here where we'll be alone."

She stepped to the window

As Alan helped her down, trying to say lightly, "It's unlucky, Joyce, to come through a window that way," he felt the hard bulge of that little bulldog automatic pressed against him. At least his gift was still protection to her.

Without a Word of Reply or Self-Protection He Took All She Had to Tell Him.

He suggested: "Let's go a little farther along, Joyce. I don't want that long-eared Whipple overhearing this."

Further aimlessly, he led her a stone-toss west of the storage shed to a little clear place in the spruces. Trying to prepare her in some measure, he told her of Larry going into the shed, happening to notice a strange pack of furs, inserting and examining them. Then he told her about the serial numbers. He hesitated a moment then, with Joyce frowning perplexedly at these strange furs being in the shed. But there was no mercy possible now, and he took the final step.

Joyce, I hate myself for telling you this. But you've got to know. Those furs in your father's shed are one of the packs stolen from the Midnight Sun!"

"Stolen? From the Midnight Sun? But Alan What what's it doing here?"

"This afternoon while you were asleep, Joyce, your father, or else one of those bandits, put the furs in there. That pack is it must be his share in the arrangement. Joyce, your father is somehow connected with those men . . ."

Realization came shortly to Joyce Then sharply, like an instrument of torture came pain, [illegible] and anger, and she drew a little away from him

I'm sorry, sorry," he said in heartfelt sympathy. Your father used to be my friend. And he's your father, that's what hurts the worst "

Joyce drew still farther back from him with her eyes flashing with a [illegible] He had gone prying around for evidence! He was blind! Heartless! A man-hating wolf! Inhuman Worm

Alan was thoroughly surprised. He had seen Joyce [illegible] Eskimos and [illegible] at their dances at them like Revolutionists arrows, but with him still, with her mother, she had always been as quiet as a summer wind. The way she was [illegible] now, defending her father, showed a new depth to her nature

Without a word of reply or self-protection, he took all she had to hit purposely cracking a stick, he had a glimpse of her whole room. Its furniture was a dresser, a chair originally straight back with a pair of rockers fitted to it, a sheet-iron stove with woodbox against the wall, and a bed which he knew had been a condemned barrack cot But Joyce had somehow lifted the bleak room almost to [illegible] These were birch-bird crests of green-purred violets and Arctic primulas and adder's-tongue on the dresser, some sprigs of bright-e

OBITUARY

At Winnipeg on Dec. 29th, 1932, Richard Field in his 63rd year beloved father of Lt. Col. R. Field, R. C.M.P., Winnipeg and Mrs. F. R. Mitchell and Mrs. Harvey of Fort Saskatchewan, Alberta. Interred in St. John's Cemetery, Winnipeg, Jan. 3rd, 1933.

MRS. PHYLLIS LEPAGE

The funeral service of Phyllis Lepage, widow of the late Napoleon Lepage of Fort Saskatchewan, who passed away at her residence, Fort Saskatchewan, on December 30, aged 63 years, was held on Saturday morning at 10.30 o'clock at Our Lady of the Angels Roman Catholic church, Fort Saskatchewan. Rev. Father Clement officiated and Interment took place in the Lamoureux cemetery. The pallbearers were Messrs. W. J. Foster, R. Latour, J. Lavoie, T. Moffitt, A. Lamoureux and Dr. Turner. Many beautiful floral tributes were received. She is survived by three daughters, Mrs. Jim Bourelle of Fort Saskatchewan, Mrs. William Morsdon of Rock Whitemouth and Mrs. F. H. Lebude of Winnipeg, Man. and two sons, Joseph and Chandler, both of Fort Saskatchewan. Edward of Winnipeg, Manitoba.

Taken from the Files

19 Years Ago Today

Thursday, January 8th, 1914

During the year there have been shipped from the C.N.R. depot here two hundred and thirty-one cars of grain and fifty-three cars of cattle.

We understand that another Edmonton chappie has been encountered this week, Jas. Graham having sold his old established blacksmith business to Tom Price the bike foreman.

The shower of rain on Monday last was not enough an innovation as is generally supposed, as it rained for four days in January 1912, and on the closing days of January, 1913, quite a down pour was experienced, although the shower last Monday was a gentle one, it was the heavy enough to lay the dust for awhile.

Two rinks of curlers went to Edmonton Monday to play a similar number of rinks in a attempt to lift the "Red Letter Cup" they were however not successful and no doubt their failure is largely due to the tricky nature of the ice, and again the rocks were not properly cooled for the game started. Mr. Fred Atkinson's rink went down to defeat in a 21 to 20 score, an advantage of 21 points which Mr. Bowden, who runs his game could not over come.

The following are the personnel of the two Fort rinks:—
J. Bowden, skip; C. Bowden, J. Wright; Parsons, F. Atkinson, skip; A. M. Carscadden, P. Gordon, R. H. Simpkin.

Fort Curling Club To Hold Big Jamboree on Feb. 3

At a well attended meeting of the Fort Curling Club held last week-end, it was decided to hold an Ice Carnival or Jamboree on Friday, Feb. 3rd.

Committees were drawn up and those whose names are not on the board in the Curling rink may be called upon anytime by Skip.

Teams consisting of the Skips, Thirds, Seconds and Leads were drawn up and each of these teams were to nominate a candidate for the Carnival Queen. Tickets were to be sold with each tickets a number of votes are given and the team selling the most tickets for their candidate will be elected Queen of the Carnival.

The following local young Ladies were chosen by the different teams for their candiate for Queen:—

Skips, Miss Helen Jackson,
Thirds, Miss Ada Truby,
Seconds, Miss Gertude Mann.
Leads, Miss Jewell Butler.

Tickets on the above candidates can be had from any member of the respective teams of the Curling Club.

It was also decided to give a pair of Curling Rocks away at the Carnival, members of the Fort Curling Club will have tickets on these rocks.

A splendid program has been arranged for this evening's entertainment, and by the advance sale of tickets up to date, a large crowd is expected. Full details will be given during the next few days.

Fort Junior Hockey Team Win Third Game

Coach Lane's Junior aggregation of hockeyists won their third straight victory on Saturday afternoon last by defeating Notre Dame 6-2. The victory cost the Fort the services of their captain and leading scorer, Robin Whitton. On a rush, Robin crashed the Notre Dame defence. A stiff check in the collision cost Master Whitton's head a pleased his leg cutting an artery and went clear to the bone. He was put in the Doctors care and the game carried on.

Lane playing defence with his Juniors to aid the boys in the working of the forward pass and keeping the defence in their place, had a busy evening at top speed. If the boys continue their present play they will win quite a few games.

R. Whitton opened the scoring in the first period on a rush which brought him to the goal. R. Williston scored on an assist from Whitton five minutes later. Before the period ended Campo scored for Notre Dame for a count of 2-1.

In the sandwich session Plisteff tallied for the locals on a pass from Kolterbern. Campo scored Notre Dame's final tally.

In the third period H. Wootton scored on an assist from Lane. Kolterbern scored two minutes later to run the count up to 5-2 on a solo rush. Lane scored to finish the count 6-2.

It was in the third frame the R. Whitton was forced to leave the game.

Lane has a hard hitting defence pair and opposing players are not any too quick deciding to pass them alone. The forwards all back check and give their opponents little chance to score.

With one or two more games the boys will be clipping at a fast rate.

Maybe some of the folks are wondering what the Junior club has done with their proceeds from their Shetland Pony raffle. Just wait folks and you'll see inside of a week or ten days.

Fort line-up:— Hazlett goal, S. Ramsay, E. Graf, R. Lane defence, R. Whitton, W. Ringsley, R. Williston, H. Wootton, O. Kolterbern, A. Plisteff. Referee B. Graf.

Any store advertisement will pay if it makes a visit to the store immediately worth while to the readers of this paper.

Rink Business Done At School Board Meeting

Minutes of a regular meeting of Fort Saskatchewan School Board held in the Council Chambers on Monday 9th. January, 1933 at 7.30 p.m.

Present: Mr. F. Atkinson, Chairman, Trustees, Mr. E. A. Brown and Dr. Brown.

The minutes of the last meeting held were read and adopted on the motion of Mr. Brown.

In connection with a communication from the Secretary of the Alberta School Trustees Association, Dr. Grunert was elected a delegate to the annual Convention of the Association to be held at Edmonton on Feb. 1st. 2nd, and 3rd., to represent this school District. The Secretary was instructed to issue cheque for necessary fees for Association, and magazine.

Moved by Dr. Grunert and adopted that the Sec. Treas. is hereby authorized for and on behalf of the School District to negotiate with, deposit with, or transfer to the Royal Bank of Canada, all or any cheques and for the said purpose to endorse the same or any of them on behalf of the said school District, either in writing or by rubber stamp for deposit to the Credit thereof. That all cheques of this School District be drawn in the name thereof and signed by the Chairman, and cheques returned and certificates of balance be signed by the Sec.-Treas.

Communication from Department of National Defence received enclosing $125.00 being annual grant for the Fort Saskatchewan School Cadet Corps.

As Miss Alice Redmond ceased attending the High School on the 21. Oct. last after having paid the fees for the full term, it was moved by Mr. Brown and adopted, That $4.00 be refunded to the Saddle HIH S.D., who asked for rebate.

The following accounts were passed for payment on motion of Mr. Brown G. A. Cranston $139.21; F. W. Smith $18.12; Meyer Co. 67c; Fort Hardware Co.; Jones, Graham & O'Brien $6. 75; The Record $2.56.

Before the meeting adjourned the Chairman thanked the trustees for their services during the year.

The Principal was present and submitted list of High School students who received less than 45 per cent. in any subject in the December examinations. Mr. Anderson also presented December attendance report, and made other reports to the Board in connection with the school.

FORMER HIGH SCHOOL BOY [illegible] AWARDED

In the list of High School Honor students published Saturday last by the Department of Education, we notice the name of James Williams, whose parents reside north-east of here.

The students are classed under the school in where they studied and in this connection we wish to point out that the said student took his Grade XII here last year and not at Bruderheim.

His father, in a letter to the local school principal, writes in part:—

We have just received Jimmy's Diploma with "Honors" marked across it in green capitals and I thank you for your good work in instructing him. He passed 8 subjects with an average of 76.86 per cent. and (Trigonometry, 100 per cent.).

The young man record is still more remarkable if we take into consideration that no subjects were repeated (he has never failed in a High School examination) and that he lost in all 5 weeks of his school year 1931-32.

Something like 4,000,000 lbs. of turkeys were marketed in the provinces during the past year, according to the provincial poultry commissioner. About 123 carloads were shipped out to eastern and western markets.

Tokio, Japan, is trying to unravel its street traffic tangle by issuing new transportation regulations.

With The Curlers

Two rinks motored to Edmonton on Monday evening engaging in a battle at the Royal Curling rink for the much coveted Ash Cup. After fourteen ends of hard fighting all the way, the local team was victorious, bringing home the cup.

The personal of the rinks were:—
J. E. Graham, J. Wright, F. Smith, Jas. Graham, J. McDonald, Davis, A. Carscadden, and McPherson.

The cup now rests in the window of A. M. Carscadden Hardware.

oooooo

Two rinks from the Royal Curling rink in Edmonton paid a visit to the Fort on Tuesday afternoon playing four ends.

The following are the personnel of the visiting rinks:
Rink, A. W. Ramsay: T. Dykes, Bert Hess, Bill Orr, McIntyre, Wm. Robinson, Bill Freeman.

The visiting team went home after winning both games.

Regular Meeting of Town Council Held Last Monday

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Council Chambers on Thursday the 5th. of January with Mayor G. T. Mountcastle and Councillors Simmons, Graf, Smith and Fillmore present.

The minutes of the last meeting held were read and adopted.

Two applications for relief were considered by the Council and approved, and recommended to the Department.

A report from the Inspector of Theatres regarding the Memorial Hall was submitted.

A By-law was passed appointing Jas. Biddle, Sherwood-Town, to be Returning Officer for the next Municipal Elections.

The usual notice required by the bank was passed That the Secretary-Treasurer of the Town of Fort Saskatchewan do deposit in the name of the Town in the Royal Bank all moneys received by him on account of the said Town. That all cheques drawn by the Town, payable to the order of the said Town be endorsed by the Sec.-Treas. Therefo, or by rubber stamp, for deposit to the credit of the said Town. That all cheques be drawn in the name of the Town of Fort Saskatchewan, and signed by the Mayor and countersigned by the Sec-Treas. That the usual receipts for cheques returned and certificates of balance, be signed on behalf of the Town by the Sec-Treas. thereof.

The following accounts were passed for payment: Simmons Lumber Co. $6.56; W. A. Graham $14.55; J. T. Lalonde $25.00. Calgary Power Co. Nov. $138.06; Ed. Robinson $2.50; J. Larose, coal $61.24.

HOCKEY

The Fort defeated Bruderheim Monday, January 9th, at Bruderheim by the score of 6-2. With this win the Fort has made a record of 4 wins and two ties in their last six games.

Bruderheim have yet to enter the win column but they are shaping around to it rapidly. They are a fast bunch of skaters but lack finish around the goal.

The locals opened the scoring when Lane breezed a fast one from the left boards to tangle it in the draperies.

The score was 2-0 when Lane again scored, beating the defence and giving the goalie no chance. to save Bruderheim fought hard to decrease the lead of the locals and succeeded by scoring from a scramble. But the Fort forged farther ahead when Lane scored his third goal on a rush with Graf and Karras.

With but 3 minutes to go in the second period Bruderheim scored their final counter from another scramble in front of the Fort goal. The period ended 3-2.

With the wind blowing more over the rink fences at a rapid rate the boys went out gamely to play the third period.

From the face-off Lane secured the puck and drove in a hard shot was in for the rebound, his shot was which found the net for his fourth goal. Stuckey, Button and Plisteff who were playing good hockey all of this remarkable Graf second to end the game at 6-2 in favor of the Fort.

Bruderheim plays here on Friday, January 13th. Come and give the locals your support as they have a very promising team. They should score a birth in the league playoff. At present they are in second place, upon which to move the fifth Lowest holding down the top berth. Fort and Lane hold back the forces of the Bruderheim crew. Karras secured the goal. Lane secured the Lamoureux, Karras, Lane, Graf, R. puck at the blue-line rushed in and Stuckey, Plisteff, Button.

Britain Leads The Way.

Because of its importance as an essential factor in the economic and financial recovery of all nations, and because a reasonable, business-like settlement must be reached before that recovery becomes even possible, we offer no apology for again making the international war debts the subject of discussion in this column. Such discussion, if it is to be at all helpful, must, however, be conducted in a fair manner, arguments advanced must be based in justice and on reason, and nothing of a nature to provoke ill-feeling or prejudice indulged in. The whole object of such discussions should be to present facts, frankly outline and explain the actual positions, and thereby seek to bring all nations closer together and into a more friendly understanding of each other's position, and the necessity of taking, not one-sided action, but in effecting re-adjustments which will prove satisfactory to all.

First of all, let us again refer to the contention advanced by the Manitoba newspaper previously quoted by us, which presented the viewpoint of many people in that country that it was passing strange that Great Britain, while finding it difficult, in fact never impossible, to repay its debt to the United States in gold, was still able to devote 600 millions of dollars annually to military purposes.

Without attempting to analyze such payments in order to establish what proportion of them is accounted for by pensions, hospitalization, and other care of living disabled soldiers and sailors, and other payments which have to do with what is past and not as preparation for the future, we would present certain facts in support of our former statements that Great Britain has reduced her military expenditure to a greater extent than any other country, that with a world-exciting Empire she is spending less, not only proportionately but actually, than the United States, much less than France, and that she is the foremost advocate of disarmament in the world today.

Great Britain does not maintain a large army, and never has done so. At the outbreak of the Great War it was so small that Germany looked at it with contempt. Such as it was, it was scattered all over the world, with the major strength in India, and units located at Gibraltar, Malta, Egypt, China, along lines of Empire communication. It was not an army of offense, but solely for defence; in a word, a necessary police force of the Empire. The British army is smaller today than before the war, and smaller than the army of the United States, almost insignificant compared with the standing armies of European countries.

Britains chief expenditures have been on its navy, and that navy was likewise a defensive machine for a non-surrounded country with Dominions, colonies and protectorates located in all parts of the world. It was designed and created to protect the sea-borne commerce of the Empire in time of war, whether Britain was involved in such war or not, and to be "a world policeman in time of peace, to ensure and protect British subjects and other people in all parts of the world where revolution or disaster might occur."

Bearing these facts in mind, and the further fact that the British Empire is not smaller because of the Great War, but larger, and its responsibilities toward backward peoples greater than ever before, let us ponder for a moment what Britain has done to lessen military, or war, expenditures and to promote disarmament throughout the world.

In the British House of Commons recently, the First Lord of the Admiralty declared that, so far from hindering disarmament, "Great Britain had given a most magnificent lead to the world." He quoted figures to support his assertion. In 1914 Britain had 60 battleships; by 1936, when the next conference on naval strength falls due, Britain will have only 15 battleships. Britain's cruiser strength in 1914 was 106; by 1936 it will be 50. Of destroyers Britain, in 1914, possessed 265, in 1936 the number will be 117. In submarines Britain in 1914 had 74; by 1936 she will have only 26.

Now let us compare total naval tonnage of Great Britain, United States, France and Japan as it was in 1914, and as it will be when the next naval conference meets in 1936. Here are the figures:

	1914	1936	Increase or Decrease
Great Britain	2,199,000	1,151,000	47% Decrease
United States	861,000	1,120,000	30% Increase
France	746,000	500,000	33% Decrease
Japan	523,000	720,000	37% Increase

Thus has Britain led the way towards disarmament. Its army, which is a threat to no nation but a domestic police force, is smaller than its navy, upon which at any moment the very food supplies of the British people may depend, and upon which thousands of British subjects in odd corners of the world have to rely in time of trouble, has been reduced by almost one-half. Can Britain with safety go further until other nations display a willingness to follow her example?

Given the figures given do not tell the whole story. Britain relies on cruisers more than any other type of ship to protect her far-flung colonies and protectorates. The life of a cruiser is estimated to be about 20 years. Nine of Britain's cruisers are already over that age, and by 1936 no less than 16 out of the total of 50 will be out-of-date.

France, Like Britain, shows a decrease in total tonnage, but in 1914 very many ships in the French navy were of practically no fighting value, while today the French fleet is very much up-to-date.

At the present time Britain has 36 cruisers in actual commission, of which 29 are showa. In the past 15 months there were 18 urgent calls for cruisers to be sent to various parts of the world, all cases of dire necessity, and the British Admiralty now finds the greatest difficulty in answering such demands. We again ask, should Britain go further, scrap more ships, allow such demands for assistance to go unheeded, and remove from a still unsettled world that protection which it has been the pride and glory of the British navy, it has always provided when the call came?

No, Britain in leading the way in disarmament, just as it is in relation to problems calling for solution. It is now up to those who professedly approve of her policy to follow that leadership and give a helping hand.

The Irish Free State has granted a 12½ per cent. bounty on cattle exported.

Slavery ends, with wing spread of six feet, are flying south from the three experienced doctors carry on the work of the cheap dispensaries.

Honored By France

Woman Rendered Disabled Feels Of Public After War

For the work she did after the war in adding plastic surgery to restoring the mutilated faces of French poilus by creating life-lasting "portrait masks," Mrs. Anna Coleman Ladd, Boston sculptor, has been awarded the Cross of the Chevalier of the Legion of Honor.

"The method I used for my portrait masks," said Mrs. Ladd, "was technically this: A mask of the mutilated face was made. Then, working from photographs, or verbal descriptions, I would build up the missing or ruined features with their natural expression in the plaster cast. From this a gutta percha mask was hung in a copper bath for two days. The blue copper sheathing was then stirred and painted with a special enamel that would match the skin tone of the subject as nearly as possible. If the wounded man was blind, the mask would be equipped with false eyes, and with spectacles, eyeshades, mustache or beard to camouflage the masks were light and durable, and they will last a lifetime.

"Those men could walk the streets and be greeted cordially by their friends and relatives. They could smoke and twirl their mustaches.

"I have many touching letters from men I have been able to help."

Work Nearly Completed

Mileage Delayed Clearing Up Canadian Pacific Lines

For two years men have been engaged in removing ledges on the eastern side of Partridge Island and other points, as a consequence, the main channel leading into Saint John harbor. More than half the work has been completed.

The history of the undertaking dates back to the spring of 1930, when the S.S. Duchess of Richmond ran aground on the island in a fog before daybreak, this being prevailed, and the ship had not acquired sufficient steam to counterbalance the strong tide. At the subsequent sessions of the Dominion Parliament, money was voted for the channel development.

Work was delayed briefly by two mishaps. In October of last year the dredge "Leonidas" sank after a leak anchor punctured the hull. The crew scrambled to safety aboard a tug. Later, a coast trader purchased in Halifax sank off Moon Scotia while being towed to Saint John. Another rock breaker is engaged in the work as well as two dredges, including the "Leonidas," which was salvaged and repaired.

The ledges are being reduced to a minimum of 20 feet below the surface at low water.

Eyes and Nerves Strain

Trying To See in Bad Light Causes Waste Of Energy

Your whole body wastes energy when your eyes are strained by trying to see in bad light, reported Doctor M. Luckiesh and Frank Moss at a session of the Illuminating Engineering Society in the laboratories for the advancement of science. Nervous tension and fatigue result from reading a book increases or decreases as in direct proportion to the amount of light falling on the book.

A possible aid to study of cancer, discovery of the organism that apparently plays a leading part in producing cancer in plants was described by Dr. Michael Levine, of Montefiore Hospital, New York.

The organism he has isolated seems to be what causes cells of a plant to multiply rapidly and produce a tumor. Human cancer results from a similar multiplying and growth of cells, but the organism that causes it is not known.

Study of how the organism works, said Dr. Levine, may throw some light on the cancer problem in general.

Man Did Not Work

Stewards on the "Empress of Britain" had arranged to get George Bernard Shaw's signature to sell to autograph seekers. When one purchaser drinks in the Cabin Passenger one signs a bill. The stewards intended to pay for the drinks themselves and keep the bill—until they discovered Shaw was a teetotaler.

H. S. HOLT, President. M. W. WILKINSON, General Manager

AUDITORS' CERTIFICATE

To the Shareholders, The Royal Bank of Canada

We have examined the above Statement of Liabilities and Assets at 30th November, 1932, with the books and accounts of The Royal Bank of Canada at Head Office and with the certified returns from the Branches and Agencies. We have verified the cash on hand at Head Office at the close of the Bank's financial year and during the year we counted the cash and examined the securities at several of the principal Branches.

We have obtained all the information and explanations we have required and in our opinion the transactions of the Bank, which have come under our notice, have been within the powers of the Bank. In our opinion the above Statement of Liabilities and Assets is properly drawn so as to exhibit a true and correct view of the State of the Bank on 30th November 1932, and it is as shown by the books of the Bank.

A. B. MACDONALD, of Price, Waterhouse & Co. } Auditors.
JAMES P. ROSS & SONS.

Montreal, Canada, 30th November, 1932.

French Cafe In Tree

Shocked By Winding Staircase Built Around Trunk

In the branches of a tall chestnut tree at Bourse, near Paris, France, a restaurant-cafe has been opened. Resting on the branches are the supporting dining place, access to which is gained by means of a winding staircase built around the trunk of the tree. The food is conveyed from the ground in baskets attached to ropes.

Saved Ten Pages

The most widely-read book in New York - the directory of the New York Telephone Company - appeared in its winter edition with the courtesy title "Miss" eliminated from the names of more than 13,000 unmarried female subscribers. The company said by debiting the title it cut 10 pages from each of the hundreds of thousands of the bulky books published.

Best Credit Risk

Working Girl Rates Highest Says Secretary Of U.S. Exchange

There was a time when the phrase "pity the poor working girl" would make strong men cry and stern women soften in sympathy.

But no more, for, as Ralph Walker, secretary of the Mutual Credit Rating Exchange of St. Paul, says, she has become one of the best credit risks in the United States.

She has attained that rating, Walker explained, because she used her credit judiciously, knows what marriage she has for spending and for credit buying, is a budget maker, and keeps within her income.

As a class, Walker says, single women are better credit risks than single men, because men take chances; women don't. Women also are the reason why the low-skirted married man is one of the best credit risks, he said.

Prize Around Her Heart Held Out After Being Executed

Mrs. Henry Hauck, Muriel Lake, Alta., married Lake Doll 1 day had pains around my heart, and cold sweats, other doctor's a little treatment. I seemed to get that Doll I had all tried one.

Seeing that Milburn's Heart and Nerve Pills were good for those troubles I sent for them, and after taking the Pills for a few days I felt a whole lot better. Since then I have had no return of the heart trouble and I take pleasure in telling you about it.

Price 50c a box, at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Treeless Prairies Will Soon Be A Thing Of The Past As Result Of Forestry Campaign

Extended stretches of treeless prairie are now the exception in Western Canada. Thirty years ago these were common. Since the Canadian Government instituted a tree-planting division in 1901 under the administration of the Department of Interior (recently transferred the work to the Department of Agriculture), a total of 117,339,936 trees have been distributed free to farmers in the Prairie Provinces. Of this total 115,199,070 were deciduous or broad-leaved trees and 2,025,866 were coniferous or evergreen.

Sufficient seedling trees to establish shelter belts have been sent out from the Canadian Government Forestry Stations at Indian Head and Sutherland, Saskatchewan, to as many as 6,000 farmers every year for the past thirty years, or an average of about 4,000,000 trees per year. In addition to the free distribution, millions of trees have been sold to the Prairie Provinces Manitoba, Saskatchewan and Alberta by owners of prairie farm homes, which formerly stood out on somewhat bare and unrelieved landscape, are now sheltered by girdles of stout trees which not only serve as windbreaks but help to conserve the moisture and make a decided contribution to the attractiveness of the surroundings. The trees that are in most popularity among farmers in Western Canada are Caragana or Serbian pea, Manitoban maple, ash, poplar and willow.

The "treeless prairie" passed into the limbo with many other things about the close of the nineteenth century.

Dominion Seed Branch

Effective Work Carried On For Benefit Of the Agriculturist

The Dominion Seed Branch encourages the production of superior seeds by co-operative experimental and export; performs field inspection of seed crops for registration, and for certification as to purity of variety and quality; grades all field seeds offered for sale on the basis of control samples or of official samples drawn by inspectors, maintains laboratories for the analysis of seeds, feeding stuffs, fertilizers, binder twine, insecticides and fungicides; supplies markets information and develops the marketing of these products, and of hay and straw under grades as agreed on request; administers the Seeds Act, Feeding Stuffs Act, Fertilizers Act, Inspection and Sale Act, and Agricultural Pests Control Act. The branch organization includes four main divisions, and for the enforcement of the Acts Canada is divided into seven inspection districts each supported by a service laboratory.

Big Sale Of Canadian Tobacco

Ontario Growers Obtain Handsome Return On Crop Last Season

One of the largest tobacco manufacturing companies in England has recently bought 5,000,000 pounds of Ontario-grown tobacco, according to a statement issued by the Ontario Government Minister of Agriculture. This transaction is reported to completes the disposal of the 34,000,000-pound crop of flue-cured burley tobacco produced in Norfolk County, Ontario, which has returned about $4,000,000 to the growers.

In recent years the sale of Canadian tobacco in the British Isles has been encouraged due to the improvement in the quality and the preferential tariff accorded by British on tobacco grown in Canada and other parts of the British Empire.

Mouse Went It Says

"Until death do us part" means something when Prince Edward Islanders stand before the altar. There was not one divorce action in the province during 1932, and only two divorces have been recorded since confederation.

Coal production in Germany is increasing.

Grow Oats in China

Canadian Oats Introduced By Missionary Man Help To Supplant Rice

Canadian oats have been acclimatized to conditions in western China and are being distributed in quantity from West China Union University, Chengtu, a missionary institution. Its government experiment farms and to the hill tribes in Szechwan province for 1932 sowing.

The original supply was brought across from Canada eight years ago by Rev Frank Dickinson, B.A. M.Sc. a Canadian missionary, and tended by him in plot and field every season since.

In the Chengtu plain the staple diet is rice and in the hill country the tribes rely mainly on Indian corn. Under this condition it is considered that the introduction of oats will add ultimately an important article to the diet of large numbers of people. The experiment has not yet reached the commercial stage, but will be watched with interest

PRACTICAL UNDRESS FOR RESTFUL HOURS AND FOR SUPPER

Easily made. Here you have two patterns—an underwaist and pants for the practical. The pants have no fly in the waist. And an underwaist for slacks or with dressmaker that also buttons on to the waist.

They require such a small amount of fabric for fashion them. And simple—well I guess! You could almost run them up before breakfast.

Several sets could be made in a single day of excellent quality fabric that will tub and tub. When you shop, look on the remnant counters, the saving will be enormous.

Bodice, crossed-over dimity, linen, poogee and novelty ribbed cotton fabric are sturdy.

Size 4 requires 1¼ yards 36-inch for either Brother or Sister suit.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Turnips Are Popular

Canadian Product Is Favored In Markets Of United States

"Imported" turnips are becoming popular in U.S. markets, according to statistics which have been issued by the Canadian National Railways concerning Canadian turnips.

"By such humble instrument as the turnip Canada's foreign export trade is being advanced," states the agricultural department of the railroad. Because of the tender quality, the Canadian turnip has been finding a ready favor in markets of the United States as widespread as from New England to Florida and as far west as Texas. During the past year the Canadian National Railways shipped no less than 2,000 carloads or about 1,200,000 bushels of turnips, to points in the United States. Refrigerator cars are used extensively in handling the traffic. These turnips all come from farms in Ontario and Prince Edward Island, the entire crop of the latter province being shipped to England and New York markets.

Expect New Record

More Buyer's Looked For At British Industries Fair

Months before the opening date the hundreds of overseas buyers who have signified their intention to visit the British Industries Fair at Olympia and the White City, London and Castle Bromwich, Birmingham, is more than 30 per cent larger than the corresponding figure last year and the indications are that it will set up a record.

The department concerned undertakes to provide for 50,000 buyers in about 100 different overseas countries and territories. The fair, which will be held from February 20th to March 3, will be attended more conveniently than any of its predecessors. The area booked by exhibitors is 21 per cent. larger.

More than 250,000 varieties of flowering plants are found in the British Isles.

Wheat Kings

Canada Has Won Highest Award In Wheat Eighteen Times

Since the contest for the world's wheat championship was inaugurated in 1911 Canada has won the highest award eighteen times. At the last International Grain and Hay Show, held at Chicago from November 26 to December 3, 1932, inclusive, 30 of the 88 awards for hard red spring wheat went to Canadian competitors, including the championship won by Herman Trelle of Wembley, Peace River, Alberta. The winners of the championship in the past twenty-two years are as follows:

1911	Seager Wheeler, Saskatchewan.	
1912	Henry Holmes, Alberta.	
1913	Paul Gerlach, Saskatchewan.	
1914	Seager Wheeler, Saskatchewan.	
1915	Seager Wheeler, Saskatchewan.	
1916	Seager Wheeler, Saskatchewan.	
1917	Seth Larcombe, Manitoba.	
1918	Seager Wheeler Saskatchewan.	
1919	Mayor H G L. Strange Alberta.	
1920	J. C. Mitchell, Saskatchewan.	
1921	J. C. Mitchell, Saskatchewan.	
1922	G W Kraft, Montana U.S.A.	
1923	R O Wyler Saskatchewan	
1924	Mayor H G L. Strange Alberta.	
1925	J P Yates, Montana, U.S.A.	
1926	Herman Trelle, Alberta.	
1927	C Edson Smith, Montana, U.S.A.	
1928	C. Edson Smith, Montana, U.S.A.	
1929	Jos. H. B Smith, Alberta.	
1930	Herman Trelle, Alberta.	
1931	Herman Trelle, Alberta.	
1932	Herman Trelle, Alberta.	

"France has been seeking ways for government support of the wheat market.

A camera for aeroplane panorama photography registers 270 square miles.

AMY'S WONDERFUL WELCOME AT CROYDON

It must be a hard job for press photographers to keep track of Amy Johnson Mollison, considered to be one of the finest aviators in the British Empire. One day she is in Cape Town, then in Paris, and again in London. Here we see her receiving a wonderful welcome at Croydon, London, at the completion of the round trip to Cape Town and back in record time. With Mrs. Mollison is her husband, Captain Mollison, who also holds several records for flying. In the background between the happy couple is Sir Malcolm Campbell, holder of the world's land record for automobiles.

Much Annoyance Is Caused By Heavy Exchange Rates Against Canadian Dollar In U.S.

Canadians are both annoyed and mystified by the treatment their dollar receives in the United States. They know that conditions across the line are much worse than in the Dominion, but they are aware that, while banks in the Republic have been collapsing by the hundreds, there is not even a whisper against their institutions in their own country. Of course, the people of Canada realize that this condition is brought about by mysterious agencies such as exchanges and the balance of trade, but these explanations do not satisfy. This question is dealt with sympathetically by the Saginaw (Michigan) News in the following editorial comment:

Canada does not understand but does resent the continuing fall of the Canadian dollar on the New York money market. Apparently it is a sympathetic reaction to the drop in the British pound sterling occasioned by the war-debt mess. As a matter of fact, though, the Canadian financial system has nothing to do with the British system of which it is an integral part. And Canada has no foreign war debt. It bore the entire and heavy cost of participation in the war through internal loans and internal financing, and owes no other country anything on account of the war.

Canadian $42,000,000 internal loans was oversubscribed. So Canada obligations are in demand in the United States. Canada has maintained its credit to a higher percentage than this country. It has had no bank failures all through the depression. No defaults on defaulted Government bonds. No element of insecurity for private investment, but it finds its dollar heavily discounted. In the circumstances it is not to be wondered at that the Canadians are puzzled over the problem.

It is not sense which should interpret this country because one effect of the slump is further to damage Canadian buying in the United States. And Canada hitherto has been a very good customer.

It will be noted that the Michigan paper does not favor the encouragement of Canada buying in the United States, and admits that "Canada hitherto has been a very good customer." After all, apart from being a cause of annoyance, this discount on the Canadian dollar does not greatly affect the individual Canadian, if he stays at home True, it has checked his buying of United States goods, and stopped many little excursions over the border, but the country is not the loser by that condition.—Toronto Globe.

Russia Issues New Order

Housewives Under 56 Deprived Of Bread and Sugar

On the eve of the end of the five-year plan Russian housewives under 56 learned that beginning with the first of this year they would be deprived of bread and sugar of which they now receive small rations

This action, reflecting the food shortage in Russia, is an extension of the government's "no work no food" policy and apparently is designed to impel more women into industrial occupations with the view to ultimate abolition of the home as the unit of family life.

At the height of the campaign which has been waged for several years to draw more women into industry a census of Moscow revealed there were approximately 192,000 housewives in the city at the end of 1931. At that time it was estimated the number would be reduced by half at the end of this year. Eighteen per cent. of the total were over 60.

Stream Flow In the Middle West

In southern Alberta, following average to above average runs of May and June, stream flow has been continuously below normal, averaging only from 60 to 70 per cent. of the average monthly flows from July to October, inclusive, according to records of the Dominion Water Power and Hydrometric Bureau of the Department of the Interior. In southern Saskatchewan the run-off has been even less and the summer flow from May to October, inclusive, has had a monthly average only 55 to 65 per cent of normal.

HER FAT WAS A BURDEN

Show Dips in Quite Shocker

Here is another case s here the trim ming figure of youth has deposed the coarse, fat outline of middle-age. It is a housekeeper writing. She says:

"I cannot say what weight I was but I must carry fat a burden to myself. I have taken three bottles of Directone Tablets, and now I am quite slender. I am so hurried and people tell me for 40 I am more than proud of myself. How can take it from me that every word of this is true. I took a teaspoonful on hot water every morning till I used three bottles Now I only take half a teaspoonful each morning. I cannot recommend the Directone Tablets enough for they are worth their weight in gold." (Mrs.) A. H.

For generations, wealthy stout weight people have been visiting those European Spas whose waters are recognized for their reducing effect. It is called taking the cure. Now the formula of Kruschen represents the ingredient salts of the mineral waters from those far-famed Spas. These Salts combat the cause of fat by assisting the internal organs to perform their functions properly. So throw off each day those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue.

WORLD HAPPENINGS BRIEFLY TOLD

The Free State Department of Education estimates it will take 30 years to make the Free State bilingual to the same extent as Canada.

A Royal Canadian Mounted Police training station is to be established at Regina. About 25 men a month will be graduated at Wellington barracks.

The hottest day in two summers was recorded at Buenos Aires, when the temperature reached 101.5 degrees Fahrenheit on December 31. One case of sunstroke occurred.

The coding of Berlet Russell's first five-year plan and the beginning of the second plan has been accelaimed at Moscow, Russia, by the Soviet press.

The Ontario Government has placed a bond of silk on a 500-acre reserve near Petawawa, with the intention of ultimately stocking the forests with them.

Dr. W. W. Yen, head of the Chinese delegation to the League of Nations during the past year, was appointed ambassador to Russia by the Nationalist government.

Another of the problems that both or blind fish has been solved. The first shoppe ever written in "Braille" has been cooked by the Bank of Manhattan Company at New York.

A collection of portraits of members of all the royal families of Europe is to be left to the British Museum. It has been compiled by Mrs. Shenan Brocklehurst, now more than 80 years old.

A bronze bust of Silas Chesman, the poet, whose ashes lie in Forest Hill cemetery in Fredericton, has arrived from British Columbia and will be placed in the library of the University of New Brunswick.

Unusual Law Suits

Judge In Scotland Fined Over Cuss Words Here

Because a swarm of bees alighted on the head of Henry Gow, of Dumfermline, Scotland, Peter Curtis has twice sued Gow. The first time he asked Curtis for the value of the bees. At end of the honey season he demanded the price of honey which he said he would have had if the bees had the honey home. Gow claims that in their first summer in a new home bees do not produce honey so that he justly fit all the cost of feeding them. The present judge postponed the case to thinks it over.

Greatly Improved Formula
NEW MILK OF MAGNESIA
Pleasant Tasting Liquid
Physicians endorse Phillips' Milk of Magnesia as the best laxative and antacid. Also combats rapidly sour stomach, gas, indigestion. Keeps you regular. Try it. Only 25c, 35c, 50c, 75c and $1.00. Genuine only with name PHILLIPS on bottle.

Tax Refunds

U.S. Government Refunds Huge Amounts On Income Tax

That very pleasant feeling you get when you find you have been overcharged and get some of your money back has come to thousands of individuals and business houses.

The United States government refunded $60,543,564 last year, all because taxpayers, through some error, paid too much money in that or in previous years.

Several refunds amounted to more than $1,000,000. The United Fruit Company of Boston got $2,500,000, the largest. The sum of $2,180,000 was returned to the Lehigh and Wilkes Barre Coal Company of Pennsylvania.

Douglas Fairbanks, movie star, had $2,180 returned, and Ramon Novarro got back $7,684.

BABY'S COLDS

Club Work Effective

Recipes For This Week

(By Betty Barclay)

LESSON MENU-MEAT

Lunch
3 apples.
1 pound carrots.
½ cup raisins.
½ cup chopped nuts.
½ cup melted butter.
2 cups sugar.
1 teaspoon salt.
1 teaspoon ground cinnamon.
1 teaspoon ground nutmeg.
1 teaspoon ground cloves.
1 teaspoon ground ginger.
1 teaspoon ground allspice.

Squeeze juice from lemons and cook peel until soft. Put through meat chopper and then rub through a sieve. Add chopped apples and remaining ingredients, mix well and store in jars. Use as a filling for turnovers and pies.

SHREDDED WHEAT CREOLE

6 shredded wheat biscuits.
3 cups hot meat stock.
2 tablespoons bacon fat.
2 tablespoons minced onion.
2 eggs.
Salt and pepper.
2 tablespoons tomato catsup.
2 tablespoons minced green pepper.

Crumble shredded wheat biscuit and cook until thick in boiling meat stock. Mix with bacon fat, onion, pepper, beaten egg yolks, seasonings and catsup. Fold in stiffly beaten egg whites. Turn into a buttered baking dish and bake 30 minutes in a moderate oven (375 degrees Fahrenheit). Serve hot with grilled tomatoes, 6 portions.

Nature's "Jitters"

Scientists Learn How Water Makes Steam, Or Can't Steam

Meaning of Mother Nature's "Jitters," a trifling times worse than the worst stage fright, is science's latest way of learning how water makes steam, or cool makes heat.

It's done by measuring the energy in a single "jitter" or vibration of a molecule, which was described before the American Association for the Advancement of Science. The jitters got strong enough, the molecule's atoms will fly apart and change from water to a different formation, which is what happens when fuel burns or liquid turns into a gas.

Public Which Should Receive Special Attention in Connection With Boys' and Girls' Swine Clubs

Five points which receive special attention in connection with the Boys' and Girls' Swine Club work in the carrying out of which the federal and provincial Departments of Agriculture co-operate are detailed as follows:

1. The location and distribution to club members of young pigs of good bacon type and breeding. Of these many of the best females are kept over for breeding purposes.

2. The giving of practical instruction to club members at their homes or through letters or club meetings.

3. The distribution of printed or mimeographed information regarding the breeding, feeding, management, judging and marketing of swine.

4. The arrangement and conduct of judging and other forms of demonstration.

5. The securing of load bacon type hogs for club districts.

Strong Annual Statement by Royal Bank of Canada

Total Assets Stand at $765,512,920—Of This Amount Liquid Assets are $355,929,912, Equal to $2.86 of Liabilities to the Public—Included Therein Are Cash Holdings of $164,630,724, Being Over 24% of Public Liabilities—Savings Deposits Well Maintained.

The annual statement just issued to shareholders of The Royal Bank of Canada contains many striking evidences of the satisfactory manner in which leading Canadian financial institutions have passed through the unsettled conditions of the past year. Every part of the statement reflects the strength of the bank's position. Curtailed industrial and trading activity is reflected in lower commercial loans, and an increase in liquid assets. The latter show a marked increase over the previous year, and are now equal to 52.86 of its liabilities to the public included in these are cash holdings which also recognized 24% of public liabilities. Savings deposits have been well maintained, particularly in view of the large Government piano put out during the year Earning's due to increased business activity throughout the year, show a slight increase, and were amply sufficient to cover dividends and the usual appropriations.

Strong Liquid Position

The statement, which is for the financial year ended November 30th, shows total assets of $765,512,920. Of this amount, liquid assets, amount to the large sum of $355,929,915, equal to 52.86% of all liabilities to the public. Cash holdings, aggregating $164,630,724 and forming one of the striking features of the report, represent over 24% of liabilities to the public.

Dominion and Provincial Government securities now stand at $68,475,000 compared with $65,473,686 at the end of the previous year, and in municipal securities and British, foreign and colonial public securities $36,736,444, up from $26,641,857.

The various loan accounts reflect current business conditions, and are down substantially from the previous year. Commercial loans now stand at $260,342,368, against $419,341,063, while call loans in Canada have been reduced to $39,981,368 from $120,139,266, and call loans elsewhere to $58,-266, and call loans elsewhere to $58,-

SUNDAY SCHOOL LESSON

JANUARY 15

JESUS AT WORK

Golden Text: "My Father worketh even until now, and I work." John 5:17.

Lesson: Mark 1:21-45.

Devotional Reading: Isaiah 61:1-6.

Explanations and Comments

Jesus' Authoritative Teaching. verses 21, 22. With His four disciples, Jesus went to Capernaum, and on the Sabbath entered and taught in the synagogue. The regular order of worship after the recitation of the Shema (Deuteronomy 6:4 and 11:13-21), and the prayer, a lesson was read from the Law (Pentateuch) and another lesson from the Prophets. There was no permanent preacher, and it was customary for the chief ruler of the synagogue, who had charge of the services, to ask a distinguished visitor to explain the lesson. Upon this occasion he called upon Jesus for this service. As the people listened to Jesus they were all amazed at the tone of authority with which He spoke, as unlike the scribes who constantly quoted some great name of the past as the authority for each of their words. Recall the phrase so often repeated of the Lord Jesus on the Mount, "I say unto you." The highest praise for a preacher was that he reasonated a reasoned esteem, which had no drop of water put into it. He was bound by no law of tradition otherwise than as he had been taught. Christ as a teacher was not a cistern but a spring, clear, abundant, and perennial."

"Whence came this authority? Undoubtedly from God, whose beloved Son and personal Messenger He was. But on the human side we find three things in the teaching of Jesus which are sources of power.

"First, knowledge; direct, real experience of God. Second, sincerity; the straight and simple utterance of a heart loyal to the truth. Third, love.

"We need more of these three things if we desire, as followers of Christ, to speak with authority." Henry Van Dyke.

Jesus' Authority Over Demons. verses 21-28.—There are six cases of demon possession described in Mark (5, 7 and 9), and in Matthew 9 and 12. There is a reference in Luke 9:2 to the cure of Mary Magdalene, and there are general references to many unnamed ones, as in verse 34 of our present text. Today we speak of such cases as insanity, epilepsy, deafness, dumbness, or nervous troubles.

Sliding behind a bush or small tree, an ostrich can use it's long neck as a periscope, to scout for danger.

A Remarkable Achievement

Great Improvement is Shown In Producing Bacon Type Of Hogs

A station and subsequent visit by the Sheep and Swine Division of the Dominion Department of Agriculture which reported to Canada's bacon hog industry observed:

"When the complete hog grading statistics for the year 1932 are added together, it will be found that the total hog marketings of the year over 2,500,000 market hogs sold for the purpose under the Hog Grading Regulations throughout the Dominion will have graded as either select bacon or bacon. The above figures show a remarkable achievement for the hog raisers of the Dominion. It means that Canada, in a period of a few years has changed her swine industry, creating as the backbone of the industry an ample supply of breeding stock of select type with prepotency and satisfactory qualities which place our best hog raisers in the front rank of type, quality and economic production."

Business For Coast Province

B.C. Likely To Increase Apple and Lumber Exports To Britain

British Columbia should reap important benefits from the new trade agreement between Canada and Germany, Provincial plants should obtain a share of the $1,000,000 increased market for wood pulp with Germany and the B.C. apple market should be considerably enlarged.

British Columbia may increase her lumber exports to the United Kingdom during the coming year to 150,000,000 feet. This compares with 87,000,000 feet shipped during the past year, a gain of more than 70 per cent. or treble that shipped in 1931, when 50,000,000 feet created a

Some For Doctor Hoo

Yuraka Matsuoka told the League of Nations that Japan regarded a boycott as worse than a military attack, to which Dr. Wellington Koo replied that if that were true, China would much prefer that Japan Leyoot her goods than invade her country with arms. And, as w. see it, the Doctor was that one.

DE VALERA TO HAVE SUPPORT OF LABOR PARTY

Dublin, Irish Free State The Labor party has made a sudden and unexpected decision to support the Regime as party of President Eamon de Valera in the general election of January 24.

Its decision followed announcement that former President William T. Cosgrave and Frank McDermott, leader of the National Guards party League, had abandoned attempts to form a national coalition in opposition to the government because there was not sufficient time to compete their plans.

The sudden decision of the Labor-Nes was taken as an indication they had patched up their differences with Mr de Valera over reductions in the pay of civil workers.

After a party meeting, William Morton, Labor leader and secretary of the Post Office, declared: "Labor has no reason to think that the reduction in commercial deposits. At the same time the strong liquid positions means that just as soon as trade recovers the banks will be in a position to take care of the increased requirements of their customers.

Earnings have held up well, especially in view of the lessened business activity and the low interest rates at reserve centres. Profits for the year were $4,661,849, compared with $5,446,327. They fully covered dividends, the appropriation for which was $3,850,000, and left a contribution to Officers' Pension Fund $360,000; appropriation for bank premises, $500,000; and reserve for Dominion Government taxes $900,000 or the number of years the bank has carried an unusually large amount in undivided profits. This year the Directors have authorized a transfer of $3,000,000 of this amount to investment depreciation reserve. This will be regarded as a conservative move, strengthening as it does the inner reserves of the bank to this extent and leaving $1,-000,000 to be carried forward to credit of Profit and Loss Account.

Debtor-Creditor Legislation

Relief Measures To Come Before Next Session Of Alberta Legislature

Edmonton, Alberta Debtor-creditor legislation and unemployment relief measures to be passed on will dominate the programme to be placed before the Alberta legislature, provisionally scheduled to open February 2. Premier J. Ian Brownlee said today every effort was being made to keep the business to a minimum in all

No undue changes in taxation are expected to come before the session, although there may be some slight readjustments, Premier Brownlee, however, declined he would not go so far as the Saskatchewan Government in announcing that not a single new tax or increase in present taxes would be introduced.

Would Reduce Dollar Value

Senator Beach Wants U.S. To Go Off Gold Standard

Washington. Senator W. E. Borah is preparing a bill to make the United States dollar buy less and by its enactment he hopes to help the farmers and improve economic conditions generally.

"Thirty-two nations have gone off the gold standard and we are still on it," Borah said. "That has practically destroyed the hope of our farmers to get a fair price for their products. How are you going to remedy that until you remedy the money situation?"

Many Staking Claims

Hundreds Seeking Wealth In Manitoba's New Mineral Fields

Winnipeg. Most Manitoba's newest mineral fields, God's Lake and Island Lake, 250 miles northeast of Winnipeg, where hundreds of prospectors seek wealth this winter, has attracted attention anew.

Two thousand claims have been staked in the two mineral areas and the rush is record there has swamped the Manitoba mines branch office. It has been announced a recorvey would be made immediately and the tangle straightened out.

China-Japanese Conflict

Estimated Recent Fighting Resulted In Death Of 1700 Chinese Troops

Peiping, China Marshal Chang Hsue-Liang informed Japanese authorities in a blunt letter that he refused to accept responsibility for the battle of Shanghaikwan and did not care to have any dealing with the Japanese concerning it.

The marshal's refusal to negotiate ended Kwantung Japanese ambassador's mission to North China that further communications should be addressed to the Chinese National Government at Nanking He placed blame for the Shanhaikwan incident on the Japanese themselves

Meanwhile it was understood the Chinese were getting ready for another battle in their positions south west of Shanhaikwan as to which they refrained when the gateway city to north China and the province of Jehol was occupied by the Japanese after hard fighting

Chinese officials here estimated the total Chinese military casualties in the Shanhaikwan fighting at 1,700, a figure far below that other casualties were extremely heavy.

One entire battalion of Chinese was reported to have been wiped out Civilian casualties accounted for by the intense bombardment from land, sea and air.

Britain is taking tough precautions to safeguard British interests in the area of conflict.

French Vessel Wrecked

Luxurious Liner "Atlantique" Destroyed By Fire In English Channel

Cherbourg, France. The luxurious liner Atlantique" was wrecked by a fire on fire in the English Channel while proceeding to Havre for overhauling, without passengers, and the loss of lives placed at 17.

Latest available figures here showed that 226 persons were aboard of whom 211 arrived here during the night on four rescue vessels. The victims either suffocated at their cabins or drowned when a lifeboat upset.

All these rescued were utterly exhausted when they were brought here. All their possession had been lost.

The captain of the liner was the last to leave her He leaped into the sea and was picked up by a small boat from the steamer "Achilles," which, with the "Ville de Madrid" and "Ford Castle," brought the survivors to Cherbourg.

Many of the boiler rooms were burned to death, the captain told port authorities, and others were overcome by smoke before they could escape. Only one radio wireless distress messages were sent out because the operator was asphyxiated at his post.

Romanoff Treasures

Famous Russian Collection Is Shown In New York

New York. Treasures from the Romanoff palaces $15,000 jeweled Easter eggs, a "quail pen" fashioned of gold diamonds, emeralds and 2,300 pearls, lavish dinner services and items 400 years old were placed on exhibit in a Fifth Avenue department store.

They formed a $1,000,000 collection acquired by the three Hammer brothers, Armand, Victor and Harry, during the nine years they operated various concessions under the Soviet government, including a monopoly on pencils and stationery. By selling their American automobile factory the Soviet they were permission to take the treasures out of the country.

Diamonds Discovered

Calcutta, India. An expedition to search for traces of a submerged continent that once may have linked India and Africa will leave here for Aden next August, under command of Colonel R. B. Seymour Sweil, director of zoological survey in India.

John Redfern Plant

Calgary, Alberta. W. R. Friend, instructor in science and physics at Mount Royal College has gone to Fort Hope, Ont., to join the staff of the new redfern plant there.

KING CELEBRATES

King Alexander [illegible] be harassed by [illegible] country, but he [illegible] mental to show [illegible] ure in his birthday [illegible] special message [illegible] Radio Station [illegible] anniversary.

Heirs Claim Estate

Seven Persons Bring Suit Against University of Alberta

Calgary, Alberta Governors of the University of Alberta have been named defendants in a suit instituted by seven persons resident in England to recover an Alberta estate awarded the University under the Ultimate Heirs Act

The plaintiffs are Miss Mackey William E. Birrell Arthur Bartlett Chatham Birrell, Arthur James Birrell, John Birrell and Evelyn Bray, all of Bromyard, Heref ordshire, England who claim Henry Birrell barber who died intestate in December, 1930 was their brother

Henry Birrell [illegible] at his home at Del Bonita Alberta, he left an estate worth $3000. Efforts of a trust company, [illegible] charge, to ascertain whereabouts of relatives failed, and the estate was awarded the university. The plaintiffs claim they were unaware of their brother's death until recently, and now ask the estate be awarded them jointly.

Directors Are Elected

Canadian Aberdeen-Angus Association Chooses Officers For 1933

Winnipeg, Man. Directors of the Canadian Aberdeen-Angus association for the year but the question was still undecided and the bank remained adamant in refusal to provide credit unless the city paid $300 000 in United States exchange charges in meeting debenture payments in excess of $2,000,000.

Loyalty of taxpayers was again demonstrated during the day when tax prepayments of $185,000 yesterday was harvested to $222,972, for in excess of the two-day total last year when $160,02.51 was paid in advances.

Cancel Interest On Farm Loans

Saskatchewan on Tabling Measure To Lift Burden From Farmers

Regina, Sask. (Cdn'ian) announcement was made by Premier J. T. M. Anderson, in a province-wide radio broadcast that the government will ask the legislature at the coming session to cancel one year's interest on all Saskatchewan farm board loans in the province. The period in to date from November 1, 1931, to November 1, 1932.

Those who have paid their interest for the period mentioned will be credited with the payment on their principal.

All arrears of interest previous to November 1, 1931, will be sanctioned and made payable over a period of five years.

It has also been decided by the government to seek sanction of the legislature to sanction other changes and arrears of principal as of November 1, 1932, over a period of 10 years, the first payment to be made November 1, 1933, with interest chargeable at the annual sanctioned rate and a half per cent. the rate now fixed by the legislature.

A reduction of one and a half per cent. on sanctioned interest is being made by the government. The amount involved in the interest sanctionation in the five-year plan is approximately $1,875,717, while the amount of arrears and principal charges being sanctioned over 10 years is $974, 978.58.

General action by commercial lenders and institutions along the lines of extension of interest arrears and postponement of principal payments was foreshadowed by the premier

City Is Own Banker

Calgary Fighting the Exchange Payment Ban

Calgary, Alberta The city of Calgary has virtually become its own banker.

Fighting the exchange payment ban and the struggle to obtain $750,000 credit to maintain city services pending tax collections, civic officials kept tax prepayments in city hall vaults under strong guard, awaiting to the bank only sufficient funds to meet obligations immediately due.

Personal application to force the Bank of Montreal to extend the three-quarters of a million dollars in credit was taken by Mayor Andy Mitchell but the question was still undecided and the bank remained adamant in refusal to provide credit unless the city paid $300 000 in United States exchange charges in meeting debenture payments in excess of $2,000,000.

Loyalty of taxpayers was again demonstrated during the day when tax prepayments of $185,000 yesterday was harvested to $222,972, for in excess of the two-day total last year when $160,02.51 was paid in advances.

M. Paul Boncour, the new Prime Minister of France, was caught by our photographer, leaving the Elysee, Paris, after forming the Cabinet which was accepted by the Chamber of Deputies after M. Herriot had resigned and M. Chautemps had failed to form a government.

RAILWAY MEN ASK ADJUSTMENT OF EMPLOYMENT

Toronto, Ont.—A petition has been forwarded to Earl Bessborough, Governor-General, on behalf of some 1,- and railway engineers and firemen and 14,000 conductors, brakemen and others pleading for readjustment of hours of employment so that there will be a more equitable distribution of work on the railways.

The petition was sent by I. H. Weldon, K.C., of Toronto, for the Canadian Re-employment Railwaymen's Association which has branches in many centres in Canada and which declares approximately half the railway employees in Canada are out of work It is pointed out some employees work as much as 80 hours a week.

One hundred miles, in freight service, is considered equivalent to an eight-hour day. It is requested under the petition be restricted to 26 work days a month.

As the Canadian people own the Canadian National and because the Canadian Pacific has great influence with the Canadian Pacific," it is urged immediate steps be taken to revise the hours of labor. It is suggested His Excellency ask the C.P.R. to adopt the plan outlined and if unable to proceed by private negotiation to proceed under the Industrial Disputing Act.

Study Wheat Situation

Groups Being Organized In Saskatchewan For This Purpose

Prince Albert, Sask. After being addressed by C. H. Puchering, who spoke on behalf of the Regina World Grain Show, the local board of trade decided to form a group which will make a study of the wheat situation and plan for improvement. One way to how it is believed the ills of the industry can best be cured. Thirty such groups have now been organized in Saskatchewan.

Mr. Puchering declare other countries are organizing upon similar lines. The purpose being to harmonize plans for action which will be considered at the conference to be held in conjunction with the grain exhibition in the capital city next year. Mr Puchering expressed the belief it is up to Saskatchewan to impress upon representatives of European countries that it would be best for them to grow other crops and instead of producing their own wheat to buy the best bread wheat available, which Canada can supply.

Unemployment Insurance

Ontario Government Views Proposal With Sympathy

Toronto, Ont.—The Ontario Government views the proposal of general unemployment insurance with sympathy and will seek to have it in operation at the earliest possible moment. Premier George S. Henry told a delegation of the Ontario executive of the trades and labor congress.

The delegation was accompanied by Tom Moore to Ottawa, president of the Trades and Labor Congress of Canada, and a request that the Ontario Government lead in advocating unemployment insurance at the forthcoming Dominion-Provincial Conference in Ottawa was the feature of the proposals advocated by the delegation.

Another request that Labor be represented at the conference was a matter for the Dominion Government, Mr Henry said

Other requests were,

Amendments to the Liquor Control Act providing for beer-by-the-glass.

Gets Five Years

Calgary, Alberta. Roman Jugvirin 23-year-old Calgary youth, was sentenced to five years in penitentiary by Magistrate H. H. Scott, when charged with the armed robbery of the Third Street West branch of the Canadian Bank of Commerce.

Basic Wages Cut

Basic wages in New South Wales for men have just been fixed $17.50 a week.

Running True To Form

British Dailies Without Money To Help Small Subscribers

When the government of New Zealand was in financial difficulties last year it asked the British Government, to whom it owed a large sum for war debts, to forego the annual instalment until times were better. Britain immediately consented, and granted the same privilege to Australia, which was in the same straightened circumstances.

Now New Zealand is getting back on its feet. It looks capable of paying, and like a loyal member of the family has offered to pay

[illegible] Britain immediately consented, and granted the same privilege to Australia, which was in the same straightened circumstances.

Now New Zealand is getting back on its feet. It looks capable of paying, and like a loyal member of the family has offered to pay

offer. He has told me his way in the Assembly that what he said last year still stands. No doubt the same procedure will be taken with regard to Australia which has also said it can now pay.

In other words John Bull has said "Thanks, son, but I can rub along without it. I've been pretty hard up, but you need this money perhaps more than I do. Look after yourself, and we'll talk about this some other time, but not now. Merry Christmas and a Prosperous New Year to you."

Isn't that just like the old man? —By Thomas Sharp.

Astronomers Puzzled

Display Of Meteors Expected In November Failed To Arrive

Astronomers all over the world are baffled.

For more than a month they searched the night sky for a spectacular display of meteors, which it was predicted would appear last November.

The meteors have not arrived. The astronomers have stopped watching and all they will say is that there is a possibility that the much-boomed display of celestial fireworks may take place in November, 1953.

Astronomers based their calculations for a super-shower of meteors in 1952 on a wonderful display seen by Von Humboldt, the explorer, in 1799.

Every 33 or 34 years since then there has been a similar visitation.

Never before have the calculations as to the date of the next visit failed.

Last year the only meteors seen by English observers were one or two stray meteors visible at Bournemouth, Bournemouth, Morpeth and in Cornwall.

There is no real explanation of the failure of the meteors to keep to their timetable," said Dr. A. C. D. Chamaulx, formerly of the Royal Observatory, Greenwich, to a newspaper representative. "They may have come in daylight, when they would not be seen. We can only wait till next November to see if our calculations are wrong."

Good News For Bag Lovers

Stood Borrow Of Shrinker Can Be Washed In Cold Water

After ten years of patient research two English scientists have made a discovery which will be welcomed by bag-lovers. Dishrinker, the dreaded cardboard disease can now be prevented and cured.

That finely resonant, involved expression which hundreds of bags may be distasteful to some people but say nothing that may have been caused by dishrinker, is simply justified by the results.

[illegible] Dishrinker, the dreaded cardboard disease can now be prevented and cured.

That finely resonant, involved expression which hundreds of bags may be distasteful to some people but say nothing that may have been caused by dishrinker, is simply justified by the results.

One Of Our Widely Distributed Weeds

Aspen poplar is one of the most widely distributed trees in Manitoba, being found in every province of the Dominion. Its northern limit extends almost to the Arctic Ocean, at the Mackenzie delta. From the wood of the aspen are made matches, excelsior, and thread spools, handcuffs, and certain kinds of wood-pulp. Leather made from it is difficult to remove and very portable. So the Forest Provinces it is an important economic asset.—Forest Service, Department of the Interior, Canada.

Record

Nearly 2,500,000 people buy one or more of the 65 radio publications in Germany every week.

W. N. U. 1979

Above we see H. J. Stanley, member of the Canadian Exhibition Commissioner's staff, who has charge of the decoration of the interior of the majestic new building recently erected at Regina to house the World's Grain Exhibition and Conference in 1933. Mr. Stanley is a native of Old London and has been associated with the exhibition commissioner's work for the past thirteen years, during which time he has taken an active part in the decoration of the Canadian exhibits at Wembley, the Worlds Poultry Congress, and many State Fairs of the United States. The principal features of the decoration are rural and industrial Canadian scenes in settings elaborately worked out with native grains and grasses; examples of decoration with grains in sheaves shown. When completed, the interior of the World's Grain Show Building will be equal to anything yet attempted in the line of exhibition decoration.

"Brick" Of Oxygen

Discovery Will Lead To Saving Of Countless Lives

As extraordinary discovery is announced from Germany, where a method has been found of solidifying oxygen into small "bricks" and of unfixing the cold gas that it can be contained with safety in an ordinary sealed tin. In this it can be kept for years without deterioration.

Despite the terrific pressure used to solidify the gas, there is no danger about these oxygen bricks, which cannot explode. Even if one, though, contains so much gas as would fill one of the great steel cylinders now used as containers at a pressure of hundreds of pounds to the square inch.

The discovery will lead to the saving of countless lives, for oxygen is the life-giving gas. The miner can carry an emergency supply with him and it can be kept in the house for use in case of serious illness.

The oxygen is released by giving the tin a sharp blow which brings two chemicals into contact with one another by breaking an inner glass vessel. This sets up a gentle warmth, which causes the brick to give off gradually the gas it contains. The process of making the bricks is not expensive and a complete oxygen tin will not cost more than about 42 cents. Tit-Bits.

Such Is Fame

Story From Chicago Proves Popularity Is Short Lived

There is a bench of patina so well as considerable food for thought, in a story from Chicago to the effect that an amateur mule owner photographed photographs of once-famous idols of the stage brought only $1 for the lot. In their day these artists delighted great audiences, had the thrill of genuine enthusiastic applause, and revealed in general popularity. When, for example, one of their autographed photographs was regarded as fortunate. Today it brings about 14 cents.

The moral, of course, is that the public is fickle. New stars arise. Age begins to take its toll of former favorites. They pass from view. "The King is dead! Long live the King!" Napoleon Caesar, dead and become clay, might step a hole to keep the wind away." Marcus Aurelius had the right idea when he said: "All is ephemeral—fame and the famous as well."—Toronto Globe.

Money For Hospitals

More than $20,000 has been raised here (Wales and England) largely as a result of the exhibition of Princess Elizabeth's milestone broom which was built and presented by the people of Wales. According to an official statement just issued in Cardiff, all but $5,000, which was given to Bristol charities, has been distributed among Welsh hospitals. More than $20,000 people paid to see the broom,

The Holiday Massacre

Appalling Number Of Fatal Accidents On English Roads During Summer

During July and August an average of 17 people were killed every day on the roads of England and Wales. Of the 1,017 accidents responsible for their deaths, less than two per cent. were unavoidable. And in over 95 per cent. it was the men and not the machine that failed. Four hundred and fifty-three of these killed were motorists, pedestrians and 186 pedal cyclists. In the list of victims involved motor cars came first, motorcycles a good second, then motor vans and lorries, closely followed by bicycles. Seventy per cent. of the deaths occurred in towns and built-up areas to 24th of them in Greater London. Half of the motor drivers involved had over five years' driving experience, but two-thirds of them were between 16 and 30. Twice as many boys were killed as girls. The most dangerous age for children is between four and five; but almost all the children between 13 and 16 were killed while cycling. These grim data are taken from the National Safety First Association's interim report on road accidents during the holiday months London Spectator.

A Famous School

Law School At Dalhousie Produced Three Prime Ministers

The law school at Dalhousie consists of only about one small dark room, with ancient desks on which are carved initials of many of Canada's illustrious men. Around the walls are hanging pictures of the graduating classes, numbering in all no less than three Canadian prime ministers, Sir John Thompson, Sir Robert Borden and Mr. Meighen. Many names are to be found of men who have made their mark in the legal profession, in politics and in business across Canada.—London Free Press.

Liquids

Liquids, in Africa, has prohibited motor truck traffic between points adequately served by railways.

Rain and Despair

Object Lessons To Those Who See No Hope In the Future

The Canada Book Magazine for September gives us a few quotations that should be a lesson to those who insist upon sitting on the top rail of the pasture fence watching for the end of the world.

"There is scarcely anything around us but rain and despair" said William Pitt in 1795.

"I dare not marry the future is so dark and unsettled," remarked Samuel Whitbread who inhabited this Earth between the years 1758 and 1872.

"In Industry and Commerce and Agriculture there is no hope," said Disraeli in 1848, while the Duke of Wellington in 1841 thanked God that he was to be spared from seeing the consumption of rain that was gathering around.

We thank the G. R. M. for digging these statements up. Now we can laugh when John Doe, 1933, insists that there never was and never can be again such a depression. Things are going to the eternal how-wows, and so on, etc. . . . . or what have you."

Book Worker Money

Hamilton All Cash Token In Adjoining Fish Market

There is a bank close to Hillingdon which handles most of the cash taken in that fish market. This bank not apart a room as a "laundry," where more than 200 pounds of silver received from the market used to be cleaned every night. Attached to almost every coin were scraps of mud from the river bed and frequently the money turned green. The coins were boiled several hours in a solution containing washing soda and various chemicals.

Now some fish firms clean their money before sending it to the bank, but nearly all manage to keep some money as much as possible from contact with the fish. Most of the bank notes, though, that pass through the market are still sent to the Bank of England to be destroyed.

UNCLE SAM: "I wonder what's the matter with the Christmas trade this year?"—Sketch in Daily Express.

Salmon Fisheries Of Hudson Bay

Anglers Find Excellent Fishing In Northern Waters

Anglers are always on the lookout for new fishing grounds, and now that the Hudson Bay railway has been [illegible] and the Toronto-Moosonee and Northern Ontario Railway completed to Moosonee there will be many who journey to Hudson Bay to test the newly accessible fishing waters reached by those lines. Salmon fishers will be able to study [illegible] more intimately [illegible] and [illegible].

Two species very closely related, the long fished chars and the lifeen land charr or Henrees salmon are found in Hudson Bay and to some extent in James Bay These fish are seldom found further south than the Churchill River on the west coast, or Cape Jones on the east coast They frequent all rivers with sand or gravelled beds, proceeding upstream to spawn about the middle of August and returning at the beginning in the following spring They are themselves most found migrating in enormous quantities. The flesh is pink in colour and very fine, and specimens up to 30 pounds have been obtained, although 5 to 15 pounds is a more representative weight Landlocked salmon are found in some of the inland lakes and, while not to be had in commercial quantities, as a big game fish it has few superiors

True salmon are seldom seen in Hudson Bay proper, although considerable numbers are known to exist in Ungava Bay where the Hudson's Bay Company have operated fisheries, on the Koksoak, Whale, Leaf and Kokmuk Rivers, from which salted, pickled and fresh fish have been shipped to England.

Another Unidentified Bird Band

Canadian Wild Geese Is Shot In Virginia, Illinois.

Recently the National Parks of Canada, Department of the Interior, received a report stating that a wild goose wearing a band of pink celluloid inscribed "Canada 98" was killed near Princeton, Illinois. Anyone knowing anything about the placing of this band would help materially by advising the Department of the Interior at Ottawa so that the record of this bird may be completed. The Canadian and United States Governments co-operate in banding investigations and in this way secure new and valuable scientific data concerning the migration, and of breeding and wintering grounds of birds in being obtained. The use of other than official bands is not encouraged because unofficial bands have a tendency to confuse the Official Records. Information about the free distribution of official bands may be had upon application to the Commissioner of National Parks, Department of the Interior, Ottawa, Canada.

Swedish Aviator Claims Record For Passengers

Captain Ahrenberg Has Carried 47,000 Passengers In His Aeroplane

A world's record in the number of passengers transported by one aviator is claimed by a Swede, Captain Axel Ahrenberg, who has carried no less than 47,782 passengers in his aeroplane. Captain Ahrenberg, who is the most popular and well-known sport in Sweden, insisted last night on the regular Swedish-Continental air routes, has done more than any other Swede to popularize flying in his annual propaganda flights.

During last year only he visited 222 different towns and villages and carried 4,000 passengers. He says from babies of a few months to old men of nearly 100 years. Throughout these flights he always practically arrived on the minute and no person carried in his machines has ever been hurt.

Captain Ahrenberg has also issued during flights across the icy and desolate regions of Lapland and was the chief pilot of the expedition sent to Greenland to rescue the young English explorer Courtauld.

An Iowa farmer has a goose which lays two eggs a day. The silly goose! Why lay two eggs when the owner would be satisfied with one a day?

CHAPTER IV.—Continued.

He clutched the plan. She could not bring herself to put Alan in so fearful a dilemma. Looking up, she met his gaze squarely again. "No, I can't ask that of you I'd never ask that."

He chose his words very carefully. "The question with me, Joyce, is this: How deeply is your father involved? I can't think he'd go the whole length with these bandits. I can't think he'd countenance murder or even so brazen a robbery as these men staged. Perhaps they decided him about their intentions. If they're caught, they're going to lie and throw as much of the blame on him as they can. But if I can have the truth as a working basis, I can nail their lies. We can't hope to save him from a penalty, but we maybe can save him from the worst."

Joyce bleached at the last word, at the specter it aroused. Her father stood charged with murder. In her heart the law suddenly became a tangible and fearsome thing.

Alan went on: "You stand a better chance of getting the truth from him than I do, Joyce. He'd suspect me if I tried to talk to him. But with you he'd be more frank and open. When he comes in, won't you try to find out what you can?"

"You mean I'm to watch him and gather what hints I can, and perhaps ask questions that seem innocent?"

"That's exactly it, Joyce. Directly what I mean. If you'll do that for me, if you'll help me that much . . . Joyce, don't you see why I told you this? Don't you see it's because I'm going to stick with you? I won't ever pour dark confessions in your ear. But the limit I can became he's your father."

He was facing her in the ghostly morning light. Again he was conscious that his four months of absence, breaking the friendship between them, had invested her with an aura of strangeness to him; and that all during this brief fabulist visit he had become aware of her in a quickened sense. How brave and comradely a girl! And in spite of her hard life here, in spite of her efforts to be a good lumber-japer, how feminine and girlish and adorable she was!

TIRED AND IRRITABLE?
Take Lydia E. Pinkham's Vegetable Compound
It steadies the nerves and helps to build you up. You will not believe . . . sleep better . . . look better. Life will seem worth living again. Remember that 98 out of 100 women say, "It helps me." Let it help you too. Liquid or tablet form, as you prefer.

W. N. U. 1976

Unwilling to detain him, Joyce offered him her hand, wishing him success today, hiding her fears for him when he should come up with them soon. Alan bent nearer to her, he bent down a little to kiss her, as more than once he had done in the years past. It was an impulsive act, he was swept by admiration of her bravery, of her girlish prettiness. And it was a humble act of sanction, too, and self-reproach, for he had said to himself that if he had kept up his visits here, instead of leaving Joyce all alone to the battle, he might have halted Dave MacMillan's plunge into crime.

She went with him down to the wharf and stood watching the patrol embark. As that first boat shove, he turned to look back. Vaguely through the mist he saw Joyce still standing on the wharf in the gray chill of early frost morning. He waved to her and caught the tiny white of her kerchief answering.

When the mist had hidden her from him, he turned his eyes ahead. Somewhere on up the spruce-bursed Alcocha river these men were hiding in the rills-armed and desperate and certain to give battle. Against them he was getting his life and the lives of his men today.

* * * * * *

Fifty miles above the MacMillan trading store, Alan ordered Postmaster Ben reserve in toward the north bank and stop.

He believed those bandits could not be very far ahead now Across that silent wilderness the roar of the launch's engine carried for five or six miles. Any sound made by the criminals might hit their canoes back into the timber and let the police go harmlessly past. Likelier still, they might be hiding somewhere in the river was narrow, and open on the launch with repeating rifles at a favorable moment. Either side would be located them on up-stream, he could slip upon them quietly in the paddle craft and lay a deadly ambush.

Taking a pair of binoculars he spindled misery and hurried up a hill to a point where he had a **[illegible]** view of a long river "straight" reaching twenty miles up-stream.

He moved his glasses slowly up the stream, probing for a glimpse of those two outlaw canoes. Carefully focusing, he scrutinized the river, the banks and other side with those keen curves and hollows; and searched above the trees for a wisp of camp smoke. Nothing, nothing whatsoever, that left human traces. The last fifty miles were twenty miles ahead at least.

He hurried back down to the launch, he began to realize that those two canoes had traveled more swiftly by them he had thought possible. For the first time in his police experience Alan found himself ill at ease and uncertain of what he was running in search of. Always before he had had the assumption of Dave MacMillan's guilt, how the bandits knew just the right moves to make in this desolate country, still he was utterly unable to explain how six absolute strangers could get into this country from they were, where they had come from, how they had got in here unknown to everybody—the whole thing was uncanny. He hastily began to expect of himself.

Splashing back upon the launch, he told his men tersely: "They're not in sight, but I could see them in a mile. We've got to meet up with them before they reach the Forks. They're making trails. Fast, you've got to drive by now. We'll take our chances."

Twice more that morning, between Alan and Postmaster Gordon, they raised ashore and futilely searched ahead. Something had gone wrong. The patrol should be within sight of the launch. Estimating their speed and the speed of the purming launch, he knew the police craft should have overtaken them about eighty miles above the MacMillan trading post. He had come a hundred and twenty, and no sight of them yet. They had either dodged aside, or had done something to give them a big edge over what he thought possible.

It was afternoons when the waters of the Alcocks had given up their ghastly secret, that Joyce MacMillan listened to the accounts of several Yellowknife men and gazed upon certain grim evidence, and placed together the story of how those bandits were able to keep in the lead. But Alan knew nothing of that harrowing story now; he knew only that something had upset all his calculations.

Fifteen miles from the Alcocha Forks he went ashore a last time and climbed a squat tree He had a clear view in the Forks The glasses picked up a sight that set his heart pounding madly again—but was

For ahead, three miles or miles from the Forks of the Alcocha, a pair of tiny black objects, like bugs crawling along a silver ribbon.

He jumped out of the tree, leaped down the slope

Splashing aboard, he flung all caution to the winds. . . .

"Get Pedmonait! We've got to beat them to the Forks. We'll close in on them in the launch. Get to! They'll have us but they won't stop, won't fight, if they can make it there. Open her up! To it—I with rocks and mud here now!"

His last words were drowned in the engine's roar as Pedmonait opened out the throttle. Wind tore and stinging his eyes and the spray lashing him, Alan clutched the pointer to keep from being flung bodily overboard, and gave Pedmonait what help he could.

The craft careened around the last bend, a scant mile from the great Y of the Alcocha. A clear open stretch lay in front Dashing the blinding spray from his eyes, Alan rose precariously to his feet, braced aboard, and his heart sank as the truth was borne in upon him

Those canoes had beaten him to the Forks.

It was maddening his defeat — doubly maddening for its closeness to a smashing triumph He had come within five minutes of overtaking them on the launch, and then had halted, had misused to a mile that seemed gigantic as two hundred. They had beaten him They had heard the thundering boat, had made their whole strength into the race; and now were whipping on eastward along one or other of the Alcocha forks.

The launch would have to be abandoned at the Forks No hiker the police would go afoot, would be wrecked within half a mile if it attempted to go up either of these obstructed streams. They would have to take to paddle canoes and split his party.

Unbeaten, he pleased swiftly. The chances were ten to one that the bandits had started to the left hand fork, he's a red-haired devil in a fight, he's our best shot, he'll be dependable in whatever comes. But the third man—Pete or Larry?" Both options were men, both experienced voyageurs of many a patrol.

He made up his mind: "I'll send Pat up the right branch with Murgens and Whipple Bill and Larry and Pete up the left. We'll be the ones to do the business."

As the great Y of the Alcocha loomed up, he turned and gestured to Sandoval and Larry. Standing unsteadying, they crept back to the stern deck, unlashed the canoes and had them ready by the time Pedmonait, slowing down the launch, steered it in between two little willow islands at the Forks and stopped.

Alan cried him: "Pat, take those two men and whip up the south branch. Larry and Bill and I'll cover the north. If you flush them, don't pitch into that pack. You'd be fighting six men single-handed. If they did happen to go that way, you drop back here to the Forks and wait for us. We'll be able to track them in that timber country. Let's pile off! They can't be over a mile and a half away."

Bill snarled: "H—l's bloo blazes, Alan! let's stick together. Us splitting up like this, it's the 6—dest fool trick I ever heard of!"

DR HAMILTON'S PILLS

"Shut up," Alan snapped. "Get—going, you two. Every minute we're losing you say or do will be twisted to him." He tossed the launch anchor into the mud. "I said pile out. Let's be moving." He stepped down into a canoe, stood rifle between his knees, caught up a paddle.

Sandoval shouldered their breath, Bill and Larry clambered in with him. The two canoes separated.

(To Be Continued.)

Little Helps For This Week

"Thou ye can another's burdens, and so fulfill the law of Christ."—Galatians 6:2.

There are those who take what they can get,
Then pear around for more;
Who save and stint, and dwell content,
Behind a miser's door.

There are those who give with generous hand,
And seek to give still more;
The rich and sad, the poor and low,
Find welcome at their door.

—Gratville Kleiser.

However perplexed you may at any hour become about some question of truth, one refuge and resource is always at hand, you can do something for someone besides yourself. Whatever own burden is heaviest you can always lighten a little some other burden. Let this thought then stay with you. There may be times when you cannot find help, but there is no time when you cannot give help — George S. Merriam.

Hobby Proves Valuable

Ottawa Man Makes Living Out Of Talent For Whittling

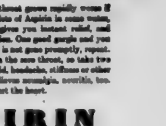
Things looked bad a few months ago for A. E. Abolit of 22 Bower Street, Ottawa, but he has whittled his way out of the depression. Discharged from the Royal Canadian Air Force when the government cut staffs, he was left without resources and with an expensive house he had built himself.

He had a hobby, whittling. Ever since he was a boy in Pictou, N.S., he had whittled little wooden statuettes just for the fun of it. He started whittling in earnest, making carica-tures of human types on Canada's Atlantic Coast, images of Indians, getting the costumes right by studying specimens in the National Museum of Canada at Ottawa, and model totem poles.

The things sold well in Canada and in the United States. Abolit wonders if he couldn't find one or two other whittlers who would join him in forming a small whittling industry. He can't fill all his orders himself, he said.

Get Rid of That SORE THROAT!
Any little soreness in the throat grows rapidly worse if neglected. Crush some tablets of Aspirin in some water, and gargle at once. This gives you instant relief, and reduces danger from infection. One good gargle and you can feel safer. If all soreness is not gone promptly, repeat. There's usually a cold with the sore throat, so take two tablets to throw off your cold, headache, stiffness or other cold symptoms. Aspirin relieves neuralgia, neuritis, too. Use it freely; it does not hurt the heart.
ASPIRIN
TRADE-MARK REG IN CANADA

No more dusting for me!



at least not with old-fashioned dust cloths. I've found a better way.

It has been learned unofficially that the Japanese government has recommended to the Soviet Government a formal refusal to sign a non-aggression pact with Soviet Russia proposed by this government a year ago.

Thousands of Canadian women know that her "better way" is the Applefood Wonder Paper. It is scientifically treated with highgrade furniture polish, it does—as it cleans—as it polishes.

Wonder Paper is changing the old-established order of housecleaning. One neat package of it spreads more to water than 7 yards of old rag that spread dust and constantly need washing to be emptied.

You get twenty-five sheets of Wonder Paper for a quarter. Simply by rubbing it into a cloth, you go over the furniture, woodwork, and the floors. The results are a delight. In half the time and with half the effort, you get a cleaner task done far more satisfactorily.

And when you've through, throw away the piece that's soiled. No washing out, or washing, of dusters. Certainly you ought to try Wonder Paper.

Special Offer

WONDER PAPER is made by the makers of the famous PARAGARN, the Henry Wood Paper in the Green Box. Most grocery, hardware and department stores have Applefood Wonder Paper in stock. If yours hasn't, just send this coupon and we'll give you a booklet entitled "Leftovers", containing one hundred recipes, as a bonus.

Applefood Paper Products, Ltd.,

VOL. II No. 37 PORT SASKATCHEWAN, ALBERTA, WEDNESDAY, JAN. 18th, 1933 $1.50 PER YEAR IN ADVANCE

Large Number Attends Institute Meeting

A large audience attended the first meeting of the Fort Saskatchewan Women's Institute for 1933, which was held in the Union Hall, Thursday, January 12th.

The president, Mrs. C. H. Grunert, after reading New Year Greetings from Mrs. H. J. Montgomery, Westlevis, Provincial President, called upon all the members to respond to the high ideals of the W.I. Creed. She pointed out how very desirable it is, in these times of depression, that women should have somewhere to go where they might forget their troubles in learning something new and enjoying good-fellowship with other women, at a minimum of cost. The Women's Institute is not a money making concern and other than the membership fee of 50 cents per year and one, or at most twice, a year being joint lectures, there is little financial strain upon the members.

Dr. Mildred Follinsbee Newell of the Child Welfare Clinic, Edmonton, spoke on the effort that is being made to have birth control clinics, established, where those married women whose family physician so recommends, could receive scientific instruction on the subject. The clinic would be operated in the interests of better babies and healthier, happier members. At present time to give such information to anyone is a breach of the law.

The attractive programme for 1933 includes Mr. Stanley Hambley on the School-Festival, Mrs. J. Keri Graham on the Modern Novel, Miss Evelyn Murphy on Home Culture, Mrs. J. Musgrave Smith on some phase of Household Economics, Professor Adam of the University of Alberta, Mrs. W. C. Short and possibly Mrs. Arthur Murphy. These events will be announced in due course.

The prospects for another successful year look bright.

Josephburg News

The Josephburg Junior U. F. A. held their second meeting at the home of Mr. and Mrs. Griffin on Friday, January 13th, 1933 and the following officers were elected:—

President—Rudolph Rippel.
Vice.-Pres.—Elsie Gorlitz.
Sec.Treas.—Fred Hennig.
News Reporter—Elsie Frey.
Social Advisors—Mrs. E. Ashton, Mr. and Mrs. Griffin.

A committee of four was appointed to get a good play which is to be put on at some future date.

Several delegates were appointed to attend the University Week for Farm Young People.

The business part of the meeting was adjourned and a dainty lunch was served by the hostess.

The next meeting is to be held at the home of Mr. and Mrs. Adolph Bosker on January 26, 1933 and the Roll Call is to be answered by a reverse.

POST CURLING CLUB JAMBOREE PRIZES ON DISPLAY

The Fort Curling Club "Jamboree" committee have selected the prizes for the many different events, including the prize for the "Jamboree" Queen, and these are on display in the former Dubec Bar-bers window.

The various committees are all working hard getting things into shape for the big night and a large crowd is expected.

The program of events will be published later, also posters will be displayed within the next few days.

If you have not bought your ticket on your favorite candidate for Queen, do so now, as all votes must be in Thursday, Feb. 2, to count. Tickets bought Friday, Feb. 3rd. will have no vote votes.

The Curling Rocks that will be drawn for at the Jamboree, are also displayed in the window. Have you bought your ticket?

Fort Oddfellows Elect Officers for 1933

The local members of Fort Lodge No. 14 Independent Order of Oddfellows took part in a joint social session at Edmonton Lodge No. 30 on Thursday evening, Jan. 12, 1933.

Lamont Lodge No. 78, Edmonton Lodge No. 30 and Fort Lodge No. 14 took part in this interesting ceremony. D.D.G.M. A. Canford of Lamont was the presiding officer and he was ably assisted by members of Lamont Lodge.

The following members were appointed to offices for the year of 1933, on the local Lodge:—

J.P.G. E. Flintoft.
N.G. A. Gibson.
V.G. G. Frey.
Rec.-Sec. T. Todd.
Fin.-Sec. C. B. W. Magor.
Treas. H. Fellmer.
R.S.N.G. W. G. Shore, P.G.M.
L.S.N.G. G. Becker.
L.S.V.G. S. Dennis.
R.S.S.N.G. E. Chesholm.
R.S.S. G. Pappas.
L.S.S. E. Ketterborn.
C.G. C. Magor.
I.G. E. Hallam.
Con. F. Baker.
Warden. P. Shaw.
Chaplain. C. Reed.

After the regular meeting of the Fort Oddfellows Lodge on Monday evening, January 16th, 1933, P.G.M. Bro. W. G. Shore presented the Lodge with a Past Grand Collar to be worn by the outgoing Noble Grand for one year. This collar has been in Bro. Shore's possession for a number of years and was originally worn by his brother.

FORT JUNIOR PIRATES BEAT BRUDERHEIM JUNIORS

The Junior hockey team now known as the Pirates won their fourth consecutive game on Saturday afternoon defeating Bruderheim 5-1.

The locals were clad in their new uniforms of black and white. Bruderheim not to be beaten their first time out in the black and white garments, they took hand early in the game and potted on a goal by R. Wootton. O. Kolterborn assisted A. Flintoft to secure goal number two. R. Wootton passed to E. Klingler who secured and made the count 3-0.

In the second period A. Flintoft gave H. Wootton an assist for his no more his second goal. This period ended 4-0.

The last session found Bruderheim forcing the play but for their efforts could only get one marker, R. Frederking beating goalie, O. Holoit.

Before the final gong sounded O. Kolterborn finished the scoring by making the count 5-1 on a solo rush.

E. Sherman, R. Frederking and goalie Roman were the outstanding performers for the visitors, while all of the local squad turned in a fine game. O. Holoit turned in another good performance as goal for the locals and by his brilliant work kept the score from being closer.

Line-ups:—
Bruderheim—R. Roman, R. Strong, C. Lige, E. Sherman, S. Armstrong, R. Frederking, L. Strong, C. Sherman, C. Klein.
Fort Pirates—O. Holoit, S. Rooney, W. Kingsley, H. Wootton, O. Kolterborn, A. Flintoft, E. Berg, R. Whitton and E. Roberts.
Referee—L. Diamond.

WEDDING

Miss Olive Chambers, daughter of Mr. Frank Chambers of Fort Saskatchewan and Mr. Charles W. McPherson, son of Mr. J. McPherson of Fort Saskatchewan, were quietly married in Edmonton on Saturday, Jan. 14th. They will reside in town.

°°°°°

He had been fishing, without any luck. So he went to the fish market, and called to the dealer.

"Throw me five of those biggest trout."

"Throw 'em? What for?"

"I want to tell the family that I caught 'em. I'm a rotten fisherman but I'm no liar."

With The Curlers

Mr. Frank Murray and Mr. A. M. Carscadden and their respective rinks will have cause to remember their curling game held on Friday evening, January 13th, when the latter club won by a score of 15-14, after playing 12 ends.

The Murray rink got away to a good start when they scored 13 points in five ends and then didn't score again until the 11th end.

This is how the scoring went:

On the first end Murray rounded 4 points, on the second another 4 points and on the third end 3 points, fourth and fifth ends one point each, making a total of 13 points with the Carscadden rink nil.

At this time the Carscadden rink must have worked the 13th hoodoo on the Murray rink, because at the end of the 10th end Carscadden had 9 points. At the 11th end Murray broke the jinks getting one point, making the score 14-9. Coming down on the home end, Carscadden rose to brilliant curling and getting the breaks at the most advantageous times, ran a count of 5 points making the score 14 all. This resulted in the rinks playing an extra end to break the draw. Carscadden rink won the extra point making the final score 15-14.

Fort Team Continues Pennant March In Victoria Hockey League

The Fort Senior Hockey team took the long end of a league fixture from Lamont on Jan. 10th at Lamont by defeating them 5-4 The Fort were never headed by their rivals but on several occasions were on even terms.

L. Hutton and B. Gaul scored 2 goals each. F. Flintoft scored one and E. Lane assisted for one of Gaul's counters. H. Shiren, B. Briggs, H Scraba and J Shumster got one each for Lamont.

Lamont played at the Fort on Jan. 20th, and Stony Plain play here on Jan. 18. Come and give your team support. They have a good record behind them. In their last 8 games they have won 6 and tied 2.

Admission 50c each.

MORINVILLE LOSES TO FORT IN FAST GAME 5-1

The fans were treated to some real fast hockey here on Friday, Jan. 13. As Bruderheim were not able to carry out their league game, the locals arranged a game with Morinville, so as not to disappoint the fans. The Morinville team arrived a bit late but a real game was provided.

The locals, playing better hockey each time out took the long end of the tussle 5 to 1.

The first period was under way only a few minutes when T. Rooney secured on a solo rush, his shot going between the goalies pads. Play was fairly even until about half way in the first period when R. Gaul carried the puck, drawing the defence and goalie to the left and passing a cut thrust pass to Earl Lane who rounds the count 2-0.

In the second session play was fast and only for the brilliant work of goalie Pocock, Morinville would have scored. The visitors forced the play during this period, but the frame ended 2-0.

Only for the great work of the local goalie, Morinville would have secured numerous times in the final frame. However in a scramble J. Lalphond was rewarded for their efforts scoring one goal. The locals at this time made sure of their lead when K. Lane scored on a solo with one minute of the final period left to play.

J. Lalphond, E. Dalgleish and B. Mesmer, goalie were the pick of the visitors, while R. Pocock, Gaul, Lane, and Henry helped out the locals.

Less Criticism : More Co-Operation

Within a few days Parliament will re-assemble at Ottawa after a long Christmas and New Year adjournment, and almost immediately the Legislatures of all the Western Provinces will meet in annual session. In view of conditions at present prevailing, people will manifest a deeper interest in the proceedings of their elected representatives than is usually the case. When times are prosperous and everybody busy, people are inclined to Let their Parliament and Legislatures very much for granted, but, with the times temporarily out of joint, people not only take a greater interest in public affairs, but adopt a much more critical attitude.

At the very time this more critical attitude develops, and when many people are inclined to demand and expect the impossible of their public men, the very conditions which develop the attitude of mind also create problems extremely difficult of solution, notwithstanding which a more benevolent desire on the part of members of Parliament and Legislatures to sincerely grapple with and solve them. In their importance for definite and immediate results, many people adopt a more critical attitude than ever before in whom the nation has reposed its confidence and who, like the masters of the people, are anxious to do the best they can to overcome existing difficulties and right existing wrongs.

True, public time is after in their views as to what should be done, but in this they merely reflect the general public, and in these times it is almost impossible to find any two neighbors seriously agreeing upon policies and methods that should be adopted. Then, too, public men in their eagerness to find solutions make mistakes, but in this they are not one whit different from the average man who today may be vigorously criticizing and condemning legislators for their action, and tomorrow, in the very magnitude and complexity of the problems now confronting the country, and many of which cannot be solved by any one Province or nation, but only through united action by all nations, men occupying representative and responsible positions are deserving of sympathy, consideration, co-operation and support.

When Parliament meets it will have the Duff Commission report on the railway problem to deal with. In striving to reach a solution of this large and intricate problem, some things will, no doubt, be done in the near future with not be pleasing to the interest, or class, or community. Any solution will involve inconvenience and sacrifice, and if each such interest, class or community adopts a purely selfish attitude and emphasizes its own particular rights and privileges to the extent of ignoring the benefits to be conferred upon the whole country, then there can be little hope of any solution being reached.

At the same time, as was the case during the war, individuals and communities must take the broader viewpoint of the welfare of the whole country. Our Parliamentary representatives must approach the problem from this standpoint, rather than from the standpoint of their individual constituency. And this general statement of policy is likewise applicable to other large issues which now face Parliament. None of them can be decided upon long view possible viewpoints, they must be dealt with as national problems. If people generally will keep this idea firmly fixed in their minds there will be less tendency to indulge in criticism, and the drafting of solutions made much easier.

In our Western Legislatures major questions that will call for considered action and serious include the drafting and passage of wise and effective legislation dealing with such matters as adjustment of debts, arrears of taxes, balancing budgets, measures to alleviate unemployment, and to provide adequate relief where needed, while at the same time not further increase by the burden of taxation already alm ost beyond the ability of the people to carry. To these matters our legislative representatives of party affiliations may, we believe be trusted to bring their best judgment in really sincere efforts to find the very best policies and put them into effect.

Irrespective of what is done, or not done, there will, of course, be some dissatisfied people Possibly everybody will be more or less dissatisfied. Where one approves of what is done, others will disapprove, while in regard to something else those who first approved will disapprove, and those who disapproved will approve. It is ever so in a democracy, but it is out of this conflict of views and opinions that compromises emerge, and it is only through compromise that democratic representative government can be carried on. It is always the average view that must prevail for the average good, not the extremist views either of the right or the left.

The thought we wish to emphasize and leave with our readers is, that the responsibility for successfully "carrying on" and "carrying through" these trying times does not rest solely upon members of Parliament and Legislatures. It rests equally upon the individual citizen. Instead of adopting a whole critical attitude, a fault-finding attitude, the individual citizen should extend friendly advice and assistance to his elected representative. And should co-operate with him in the common endeavor to work out what is practical and best for all, whether it is everything each citizen favors and desires or not. Only so can the best results be achieved in times of stress and difficulty like the present, only so, in fact, can a maximum of wise policies and good government be attained. It is not good citizenship, but the reverse of it, to make demand for impractical, impossible policies, and then to criticize and oppose what actually is done.

This is a time for all to work together, whether in government or opposition. They need not necessarily merge into one; in fact such a merging might be a mistake because constructive criticism in times like these is more important than in more normal times, but all criticism should be constructive, and co-operation should be the order of the day. And it should be exercised fully and completely by the individual citizen who is expressing such action by his elected representatives in Parliament and Legislature and municipal council.

Was So Short of Breath Could Not Lie Down to Sleep

Mrs. P. J. Chenard, Shawanaga, B.C., writes:—"I had been so troubled with shortness of breath I could not lie down to sleep.

I couldn't do any hard work, or climb the stairs, and had terrible and smothering feelings which became very weak.

I tried all kinds of medicine, but could get no relief until after I had taken three boxes of Milburn's Heart and Nerve Pills, and since then I have felt better in every way."

Price 50 cents per box, at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Looking Into the Future

Dean Inge Sees Another Gloomy Winter

Dean Inge drew a picture of England 1,000 years hence when speaking in London, recently. He considered that by that time England would have a population of only 20,000,000 about half the present population—and that they would live mainly in villages.

"Physicists and astronomers tell us there is no reason why this planet should not be habitable by human beings a million years hence, but whether the human beings will be at all like us and recognizable as men is very difficult to say," he said.

"London may be a hundred feet under water 20,000 years hence, and another ice-age is due at some period which may make them bitterly unwelcome.

"I do not think it is at all possible that we shall ever colonize Mars and Venus or that we shall ever be interplanetary. I do not think many people believe in the canals which an American astronomer saw there.

"As for Venus, there is some reason to think that it is always hidden by a dense water. We might have one nice hot bath there before being drowned. I do not think we are magnificent enough for the expenditure of ever getting there."

The Dean said that our race had not increased greatly since the dawn of history since the discovery of tools. Hands of 50,000 years ago which had been fossilized to have bodies as good as our own.

The changes going on were for the most part degenerative:

"Our jaws were getting narrower. We were becoming balder.

Possibly our sight and hearing were not as good as those of the savages.

Our sense of smell was less keen, and

We were losing our claws and fur.

Return To Barter

Balkans Are Considering Series As Substitute For Money

Cash scarcity is becoming so scarce in Central European countries that it returns to barter, with series the medium of exchange has been inaugurated, it may be extended in parts of the Balkans.

At Kragujevac, in Jugoslavia, the municipal authorities have established with an Austrian firm for 700 carloads of brass parts needed in the arsenal there These will be paid by delivery of 7 million dinars' worth of timber.

Meantime negotiations are underway between the National Railways of Yugoslavia and Hungary. Under the present arrangement each line receives payment for mileage on its trucks sold by the other lines. The monthly balance due Czecho-Slovakia from Hungary is running about 1,000,000 Czech crowns a month. Hungary cannot overspend, but it has the amount in cash and has offered to settle monthly with Hungarian pigs.

Landing Field Put Of Canker Equipment

Swedish Ship Under Construction Will Be Up-To-Date

Equipped with its own landing field the Swedish cruiser, "Gotland," now under construction, will be an interesting experiment in sea warfare. The landing field pattern will be a wide, heavy strip of canvas, which will pick up aeroplanes as they alight. fast speed. The planes will run up on the outer end of the strip which will be on an enormous pneumatic float. The planes, with folded wings, will be hoisted up the current incline to the hangar by a hoisting crane. To launch the planes a rotating catapult will be employed which can shoot the planes into the air even against a contrary wind.

"I'm afraid the car does not suit me," wrote the poor motorist. "My fiancee cannot reach the brakes and the steering wheel at the same time."

"The car is perfect," wrote back the agent. "I suggest a new girl."

During the year ending December 31, 1921, Saskatchewan shipped 307,000 tons of liquids and frozen meat mines to supply fuel meals in the province of Manitoba.

Armament Expenditures

United States Appears To Be the Chief Culprits In This Respect

The tendencies by up-heaval of the United States, official and un official President Hoover, Mr Stimson, Senator Borah and apparently three out of four newspapers in the country that the debtor nations must reduce their outlays on armaments before they can talk revision of debts with the United States has drawn the retort from the Paris press that the greatest stimulus to the spiral of outlays on armaments is the United States itself. "Le Temps" gives these comparative figures:

"The President of the United States insists that what he believes is a formidable increase in military expenditure constitutes one of the most important factors in the world-wide disequilibrium of national budgets with an unfavorable effect on credit and on monetary systems But no country in the world has increased its military expenditure to the same proportion as the United States have increased theirs, even though their country is not exposed to any danger and its only preoccupation has been to obtain naval parity with Great Britain.

"In 1916 the whole military and naval expenditure of the United States was $367,000,000. In 1930 according to figures communicated by Washington to Geneva, the total by ure had reached $700,000,000."

Find Fossil Bed in West

Evidences Of Prehistoric Age Discovered Near Swift Current

Discovery of a new locality for fossil remains of prehistoric animals, announced by Dr. L. S. Russell and Dr. R. T. D Wickenden of the geological survey, Department of Mines, Ottawa.

"Working in the vicinity of Swift Current, Sask., these two government paleontologists obtained a small collection of fossil teeth, which proved to represent animals of late eocene times, not previously found in Canada. Such fossils have been found in Utah, and have been more recently discovered in southern California.

The Saskatchewan collection includes teeth of a rhinoceros, of titanotheres (large, horn-bearing beasts), of a three-toed horse, primitive antelope-like creatures, and a forerunner of the squirrels. Most interesting is a single rabbit tooth, one of the oldest known records of such animals.

The fossil-bearing beds are part of a great sheet of coarse-grained rocks extending over the Cypress Hills and eastward to Swift Current, and resting on an irregular surface of the older formations. There are indications here that southern Saskatchewan during the early part of the age of mammals had valleys and uplands differing in elevations by as much as 1,000 feet.

Landlord Accepts Vegetables

Fruit Also Helps Pay Rent In New South Wales

If people in New South Wales cannot pay their rent in cash landlords are accepting barter rather than turn them out. Potatoes, turnips, melons and pumpkins are being paid for a last and five acres of land. One tenant gave his landlord more than 150 cases of fruit, and still is settling each week in fruit. A man in Parramatta pays in poultry and eggs, and his landlord sells them in his produce shop. An Australian mechanic supplies the owner of his house with milk and eggs, and has offered to keep his car in condition. Another tenant delivers loads of wood. A Bellingham, suffering from milk veal, pays in calves and heifers. But the War Service House Commission balked at when a tenant started to deliver several hundred pounds of pumpkins.

A Floating City

Among the "comforts" provided for passengers on the new French liner "Normandie" are a theatre, a church, a "street" of shops, cafe, dance salon, winter garden, and a garage. The ship also has six separate wireless installations on board.

Australia is sometimes called the "drinkless land." The brewer of some of the trees there are so arranged as amongst to prevent their edges to the sky.

Beautiful Cape Town

South African City Has a Noble Setting and Wonderful Climate

It may be truthfully be said that few places in the world compare with the Cape Peninsula, South Africa, either in scenery, climate, verdure woods, water, salubrity, or accessibility.

Table Mountain, upon which Cape Town rests its shoulders while its feet dangle in Table Bay, throws its ever-changing shadows upon a land of trees, flowers, odorous plants, and grasses, nine months healthful hills and azure-hilled valleys.

In all the world there is, perhaps, no city so absolutely beautifully located as Cape Town. A nobler site for a city could not be imagined. It rivals Gibraltar and Constantinople, Bombay and San Francisco. Immediately behind the town, which lies along the sea, the majestic mass of Table Mountain rises to a height of 3,500 feet, a steep slope capped by a long line of stone precipices more than 1,000 feet high, and to the right and left by bold, isolated peaks. The massive wings of the bay in front, the towering crags behind, and the romantic pinnacles which rise on either side make a landscape of unparalleled grandeur.

Cape Town enjoys a most equable climate There is a wealth of sunshine at all seasons of the year. The breezes blowing fresh from the sea tempers the rays of the African sun.

Converging on the "Cheltenham" cruise around the world via the Southern Hemisphere will reach Cape Town on the 18th of next April. Visitors will be amazed at the vast variety of orchids that grow wild all the way from the outskirts of Cape Town to the tops of Table Mountain.

Some people may be content with viewing and admiring the gorgeous display of flowers offered for sale in the attractive bazaars on Adderley Street, but to properly appreciate the exquisite beauty of the Peninsula flowers they should be seen growing in their natural habitats.

One of the strange flowers found is the parasitic "Hirvey," whose calyx blooms bora black if handled. Another is the "rumdve" whose leaves are covered with sticky glandular hairs for catching insects, on which it seems to feed.

Cape Town is in the same latitude as Montevideo, Uruguay, and Sydney, Australia.

Imperial Airways Record

Imperial Airways have since their inception in 1924, just on 18,000,000 miles and have carried over 300,000 passengers and more than 6,000 tons of mails, parcels, and urgent freight. From the all-important aspect of reliability, the figure for flights completed to schedule has risen from 78.3 per cent in 1924 to 94.16 per cent in 1931.

"Do you have much variety at your boarding house?"

"Well, we have three different names for the meals."

World Has Still Much To Learn About The Production And Distribution Of Our Food Supply

Some day when dreams of international some true and the world is just one big neighborhood, folks will marvel at the combined muddling today over the production and distribution of foodstuffs It is probable if political interference were abolished and adequate international currency facilities were invented, that production of necessities by cultivation of the soil would settle to a handsome normal pretty shortly Every last human being would have enough and to spare and starvation and distress from maldistribution speedily would become unknown.

But in the crazy system now prevailing in the world, we have all sorts of policies in force either to spur on reluctant production or to curb production where the boundary of each is only partially obliterated. The American Congress will spend a great part of its session in trying to devise means for protecting American farmers if they will not produce too much. Over the greater part of Europe, governments are using the people's money to stimulate farm production so that they need not buy from nationals other than their own.

Great Britain, through a complicated tax system, virtually is paying a bounty for the growing of wheat in the United Kingdom, and Italy and France are providing, at public expense, rewards for increased production of farm products. The Netherlands government is experimenting with price fixing to encourage wheat growing On the other hand, Netherlands capitalists would check the raising of too many hogs by furnishing a limited number of tags to hog raisers and saying every man annual going to market to be tagged, as to the practice in this country with reference to the shipment of cattle, to maintain the price of coffee, reports to the railways system of pegging the price by the government buying and then destroying all surpluses.

The human race can hardly boast of its wisdom in the way it meets such uneconomic practices in managing its food supply while millions of its members are not sure of food.—Detroit News.

Legends Are Mere Myths

Trees Credited With Unnatural Powers Are Quite Harmless

The man-eating tree of Madagascar which an explorer has immortalized, he is happy to find, is one of the world's hardiest myths. Quite obviously a tremendous exaggeration of such familiar insect-eating plants as the sundew and the Venus fly-trap, it has been used for generations by Madagascans to fool credulous people.

The legend of the deadly upas tree of Java is another similar yarn. The gullible—including Mealy tells the visitor of a tree so poisonous that its very "breath" kills all plants and animals for miles around Actually the upas tree (Ipoga) is Javanese for "poison"), exists, but it is easy to approach, and its poison has to be pushed into you on an arrow point to do you any harm.

Wheat Shortage In Roumania

School children, theological students, police and soldiers in Roumania will have no white bread until next harvest It has been discovered that the wheat crop is shorter than expected. The minister of public instruction has advised boarding schools to serve rye bread and "mamaliga," a stiff porridge.

"Henry," said his nagging wife as she prepared to retire. "Is everything shut up for the night?"

"That depends on you," muttered Henry. "Everything else is."

Suitor—"Sir—I—er—am making your daughter's head—er—have you any objection, sir?"

Father—"None at all. Take the one that's always in my pocket."

Market For Alfalfa Hay

English Dairymen May Import It As Feed For Cattle

Sale of alfalfa meal and alfalfa hay have never been extensive in the West of England but increasing interest is being shown in both these products recently in view of the fact that in the West of England and South Wales clover mixtures is usually as successful a feeding stuff alfalfa may not being Tested it is interesting to learn that the Gloucestershire Milk Recording Society have been conducting experiments with alfalfa hay as a food for calves, and they are of the opinion that it may increase the butter fat content and improve the color of the milk. There is a possibility that if this becomes popular alfalfa may import alfalfa hay California alfalfa meal is quite out of the market owing to the adverse exchange situation South African meal, however, is not affected and it is said to be of a deeper green color than that from Canada and is, therefore, well liked. Last there were no certain imports from Canada which have been apparently quite satisfactory.

Present prices which are being offered for the South African meal with a fibre content of 27 per cent range from £26.12 to £30 6d. figured at exchange at $3.36 to the pound sterling per ton of 2,240 pounds c.i.f., London The Liverpool figures from Canada are also advantage in this market over those from South Africa, as very few South African vessels call at Liverpool, while a regular liner service is provided between this port and Canadian ports Recently offers have been made to Canada but have not made at $35.17 by consumers, which would mean about $24.70 f.o.b. Canada, to the shipper In addition to the change rates placed such a handicap on the live cattle trade that it disappeared, export cattle numbering only a few hundred in 1931 as Liverpool for Liverpool January 7.

Referring to the proposed better arrangement by which Canadian cattle would be exempted for Empire oil and coal, R. Bruce Burns, one of the shippers, said:

"The government doesn't need to take the risk of losing millions on a Russian deal. If it could provide for as $150,000 to establish a lower freight rate it would recover millions of dollars to the Canadian farmers on the cattle they could sell on the domestic market in the United Kingdom."

Jim—"I don't mind losing after your heaves but I don't want to be called the hostler."

Tom—"Oh, that's all right I'll call you our stabilizer."

Cotton and artificial silk material is being made by a process that insure it against wrinkling.

New Photographic Telescope In California Will Bring Planets Into Close Range Of Vision

Strange Strain Of Cattle

Native To Philippines Cannot Live Without Salt Water

From the Philippines, United States Protectorate in the Pacific Ocean comes word of a strange strain of cattle that cannot live without salt water.

It must be possible to distinguish objects 20 feet apart on the moon's surface by employing a magnification of 16,000 diameters in the giant telescope Ordinarily much smaller magnification is used because of atmospheric conditions. However, with proper atmospheric surroundings the greater reflection range would enable the observer to view the moon and other heavenly bodies at extremely close range.

This telescope is designed to collect and photograph in a measure a vast field of heavenly bodies However, the machine can be adapted for direct observation.

Professor Wilson Observatory, where the 100-inch telescope is located, now the world's largest, is just a few miles from the California Institute of Technology The institute and the observatory collaborate on astronomy research and findings

Dr. Leonard pointed out that estimates have revealed that there are in the neighborhood of 800,000,000 stars brighter than the nineteenth magnitude, which is the visual field limit of the 100-inch telescope Although the nineteenth is the limit attempted as to the possible scope of the 200-inch instrument. Dr. Leonard declared that probably a billion and a half stars could come within its range.

Hence the giant telescope will reveal about as many stars as there are people on the earth. The photographic lens makes possible the recording of a far greater number of the heavenly bodies than can be detected with the human eye, to which only about 6,000 stars are visible. Dr. Leonard said.

A telescope is designed to collect light and not to magnify, as is commonly supposed by the layman the scientist explained. It can be compared to a funnel, collecting light and concentrating the rays in a small beam to be in turn directed to the eye of the observer or to the photographic plate In fact, making stars appear nearer and larger is a secondary purpose, Dr Leonard explained

Should a star suddenly be destroyed and cease to give off light rays it would be millions of years before the knowledge would reach people on earth. This is due to the fact that light rays now leaving the stars will not reach the earth for ages to come.

In describing telescopes, Dr. Leonard explained that there are just two principal types reflecting and refractors. The refracting telescope is similar to opera glasses, and is composed of a large double convex lens, or object glass. This lens, located at the upper end of the instrument tube gathers light from the stars concentrating the rays to the eye of the observer.

The reflecting telescope is composed chiefly of a large concave mirror, silvered on the front surface rather than the back, as with ordinary mirrors. This mirror is mounted at the lower end of the tube in the refracting telescope.

Bovea Is Lucky Number

Replaces Thirteen With Carnivore At Casino Along Riviera

There is a craze for number seven among gamblers at the casinos along the Riviera They maintain that Bovea has replaced thirteen as a sign of most number, pointing out that Napoleon's great tragedies happened on the seventh day of the month.

On January 7, M. Maginot, Minister of War, died.

On March 7, M. Briand died.

On May 7, President Doumer was assassinated.

On July 7, the submarine "Pourcelles" was lost.

The tragedies happened in each alphabetic month.

JAPANESE CONSOLIDATE MILITARY POSITIONS—CHINESE RETIRE FREE

Here is a section of the Great Wall of China at its strongest point outside the city of Shanhaikwan. It is here that Japanese tanks and artillery made a breach and stormed the city, inflicting severe casualties on the Chinese defenders. The map shows the general location of the latest "war area," Shanhaikwan, as can be seen, to the gateway to Inland Province. Inset, lower left, is General Yoshimichi Hasegawa, who commands the Jap forces at Shanhaikwan, and at the right is Marshal Chang Hsiao Liang, Chinese commander, whom the Japanese blame for the overt act that started hostilities.

WORLD HAPPENINGS BRIEFLY TOLD

Following a three months' adjournment the joint committee which is investigating the administration of the Pension Act reassembled in Ottawa.

W. Martin Griffin, K.C., Vancouver, has been retained by the Dominion government to revise the Canada Shipping Act. He has gone to Ottawa to undertake the work.

Sir Hubert Wilkins noted Britis explorer, said he planned to leave the United States in April for Norway and to join the Ellsworth-Nobilen expedition to the Antarctic.

Amendments to the Canada Shipping Act are being drafted. The legislation will be brought down this session. The measure was left stand over from the previous session.

Charles Wong, first Chinese to receive a private aeroplane pilot's license, is leaving Winnipeg for China where he will join the Chinese government air force.

Sailing alone as an 18 foot skiff, Fred Rebell, Australia's "knight of folly" navigator, put in at San Pedro, California, January 9, after a year-long 6,000-mile voyage from Sydney.

Canadian wheat crops will be exhibited in at least 12 of the largest cities in Great Britain in the next year and a half, officials of the National Gallery stated at Ottawa.

Julian Montagu Williams, scientist, lecturer, picturesque missionary of better day among the Indians of Northern Ontario, Alberta and Saskatchewan, died suddenly in Toronto in his 76th year.

International debts may be used by the United States to reduce trade barriers against the products of that country, according to the opinion expressed by Premier Bracken during an interview at Winnipeg.

Prof John H. Williams, one of the American delegates to the preparatory committee for the world monetary and economic conference, told the committee that he believed high protective tariff sentiment in the United States is abating.

Flight Scheme Dropped

Premier Picard Will Not Accept Post; Hudson Bay Shelved

Canada's Hudson Bay District will not see a flight to the stratosphere by Professor Auguste Picard after all. The famous explorer of the upper regions is in New York where he is a series of lectures.

The reason he will not make the Hudson Bay attempt himself, he explained, is because, "The man who make the flight must be immune to families of the northern regions."

"The greatest difficulties of that attempt would be landing in that remote region and transporting the materials and equipment," he said. "A system of signals for guiding the plane from the ground by wireless must be used."

First of all, Professor Picard said, it would be necessary to find a man, "with a big pocketbook," who also had a genuine, intelligent interest in scientific matters, to finance the [illegible]

Tobacco To Queen Mary

Good Example As Remunerative Optional Cash Crop Encouraged

Queen Mary is "too good a housewife" in the opinion of Sir Richard Wallington, who at the age of 72 years, has just retired from the post of Treasurer to the Queen.

"I have paid all the Queen's private bills every day appointment 12 years ago," says Sir Richard, "and not once had I to query her accounts. She is an example to the housewives of Britain for when shopping carefully spending and discriminating choice."

No Mishaps In Air

Vancouver's Sea Island Service Had No Accidents in 1932

Vancouver's Sea Island airport carried on its activities during 1932 without a single accident, according to the report of Manager William Templeton, to the civic airport committee Passenger flights for the year totalled 2,000, but flights 50 student instruction flights 734 student solo flights, 1,510; arrivals, 309, departures, 320, visiting aircraft, 134, and passengers carried 3,000.

Factory

By Ruth Rogers

A SLENDERIZING STYLE YOU'LL LIKE

Its smart tailored lines meet every-day requirements.

A luxury air of the soft new pouch-ons are lovely for this model—a very becoming style for the normal or slightly over-normal figure.

You'll notice that since the center of the cross-over bodice is cut in a panel effect and left bottom, it combines with the skirt panel to add height to the figure.

Rough crepe silk would be equally suited to this model.

Style No. 213 is designed in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust.

The original was the popular rust tone in a diagonal weave. White piqué was used for the inset vest.

Size 36 requires 3¼ yards 54-inch with ½ yard 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

More Employed In England

Activity In Several Lines Of Work Shows Increase

Employment is improving in England. The number of registered unemployed decreased by 76,519 between November 14 and December 19. The increase is credited to the usual seasonal improvement but in several lines of work activity has increased.

More employment is reported in coal-mining, iron and steel industries, general engineering, cotton and jute trades, tailoring, bleaching and dyeing, finishing works, distributive trades and hotel and laundering house services.

Less employment is reported in building jobs, public works construcing, pottery, hosiery and other industries, hosiery manufacturers and the woollen and worsted industry.

Ski Jumpers Fly Snow

Illinois Club Entered Into The Local Winter Sports Activities

It may not have entered in sufficient quantities for ski jumping, but the Norge Ski Club had more for its annual tournament at Cary, Ill. on January 15.

After canvassing the region, club officials learned that there was plenty of snow about two miles north of Chicago, up in Wisconsin, and placed an order for six freight car loads.

The science of fighting fire has become so specialized that the fire departments of large cities are organizing fire colleges to train their men.

ARM NUMB WITH RHEUMATISM

Woman's Thanks to Kruschen

"I have been suffering from rheumatism for years. At one time I could scarcely walk with pains in my feet. The thumb of my left hand was so stiff I could only bend it with the aid of the right hand. I was afraid to go to bed, as my right hand and arm up to the elbow used to go numb, and the pain was just terrible until I got the circulation going again. I started to take a half teaspoonful of Kruschen in a glass of hot water before breakfast, and believe me I feel a different woman. I tell everyone what I take, and the good it has done me."—(Mrs.) W.A.H.

Kruschen contains six mineral salts which tone up the liver, kidneys and stomach and keep them working sensibly and efficiently. The reward of this internal cleanliness is a fresh mind and invigorated blood-stream. Poisonous uric acid is expelled through the natural channels and the pains of rheumatism cease. And a dose each morning with Kruschen, your whole being beams. Get a bottle to-day. It spends its 25 purifying forces.

SUNDAY SCHOOL LESSON

JANUARY 22

JESUS IS POWERFUL IN HIS HOME

Golden Text "The Son of Man hath authority on earth to forgive sins." Mark 2:10

Lesson Mark 2:1-12

Devotional Reading Psalm 32:1-7

Explanations and Comments

Jesus Is Criticized For His Words To a Paralytic, verses 1-12 On one of Jesus' visits to Capernaum, his headquarters, it became known that He was in the house and the people hurried thither in great excitement. They crowded into the room, jammed the door leading to the street, and stood around in crowds outside. Presently, who had heard of Jesus' wonderful deeds of healing determined to bring to Him a friend who was paralyzed, but when they approached the house carrying the paralytic on a light pallet, he one would make way for them.

"The hearers of Christ were so anxious to get every word that fell from His lips that they shoved the invalid out of the way in order that they might hear the better. The picture is typical. It is well enough to seek for ourselves the highest advantages of Christian worship, to pay liberally for continued ministrations of religious luminaries, but the spectacle of a church paying ten dollars for it, and where it pays one for aggressive outside work is calculated to call to mind the Gospel verse where every man's very eagerness to hear eclipsed in him the real spirit of Christian unselfishness."—Francis J. McConnell.

The four men were persevering and resourceful and undiscouraged. They carried their burden up the outer stairway to the roof, removed the covering and made a hole large enough to let the mats down on his bed at the feet of the Great Physician.

The four friends brought the paralytic to Jesus for bodily healing. Jesus began to reward them by forgiving the man's sins. Seeing their faith, we are told, Jesus said to the man, "Son, thy sins are forgiven." Jesus knew what was in man. Mark 2:25, and knew that the man needed spiritual healing as well as physical help. "See what the faith of others may do for one!" exclaims an ancient writer.

Jesus distinctly recognized the faith of the bearers as well as that of the sufferer who was borne. Humanly speaking, the palsied man owed his recovery and salvation to the faith and self-sacrifice of his four friends. The great lesson created is here that to an unknown extent it is possible to inspire and to bring about the salvation of others by our faith and co-operation. Because it is always useless, dependable, and gives consistently better baking results.

And Magic is the favorite of Canadian housewives. It exceeds other baking powders combined.

You'll find Magic makes all your baked foods unusually light and tender . . . and gives you the same perfect results every time.

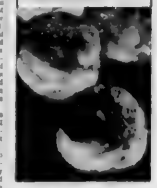
Try Miss McFarlane's Favorite Recipe for BREAKFAST

¼ teaspoonful Magic
Baking Powder
2 tablespoonfuls
shortening
¼ cup milk, or half milk and half water

Sift together flour, baking powder and salt. Cut in the chilled shortening. Stand add the chilled liquid to make a soft dough. Toss dough onto a floured board and do not handle more than is necessary. Roll or pat out with hands to about ¼ inch thickness. Cut out with a floured biscuit cutter. Place on slightly greased pans or baking sheet and bake in hot oven at 450° F. 12 to 15 minutes.



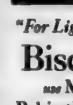
"For Light, Flaky

Biscuits

use Magic

Baking Powder,"

says Miss M. McFarlane, dietitian of St. Michael's Hospital, Toronto



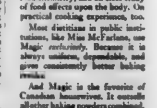
"I RECOMMEND Magic because I know it is pure, and free from harmful ingredients."

Miss McFarlane's opinion is based on a thorough knowledge of food chemistry, and on close study of food effects upon the body. Her practical cooking experience, too.

Most dietitians in public institutions, like Miss McFarlane, use Magic exclusively. Because it is always uniform, dependable, and gives consistently better baking results.

And Magic is the favorite of Canadian housewives. It exceeds other baking powders combined.

You'll find Magic makes all your baked foods unusually light and tender . . . and gives you the same perfect results every time.



Biscuits Ready

An Artificial Heart

Device Has Been Developed and Tested By Moscow Surgeon

An artificial heart has been developed by Moscow surgeons, which, when perfected, is expected to revolutionize methods of operating on the heart. It is a device for pumping the blood through the arteries like a real heart. The heart of a living dog was taken right out of its body and opposed up within the "artificial heart" and the body alive. Science children were below in the heart and then it was put back into the body. The dog has survived.

Many new gold-dredging companies are being organized in New Zealand.

Photograph, Canadian Kennel Gazette

WHAT the tamest bird in the woods is the Canada Jay? It is sometimes called the "Whiskey Jack" and is rarely known to be found except in the vicinity of lumber camps and lonely trails. This Fraser Valley specimen is a considerable source of interest to visitors at Vancouver Province Zoo. Its favorite food seems to be bacon, and it is not above stealing it from a camper's frying pan.

The statistical information contained herein was obtained from the books and records of the Town, or from information supplied by officials of the Town.

Dated at Fort Saskatchewan this 12th day of January 1933.

E. DENBY, Chartered Accountant, Auditor,
Bank of Toronto Building, Edmonton.

I have audited the accounts of the Town of Fort Saskatchewan for the year ending 31st December, 1932, and have compared the said accounts with relative vouchers and certify that in my opinion the foregoing financial statements are properly drawn up so as to exhibit a true and correct view of the financial affairs of the Town, to the best of my information, the explanations given to me, and shown by the records.

"TOOMANY"

According to some unidentified locale but penetrating bard, the trouble with the world is expressed in two words, "too many" and "toomuch". We hand on his analysis as follows, together with the humorous comment that there has been and is much too much talk and far too many people who do nothing else.

Too much cats and too much wheat,
Too much corn and too much beat,
Too much cotton and too much oil,
Too many hours we don't toil,
Too many highways, too many cars,
Too many people behind the bars,
Too much poverty, too much wealth,
Too many people in ill health,
Too much politics, too much booze,
Too many wearing high-heeled shoes,
Too many loafing, too many bets,
Too many failing to pay their debts,
Too many living beyond their means,
Too many buying canned corn and beans,
Too many owning their wild oats,
Too many candidates out for our votes,
Too many liking their washing done,
Too many playing bridge for fun,
Too many buying goods on time,
Too many people don't serve a chime,
Too much hall, too much play,
Too many politicians on big pay,
Too many taxes, too much spent,
Too many folks spend every cent,
Too much reform, too much law,
It's the darndest mess you ever saw!

Wife (breaking the news of good-for-nothing brother's arrival): Hector has come to stay for a few days. Poor boy, he's looking very seedy.

Husband: Seedy, is he? Well, he's not going to plant himself here.

Alberta's Air Ports

Alberta has four first-class airports, each of 60 acres in area, and seven auxiliaries. These are located at Edmonton, Calgary, Lethbridge and Medicine Hat. In addition, there are ten emergency landing fields at various points in the province.

Wifie: Do you think my new hat gown looks like the dame?

Hub: In a card sense, my dear. The dance, you know, is the lowest possible cut.

"What is your occupation?"

"It isn't an occupation, it's a pursuit. I'm a bill collector".

Let's Advertise One Way Back to Prosperity.

BLACK GRANITE FOUND NEAR LOCH RAYMOND

An important deposit of black granite has been uncovered near Loch Raymond on the border line between Antigonish and Guysborough Counties, Nova Scotia, according to information received by the natural resources department of the Canadian National Railways. The deposit covers a wide area and the stone is of good quality. As black granite has always been imported into Canada from Sweden it is believed that there will be a large and ready market for the local product for the marketing of which plans are now being made by a Nova Scotia syndicate.

Seventy-two railway freight cars of Christmas trees have this year been shipped from Vancouver Island to all parts of United States.

Here and There

Buildings which will house the World's Grain Exhibition and Conference at Regina next July and August are rapidly approaching completion and preparations are already being made for the extensive exhibits.

Canada's apple-growing belt is moving northward. Standard apples have been grown this year at the Dominion Experimental Farm at Beaverlodge, Alberta, which is 420 miles north of the International boundary between Canada and the United States.

Canada has entered the British Wool Africa Market by embarking with a trial shipment of 25 cases of Canadian-grown tobacco recently. About 77 per cent of British West Indies tobacco has been secured from the United States but Canada hopes to get the market under the new Empire preference.

Sailboat Fish Week between October 24-31 has been suggested by the Canadian Pacific Railway when 1918 said the year was an exception. The company marked the celebration with special souvenir cards listing fish products of the waters of Canada through which the railway runs between Saint John, N.B., and Vancouver, Brit. Columbia.

Canada lost one of its best-known and popular railroad officials recently when A. Allen, assistant superintendent of the Prince Division, Canadian Pacific Railway, dropped dead in Toronto on his way to his office. Mr. Allen was 66 years of age and had spent 54 years in the company's service.

The Canadian Pacific liner Empress of Britain was the scene of a wedding reception and breakfast at Quebec recently, following the marriage of Miss Marion H. Laurent, daughter of the prominent Montreal financier, to Dr. Matthieu Simcox. Five hundred guests filled part of the wedding group assembled in the Maple Leaf Lounge of the liner.

Not forgetting his work as director-general of its National Flood Relief Committee in 1931, China has asked Sir John Hope Simpson, famous Indian relief worker, to join in a newly created National Economic Council. Sir John sailed recently aboard the Empress of Canada for Shanghai to wind up the flood relief commission affairs.

The United States Middle West and the Province of Quebec share honors as winners of the Canadian Pacific Beaver Cup. The Fishing Trophies which have been awarded at French River, Magnetawan River and Devil's Gap. G. A. McIntosh, of Montreal, landed a 27½ lb. muscallunge; C. O. Kalman, of St. Paul, Minn., had a 4½ lb. square tailed speckled trout; and A. C. Steinmeyer, Cincinnati, Ohio, had a bass weighing 4 lbs., 14 ounces.

Leaving a money belt containing record-the-world steamship and rail tickets and a cool thousand dollars on it in a cab at his Vancouver hotel, Charles Clarke, Los Angeles, only discovered his loss after his ship, the Empress of Canada, had sailed from Vancouver. Wireless messages to the Canadian Pacific steamship general passenger agent resulted in recovery of the belt and its forwarding by airplane in time to reach the vessel before she left Victoria.

KEEPING THE HIGHWAYS OPEN

More than 900 miles of main highways in Alberta are on the winter programme of road clearances of the provincial public works department this winter. That is, the department is making an endeavour to keep this number of miles open on the main road clear of snow and passable at all times. In addition to this, a considerable mileage has been protected with snow fencing. This is the largest mileage the government has yet placed on the winter road clearing programme and brings Alberta into second position among the provinces of the Dominion in this respect, being surpassed only by Ontario. The snow problem is, however, not generally a serious one in Alberta, as it is in some of the eastern provinces, but occasionally in the winter season a snowfall that demands considerable effort before the roads are cleared for traffic.

Auto Licenses in Alberta

The total issue of auto licenses in Alberta for 1932 was 86,568, a decrease of 8,151 from 1931. Of the total 71,483 were for passenger cars and 14,522 for trucks and other licences. The peak year for licences was 1929 when the total passed the 100,000 mark.

U. S. PROCEEDS TO REVIEW THE DEBT PROBLEM

Washington. — President Hoover went ahead on his own responsibility to organize a commission to review the war debts, after apparently receiving from President-elect Franklin D. Roosevelt a refusal of his invitation to participate.

Lengthy conferences between the president and Secretary of State Henry L. Stimson and Secretary of the Treasury Ogden Mills led to speculation that these two cabinet members might serve on the debt agency.

Stimson heads the American arms delegation and Mr. Hoover is insistent upon having the armaments question with the debt study. American experts to the forthcoming economic parley also were called into the administration meetings of the day.

Definite, concrete result from the Government and economic conference is the objective of the president in entering the negotiations declared to result in relief for the European war debtors.

At his home in Albany, Governor Roosevelt maintained a strict silence on Mr. Hoover's suggestion that he co-operate in forming the debt commission machinery, but his friends there and here were convinced his answer already was at the White House.

Paris, France. Official French opinion fails to find in President Hoover's message to congress satisfying indications that the French plan for a general examination of the debts will be accepted by the United States.

The views were expressed after perusal of the complete text of the message. A French spokesman said he apprehended that the existing situation is not of a nature to induce the Chamber of Deputies to shift from its attitude of postponement of the December interest payment.

Official and hopeful signs in the Hoover message that he soon eye to eye with the French Government upon the necessity of treating the debt problem from a broad standpoint of economics. However, the underlying idea of the French plan is its international scope.

Fascist Headquarters

Huge Building To Be Erected In Rome To House Party

Rome, Italy.—The Mussolinian attic will dwell with its past in a monumental building to be erected in the new Street of the Empire. Leading Fascist architects have been invited to submit plans for the office. It will house the Fascist party headquarters and a museum for recording the history of the movement, now 10 years old.

The Street is a broad avenue leading from Il Duce's fortress-like palace to the Piazza Venezia to the 2,000-year-old colosseum.

Pay For Railway Men

Montreal, Que. The entire membership of the railroad running trades from coast to coast, numbering some 80,000 men, are now reviewing the question of continuing the present 10 per cent reduction in pay for another year, as proposed by the railroads. Their decision will be made known at a general meeting to be held here after the New Year.

Relief For French Canada

Paris, France. It was announced here that arrangements have been made to furnish Madame Curie, famous discoverer of the radium treatment for cancer, with supplies of radium from Canada. Madame Curie has been bankrupted in her research of recent years by inadequate supplies.

Steamship Service To North

Vancouver, B.C. A steamship service by which supplies will be carried from Vancouver to within 150 miles of the Great Bear Lake mining district, will be established next summer, it was stated by Col. J. H. Cornell, northern explorer, in an address here recently.

W. N. U. 3001

Wheat Preference

Question Not Decided Regarding Wheat Shipped In Bond Through United States Ports

London, Eng. The vexed question of whether Canadian wheat oh ped in bond through the United States to the British market is eligible for the preference of six cents a bush l decided on at the Imperial C nference, will probably remain unsettled until near the end of the month.

It was not stated that no decision on the new famous test shipment sent on the liner "Laconia" could be expected by Prime Minister R. B. Bennett returns to Canada from his visit here. He is expected at Ottawa about Dec. 28.

But while the British customs authorities remain silent on the ruling that is to be made on the "Laconia" shipment, a ruling that will be of far-reaching importance in it's effect on the future channels of Canadian wheat shipments, it will be learned that general impression in interested quarters here was the wheat would get the preference.

The "Laconia" wheat was shipped from Fort William by the Reliance Grain Company, through Buffalo and New York to Liverpool, Lancashire, and by documents stating it had passed through the United States in bond and was consigned to a Liverpool miller and port agent. The bulk arising here that it would get the Imperial preference was directly counter to months of effort already resented by Canadian grain trade experts, who are said to have been advised the shipment would not receive the preference because of inadequate documentary evidence accompanying it.

It is stressed there is no authority for statements, as yet, as to whether the "Laconia" wheat will or not receive the preference. Cana... gov. ernment officials point out the question is entirely one for the British authorities to interpret and it was uncertain what point prompted the shipment, and that the ruling would be delivered until Prime Minister Bennett returns to Canada.

Unboundaries Of India

Poona, India. The Mahatma Gandhi told a delegation of untouchables who visited him at yeravda jail, "If it is in my power, I shall certainly incorporate the question of the removal of untouchability as one of the fundamental rights in the new constitution of India. It should be a criminal offense for any Hindu to be treated as untouchable (the lowest caste)."

Will Name Committee

London, Eng. The committee to study methods which will further the plan of economic co-operation between the countries of the British Empire will be constituted shortly. The announcement was made in the House of Commons by J. H. Thomas, secretary for the Dominions, who declared he had discussed the project with Prime Minister R. B. Bennett last week.

Ask 30-Day Month

Winnipeg, Man.—More than 20,000 unemployed men in the railway running trades have forwarded a petition to the federal government asking that employed railway men of Canada be restricted "during the depression" to 26 days of work per month, leaving it possible for many of the unemployed to be taken on again.

Ship Subsidies

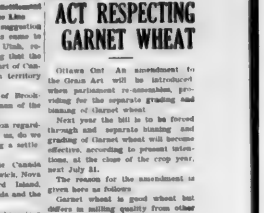
London, Eng. "Huge subsidies" with which it is alleged the United States Government financed United States shipping were flayed by Sir Alan Anderson, chairman of the Orient Line, at the company's annual meeting. He estimated the subsidies at one,000,000 during the past 13 years.

Five-Day Week Plan

Toronto, Ont.—Newspaper printers here intimate they would apply for a court injunction against any move to put into force here the five-day week, reported from Indianapolis as overwhelmingly voted by the International Typographical Union.

Income tax returns were filed by 318,856 persons in India in the last fiscal year.

MAY SUCCEED MELLON



Lawrence Lowell, former President of Harvard University, may replace Andrew Mellon, United States Ambassador to Great Britain, when Mr. Roosevelt becomes President Mr. Lowell, who retired from the presidency of Harvard recently, has been a close friend of the President-elect for more than twenty-five years.

For Cancer Sufferers

Only Radium Refinery In British Empire To Open At Port Hope

Port Hope, Ont. Thousands of cancer sufferers may look with renewed hope to a humble factory in this quiet Lake Ontario town. Opening a new chapter in Canada's record of mineral history, the only radium refinery in the British Empire will be operating within 10 days, and the product will go to all parts of the world.

Made from Canadian ore, shipped by Canadian airways to the all-Canadian plant here, the radium will prove Canada's challenge to the Belgian syndicate which now controls the world's supply of radium. If present plans materialize, the radium will be on sharply and effectively produced that the price will be lowered. Even the poorest cancer patient will ultimately be able to afford the radium treatments which have proved the most efficient in the treatment of the dread disease.

Battle Of Bullets

Nine Policemen Slain In Chicago In 1932 and Thirty-Seven Criminals

Chicago. Although nine of their own number were killed in action this year police today counted 37 criminals slain during 1932 in combats with the guardians of the law.

Listed in the police classification of bandits who fell mortally wounded under police fire were 19 bandits, nine burglars and automobile thieves and nine who resisted officers.

In addition police said 26 other criminals were killed by citizens and private police.

Want Slice Of Canada

Suggestion For Debt Settlement Comes From Across the Line

Washington. — Another suggestion of settlement of war debts came to Senator Reed Smoot, of Utah, recently in a letter proposing that the United States takes over part of Canada or some other British territory near the country.

Fred W Gravenhurst, of Brockton, N.Y., wrote the chairman of the senate finance committee

"Why, in all the discussion regarding Great Britain's debt to us, do we hear so little about making a settlement in land?

"To the north of us lie Canada Newfoundland, New Brunswick, Nova Scotia and Prince Edward Island, while to the east lie Bermuda and the West Indies Islands.

"Expansion through purchase is a well-tried American precedent

"Many of our hard-pressed citizens would probably flock into such new territory."

West Hosts Obligations

Western Provinces Retire Funded Indebtedness Heavily

New York. Canadian provinces retired $10,873,000 of funded indebtedness payable in United States gold coin in December, according to the Dominion Securities Corporation. The bulk of these payments consisted of $9,139,000 Province of Manitoba four per cent bonds and $1,011,000 Province of British Columbia four per cent notes, both retired Dec. 15. Since about $2,500,000 of this total was refunded in New York, the effect has been a net reduction in the U.S. dollar obligations of these two provinces of $7,675,000. Other maturities paid off add $708,000 to this figure.

The financial requirements of Canadian governments and corporations this year have been taken care of to a large extent through sale of internal issues in contrast to the large amounts borrowed in the New York markets in previous years.

For Federal Post

Toronto, Ont. "Dr. W. J. Bell, Ontario Deputy Minister of Health, is shortly to retire to become Deputy Minister of Pensions and National Health at Ottawa, according to a Queen's Park rumor," the Toronto Telegram states. "Hon. Dr. J. M. Reid, Minister of Health, is in the north country and no definite confirmation could be obtained."

Paid In Pennies

Sheldon, N.D. It was a load of his mind to say nothing of his arm, said E. E. Good, Sheldon dairyman, as he deposited a 22½ pound bundle in the Ransome county "Here's my personal property tax payment count it." Good told officials. They did—all 22½ pounds. There were 4,500 pennies. Good said he'd been saving the coppers for three months.

AMEND GRAIN ACT RESPECTING GARNET WHEAT

Ottawa Ont An amendment to the Grain Act will be introduced when parliament re-assembles, providing for the separate grading and handling of garnet wheat

Next year the bill is to be forced through and separate handling and grading of Garnet wheat will become effective, according to present intentions, at the close of the crop year, next July 31.

The reason for the amendment is given here as follows

Garnet wheat is good wheat but differs in milling quality from other prairie hard wheats. When mixed in with these wheats, the foreign millers are presented with a Canadian product that will not mill evenly. This is held to affect Canadian prices and Canadian markets adversely. By grading and binning Garnet separately, the market for other wheats, it is believed, will be improved both as to volume and price Also the Garnet will command a good market on its own. The government may assist in marketing the Garnet crop in the early years of separate binning by spending money in Europe advertising its quality.

Whether or not the amendment will contain other sections is not yet certain. There has been trouble at Montreal in regard to the certification of United States wheat, and something may be attempted to straighten out this problem.

Refuse To Pay Exchange

Calgary City Council Will Pay New York Brokers In Canadian Funds

Calgary, Alberta.—Accepting the recommendation of the finance committee, city council voted to default the exchange charges in making payments on the $1,000,000 debentures in New York, January 1, totalling $5,000,077.96. The payment will be made in Canadian funds, the exchange charges of approximately $300,000 will be ignored.

By a vote of eight to two, council upheld the actions of Mayor Andy Davison and the finance committee in bidding for gold from the Dominion government at par to meet the payment, thus avoiding exchange charges. With the gold refused, and despite protests from financial circles, the aldermen decided to refuse to meet the adverse exchange difference in Canadian and United States funds.

As the situation now stands, the city will offer to meet the debenture issue payments, both principal and accrued interest, in Canadian dollars. Any requests from bondholders for payments in United States funds will be rejected.

Finds Speaking Hard

London, Eng.—Establishing long distance flight records is hard work but Amy Johnson thinks speaking to an audience of men is considerably harder. Amy was feted at a luncheon of men distinguished in British aviation circles. She listened to speeches in which aeronautical experts praised her feat of setting a new record of seven days and seven hours for the flight between Cape Town and London.

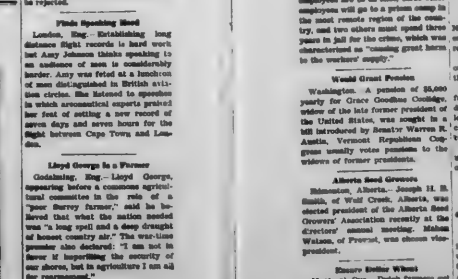
Lloyd George Is a Farmer

Godalming, Eng.—Lloyd George, appearing before a consensus agricultural committee in the role of a "poor Surrey farmer," said he believed that what the nation needed was "a long spell and a deep draught of honest country air." The war-time premier also declared: "I am not in favor of importing the security of our stomach, but in agriculture I am all for rearmament."

Road To Peace River

Vancouver, B.C.—Construction of a trail and eventually a road over the mountains into the Peace River country, having natural development of lands to take care of an ultimate railway, is the solution offered by Col. J. E. Cornwall, pioneer northerner, for the Peace River transportation problem.

LEADING LADIES IN CONCLAVE



Lady Nancy Astor, member of the British House of Commons, now on a visit to the United States, is shown with Mrs. Franklin D. Roosevelt, wife of the President-elect, as they attended a dinner of the National Consumers' League in New York. Lady Astor later led a Community Sing Song for charity.

JAPANESE SEEK CONTROL OF JEHOL PROVINCES

Shanghai, China.—Ten thousand Japanese soldiers are marching into the province of Jehol, Chinese press dispatches said today, and are en route to Lingyuan, which is about 90 miles south of Shanhaikwan, the city at the eastern end of the Great Wall occupied last week by the Japanese.

The despatches also said a Japanese landing force had gone ashore at Chinwangtao. Chinese nonget about 10 miles southwest of Shanhaikwan Patrols have been sent out by the landing force, it was reported.

The column proceeding into Jehol the despatches asserted, included artillery and cavalry marching from Suichung, north of Shanhaikwan, which is in Japanese hands.

Japanese military leaders have said for some time that they intended eventually to gain control of the province of Jehol and to annex it to the state of Manchukuo which has been established, with their assistance, to administer Manchuria.

The city of Jehol, capital of the province, used to be used by the Manchu emperors as their summer residence.

The National Government at Nanking has reiterated that it will not accept the Japanese thesis that the capture of Shanhaikwan is a local incident. Instead, the Chinese policy will be that the occupation of that city is part of the whole Chinese-Japanese dispute which is awaiting settlement by the League of Nations.

Concessions To Peasants

Russia May Decide To Abolish Grain Concessions

Moscow, Russia. A long-expected concession to the peasantry in the effort to extract from that class enough agricultural produce to feed the country seemed definitely on the cards in the publication of a speech by Vyacheslaff Molotoff.

The president of the union council of the people's commissars announced that the government probably would abolish "collections" of grain and substitute a grain "tax" in kind. Returning to a system in effect 10 years ago, the grain production of the country would hereafter be placed on the recently instituted basis for rent and better production.

Russia Executing Thieves

Men Sentenced For Stealing Jam From Government Warehouse

Moscow, Russia. Four men were sentenced to death and three others to 10 years in prison for stealing jam from a government warehouse. The manager of the warehouse and three employees are to be shot, three other employees will go to a prison camp in the most remote region of the country, and two others must spend three years in jail for the crime, which was characterized as "causing great harm to the workers' supply."

Would Grant Pension

Washington. A pension of $6,000 yearly for Grace Goodhue Coolidge, widow of the late former president of the United States, was sought in a bill introduced by Senator Warren R. Austin, Vermont Republican. Congress usually votes pensions to the widows of former presidents.

Alberta Seed Growers

Edmonton, Alberta.—Joseph H. Smith, of Wolf Creek, Alberta, was elected president of the Alberta Seed Growers' Association recently at the directors' annual meeting. Malcom Watson, of Prevost, was chosen vice-president.

Ensure Better Wheat

Montreal, Que. Dutch farmers get $1 a bushel for their wheat, according to P. Stute, Dutch seed merchant, who is here on business. The government provides a subsidy to bring the price up to this amount.

Electric refrigerators are to be tested in Peru.

W. N. U. 3017

Pension Act

Veterans' Claims Sounding Wrong With Its Work Are Investigating

Ottawa, Ont An impressive array of veterans' organizations dealing with exp ri nc ... pensioners problems appeared before the joint committee investigating the administration of the Pension Act, and told that body what they considered to be wrong with the way the act was operating

Practically all witnesses were unanimous in their disapproval of the attitude toward returned soldiers of the counsel employed by the board of pension commissioners

Sometimes, said A K. Moore of Winnipeg, chairman of the Dominion executive council of the Canadian Legion, "I listen to these counsel and expect every moment to hear them turn to the tribunal with the words 'I therefore submit that this man be taken from hence and hanged by the neck until he is dead.'"

Witnesses argued that section 73 of the Pension Act, known as the "benefit of the doubt" clause, was not being applied in accordance with the intention of parliament and of the people of Canada.

The city of Jehol, capital of the province, used to be used by the Manchu emperors as their summer residence.

Property Owner Not Protected

Debt Adjustment Act Provides Only For Present Occupant

Saskatoon, Sask. "While governments are giving protection to persons in possession of property, and who are living therein, under the terms of the Debt Adjustment Act, which have been confirmed on agreements of sale, or for which a second mortgage has been taken, no consideration has been given to the original owner who sold the house and who is relying on principal and interest payments to meet obligations incurred in the creation of the property," states David C. Kyle, Saskatoon barrister.

"Many people who have invested their life savings in such properties are now facing the threat of loss of their equities, as the owners are under the occupant owner by the Debt Adjustment commission has curtailed the revenue from the property to the original owner to such a low mark that he is unable to meet interest, principal and other charges against the property."

Entry From New Zealand

First Received From That Country For Grain Show Competition

Regina, Sask. First entry from New Zealand in the competitive classes of the World's Grain Show has reached the office of the organization.

It comes from J. D. McGill, a farmer of Tipua, Southland, New Zealand, in the oats class.

A few days ago 12 entries came from T. A. Sims, a farmer of Meridian, Idaho, his entries being as follows: four wheat classes, four barley classes, two millet classes, one dent corn and one rye.

Closing dates for entries is January 21 and closing date for receipt of grain samples is March 31.

South African Politics

General Smuts In Favor Of a Coalition Government

Cape Town, South Africa.—Tension in South Africa's political situation was augmented when General Smuts, Christian Smuts, leader of the South African party, arrived here to confer with his colleagues regarding negotiations to overthrow the government.

Thousands of cheering people greeted General Smuts on his arrival at the station from Johannesburg.

In a brief interview the general indicated his willingness to accept a subordinate post in a coalition government if it appeared in the best interests of the nation.

Criticizes Board

Charges That Land Board Of 1 niversity Bid Loose System

Winnipeg, Man.—Charges that for 10 years the methods of the land board had the "C... unsatisfactory system of directing the investments of the University of Manitoba, which was its statutory duty, were made in the course of inquiry by J. T. Thorson, K.C., in summarizing evidence regarding the $1,000,000 deficit in University of Manitoba funds.

Mr Thorson, ... counsel for the commission inquiring into the charges, said no member of the board ever asserted ... authority to direct the investment which he said was a "most astonishing situation." No member of the board, he said, ever went to the board of governors to find out what authority the land board had.

Irish Trade With Dane

Vancouver, B.C. The one ship per month which the British Canadian Steamship Company had contracted to take care of the subsidized Canada-China lumber trade has proved inadequate and four steamers will take about 12,000,000 feet to the Orient within the next six weeks. The extra ships will also take 9,000 tons of wheat and 1,000 tons of salt fish.

Want Uniform Relief Policy

Alberta Federation Of Labor Discusses Unemployment

Calgary, Alberta. Establishment immediately of a uniform relief policy by the Alberta Government was sought by the Alberta Federation of Labor in conclusion of its annual convention here.

Alderman Fred J. White, M.L.A., Calgary, was re-elected president for an eighth term, and Carl E. Berg, Edmonton, was elected secretary-treasurer to succeed Elmer E. Fegar, Edmonton, who was elected president of the Alberta section, Canadian Labor Party, at its gathering preceding the federation's convention.

Allegations of wide variation in relief policies and administration throughout the province were made during the debate on the relief question In urging a uniform policy for cities towns and country, the delegates asked the maximum aid now granted become the minimum, and, where necessary, increased assistance be given destitute.

Geneva Conference

Forty-Hour Working Week Is Advocated By Delegate

Geneva, Switzerland.—The question of the maintenance of wages at their present level or reducing them according to the cost of living, and of a proposal for a 40-hour working week before the international conference on unemployment.

Leon Jouhaux, general secretary of the French confederation of labor, declared that working hours must be reduced without any reduction in wages.

M. Jouhaux told the conference that unless the world unemployment situation is relieved civilization may be destroyed. Thirty million men and women one-sixth of the world's workers are jobless, he said, and as a result of inquiry by J. T. Thorson, K.C., in summarizing evidence regarding the $1,000,000 deficit in University of Manitoba funds.

Mr Thorson, ... counsel for the commission inquiring into the charges, said no member of the board ever asserted ... authority to direct the investment which he said was a "most astonishing situation." No member of the board, he said, ever went to the board of governors to find out what authority the land board had.

Irish Trade With Dane

Vancouver, B.C. The one ship per month which the British Canadian Steamship Company had contracted to take care of the subsidized Canada-China lumber trade has proved inadequate and four steamers will take about 12,000,000 feet to the Orient within the next six weeks. The extra ships will also take 9,000 tons of wheat and 1,000 tons of salt fish.

Kidnapping Plot

Millionaire Contractor In East Reported Threatening Letters

Toronto, Ont.—"Kidnapping plot which police regard with the utmost gravity is said to have been disclosed in an extortion letter received by James Franceschini, millionaire contractor of Almira," Hamilton Star says it learned from an authoritative source.

The first letter demanded "a fabulous sum," and threatened abduction of Franceschini's little daughter A second letter is said to have been received and guarded grounds of the contractor's home.

Visiting Western Canada

Ottawa, Ont. Dr. S. S. Archibald, director of the Dominion Experimental Farm, is in western Canada, where he will spend the next five weeks touring the various experimental farm stations in the west. While there he will attend an executive meeting of the board of directors of the World Grain Fair at Regina.

Gas Conservation Plans

Calgary Temporary withdrawal of motions questioning legality of public hearings of the Turner Valley gas conservation board was effected until January 23 and the way left open for the board to further its studies with a view to conserving gas for domestic use in southern Alberta cities and towns.

Death Of Senator Daniel

Saint John, N.B. Hon. Dr. J. W. Daniel, doyen of the Canadian senate, died suddenly at his home January 11th. His would have been 86 years old on January 26. The aged senator had been ill since Saturday, January 7, with influenza and complications.

CENTRAL PARTY OPPOSE POLICY OF DE VALERA

Dublin. Irish Free State. The Central party in the Irish Free State election campaign issued a manifesto indicating it intends to secure, if possible, the balance of power in the new dail stream which the Laborites hold in the old.

Frank McDermott, leader of the Centrist group, which has the support of the National Farmers' League and the Blueshirt League, said in the manifesto his party was not going to be "captured" by the National party, nor other parties to "drift back into the same old rut."

At the same time the pronouncement denounced President Eamon de Valera and his Republicans and said the Centrists would see "long delayed justice" given the agricultural community.

The party, it said, would do its best to see increasing war waged against poverty and unemployment, and insisted members of a kindly, self-contained Irish nation."

What success the Centrists would have at the polls January 24 was uncertain, but they appeared to have aroused considerable friendship among the masses of the nation.

Nominations, which closed tonight, showed the Centrists with 21 candidates in the field while the Laborites had placed 23.

Spanish Riots

Estimated That 60 Persons Have Been Killed

Madrid, Spain.—Outbreak of anarchist and syndicalist violence, which began recently, continued in many Spanish cities, although governmental authorities declared their belief that the disturbances had definitely been quelled.

It was estimated at least 42 persons have been killed during the disturbances which have been marked by frequent bomb explosions, seizure by extremists of public buildings and documents, and efforts to disrupt communications.

The number of persons injured has not been officially estimated, but it is thought the toll will reach the above 100. Numerous persons have been arrested.

SCENE OF THE LATEST POLITICAL BATTLE

The whole of the Irish Free State is swelling with the excitement of a General Election, an election, which came a little earlier than was expected. Ex-President Cosgrave is fighting for power with promises that he will enter into friendly relations with the Mother Country and "in three days" procure benefits for the farmers who have been hard hit by Britain's tariff. Eamon de Valera (lower right) maintains his stand on the secession with the Republicans of Britain and is determined to make the Free State economically independent of the rest of the British Isles. He is waging a bitter campaign against the Cosgrave Party, whom, he claims, is in collusion with the British Government.

To Cure Economic Ills

Sir John Aird, president of the Canadian Bank of Commerce, called on all and one to make a general reduction of 10 per cent in their tariffs as a means of aiding business upturn.

Sir John, delivering his annual address at the shareholders' meeting of the Bank of Commerce, said "Some bold stroke of international action is required in pursuit of economic progress and I suggest an early reduction of 10 per cent in every tariff in all countries. A move which should not seriously disturb the economy of each, but which might check the decline in world trade and lighten the arduous tasks confronting statesmen at the forthcoming world economic conference."

His speech continued a vigorous plea against the overthrow of the existing economic structure of the world and against nationalization of banking.

"Let me say," he declared, "that while I welcome every effort to improve working and living conditions in this country, I feel strongly that the faults in the world's economic life spring from the abuse of privileges by individuals and a lack of understanding of the responsibilities entailed in the operations of any system, whereby men and nations live and work together."

Sir John attributed trade depression to consequences of the Great War.

"After all possible allowance for current misunderstanding, fears, and 'war' original embarkers remains that our economic injuries resulting from the Great War and the spirit of that led up to that conflict had only first-aid treatment."

He said, however, that in recent developments at Lausanne and at the Ottawa economic conference he now good omens for the future.

In view of what he described as the apparent determination of western Europe to restrict imports of grain so far as possible, he urged greater diversification of Canada's agricultural activity and declared his belief that if the exportable surplus of Canadian wheat were reduced by 50,000,000 bushels with the consequent reduction in wheat acreage of about 10 per cent, it would improve the price of wheat by about 10 cents a bushel and bring enduring benefit to Canadian agriculture as a whole.

Sir John remarked that advocates of bi-metallism, agrarianism and managed currencies found less encouragement than a year ago.

"The return of all nations as soon as possible to the gold standard, he said, would in his view be a step toward stability in international trade."

War Debts

Discussion Aimed Authority Of Phrase "The Tragic Debt-Hanging"

There has been some discussion as to the authorship of the phrase "The Tragic Book-Keeping" which resulted from the war. It is the only quoted phrase in Mein Kampf (the record British war note) to which the authorship is not attributed. The author of the phrase appears to be Eugene Meyer, Jr., and in a statement to a second last January:

The economics of war, he says, is that, striking out both debits and credits, close the tragic book-keeping of the war. It is the basis of the situation, and doctrine or sentiment which ignores this radical solution and peremptorily warn us against temporizing measures.

Using British Shoddies

Because of trade agreements concluded at the Ottawa Imperial Conference last summer, the Royal Canadian Mounted Police of the Winnipeg division will henceforth be equipped with British-made motorcycles. A Winnipeg firm has received placing of an order, totalling $8,000, for a complete new fleet of British machines.

Forty-two of the 50 highest mountain peaks in the United States are located in the state of Colorado.

W. N. U. 1977

Canadian Band Holders

People Who Own Dominion Securities Are Widely Scattered

Just take one the bondholders of Dominion provincial or municipal bonds? Some pleasure politicians assorta the "big fellows" hold the bonds.

But bonds are distributed far and wide. Take the case of Allen Norman, Bondsmarket of L'Abbaye, St Jacques-de-Mar. Cotes du Nord, France. She had a $1,000 British Columbia coupon bond. In some way she mislaid it. But she proved the loss to the satisfaction of the Government and she is to be reimbursed for interest due on the missing coupon. An order-in-council has been issued by the province to provide for the replacing.

Besides demonstrating that compensation can be made for the loss of a bond, if the loss is proven beyond doubt, the holding of a British Columbia bond by a woman in Normandy, France shows how widely scattered the bonds get. It would surprise some of the platform speakers if they knew just how many men and women have joined eloquently in order to buy a government or municipal bond, because they think these securities provide a safe investment.

Fighting Radio Tax

Quebec Lawyer Refuses To Pay Federal License Fee

A lawyer residing in the Border County, who is also a broadcaster, announced that although he has been summoned to police court for non-payment of the annual Federal license fee for his operation of a radio in his home, he has no intention whatever of paying it. "I did not pay for a radio license," he declared, "I'm not going to pay. I submit they can't collect it either. I do not believe the tax is constitutional."

If this case leads his case to a higher court and fights the tax successfully, an interesting tension may develop, since returns from the radio license fee, which some call a tax, are intended to prove the membership of the annual radio listeners' license. It is claimed to be established. It is evidently the belief of the Border Citizen lawyer that the collection of this license fee is not within the province of the Federal authority and ought to be reserved to the provinces. Should his point of view be sustained, the collection would be in order.—Brockville Recorder and Times.

Seeded Wheat

Thirty Thousand Tons To Be Sold On World Market

Thirty thousand tons of Seeded wheat will have to be sold on the world market as a result of overwhelming and unexpectedly good crops says an announcement by the Swedish Grain Association.

It also has been announced that an increase in the mixing percentage of wheat, to not less than 95 per cent. domestic will be necessary to the government mixing of some foreign wheat with the domestic is necessary because of a lack of gluten in Swedish wheat. This year's crop is declared to have better than average baking qualities, however.

Predicts Another War

Former U.S. Ambassador To Great Britain Sees Danger Signs

Former American ambassador Europeans war, Alanson B. Houghton declared in an address at New York that while the United States was isolated behind Hadrian from the rest of the world it "can control the extent to which we care to involve ourselves."

Responding, United States ambassador to Great Britain and Germany, pictured Europe as dividing again into two hostile groups.

Could Restock World

The "Army of Unemployed" throughout the world could produce enough 20,000,000, according to figures issued by the League of Nations. If spread out in a single line round the equator this workless army could make a chain round the world by holding hands, for there would only be one foot between each man.

London has one policeman to every 2,000 of its population.

Immigration Population

Total Number In Canada Given As 2,997,235

Canada's total immigration population, according to the last census was 2,997,235, declared a statement issued by the Dominion Bureau of Statistics recently.

More than 23 per cent. entered Canada in the 10-year period between 1921 and 1931 and about 20 per cent. in the previous decade, while nearly 29 per cent of those living at the date of the 1931 census may resident in Canada reported a year of immigration prior to 1911.

The statement adds that 324,622 of all the immigrants reported that in last census were in Canada for 30 years or more and that less than 50 per cent. of all immigrants resident in the Dominion at the last census were of alien birth, the balance, exclusive of 781 born at sea, being made up of 1,334,641 born in the British Isles, and 48,137 born in British possessions.

Mutilated Currency

American Farmer Has Burned Bills Received At Wheat Sales

Money is soon brought mutilated money to Washington and redeemed at least a part of it - but it remained for W. A. Belter, farmer of Benton Harbor, Mich. to take back in silver the thought he had.

He unconsciously entered Senator Vandenberg's office at Washington with a bag full of bills so burned they were unrecognizable to an untrained eye. He told of how a fruit jar into which he had stashed $1,000, almost his entire capital, had fallen into the fire. He had extinguished the flames with snow, he said, the hole to save his money.

Expert examiners and counterfeit detectors putting the pieces together, found for Mr. Belter not only the $1,000 but an extra $10 bill which he didn't know he had.

Romance Still Lives

Story About Missing U.S. Flyer Makes Good Reading

Few stories in modern times have had more of the essence of pure romance than the one which has built itself up about the disappearance of Paul Redfern, the American flier who vanished five years ago while trying to fly from Georgia to Rio de Janeiro.

Redfern, according to this story, came down deep in the Brazilian jungle and is now living there as the king of a native tribe, which horrors him highly but refuses to let him get away. So now a new expedition is being prepared to go down to the jungle, look for him and bring him back to civilization.

Here is a sample of the sort of yarn that adventure-story writers have been fond of for decades. If it isn't true, it ought to be, for it contains just the right proportions of mystery, adventure and surprise. The modern world, apparently, is quite incapable as former ages of producing exciting tales.

High Up in the Alps

Monastery Of Grand St. Bernard Occupied the Year Round

The Monastery of the Great St. Bernard, at the altitude of 8,000 feet, is still presumably the highest building in Europe inhabited throughout the year. During the War, the headgame of the High Alps was strangely broken by the fathers of smoke their arrow from snow-clad peaks; for under pressure of necessity and with the aid of the transporter cable men then lived throughout the winter on mountain tops far above the snow line.

Debt Is Appreciated

Canadian Almanac Contains Hum Of Information About Dominion

With the New Year comes once more the Canadian Almanac. Each year, into the Dominion itself, it continues to grow. This year it "turns the scale" at over 600 pages. It is packed with a mass of information about Parliament and the Legislatures, their departments, the legal, commercial, statistical, ecclesiastical and educational life of the Domin on, together with a mass of general information about Canada that is complete as well as concise, and is a remarkable compendium of knowledge about this country and almost everything in it.

The editors of such a publication take upon themselves a huge task in compiling all that data, but they can n the gratitude of busy journalists and public men in presenting in such form matter which would otherwise involve long and laborious research. St. Thomas Times-Journal.

Latest Gadget For Car

Among the accessories on display in New York at the annual automobile show in Grand Central palace this year is a gasoline lamp with a flash. Not only will this prevent thefts of gasoline, its sponsors say, but if the whole car is stolen it can be driven only until the tank runs dry, for no fuel can be added without using the key.

Texas produces from one-fourth to a half of the United States' total peanut crop.

A Better Outlook

Some Taking Of Pressure Which is Forcing Wheat Prices Downward

Some easing of the pressure which is forcing wheat prices downward may result by the end of the present crop year, said George W Robertson secretary of the Saskatchewan wheat Pool, in addressing the Regina Rotary Club recently

World wheat stocks had been reduced only about 40,000,000 bushels in the course of the 1931-32 crop year he said, and had been more than 50 per cent above what had come to be regarded as normal at the close of the year.

In round figures stocks at that time had been still in excess of 800,000,000 bushels, and until these had been reduced to below 600,000,000 bushels, the word "surplus" would legitimately disappear. He would wheat situation from a statistical point of view. The excess had been concentrated entirely in United States and Canada

In conclusion Mr. Robertson said that there was a possibility of the Argentine crop proving of poor quality, and also that the Continent should absorb a larger quantity than usual of low grade wheat, particularly from Australia.

To Overcome Stuttering

University Student Develops Use Of Left Hand To Remedy Speech Defect

David St Clair, Minneapolis, rowed, winner of a Rhodes scholarship, is left-handed now but he doesn't stutter.

St. Clair entered the speech clinic of the University of Minnesota struggling with stuttering and it was found little time wasted in his adjustment to the use of the left hand before the speech difficulty could be overcome.

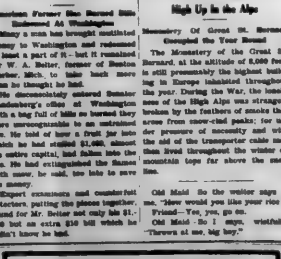
"The theory we used," Dr. Bryngelson, director, said, "is that reorganization of control in the two brain hemispheres might be brought about through the use of the other hand, in this case we succeeded.

"The physiological explanation is that one of the brain hemispheres is dominant, with the right hemisphere controlling the left side of the body and the left hemisphere, the other. When one side is dominant and the other side is called upon for nerve control, the two forces, clash when they become about equal in strength.

"Our diagnosis was correct in this case, and after he started using his left hand primarily, he corrected his stuttering."

St. Clair will go to Oxford University, Bigelow, He is a student of geology and mining.

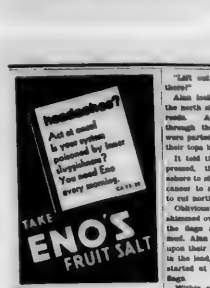
DE VALERA Just leave it to me."
IRISH FARMER Bogeyre! and it's a knot you've got us in." Shuttleworth. Review of Reviews, London.

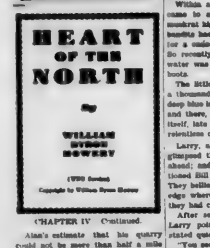


FANCIFUL FABLES

Old Maid So the senior says to me, "How would you like your rest?" Friend—Yes, yes, go on.

Old Maid - So I says, wistfully, "Thrown at me, big boy."





CHAPTER IV Continued.

Alan's estimate that his quarry could not be more than half a mile in the lead, was true enough, but a stern chase is a long chase, and if these bandits were aching from exhaustion, they had the fear of death in their hearts to goad them on.

A whole hour, an hour of terrible labor, went by, and still no sight or sound of the bandits. With the responsibility of this patrol on him, with human lives, the lives of comrades, at stake, a fear gripped Alan that these bandits had taken the south branch of the Alcoska. If they had, Frank Poisnault and these two new recruits might run into an ambush or Fed might attack them, reckless fellow that he was, practically lone-handed, and get killed.

The chase was entering the Thal-Annah Reef, that watery wilderness of lakes and labyrinthine channels and musking thousands of square miles in extent. Not far ahead the branch split into a dozen channels leading in every direction. Pursuit would end there. A few miles more, and those canoes would be swallowed up in the watery oblivion of the Thal-Annah.

But then, as he shirked around a headland, his prophesy yesterday to Haskell, and his conviction, founded on long man-hunting experience, that these bandits would surely follow the left branch, were suddenly proved true to the letter. On ahead, a scant thousand yards, he caught one fleeting glimpse of two heavily laden canoes that carried six men.

Dipping faster, deeper, he and Bill and Larry paddled at a furious pace to come up within rifle range. The river was so winding that they could see only a few hundred yards in front. There was danger, a terrible danger, of running headlong into a blind ambush where all three of them would be killed outright and their canoes sunk before they even could start to shoot back. Every stroke, every curve, every clump of flags they skimmed close past was a deadly peril. They knew it, but they dared not slow up. They were taking their chances.

As they shirked out upon a shallow little lake fringed about with tall flags, Larry suddenly heaved back on his paddle.

"NOW I FEEL FULL OF PEP"

After taking Lydia E. Pinkham's Vegetable Compound

That's what hundreds of women say. It relieves nervous weakness, it tones and invigorates, it helps build up your system. Why suffer needlessly? Get a bottle today and see how much better you feel.

"Left out! Look! Alan, look over there!"

Alan looked where he pointed at the north shore, at the wall of dense reeds. A path had been broken through the flags there; the reeds were parted, some of them trampled, their tops bent to either side

It told the story to him. Hastily pressed, these men had whipped ashore to shake off pursuit, had lifted canoes to shoulder, and were trying to cut north and hit another channel Oblivious to ambush danger, they shimmied over to the telltale break in the flags and drove out upon the mud. Alan and Bill slung the canoes upon their shoulders, and with Larry in the lead, following the signs, they started at a lope back through the flags.

Within a few hundred yards they came to a little creek, a sluggish muddy highway that led north. The bandits had taken to it. Too shallow for a canoe, they had had to wade. So recently had they passed, the water was still roiled from their boots.

The little creek took Alan's party a thousand yards north to a lake, a lake about two miles long several across; and there, within the Thal-Annah itself, late in the afternoon, the long relentless chase came to its end.

Larry, a dozen steps in the lead, glimpsed the silvery sheen of water ahead; and stopping dead-short, motioned Bill and Larry to be cautious. They bellied forward toward the lake edge where the flags were thin and they had a clear view.

After several minutes of waiting, Larry pointed across the lake and stated quietly:

"There's that big patch of brown-ish flags over there, about thirty or forty yards back from the water? Those little trees beside it, and the mountain, they had the four of death in their hearts to goad them on.

A whole hour, an hour of terrible labor, went by, and still no sight or sound of the bandits. With the responsibility of this patrol on him, with human lives, the lives of comrades, at stake, a fear gripped Alan that these bandits had taken the south branch of the Alcoska. "NOW I FEEL FULL OF PEP"

After taking Lydia E. Pinkham's Vegetable Compound

That's what hundreds of women say. It relieves nervous weakness, it tones and invigorates, it helps build up your system. Why suffer needlessly? Get a bottle today and see how much better you feel.

If you are not as well as you want to be, give this medicine a chance to help you. Do it today. Lydia E. Pinkham Medicine Co., Windsor, Ont.

W. N. U. 1977

They Came Up Within a Hundred Yards Of Their Quarry

At his gesture Bill slid cautiously up beside him. In whispers, Alan said to him: "Bill, we've got to go. We've got to get across this pond. These muskrat houses out there are particularly good luck for us. By sundown, maybe, we'll be within rifle range. But we've got to get across. We can sneak from one house to the next. The last one isn't a dozen yards from those men. If we make it, we'll have point-blank range and the best kind of cover to shoot from."

Taking off their hats and jackets, they wriggled carefully out of the tall flags, eased into the water and squirmed toward the first muskrat house, which stood up four feet above the surface and entirely hid their approach. Behind it they stopped a moment, chose their next one, and sank back into the water.

As they crouched down behind the third little dome of mud and reeds, a towering red-bearded man parted the flags they were staring at, bent and stepped up a hatful of water, took a swallow in this unshaved country. With no tent, no shelter, the mosquitoes and flies would drive them crazy in less than a day, and they'd fall into our hands. If you understand now what's cut out for us, we'll be starting."

Both men nodded.

Bill and Alan had had many with infinite caution, for the flushing waterfowl would raise a the others. Yard by yard the two men slipped back into the rushes till they were a safe distance from the lake

Then they began the long hard job of circling around the bandits.

Wet muddy, tortured by insect pests, they pushed steadily on, mindful of evening twilight.

It took an hour and a half to make the wide careful circle and start coming in toward the bandits from the south. With the cut in two by the western horizon, and the chill of twilight in the air, those six men would shortly be on the move. But Alan's hopes had risen again. It seemed that he indeed had taken his luck along." The bandits did not know they were being stalked In half an hour more, if he should, he and Bill would be in position to open on them all unawares

Dropping at last to hands and knees, the two of them crawled along through much soft water keeping only their guns dry. They came up within a hundred yards of their quarry.

As he parted the reeds in front of his face Alan saw the tops of a clump away suspiciously A moment later he glimpsed the dim outline of a man standing up, stretching himself, sitting down again.

In actual sight now those men who had killed Jimmy McGregor. Alan felt only a pulsing shot away But to take them Alan cursed savagely at the thought of Poisnault and those three men a hundred and fifty yards behind. As he remembered what Haskell said about the Law being behind his patrol, his lips curled in scorn at that stock expression

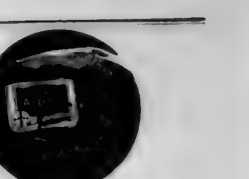
"The Law that's supposed to be back of us, I wonder where in h- it is now! What it means to Bill and me now!" More in this watery wilderness in the creeping twilight, he and Bill were going up against men who had killed a man of fifty and who had murder charges hanging over their heads. And if they broke away, Larry single-handed would have to stand the whole brunt of stopping them

ing the water out of his hat, he changed speech.

Alan's last secret doubt about these bandits being utter strangers in the country was dispelled now. He had had a clear view of this huge red-bearded leader; he could say positively, as Ashman and all the passengers had sworn, that he had never laid eyes on the man before.

"Bill," he whispered, "When we reach that last house, I'll splash or do something to draw their attention. They'll come out to see what's up. And keep a quiet mind."—Adam.

Let us then think only of the present, and not even ponder our mind to wander with curiosity into the future. This future is not yet ours; perhaps it never will be. It is exposing ourselves to temptation to wish to anticipate God, and to prepare ourselves for things which He may not destine for us. If such things come to pass, He will give us light and strength according to our need. Why should we desire to meet difficulties prematurely, when we have neither strength or light as yet provided for them. Let us give heed to the present, whose duties are pressing; it is fidelity to the present which prepares us for fidelity in the future. —Fenelon.



Throw OFF That
COLD!

Some one and sometimes fight colds all winter long. Others enjoy the protection of Aspirin. A tablet in time, and the first symptoms of a cold get no further. If a cold has caught you unawares, keep on with Aspirin until the cold is gone. Aspirin don't harm you. It does not depress the heart. If your throat is sore, dissolve several tablets in water and gargle. You will get instant relief. There's danger in a cold that hangs on for days. To stop aching of the pain and discomfort Aspirin might have spared you! All druggists; with proven directions for colds, headaches, neuralgia, neuritis, rheumatism.

ASPIRIN

Little Helps For This Week

"When He giveth quietness, who then can make trouble?"—Job 34: 29.

"None of those things move me."
Acts 20.24.

I've many a cross to take up now,
And many left behind;
But present troubles move me not,
Nor shake my quiet mind.
And what fear be to morrow's cross
I never seek to find:
My Father says "Leave that to me,
And keep a quiet mind."—Adam.

Let us then think only of the present, and not even ponder our mind to wander with curiosity into the future. This future is not yet ours; perhaps it never will be. It is exposing ourselves to temptation to wish to anticipate God, and to prepare ourselves for things which He may not destine for us. If such things come to pass, He will give us light and strength according to our need. Why should we desire to meet difficulties prematurely, when we have neither strength or light as yet provided for them. Let us give heed to the present, whose duties are pressing; it is fidelity to the present which prepares us for fidelity in the future. —Fenelon.

U.S. Unemployment

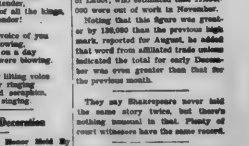
Estimated That 11,500,000 Were Out Of Work In November

An "all-time peak" of unemployment in the United States was reported recently by William Green, president of the American Federation of Labor, who estimated that 11,500,000 were out of work in November.

Noting that this figure was greater by 1,250,000 than the previous high mark, reported for August, he added that word from affiliated trade unions indicated the total for early December was even greater than that for the previous month.

They say Shakespeare never told the same story twice, but there's nothing unusual in that. Plenty of court witnesses have the same record.

Farmers raise 70 per cent of their own food.



Many Have Decoration

French Legion Of Honor Held By 150,000 Persons

Holders of the Legion of Honor now number 150,000, according to statistics just published in Paris. This number includes thousands of foreigners who have been awarded the coveted decoration which all French-men aspire to gain. The chevaliers number 125,150, the officers $1,213, and the commanders 2,145. Holders of the Grand Cross total only 78.

"I think your picture's adorable. It breathes the very spirit of dawn. What are you going to call it?"
"Sunset."

CHOICE

I'd rather see your eyes aglow
With faith and love and gladness,
As once I saw them when the world
Was gay with April madness.

I'd rather see your smiling eyes,
Than brave, bold tender,
Than all the gems of all the kings,
Ashine in regal splendor!

I'd rather hear the voice of you
In happy laughter flowing,
As when I heard it on a day
When April winds were blowing.

I'd rather hear your trilling voice
In modern laughter ringing
Than cherubim and seraphim,
And all the angels singing.

THE RHYMING OPTIMIST

By Abbie Hollander

CARD OF THANKS

We wish to thank all those who brought tributes to enable the Junior team to buy new uniforms. We also thank Omer Lamoureux for donating the outdoors for the uniforms.

The Fort Fitzhue Hockey Team.

Evelyn Roberts wishes to thank all friends who so kindly helped her with the third prize (a buggy) in the Doll Contest at Smith's Drug Store, recently.

Advertising Will Connect Buyers. See Into Prosperity.

LOCAL NEWS

Mr. Roland Sheridan of Lethbridge was the guest at the home of Mr. and Mrs. W. E. Roberts last Thursday and Friday.

The dance committee of the Fort Curling Club wish to thank the Ladies Curling Club for their help and assistance in making the dance a success.

THE TOWN FINANCIAL REPORT APPEARS INSIDE THIS ISSUE.

The subscriptions paid into The Record office during the past three months were a big factor towards meeting the weekly cost of getting out the paper in fast, without them, the business would have been heavily in debt.

A number of Record subscribers whom we have seen personally during the past three months, promised to pay up their accounts in various ways, so far, only a few have done so, and we cannot appreciate it if the rest would do it a point to have these arrears paid.

The conditions under which we are publishing The Record is a wide-hazard, and support from The Record subscribers—this they can give by the payment of their subs.—and we will try our part towards continuing to carry on—trusting for better conditions.

COMING EVENTS

The W. M. S. of the United Church are holding a Chicken Salad Tea, and Home Cooking Sale on Saturday, Jan. 28th, from 2 to 6 p.m., at the Fort Confectionery. Cents as well as Ladies are welcome.

The Princess Rebekah Lodge No. 82., are holding a Whist Drive on Wednesday, Jan. 25th, at 8:30 p.m. Everybody welcome. Refreshments. Admission 25 cents.

Do not forget the Hockey Boys Hop dance this Friday night.

BORN

Born to—Mr. and Mrs. J. R. Milligan of Ben Accord on Monday, Jan. 16th, at the Hillcrest Hospital. A daughter.

Born to—Mr. and Mrs. William Mostyn of Gibbons, on Monday, Jan. 16th, at the Hillcrest Hospital. A son.

WEDNESDAY, JAN. 18th, 1922

A.Y.P.A. Elect Officers

A meeting of St. George's A.Y.P.A. was held on the Rectory on Jan. 17th, for the purpose of electing officers for the ensuing season.

These elected were:—
President—Edward Roberts.
Vice-President—Donald McLellan.
Secretary—Peggy Graham.
Treasurer —Glover Taylor.
Publicity Sec.—Tom Henry.
Refreshment Committee—Gwyneth Roberts, Muriel Taylor.
Program Committee—Irene Graham Ernest Smith and Herbert Roberts.

The financial situation gave to a bright outlook on things in the treasurer's report showed a balance on hand of $19.25.

Mr. Neale discussed the possibility of the church starting a bible class. It was decided to do so and that it would meet in the church at 10:00 a.m. on two Sundays and 12:15 a.m., the other two Sundays. This bible Class entitles any member of the Anglican Church to membership.

A telephone bridge was arranged for Friday, January 27th. Tables will be held at the following homes:—Mrs. Reed's; Mrs. W. H. Roberts; Mrs. T.W.E. Henry's and Mrs. Ed. Graham's.

It was undertaken by the A.Y.P.A. to raise the amount of $25 for the church for the year 1922. It has been done before and with co-operation of all members it should be able to be done again.

FEEDING UP CATTLE

More than 12,000 head of beef cattle are on winter feeding throughout the province during the present winter, according to th provincial live stock branch. Of these, some 2,500 have come under the plan inaugurated by the Red Label Association, which co-operative arrangement between ranchers and farmers for feeding of the cattle from the ranges by the farmers.

This will mean that something over a million pounds of good quality beef will be ready for the market in the coming spring. In the Calgary district there are some 2,000 head on the feed lots, with 2,500 in the Edmonton district, about 1,200 in the Lethbridge district, 1,100 head in the High River District and 1,200 head in the Lacombe district, 1,000 head in the Olds and Innisfail district, and the balance scattered in small lots to various points in the province.

In addition to the cattle on feed, there are over 30,000 lambs also on winter feeding, of which nearly 14,000 are in the Lethbridge area.

FOR SALE

The amethyst and violet tinted glass of the ancients owed its color to manganese.

Taken from the Files

19 Years Ago Today

Thursday, January 23nd, 1914

Rise of Edmonton was the Grand Challenge, Merchants, and Grand Aggregate Cups in the Fort Bonspiel held here last week. Members of the Fort won the Graham shield.

It was rumored here that the R. N.W.M.P Barracks here will not be transferred from the Dominion Gov't to the Provincial until the first of march.

About a hundred people presented Rev. Ingram-Johnson at a meeting of the social club of St. Luke's Parish, a large wheelbarrow, which contained nothing less than a kitchen shower.

An interesting wedding took place in St. George's Church, when Miss Edith Gertrude Dawson, only daughter of Mr. and Mrs. George J. Dawson was married to Rev. R. T. Ingram-Johnson, son of the late Rev. Rowland Ingram-Johnson.

The Fort Saskatchewan hockey team were defeated by Varsity at Strathcona last Friday by a score of 6-4.

At the Royal rink, Edmonton last night, the local curlers defeated two Edmonton rinks for the Weiner Cup. This cup is known as the Red Letter Cup, and is much coveted by every club in fact there are three challenges in hand at present.

Much Business Done At Town Council Meeting

A regular meeting of the Council of the Town of Fort Saskatchewan was held in the Council Chamber on Thursday the 19th instant, with Mayor Montgomery and Councillors Simmons, Gray, Lalonde, Smith and Pillmore present. The minutes of the last meeting held were read and adopted.

The report of the Medical Health Officer, Dr. Mason, for October was submitted. Two applications for relief were approved by the Council and two were left in abeyance.

The following motion made by Councillor D. Simmons was adopted:—"That lots one and two in Block 1; plan O, except that portion registered as a lane, be set aside for a park under the provisions of Sec. 19 (2) of The Town Planning Act, and that the park shall be named the "McLean Park". Mr. McLean has kindly undertaken to landscape the park free of cost for the benefit of the Town.

A motion was approved by the Council rescinding the resolution passed on the 5th. Ultimo regarding the telephone rental for 1922 being paid one year in advance.

A further letter was received from Chief Inspector of Theatres regarding certain changes to be made in the doors of the Memorial Hall, and the Secretary was instructed to write and say that the Hall is not now occupied, and will not be used for the present.

Restaurant licenses for the Royal, City, and Club Cafes were approved by the Council.

Owners of dogs can now secure dog tags for 1922 at the Town Hall.

Preparing to Visit the World's Grain Show

Motorcades are being organized in many parts of Canada and the United States for the purpose of attending the World's Grain Show opening at Regina on the 30th of July next. Motorcades are usually organized in this way. A party at some center maps out the route it intends to follow, then writes to some public body in each of the centers along the route inviting them to join the party at a certain time. In this way two or three motor cars may start at the original center but by the time they reach their destination the motorcade, as it is called, may consist of a large number of cars. It is known that plans are being worked out for several of such motorcades and according to J. A. Mooney, the managing director, that quite a few are expected from the Gulf Lake district of Saskatchewan and a similar number from the Southeast of the Province. Prince Albert district is planning a large contingent. Winnipeg itself through the Young Men's Section of the Board of Trade, has the objective of 1,000 cars. Even from Eastern Canada such motorcades are expected. Mr. Mooney has been in every province in the interest of the World's Grain Exhibition and Conference and reports the keenest interest everywhere he has been.

TIMBER RESOURCES

First sales of timber berths in the province will be announced next week by the lands and mines department of the provincial government. Last year 40 sales were held of berths located in the northern and northwestern part of the province. The timber berths generally comprise about one million feet of lumber each.

It is estimated that about 400,000 railway ties will be required this season, and a number of camps are already at work.

A children married couple in Ireland adopted an orphaned three-months-old German baby. Then they took a correspondence course in German so that they would be ready to understand the child when it started to talk.

SUPPORT THE ADVERTISERS

Girls A.A.A. Elect Officers At Annual Meeting

The annual meeting of the Girls A.A.A. at which F. Fleming and H. Carmichael were joint business and a stump poverty party, was held January 17th, and took the form of a combined business and social meeting.

The following officers were elected for the coming year:—
President, Ada Dehaan.
Vice-President, Helen Carmodeley.
Secretary-Treasurer, Flo. Fleming.
Executive, Gwyneth Roberts, Ruth Henry.

It was decided to furnish daily for at least two months, beginning Jan 23rd, $4 half prizes of milk for those school children requiring same.

Among the correspondence read was a letter of thanks from Mrs. M. McLean, nee-Cross, of the Fort Red Cross Society acknowledging the Christmas donation of $50.00 from the A.A.A.

In view of the number of social activities in the near future it was decided to postpone, to a later date, the dance usually held on Valentine's Day.

A very facetious "scratch dog", the prize for which contest, was won by Winifred Bullock and honors at cards went to Dora Looker.

RED CROSS MEETING

The Annual meeting of the Fort Red Cross Society will be held at the home of Mrs. A. M. Carscadden on Thursday afternoon, January 26th, at 3 o'clock.

DIED

MRS. MARY McEACHERN

The funeral service of Mary McEachern, widow of the late Donald McEachern of Fort Saskatchewan, who passed away at her residence at Fort Saskatchewan on January 21st, aged 77 years, was held on Tuesday afternoon at 2:30 o'clock at the Fort Saskatchewan United church. Rev. Mr. Ramsay officiated and interment took place in the Fort Saskatchewan Cemetery. The pallbearers were:—Messrs. E. Flintoff, R. Johnson, W.H. Fisher, Robert Gordon, Tom Johnson and Fred Black. Beautiful floral tributes were received from: The family, Mr. J. Campbell and Mrs. Neil; Mr. and Mrs. Hornby; Mrs. Fred Simmons and family; the Black family; She is survived by three sons, Neil, Ernest George, and Gilbert A., all of Fort Saskatchewan, and four sisters, Mrs. Hugh McMillan, Mrs. Tory and Mrs. Jamieson, all of Woodville, Ontario, and Mrs. Cameron of Beaverton, Ont. Howard & McBride, funeral service.

St. George's Church Hold Annual Meeting

The annual meeting of St. George's congregation was held in the Rectory on Thursday, 19th last, the Rev. C. Neale in the chair. The financial statement showed that all debts were paid and a small balance was in hand.

Attendance at services had been only slightly less than last year, an some regular members had left town.

All the organizations showed good work done and help given to the general expenses.

Mr. J. H. Carscadden accepted re-appointment as Rector Warden and Mr. C. Hager was elected People's Warden.

Messrs. Bullock, Redd, McLellan, A. M. Carscadden, with Mrs. Wicks and Mrs. McLellan were elected on the Church Committee.

Approximately twenty junior farmers will receive a course of training in grain judging at the Ontario Agricultural College. From these boys a team will be selected to represent the Province of Ontario in the Junior Grain Judging competitions to be held at the World's Grain Exhibition and Conference, Regina.

HOCKEY

By defeating Chipman 7-0 Tuesday night at the local rink the Natal increased their winning streak to ten straight and two t. [illegible] in the last 12 games.

The game was fast but the Fort were masters all through the game. The forwards backchecked and covered their man giving opponents little [illegible] scores.

Tom Henry started the scoring by netting the rubber from the left boards. E. Lane made it 2-0 scoring from close range. R. Richardson ran the count up to 5-0 scoring three goals, two on solo plays and one on an assist from Lane. John Kerven finished the scoring at 7-0, by sending home the rubber for two goals, a solo and an assist from Lane doing the trick.

The Fort are now even in points with Lamont, but have played two games less than their rivals Bruderheim make their first appearance here Friday, Jan. 27.

GRASSHOPPER OUTBREAK EXPECTED

Possibilities of an outbreak of grasshoppers in Alberta next spring and summer are reported by the provincial department of agriculture, and the government is making preparations accordingly. A considerable area in the southern part of the province is likely to be infested, large numbers of eggs having been found in the ground. In order to cope with the expected outbreak of the hopper plague, the government has contracted for sufficient supplies of poison-stuff to be made up, with stocks already on hand, about 150 tons, and these will be stored in Calgary for distribution as needed.

Taken from the Files

19 Years Ago Today

Thursday, January 29th, 1914

Two rinks representing the Strathcona Curling Club, shipped by J. M. Kinnear and P. E. Brown, failed to lift the Weiner Cup. It was arranged to play 14 end games. Athlason (Fort) defeated Kinnear (Strathcona) giving the Fort a four-point margin.

The Fort defeated Manville Hockey team here last Tuesday, after a hard game. For two periods Manville held the locals down to 5-1, but here unable to stand the pace they allowed the home boys to more three goals in the last ten minutes, the score ending 5-1 for the Fort. E. Dewar and Pete Button were the officials.

F. H. Walker, M.L.A., gave his annual banquet last night to his host of young men friends of the Fort. From all reports no end of a good time was enjoyed to an early hour.

On Friday afternoon last, in the Presbyterian church before [illegible] the W.H.M.S., and W.F.M.S., held a reception for Mrs. A. Forbes, who is leaving for Grande Prairie where she will join Rev. A. Forbes.

The Fort Saskatchewan Grain market Thursday morning, Jan. 29, 1914 Wheat No. 1 northern 64c; Oats, No. 1 feed, extra 37c; Barley, No. 3, 39c.

Beaver Hills

Last week ten elk were seen crossing J. Fisher's farm. They carried away part of the wire fence.

Sherwoodville

The annual meeting of the St. Eugene school district was held on Monday, January 9th, to elect a trustee in place of T. McFee, retired.

Jack Holmes was appointed as Secretary-Treasurer to the school district of St. Eugene, at the annual meeting held on Monday, January 9.

Mug: "Why don't you get a car for your wife?"

Wasp: "I can't find anybody willing to exchange his car for my wife."

Copper near the surface of the ground is said to check growth of vegetation. For this reason copper mines are being used in Africa to spot likely deposits of copper.

— RADDISTON NOTES —

The Fort Saskatoon Club have accepted an invitation from Inglewood Club in Edmonton, to visit them for Saturday evening, January 28th, to renew the league in some friendly games. Any members wishing to avail themselves of this opportunity to visit the Inglewood Club will please see the President today.

The Fort Club is holding a dance in Simmons Hall Friday, February 10th. Those attending are assured of another real enjoyable evening. Do not miss it!

IT PAYS TO ADVERTISE

EGG IMPORTS AND EXPORTS

New little Alberta depends on imports of eggs is shown by the figures for 1922, which show that only 900 dozen of eggs were brought into the province in comparison with an export of Alberta eggs totalling 68,000 cases to outside markets. Export of poultry amounted altogether to 20 carloads according to final figures just released.

Miss Ketting: "What is your favorite sport?"

The Human Factor.

In these days when so much is being said and written about plans, and systems, and machines and institutions, it becomes all the more necessary that sight should not be lost of the most important of all factors in our individual and community life, in fact in our present day civilization, and that is the human factor.

Man has been instructed that he can invent a machine and so improve it that it is almost perfect in its operation and in doing what is expected of it, with the result that, when it does fail, that failure is to be attributed in the vast majority of instances to the person who is in control and directing the operation of the machine. In other words, it is the human factor not the machine that is found to be weak and faulty and breaks down under stress and in emergencies.

For example, if a study is made of the records of automobile accidents it will be found that the majority of accidents in which there is loss of life, faulty brakes, poor construction or materials used in any part of the car or even to bad roads and adverse weather conditions, but to the drivers of cars. Poor judgment is displayed in an emergency, downright selfishness influences the driver in his attitude towards other drivers, recklessness leads to the taking of desperate risks, in a word, it is the human factor, not the machine that is at fault. And what is true in the case of the automobile will be found to be true in varying degrees of all machinery.

Not only so, but the same statement may be made without fear of successful contradiction in regard to all man-made or evolved institutions, systems and plans. Of course, no machine and no institution or system is perfect, but as the years roll by they are constantly improved upon and brought ever nearer perfection, although, admittedly, perfection will never be fully attained. But such approach to perfection is not attained by destroying the existing machine or institution, but by improving upon that which exists until, in course of time and through experience, a new machine has been actually developed which replaces the old one, or a new scheme has been evolved which, because of its many advantages over an old one, gradually replaces it. It is, in fact, not a new scheme at all, but an evolution of, a development out of, the old one.

There is a tendency in these troublous times to lay all the blame for our difficulties upon the machine, to denounce our systems and methods of government, our methods and ways of distributing commodities, the institutions through which we finance the purchase and sale of goods and services, as some responsible for the evils against which we are unsuccessfully contending. Perhaps machine production needs to be more effectively controlled, and our institutions, systems and methods further improved improvement is always necessary, and furthermore it is always taking place. Mankind is not slipping backward, but is constantly and steadily going forward. And if, temporarily, we have allowed things to get out of gear; if the machine is running wild, if our systems of government and of life are proving unequal to the strain we have put upon them, is the fault in the machine, or the system, or is the fault in the human factor which created the machine and established the systems and then failed to guide them aright?

Scrapping all the machines in the world today, over-throwing every existing form of government, every system in the financial or economic world, every man-made institution, and replacing them with something entirely new would not provide a solution for the difficulties in the world today and unless with the same characteristics, the same natures, the same prejudices and passions, the same greeds, in a word all the same human limitations which now hamper and control us, remain in control.

Our chancellors should be no more perfection as a result, in this world can be, but they are not; indeed, they are far from it. Nor because they are not founded upon the highest ideals, because they are, but because a church is just what the people who constitute that church make it. We boast of a democratic form of government, but it is full of weaknesses and admitted evils, not because the principles upon which democratic government is founded are weak and evil, but because our present-day democracy, that is, the people, themselves create the weaknesses and are responsible for the evils. Leaders of political parties are blamed for many things against which they are constantly fighting but which are forced upon them and their parties by the rank and file of the people.

If all men were honest in their thinking and in their dealings with one another; if in their desire to prosper they also controlled their greed; if in demanding recognition of their own rights and opinions and beliefs, they were always ready and willing to accord a like recognition to those who hold contrary views; if, in a word, the human factor was stronger, better and a little nearer perfection, there would be less cause to condemn machines, systems and institutions. More than anything else in the world today, it is man who is at fault, and the fault extends all the way from the man whom the world regards as being at the top to the man who is at the very bottom.

We are told that the law of the jungle prevails; that it is still a case of the survival of the fittest. It is largely true, and why is it true? Because it is, after all, Nature's law. All Nature proves it, from the tiniest insect or plant to the largest. Nature's law rules supreme in the animal, vegetable and mineral world. It manifests itself among the fishes in the sea, the birds in the air, the vegetation in the fields and forests. It influences all mankind, but, given a brain and reasoning powers, man has constantly risen above his beasts. He has not attained perfection; far from it. Nor can he attain it by act of Parliament, or through any given system, but only by the steady upward climb, higher and ever higher above the lower animal world.

God and Nature alone are perfect, and man can come drew closer to that perfection by subordinating the evil and the gross in his nature to that which is good and beneficient. What the world stands in need of today is a greater knowledge of the human factor. That accomplished, many our other ills discovered and highly destined betterments will quickly follow.

Emergency never made a contented passenger on the 'as a trip from Regina to Winnipeg.

London now has 20 automatic telephone exchanges, covering 830,000 lines.

Automobile transport has increased the efficiency in Egypt-Egyptians declare that it is outrunning expansion of roads, machines being able to traverse almost any section of the country in dry weather.

Hundred Mile Canal

Second Big Power When English Lady Was Cheated By Watchmaker

An English lady bought a lovely watch in Rome, and paid 1200 for it. Proud of her buy, she took it to a London shop to have it appraised before insuring it. The watcher told her the watch might be worth a pound, but no great bargain at that.

Enraged, the English lady could think of only one thing to do. She sat down and wrote direct to Mussolini, telling of the deceit in and asking history that she hadn't think ridding such a people was anything to brag about. In a couple of weeks back came a letter from Il Duce apologizing for the incident and saying that the lady didn't really judge all his countrymen by the one bad example she met, and enclosing a bank check for the amount 1 453

A couple of weeks later the lady got another letter from him but it wasn't from Mussolini It was from the bigger who had sold her the watch. The government he said, had closed the shop, fined him, and was about to inspect him to jail to do a six months stretch for having cheated a foreigner.

The lady, very much awed, decided she wouldn't. Fr m Fortune

TO SEE HER FAT GO

Cost This Woman 75c.

If you are curious—you know what is necessary to lose weight—study the measurements, read her letter

"I was 164 lbs. when I started taking Kruschen three months ago, and now 142 lbs., and I hope to reduce to 9 st. 7 lbs. which was my weight before my measurements before taking Kruschen. I was 41-ins. bust 36 ins. waist, and 49-ins. hips, and now I am 39-ins. bust, 30 ins. waist, and 45-ins. hips, my age being 39 years A Fife, both of Kruschen lasts me a month. I take one half-teaspoonful in a tumbler of hot water each morning before breakfast. Apart from losing weight, I feel so much better in health. I do not wake up in the morning still feeling tired, and do not get headaches like I used to. I cannot thank Kruschen enough."—Mrs. M. A. H.

Kruschen contains those six mineral salts, proportionately balanced, found in the waters of three famous European Spas used by generations of fat people to reduce weight.

Kruschen helps blood, nerves, glands, and body organs to function their best, you gain new strength and energy—feel years younger—look better, work better.

New Camera Perfected

Device Checks Mistaken Of Witnesses In Street Accidents

An "evidence camera" to assist courts reconstruct serious automobile accidents and check on witnesses' testimony was demonstrated before the International Association for Identification, meeting here in convention of Andrew Kavenaugh, chief of police at Rochester, N.Y., who perfected it in co-operation with camera experts.

The device consists of the camera set up over a miniature diagram of streets, complete with signal lights, post and other pertinent features. Witnesses questioned immediately after an accident are required to place miniature cars on the map in the programmed streets in positions applying at the time of the accident and the layout is photographed and ryled for presentation in the event the witness deviates from his original story in court.

A One Tree Orchard

Grower Now Plans Fly Grafting To Grow Variety Of Fruits

F. E. Jorden needs only one tree to make an orchard.

And on that one tree he'll grow everything from an apple to a rose.

On one tree a blight resisting pear tree he has grafted 99 apple, 16 pear and four quince varieties. One of his peach trees is bearing peaches, plums, prunes, apricots, plumcots and nectarines.

Payments for dog licenses in Simcoe, Ontario, may now be made by installments of four cents a week.

Gambling is in the National Museum in Washington. It is said to be the largest exhibit in the world.

Headaches and Dizzy Spells Nerves In Bad Condition

Mr. Reid Crawford, Hamilton, Ont., writes: "For years I was in such bad condition I found it almost impossible to get a good night's sleep. I was also bothered with headaches and dizzy spells.

I tried many different remedies, but they did not seem to give me much relief, but after I had taken Milburn's Heart and Nerve Pills I could hardly believe the change they had made in my condition."

Price 50c. at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Shipping Tied Up

Thousands Of British Seamen Are Paid Rarely More Than One Day Of Work

No industry more anxiously awaits some definite step toward the economic conference than the shipping industry, which, because of its dependence on the trade of London Under the present conditions, is the hardest hit of all industries. To this conference shipowners look to break the vicious circle of tariff barriers, unfair competition, subsidies on uneconomic passenger and selfish restrictive regulations which have combined to bring the proud seafaring men of this country perilously near to economic disaster.

In the estuaries and harbors of Britain today millions of pounds worth of shipping are tied up delerelating rapidly, and paying only such maintenance charges against owners with little hope of ever again putting to sea. Twenty per cent of all the world's shipping is idle the aggregate quite recently tied up mounting to 13,000,000 tons Thirty thousand seamen are walking the streets of the ports in search of jobs that are not there.

Behind the shipping crisis at the moment are paying no dividend on their ordinary shares, which means the impoverishment of hundreds of thousands of small investors all over the Empire

It is estimated that foreign nations for the past several years have been spending $150,000,000 yearly on subsidies to shipping. At the same time all sorts of restrictive tariffs have been passed against the natural operation of shipping and old regulations have been tightened up. Today, while every port in the British Isles and in the whole Empire is free to shipping of all nations, British ships are barred from the coastal trade of many countries.

If British shipping were subsidized on the same relative scale as their foreign competitors, it is stated that the British taxpayer would have to find more than $100,000,000 annually.

Meanwhile, British shipping fleets are forced to curtail expenses in every possible direction; thousands of unemployed seamen are out of work, the British shipyards, with a capacity output of 2,500,000 tons a year, at this time have only 130,000 in hand.

New Zealand Crop

Record Wheat Crop Is Forecast By Wheat Producers Board

A record wheat crop of more than 10,000,000 bushels which will include an exportable surplus of 2,200,000 bushels, is forecast by the New Zealand Purchase Board.

The local price to the growers is fixed at three shillings and four pence, f.o.b. (80 cents at par), with the possibility of further payments later from the compulsory wheat pool. The pool is designed to maintain the average value of wheat based on the New Zealand home consumption value at four shillings and five pence a bushel ($1.04 at par) and the probable export value of half a crown (60 cents at par).

Our Likes and Dislikes

Many People Do Not Know What They Really Enjoy

Half the evil of this world comes from people not knowing what they do like, not deliberately setting themselves to find out what they really enjoy. All people enjoy giving away money, for instance; they don't know that,—they rather think they like keeping it; and they do keep it under this false impression often to their great discomfort. Everybody likes to do good, but not one in a hundred finds the out. Meditation thinks they like to do evil; yet no man ever really enjoyed doing evil since God made the world.—John Ruskin.

World Will Right Itself

Lord Birkenhead In 1920 Thought Time Cannot Lead Forever

In days "All Wrong."

The above was the caption on a cartoon published some time ago in the streets of London Under the caption was printed the following list of predictions:

William Pitt There is scarcely anything around us but ruin and destruction.

Wilberforce early in the nineteenth century I dare not marry, the future is so dark and unsettled

Lord Grey in 1819 said he believed everything is tending to a convulsion such

The Duke of Wellington on the eve of his death in 1851, thanked God that he would be spared from seeing the consummation of ruin that is gathering about us."

Disraeli in 1849 "In industry, economy and agriculture, there is no hope."

Queen Adelaide said she "had only one desire, to play the part of Marie Antoinette with bravery in the revolution that was coming on England."

Lord Shaftesbury in 1840 "Nothing can save the British Empire from shipwreck"

The circular concluded

"We came through all right, and shall do so again."

In commenting on present conditions Sir Wilfred Grenfell says: "To adopt an attitude of defeatism is a negation of our heritage as a Viking race". The Christian World.

Wife "So you think my new ball gown looks like the dooce?"

Hub "In the cold sense, my dear, The dooce, you know, is the lowest possible cut."

Florence, Italy, probably contains more works of art than any other similar area.

Durable, rolled day and night comfortable. Liberty sent free to prove needed coverage. THE HYDE HERNIA APPLIANCE CO., Dept. W.N.U. 1 Toronto St., Toronto.

Half A Million Pounds Of Buffalo Meat Placed On The Canadian Market Last Fall

Thousands of head—a million pounds of buffalo meat was placed on the Canadian market during the autumn as a result of the slaughter of some 1,700 animals from the herd in Buffalo National Park at Wainwright, Alberta. The disposal of these members of Canada's great national herd was made necessary by the grazing limitations of the immense fenced reserve at Wainwright and the 1,700 slaughtered are the equivalent of the 1937 increase. This reduction brings the herd down to approximately 6,000.

The annual reduction of the herd at Wainwright, Alberta, which is administered by the Department of the Interior through the National Parks Bureau, calls to mind Canada's success in bringing back the buffalo. The herd at Wainwright developed from the Pablo herd purchased by the Dominion Government in 1907. A total of 716 animals were bought from the shrewd Montana half breed and 631 of these were established in Buffalo National Park while the remainder formed the nucleus for the present herd of over 1,000 in Elk Island National Park. The animals placed in Buffalo Park have increased rapidly during the twenty-five years since the establishment of the park. A total of 6,673 was shipped south to Wood River, Nebraska, and Fort Smith, Northwest Territories, including this year's number a total of 8,000 have been shipped south. The animals' heads, and hides disposed of, which together with the 6,000 still remaining in the park make a total of 21,-673 animals.

The practice followed in this year's disposal of the surplus animals at Wainwright was to make as far as possible several years of a reduction of the herd become necessary for its future well being. The entire herd was rounded up and the animals selected were separated and placed in special corrals approximately close to the slaughter. They included 800 over four years of age, 400 three year olds, 200 two year olds, and 50 aged bulls. Each animal weighed about 2,300 lbs. the week began, a certain number were slaughtered and the carcasses imported and placed in refrigerator cars for shipment to the larger centres of population throughout the Dominion. Vancouver, Edmonton, Calgary, Regina, Winnipeg, Toronto, Ottawa, and Montreal all receive allotments and thereby citizens in every part of the Dominion were given an opportunity to enjoy a real treat. Buffalo meat has all the juicy tenderness of the finest beef and is highly regarded as an article of food. Plenty of the carcasses from the slaughter including the fifty aged bulls were set aside to be dried and later distributed among the Indians to relieve cases of distress.

The buffalo heads are mounted for sale, while the skins are made up into robes and rugs, and coats for both ladies and gentlemen. By careful treatment the weight of the coats has been reduced so that they compare favourably with other skins in this respect. For warmth, durability and appearance they rank with the best from other Canadian fur-bearers.

Safety For Horses

Rubber Pads On Shoes Prevent Slipping On Greasy Streets

Successful experiments have been carried out by a rubber company to test the practicability of rubber heels and soles and shoes for horses.

The majority of accidents to draught horses arise from slipping on the wet and greasy surfaces of modern streets, and it has been found that the anti-slip iron made used as a protection on icy surfaces accentuates rather than decreases the danger.

The rubber pads are constructed on metal cups which can be replaced without removing the shoe from the hoof, and the rubber acts as an absorber of the shock of the constant pounding on paved streets.

One of 25 per cent. of the automobiles purchased are bought for cash, according to a survey.

Construction Started On French Battleship

Challenge To Italy and Germany Re news Naval Race

The 10-year holiday in capital ship construction declared by Great Britain laid down by Rodney and the Nelson came to an end without ceremony December 31, when the French Ministry of Marine announced work had started on the new 26,500-ton super cruiser "Dunkerque."

The new cruiser is the French reply to Germany's construction of "pocket battle-ships." It also was understood at Paris that the Italian Government was hastening completion of plans for a super cruiser of even greater size which will have a tonnage of at least 27,500 and will be capable of speeding 33 knots.

The "Dunkerque will require four years for building and will cost $24,000,000.

Establishment of a memorial to Canadian and American soldiers who died in the war, in the form of an international forest of 10,000,000 acres, is being considered by conservationists of the two countries.

Inspector Gilbert Smith, Ottawa, and Inspector E. R. Jackson, of the Dominion postmasterships branch, are being retired on recognization of the branch, it was learned in official circles.

The agreement arrived at during the Imperial Economic Conference between the United Kingdom and Canada which will modify the restrictions on the importation of Canadian cattle came into operation on January 17.

A case of leprosy, the second within a year, has been discovered in Toronto. The man is in isolation hospital and will probably be taken to the leprosy colony in New Brunswick. He is a former resident of Rio de Janeiro, where it is believed he contracted the dread malady.

Realization Of Hopes

Depends On Making Most Use Of Present Opportunities

The story is told of Alexander the Great, that, when he was leaving Macedonia, he made so many lavish presents to his friends that one of them asked him, "But what are you leaving yourself?" The reply was, "My hopes."

So full was the mind of the religious composer of the countries and nations that he brought under his sway and the treasures yet to be gathered into his sleeve, that all the riches already won were as nothing to comparison.

Men's greatest assets are their hopes. This is true especially of those who stand at the beginning of life and look eagerly forward to the good things which the coming years may bring. But it is well to remember that the realization of our hopes for the future depends on our making the best use of the opportunities of the present. Hopes are assets of the utmost value, but they will become "frozen assets" unless we do our part to give them life.

Queen Mary Popular

Cites To Search Of British People Says Prince Of Wales

The Prince of Wales is quoted as saying that his mother, Queen Mary, is closer to the hearts and affections of the English people than any member of the royal family. As motherly soul, the queen is the quality of many things that attract favorable attention. There is the case of Arthur Yapp, for instance. He is one of the military readers in St. Mary's Mission, Vantag. He is just 17, and when the mission decided to hold a banner, he was delivered the task of writing to Queen Mary and asking if she were sentimental fair thought for expression of Arthur and others in the mission to receive a reply from the lady in-waiting to Her Royal Highness to that effect that the queen would be delighted to send some things. Later a parcel arrived with about a dozen autographed photographs, post cards, egg-cases, pictures and books. They were from the queen in response to the request. You may think that was a little thing for Queen Mary to do. Perhaps it was and spectacular, but it endeared her to the people of St. Vantag, and to all others who heard about it. As the Prince of Wales remarks, his mother is close to the hearts of the people.

In Great Demand

Composite, After Men Had Not For His Services

A man applied to a famous film producer for a super's job. Like so many other supers in Hollywood, he had had no work for weeks.

"Well," asked the producer, "I might be able to use you. See me in a month's time."

"If you want me at all," replied the actor, "you'd better put me on the pay-roll right now. There are a lot of other composites after me."

"Yes," answered the director, who had often heard that remark before. "And what composites are they?"

"Well," said the actor, "there's the light company, the gas company, the telephone company, and—"

The director laughed and the man was put on the salary list.

Photo By Flashlight

A new "black light" electric bulb by which a flashlight photo can be made in apparently complete darkness was described to the Illuminating Engineering Society of Boston, New York, by demand C. Ives, a lighting engineer.

SUNDAY SCHOOL LESSON
JANUARY 29
JESUS AND THE SABBATH

Golden Text: The Sabbath was made for man, and not man for the Sabbath: so that the Son of Man is Lord even of the Sabbath. Mark 2 27, 28.

Lesson: Mark 2 15 3. 6.
Devotional Reading: Daniel 6:10

Explanations and Comments.

I. Without Due Not Fasting, 2 15-22. The Pharisees were continually being angered by Jesus' refusal to be bound by the religious practices of this time. There was only one day of fasting during the year prescribed by the law, the great Day of Atonement, but the strict Jews at this time fasted on two days each week. Jesus paid no attention to these weekly rest days.

2. Defended For Breaking Their traditional Law, 2:23, 24. A still greater offense to the Pharisees was the refusal of Jesus to be bound by their numerous rules of the Sabbath day which they had perverted from a day of rest and gladness (one of burdensome restriction). They charged Jesus with allowing his followers to pluck and eat ears of corn as they passed through the fields on the Sabbath. (It was a custom of the Hebrews it was lawful to do this, for the law in Deuteronomy 23 25 reads: "When thou comest into the standing corn of thy neighbor, then thou mayest pluck the ears with thy hand; but thou shalt not move a sickle unto thy neighbor's standing grain. To do it at the harvest season, however, was declared unlawful, was reaping, and thus broke the fourth commandment, which forbade work on that day.

3. Justified That the Sabbath Was Made For Man, 2:25, 26. Jesus waived the point as to whether the disciples had broken the Sabbath. They did not admit that it was at least so unlawful for David to eat the shewbread and give it to his people to pluck corn on the Sabbath. The shewbread was the Priestly food of loaves made of fine flour which were placed every Sabbath on the golden table. They were place of the temple in David's time in the tabernacle and left there for a week.

"Bank and church and day are given For man, not God, for earth, not heaven."

4. The Lord of the Sabbath, 2:27, 28. Then Jesus made His great announcement the first part of which was that the Sabbath was made for man, and not made for the Sabbath. In other words, the day of rest is but a means to an end; the end is to be enjoyed upon man's need and advancement.

"The Sabbath is a means to an end; the end is man's enjoyment of the attainment by man of his true destiny. He who himself has received arrived at its end, has surely a right to say how the means may best be employed." J. M. E. Ross.

Queen Mary Popular

Cites To Search Of British People Says Prince Of Wales

The Prince of Wales is quoted as saying that his mother, Queen Mary, is closer to the hearts and affections of the English people than any member of the royal family. As motherly soul, the queen is the quality of many things that attract favorable attention. There is the case of Arthur Yapp, for instance. He is one of the military readers in St. Mary's Mission, Vantag. He is just 17, and when the mission decided to hold a banner, he was delivered the task of writing to Queen Mary and asking if she were sentimental fair thought for expression of Arthur and others in the mission to receive a reply from the lady-in-waiting to Her Royal Highness to that effect that the queen would be delighted to send some things. Later a parcel arrived with about a dozen autographed photographs, post cards, egg-cases, pictures and books. They were from the queen in response to the request. You may think that was a little thing for Queen Mary to do. Perhaps it was and spectacular, but it endeared her to the people of St. Vantag, and to all others who heard about it. As the Prince of Wales remarks, his mother is close to the hearts of the people.

Bad roads And Bad Cars

Are Responsible For Many Accidents

Bad roads and bad cars are responsible for many accidents, but the greatest cause of accidents is bad driving, according to Commissioner Thomas Duncan, of the Ontario Provincial Police.

Royal Bank Of Canada Presents Strong Statement

CASH ASSETS 164 MILLION DOLLARS

"Canada has maintained her credit unimpaired."

Sir Herbert Holt deals vigorously with railway and other national problems — Emphasizes need for Government Economy — Imperial Conference — Canadian Business Conditions — International Outlook.

Mr. M. W. Wilson reports on satisfactory year's operations—Central Bank Discussed—Measures needed for business recovery.

The Sixty-Fourth Annual Meeting of The Royal Bank of Canada marked the close of a very successful year. The Statement submitted showed the Bank to be in a very strong liquid position. Of the Total Assets of $760,512,930 the Liquid Assets amounted to as much as $35,-329,915, and were equal to 52.9Cr. of all Liabilities to the Public. An outstanding feature of the Statement was the large increase of Cash Assets, which reached a total of One Hundred and Sixty-Four Millions.

The Annual Meeting brought together a large number of shareholders, and was marked by interesting and instructive addresses by the Hon. Herbert Holt, the President, and Morris W. Wilson, Vice-President and General Manager.

Vigorous comment and suggestion regarding several of the outstanding domestic problems of Canada, and an able summary of the world economic situation and the prospects ahead; a strong plea for the amalgamation of the two Canadian railroads, as the only practicable means by which the present railway situation can be solved; intervention by the provincial governments to conserve Canada's natural resources, and to prevent the exploitation of the vitally important newsprint industry, if the present voluntary efforts being made by the co-operative concern are not successful, and a condemnation of extravagant and unnecessary expenditure, featured the address of the president.

Sir Herbert said in part:

"The period of prosperity which this country has shown during the third year of the depression is a matter for congratulation. With no financial assistance from other countries, other than a small amount of re-financing, which was necessary on a strictly business basis, with currency depreciation in terms of gold limited to a very moderate percentage, and with none of the restrictions on foreign exchange or international trade which have been found inevitable in so many cases, Canada has stood up to the letter of her contracts and maintained her credit unimpaired. In doing so she has followed the tradition of the Motherland, and has given as a whole a management on to say that the stability and soundness of the Canadian banking institutions have played an important part in the creation of this good record."

Business To Be Stimulated

In referring to the report of the Royal Commission on Trade Relations, Sir Herbert expressed the opinion that the solution is to be found in a co-operative movement between the two railroad systems which, if effected immediately, will not prove drastic enough to cut down in any adequate degree the annual deficits of the government railways, and expressed the conviction that the solution is to be complete amalgamation. He felt that a company were formed now and the united under proper safeguards unification would result in a co-ordinated transportation system adequate to the needs of the country, and conducted at a minimum of expense.

Government Economy

"For many years, Government expenditure has been on an extravagant scale. Extravagance is characterized the budgets of national provincial and municipal governments. Throughout the country there is a general demand that budgets be balanced and every effort made to lighten the heavy burden resting upon the people by reducing the unduly heavy taxation.

"There is a noteworthy duplication of Government in the country which tends to the excessive cost of administration. We cannot seriously consider whether this country can afford to maintain as separate units the Provincial Governments, together with the Federal Government, each with an elaborate organization. The whole people of the Great British Empire are represented by a single Parliament which in time to legislate, not only for all internal matters, but also for those which concern the Empire as a whole.

Reviewing the Imperial Conference at Ottawa, Sir Herbert said that the material achievements attained were a triumph for Mr. Bennett and his Government.

In concluding Sir Herbert said that Canada was fully capable of meeting any further tests which might be imposed but felt that present indications pointed to the initiation of a recovery in 1933 if a reasonable degree of international common sense and co-operation could be secured.

Gen. Manager's Address

Mr. M. W. Wilson, Vice President and General Manager, in referring to the position of the bank, said that an outstanding feature of the Statement was that Cash and cash balances totalled $164,630,915 or over 36% of public liabilities, total liquid assets being $235,329,915, or over 52.9% of public liabilities. He mentioned the favorable improvement in the market for government bonds which took place during the year and said, "Canada again proved its capacity to provide the funds required for her public needs. During the year the average yield on Dominion Government long term bonds declined from 5.20c. to 4.46c. This represents a distinct and very satisfactory improvement which in due course should be carried to the credit of local capital needs and to private enterprise and securities."

Pointing out that the banking system has adequately served the needs of the country, he said that a Central Bank could not perform any services not available under the present system, and would in any sense do away with the necessity of adequate security for banking accommodation, nor prevent banks to undertake long-term financing. Instead of short-term advances for reproductive purposes. He said that the question of central banking is one to be disposed of summarily, he said: "Canada is fortunate in that experience is called upon to deal with the matter, the Government will first have the project examined thoroughly by a body of experts, including several from other countries who have had experience in the practical working of a central bank. I confess to a feeling that I would rather see the financial machinery in a time like this."

Price Restoration.

"On previous occasions we have stressed the importance of restoring the world price structure to approximately 1926-29 levels. We marked last year that such action was essential if the present depression is to be liquidated in an orderly manner, pointing out that the task was largely one for governments and that co-operative effort was imperative. Unfortunately, prices have continued to fall until the end of 1932, and the rate of decline was greatest at that time has since been considerably checked for the year, as indicated by the United States Bureau of Labor Index will be, apparently, about 7 per cent. below comparable groups for 1931, and 27 per cent. in 1929. The fact that can be said of the rate of fall now appreciably less than the previous years.

"The vital necessity for increasing prices is now commonly recognized, but the difficulty of countering deflation increases as the depression continues. We must hope that the forthcoming World Economic Conference will find the way to constructive action in this respect.

"There is little inclination to indulge in prophecy as to the future. As Sir Herbert stated, there are indications of a gradual increase in stability throughout the world. This is particularly true in Europe, where conditions were surprisingly not favorable a year ago. In the United States, the financial crisis is apparently over, and a return of greater confidence is in evidence. Many problems of readjustment and reparation have to be met, both abroad and in Canada, but great progress toward recovery has been made, and the prospect for further improvement in the coming year is brighter than it was a year ago.

"I have full confidence in the character of our people and of our institutions, and without minimizing the importance of the problems that must be dealt with, I look to the future with increasing optimism."

Turkeys Bring In Dollar

Turkeys living in that national state rest in Iran.

U. F. A. DECIDE TO LINK WITH C.C. FEDERATION

Calgary, Alberta.—Three hundred delegates to the United Farmers of Alberta convention here swung Alberta's strongest political farm organization under the banner of the newly-formed Co-Operative Commonwealth Federation.

After listening to speeches for an hour, including an encounter with a woman not a member of the U.F.A. who sought to oppose principles of the C.C.F., the delegates by an almost unanimous show of hands endorsed affiliation previously taken by executive members at the birth of the C.C.F. here last August.

The voting strength which the U.F.A. will bring into the Dominion-wide co-operative commonwealth is doubtful, but leaders of both organizations were confident Alberta would send strong representation into the Federal House after the next election.

The United Farmers of Alberta is represented in the House of Commons by seven members, with Robert Gardiner, its president, leader of the Progressive group in parliament. It is the party behind the Alberta administration of Premier J. E. Brownlee, and in a legislature of 63 members has 27 seats.

Voting of official affiliation by the convention marked the open union of the U.F.A. with the organization which its leaders helped greatly to create. Its part in the C.C.F. came through both of the U.F.A. to create a working agreement with other co-operative and labor organizations of the Dominion.

Each of the three prairie provinces-wide agrarian organizations is now affiliated with the C.C.F., United Farmers of Manitoba and United Farmers of Canada, Saskatchewan section, having previously voted for membership in the C.C.F. Labor groups similarly in alliance on much the same terms as Alberta.

United Farmers of Ontario because affiliated last December at the annual convention of the organization at Toronto and numerous labor bodies in both east and west have joined the C.C.F.

The declaration of affiliation read:

"Therefore, be it resolved, that this convention directs the central board of our association to affiliate with the Co-operative Commonwealth Federation, it being understood that in affiliating we retain at all times our identity and our autonomy as an economic group, in accordance with the declaration of principles adopted by the association in annual convention."

Uniform Companies Act

Measure To Be Designed For The Protection Of the Public

Ottawa, Ont. The death knell for "evasive" companies was sounded at the Dominion-provincial conference. With marked unanimity, the delegates agreed that steps be taken to prepare a uniform Companies Act for the province and the Dominion.

The action is supported by a resolution of the Canadian Bar Association, passed in Calgary last September.

Designed for the protection of the public, the uniformity will correct an abusive situation developed over many years. The complexities have been many.

Incorporation applications have been made to the Dominion and refused. Many have turned to the provinces later, with their varying provincial company laws. In a number of instances they secured provincial charters. Through the license by provisions of some of the provinces, these concerns then extended their operations.

Women Thieves Denied

Chicago. Two women burglars who tortured their housewife victim by burning the soles of her feet with lighted matches until she revealed the hiding place of her money -$10 were reported to police. The victim was Mrs. Rose Schmaizer, 32. The attack was made while her husband was at work in a bakery.

Sino-Japanese Problem

League Of Nations Working Hard Effort Towards Reconciliation

Geneva, Switzerland. League of Nations unwearily hunters in quest for a final effort at conciliation of the Sino-Japanese conflict was the only real hope that Tokio would accept the league's scheme for settling the dispute.

The Japanese delegation was very busy exchanging communications with the home government regarding the Geneva situation.

Yosuke Matsuoka Japan's chief representative, reiterated that his government would insist that the assembly refrain from denouncing the establishment of the government of Manchukuo in Manchuria and from condemning Japanese policy in Manchuria since September, 1931, as unwarranted aggression.

There appeared little hope that the League quarters in accept the Japanese position on outstanding issues. Unless something unexpected develops, officials believe the assembly's committee of nineteen will advance to paragraph four, article 15, of the League covenant and will make a report on the situation regarded as largely unacceptable. Paragraph four provides for such a report with recommendations for League action.

Cabinet Crisis Threatened

New Zealand Minister Of Finance Has Resigned Office

Wellington, New Zealand. Hon. W. Downie Stewart, Minister of Finance, has resigned his office, and a cabinet crisis is threatened.

Difference of opinion with the remainder of the cabinet on the question of exchange rates and the establishment of a central bank to which he have brought about Mr. Stewart's resignation, and it is considered possible other members might follow his example.

There has been some hope that Mr. Stewart could be persuaded to continue in office, but he remains adamant in his decision. While it is possible city members of the cabinet will support the Premier, there is a general belief the government, headed by Rt. Hon. G. M. Forbes, will be able to carry on.

Building Permits

Mimico Alone Registers An Increase In Construction

Ottawa, Ont.—Building permits issued in December last showed a decrease of more than $1,000,000 in value, according to a report issued this month, and more than $6,000,000 as against the corresponding month of 1931, according to a report issued by the Dominion Bureau of Statistics.

In December, 1932, construction work was valued at $1,480,721, against $2,506,000 in November, and compares with $7,886,100 in December, 1931.

As compared with the preceding month, construction value registered an increase in the value of the authorized building, showing a gain of $1,000,000 or 67.7 per cent. Decreases are indicated in the remaining provinces.

Want Thanksgiving Later

Toronto, Ont.—Claiming the recent change in the date of Thanksgiving day from November 30 to October 31 Canadian poultry trade as farmers find it impossible to get their turkeys late 31 ready for October, the Canadian Produce Association here adopted a resolution asking the government to revert to the November date for Thanksgiving.

Annual Race On

New York.—The annual race of Australian windjammers carrying cargoes of wheat to the British Isles is on. A special cable to The New York Times from Adelaide, South Australia, says the first of the wheat race ships left January 16. Both are expected to take about 100 days for the voyage.

Irish Start Boycott

Dublin, Irish Free State.—A boycott campaign against British goods entered fresh phases in Dublin when bands of young men entered public houses, lodged open containers and assaulted bottles of British goods and Advertising signs were wrecked.

Aid To Humanity

Newspaper Publisher Says Machinery Is a Benefactor

Vancouver, B.C. Machinery and the engineers who design it are humanity benefactors. Those who decide this should look at Asia and India and see the work still done with human backs and hands, said Robert Cromie, published of the Vancouver Sun, addressing a largely attended meeting in Hotel Georgia under auspices of the engineering bureau of Vancouver Board of Trade.

Taking as his subject "Machinery from the viewpoint of an editor," Mr. Cromie at the outset described technocracy as "the publicity side of technology," and held that the widespread discussion it has evoked will prove of great value because it will stimulate broader study of the relation of technological development to the future of the human race.

Endorse Calgary's Stand

Refused To Pay Advance Exchange Suggested By U.F.A.

Calgary, Alberta. The United Farmers of Alberta Convention adopted a resolution endorsing the stand of the city of Calgary in refusing to pay advance exchange charges in meeting debt obligations.

Introduced after being adopted by the board of directors, the resolution declared the Dominion Government had "defaulted" in failing to supply Calgary with gold at par to make the payments. It formed the ceiling for advance payment a "racket" and declared the city was justified in meeting its obligations in Canadian funds only.

Deaths Arouse Suspicion

Three In Ontario Township Are To Be Investigated

Toronto, Ont.— A series of three deaths of residents of York township and East York in a period of over three years have aroused sufficient suspicion to be followed now by investigations under the direction of the attorney-general's department, and the York township police," the Toronto Telegram says.

Police investigations so will probably result in the exhumation of the body of one of the deceased with a view to holding a post-mortem to determine whether poisoning was the cause of all three deaths.

The deceased persons whose deaths have aroused suspicion among their relatives and friends are: Mr Bryans, Hunt Vork Mrs. Stainburn, York township aged 90 at her death, and her daughter Miss Ruth Stainburn, aged 52 at her death," the newspaper says.

Barely a Ruse

Russian Rival For Canadian Wheat May Never Develop

New York. Despite claims to the Amtorg Trading Corp., Soviet Russian commercial representative in the United States, said negotiations regarding the sale of 20,000,000 bushel wheat deal with Canada were in merely "conversational" stage.

No contract, it was said, had been closed, and it was indicated some time might elapse before such a transaction might take tangible form, if ever.

Hope Round Up Radicals

Arrests Involved Many Girls Belonging To Wealthy Families

Tokyo, Japan. Removing a publication ban, Japanese authorities announced the details of a country-wide round-up of 2,000 radicals. The arrests occurred late in October, following discovery of widespread Communist activities aiming at eventual overthrow of the existing social system.

It also was announced that 7,000 radicals in all were arrested in Tokyo during last year, most of them college students, and more than half girls. Those included girls, many of whom belonged to wealthy families.

To Rewind Treaty

Rome, Italy. Dissatisfied because Italian purchases in Russia have been exceeding Russian purchases in Italy, the Italian government will renounce the 1924 commercial treaty with the Soviet within the next three months.

CANADIAN PROFESSOR HONORED BY FORMER STUDENTS

Above is a reproduction of a portrait of Professor A. H. Young, which has been presented to Trinity College, University of Toronto, by former students, in honor of Dr. Young's forty years' service given to Trinity. Professor Young enjoys a wide reputation for his writings on historical subjects, and he was recently elected President of the Ontario Historical Society. The painting shows the famous historian in his robes as a Doctor of Laws of King's College, Halifax, and it was executed by Evan Macdonald of Guelph, Ontario.

AMALGAMATION OF RAILWAYS IS TO BE BIG ISSUE

Ottawa, Ont. While the immediate reaction to the Beatty railway merger speech at Toronto has been born as favorable as opponents of the policy decried, it is clearly recognized here that the question of government will precipitate a bitter struggle.

Mr Beatty's speech received ardent support in some eastern newspapers within a few hours of its delivery, but it is now apparent there are grave doubts that the amalgamation idea can succeed and there is a distinct tendency to support the Duff report legislation in preference to the Beatty plan.

For one thing the government is believed to be unscrupulous to any line of action with respect to railways. Many would favor the amalgamat. no doubt, favor the Beatty plan But even Mr Beatty while he favors a merger, does not favor the kind of merger he has in mind His speech, by inference, favors the Bloomingsney plan of 1921, which was that the Dominion should buy out the C.P.R and turn all the railways over to the Canadian Pacific directorate under contract to administer and operate. If the government, as such, has any preference, it is believed this preference is for the Duff solution as set out in the Montreal Star before the senate railway committee

The Montreal Star, which recently discussed the transportation problem under the caption: "The Railway Monster," comments, directly on Mr Beatty s speech. The Star more or less reserves judgment but points out several weaknesses in Mr. Beatty's argument. It also dismisses as not substantial most of Mr Beatty's arguments of the Duff report. The Star believes the merger means has now been past and concludes its editorial comment by stating that the public may safely leave the final decision to Premier Bennett.

The Montreal Star is believed, would scarcely raise such an issue unless he had the unanimous support of his colleagues and the support of his friends and advisors It is thought he would not do so unless he believed there is an excellent chance of success Coupling his speech with that of Sir Herbert Holt and other business magnates, it is presumed that exceedingly powerful interests are behind the drive for a railway merger.

The reaction among supporters of public ownership is to prepare for the battle. Hon. W. G. Martin, the Liberal minister and the Movement of their advocates in the Commons, assailed the Beatty plan in a speech broadcast at Ottawa recently. At Ottawa there is any amount of informal discussion going on but an unwillingness to talk for publication.

Proved Himself a Hero

Captured Pugilist's Brought Help To Companions In Plane Crash

Prince Albert, Sask — Hero of the plane crash at Moose Lake which claimed the life of Pilot W. A. "Bill" Spence, Bissett Superintendent of Nerona River, will be brought to Saskatoon, through Prince Albert, as a captured fugitive wanted by the province of Saskatchewan. Constable C. P. Montsmmebert of this R.C.M.P. district, ascertained this in a 'phone call to The Pas.

Whitaway, thrown from the cabin through the roof in the fatal crash, was the first to regain consciousness and he brought to help other survivors. He is at present in hospital recovering from a fracture.l ankle which did not prevent him from struggling through the storm to bring aid to his companions in the crash, one of whom was Constable P. Greaves, of the R.C.M.P. who had also under arrest.

Many Book Worms

Montreal, Que. Peaceful and honest, having no revolutionary ideas but wanting work and a living, was the description given by their spokesman to a group of 2,000 men who assembled at the city hall to seek interviews with the civic administration. A reply was promised.

Grain Through Canadian Ports

Said That Route Is Considerable Saving in Using All-Canadian Routes

The growing tendency to ship Canadian grain through Canadian ports is emphasized in reviews issued by the Dominion Bureau of Statistics. During the month of December Canadian exported 37,720,889 bushels of wheat of which 17,206,177 went to the United Kingdom and of these exports to the United Kingdom the amount via United States ports was only 1,- 213,316 bushels, the balance going via Canadian ocean ports. The shipments to all other countries went entirely by Canadian ports.

This is a marked change from a year ago when 6,695,026 bushels went to Great Britain in December through U.S. ports and 3,573,989 bushels through Canadian ports. The bureau of statistics of course draws no conclusions as to the cause of this re-

Representatives of United States grain exporters are protesting to Washington that the change is due to the Imperial preference on wheat and the uncertainty under what conditions wheat shipped from Canada through U.S. to Britain would get this aid it could be pooled advantage.

Ottawa officials are inclined to agree that the uncertainty as to the preference is one cause for the change. Canadian exporters know they will get the preference on wheat entering the U.K. markets if the grain is shipped through Canadian ocean ports, and are very uncertain of such an advantage if the wheat is routed through the ports of the United States.

However the contention is that it is not only more sure to ship through Canadian ports (and it keeps the money in Canada), but that it is cheaper. Pre-gist rates are competitive as are also elevator charges, and accordingly it is stated it costs as much in U.S. money to ship to United States ports as it does in Canadian money to ship to Canadian ports. With the Canadian money at a 15 per cent. discount in New York, it is said that the saving is considerable when Canadian ports are used.

The fact that all the grain shipped in December from Canada to overseas countries other than Britain, and therefore not affected by the preference, went through Canadian ports indicates that the preference is not entirely responsible for the swing.

The heavy shipments of Canadian wheat to Great Britain during the present crop year which began on August 1 last is shown in the reports. December's totals to the U.K. were 37 per cent. down from in December, 1931. During the five months ending December the amount to Great Britain was 58,666,668 bushels, a 67 per cent. increase over the same period a year ago.

Has Its Jubilation

Illness Tendency in the Head Soldier Of Chancellor

Sky crime is frequently ascribed to the effect of the criminal stories of the movies and the radio. In our day it was the dime novel that was supposed to be lad's undoing. Boy, go, lead to read a dime novel, of course, and no boy has to attend the movies or listen to the radio, and no parent has to permit him to do any of these things if it is supposed to be bad for him We have an old-fashioned idea that the parent has a right to do with the boy's troubles being then that either good-by gets credit for, and you will probably be credited for stealing it, but here it is:

There is no substitute for home training. Home training has hanged here left to the schools and other agencies. The schools can not do it all, and in so far as the social agencies are needed they relieve the home of its duty. That is not the best road to the building of character in the child, and it may account for a good deal of present unrest and crime. I have definitely agree with us!—British Saturday Night.

Taking Coals To Newcastle

Young Telephone Engineer Proved He Knew His Job

This is the story of the "Man Who Did His Job"—and how!

The other day, the London engineer responsible for a Sussex telephone area was not fast that one of the instruments under his control was "out of order."

To the house he sent a young and ambitious engineer, with orders to show how things should be done.

With great speed, the repair was made. Then the young man remembered that he ought to get an order for a new telephone facility—if he could.

He opened his bag, and from it produced a "hand-microphone" instrument.

"Sir," he said, "this is the sort of instrument I can send. The other costs out of date."

The master of the house listened. He replied:

"Of course, sir, you've every reason

"But I am quite content with the instrument I have," he said.

"Sir," said the engineer, "though I say it as shouldn't, perhaps—I believe that my is the world. Still—there's no difference—"

The master of the house began to waver. Perhaps he would think about it, he said.

"Thank you," said the present, sir!" urged the engineer.

His victim fell.

"Very good, sir!" he murmured, and handed the engineer his card.

It read:

"Sir Kingsley Wood.

"His Majesty's Postmaster-General."

The post office has charge of the British telephone system.

Recipe For Long Life

"Stay Single" Says Oldest Woman In South Africa.

To live long, don't marry. This is the advice of Mrs. Sarah Elizabeth Visser, the oldest woman in South America, who has reached the age of 135. At her home in Cradock, Cape she said, she attributed her great age to celibacy. "I should never have lived so long if I had had a husband," she adds in heartbeat in the cemetery of the old Spanish Colonial Church. She still takes in washing, the work she began as a girl when the Cradock district was the Spanish for fine produce.

Lost English Village

Thirty Have Disappeared Into Sea During Last 150 Years

During the centuries miles of British have disappeared into the sea. A strip half a mile wide has been taken all the coast of Yorkshire in the last 150 years, and at least thirty villages have been submerged.

Lower down the coast, at Dunwich, a whole medieval city has disappeared, and yearly services are still held at the sea's edge in memory of the cathedral and eight churches which are now below the waves.

Not far away, at Pakefield, it is possible at low tide to swim over and touch stouts of ruined and submerged houses.—London Sunday Pictorial.

Actor Leaving London

Sir Henry Lytton, who has appeared in Gilbert and Sullivan opera for nearly 50 years, made his last bow to London audiences at the close of the season at the Savoy, January 23. However, he is not thinking of retiring although he is 66, for he has booked a provincial tour which will extend well into 1933.

Snow gentles reach a height of 17 feet.

There are about 3,125 species of trees in the United States.

A New Phone Service

Company Takes Calls When Party Not At Home

"Sorry, no reply," will no longer be heard over the telephone in London when the scheme to establish a home for London's "lost" telephone calls is in operation. Under licenses by the postmaster-general, a newly-formed company is preparing to give telephone subscribers a service which is intended to avoid the irritation and the loss of time and money resulting from unanswered telephone calls.

By this scheme a subscriber of the service will be able to leave his office or his home deserted, with the certainty that he will receive all telephone messages that have matured during his absence. No longer will the bell ring vainly in the empty house or office until the caller's patience is exhausted, but, instead, he will ring up the exchange in Grosvenor Place and leave his message. On his return the subscriber telephones the exchange and receives all messages that have accumulated for him. It is believed that the service will be especially useful to the "one-man" business.

Smeltering in 1200 times as sweet as sugar.

London's latest dance is the Charleston.

The Pleasure Of Skating

Proper Surfaces Provide Great Sport For Young Canada

The average Canadian father keeping the affairs of his family in view, cannot escape expenditure on food and clothing, nor if he is an average Canadian family can he avoid a certain expenditure on winter sport equipment. Rarely has he ceased buying baby shoes than he is called on to provide heavy accessories for young Canada early reaches and capitalizes the advantages of the health giving winter months. In rural sections the ponds and streams which were the scene of summer adventure change to sports of winter pleasure. A frosty night or two reduces any surface with a glassy sheet, and eager feet summoning of strength, unfortunately not always warranted, the young skater can glide over the enjoyments on which they splash on summer days. Short is the season of skating on the natural sheets for more usually comes early to put a stop to it, though thaws occasionally restore the ice sheet and revive the glory of skating out-of-doors.

No less eager are the youngsters in towns and cities where man-made rinks open and covered, provide an artificial ice-field of more protracted use. The moonlight, and torches lend illumination like Ice Sheets in the country here give way to electricity, and from dawn to far into the night the rinks are crowded with humanity on pleasure bent. Young middle-aged and old are there as elder glide by on the blades of steel. Happy faces and glowing cheeks mark the enjoyment of the passing hours that is the heritage of the skaters, for skating is a social and healthy exercise.

As with most exercises the element of competition enters into the full enjoyment of skating The swift and exciting hockey games are one of its byways. The colourful carnivals where one may see the gay masqueraders dressed in the lovely habiliments of an organ grinder or the resplendent mail of the Crusader is another Spool on skates is the goal of many, and to them the height of glory is represented by the plaudits of the spectators gathered round the judges' stand at the closing event of other centres as speeding blades flash to a new world record.

The annual fancy skating events staged in a number of Canadian cities are sometimes spectacular affairs. They will display the grace and dexterity of the skaters in executing the intricate figures and manoeuvres in competitive progression. Rythmic motion of waltz and four-trot on be developed from the elementary threes and eights practiced so assiduously by the beginners. To the spectator who have only indulged in the straight away style of skating these competitions are a revelation of an art and science in the acquiring of which there is a certain satisfaction added to healthful exercise. All Canadian winter sports have their adherents but none are more enthusiastic in advocacy of their favourite pastime than the skaters.

Does Not Happen Often

Remarkable Record Concerning Birthdays Is Recalled By Ottawa Man

Only four times in the history of the United States have there been periods in which there were no living ex-Presidents.

The first was between the death of Washington in December, 1799, and the inauguration of Thomas Jefferson in 1801.

The second occurred during General Grant's term as President, when the death of Andrew Johnson in May, 1875, left the nation without a living ex-President until Grant was succeeded in 1877 by President Hayes.

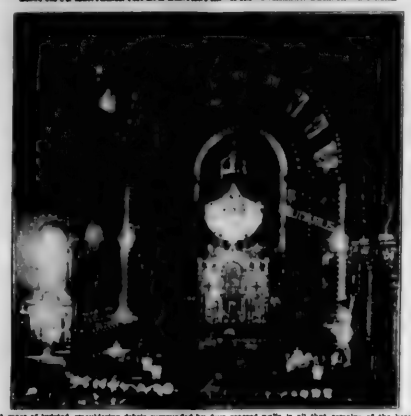
The third period in which there was no living ex-President occurred in June, 1946, when Grover Cleveland died.

The death of Calvin Coolidge created the condition for the fourth time.

Friend—Whatever became of that cheeky and ugly little thing you used to run around with?"

Jerry—"She's the big, fat and beauty thing I'm married to now."

A welsh miss and a half inches in



A mass of twisted, smouldering debris surrounded by four scarred walls in all that remains of the beautiful Church of St. Louis de Fonnes, one of the finest Roman Catholic Churches in Montreal. Our picture shows a view of the interior of the church, which was gutted in a spectacular fire which caused damage of more than $450,000, and for a time threatened to enfold a huge section of Montreal in a general outbreak. Flying embers set fire to 12 homes and the roofs of thirty automobiles before firemen controlled the conflagration. The arson squad are investigating possible incendiarism.

CHAPTER IV Continued

Halfway there, disaster overwhelmed them, sudden and stunning.

It came from the air, in the shape of a pair of red-throated loons, flapping heavily out of the west, the birds dropped with a loud splash not ten feet away from the two men.

At the splash Alan heard a muffled oath over in the flags; then a rustling movement, as though the bandit's head nervously jumped to their game; then silence. And then a voice from the twilight among the reeds:

"Nothin.' Just a pair of divers plumped down."

The alarm would have blown over if the loons had swum off. But the birds, crop-heavy and indolent, stayed where they were, showing no intention of moving away. As the female started preening herself, the male turned its eye suspiciously at the two strange objects sticking above the water.

What startled it Alan never knew. Bill did not move; he himself did not bat an eyelash. But in that jumpy last silence the male suddenly threw open its beak and sent a raucous maniacal shriek, as though some animal had seized it by the neck.

Instantly its mate joined in. The jarring, ear-splitting discord set resolute diving off their heads and flushed every waterfowl in the lake a hundred yards distant. With a last frantic peal the loons taxied over the water, finally managed to take wing, and flapped heavily away.

But the damage had been done beyond retrieve. All that hour and a half of careful stalking, all the great caution and pains of slipping unaware upon the bandits, had been set at naught by the crazy shriek of a crazy loon.

Over in the murky twilight of the flags there was a commotion, sharp orders, the click of rifle bolts. At the edge of the flags a gun cra-ac-clack, a rope of flame reached out, a bullet ricocheted off the water.

It was a shrewd manoeuvrer from the bandits, a tentative shot to draw the fire of their stalkers and discover where they were. Alan was quick-witted enough to see their motive and to be low; but Bill jerked his rifle against his cheek and shot point-blank at the spurt of fire.

When Your Daughter Comes to Womanhood

Give Her Lydia E. Pinkham's Vegetable Compound

Most girls in their teens need a tonic and sometimes Lydia E. Pinkham's Vegetable Compound for the period of adolescence. For here is ground her health at this critical time. When she is happy, healthy and rosy and mother she will thank you.

W. N. U. 2020

A cry of pain went up. His bullet had scored. But the shot gave away their hiding. With all hope gone now of getting the drop, Alan scrambled back some of a municipal house, thirty dragging Bill after him.

Half a dozen rifles exploded in the flags. Alan fired his rifle over the top of the house and emptied it at the flashes. A howl from a savage, a sharp-cracking deadly Savage, but his weapon smashed the mechanism. Immediately the bandit sent down a second fiery tide of steel into his fingers.

For several minutes the bullets of the bandits beat a thudding tattoo against the sand mound. Between they could Alan and Bill lifted their ball guns over the top of their shelter, and fired back. They heard no more yells, only curses, intensely realizing that, believing the bandits had crept into the run and were sheltered by its banks, Alan stopped shooting and listened.

Sooner or the sound has been fired away raggedly. A minute Bill minute lengthened into two, three. Four Alan heard, or thought he heard a faint rustling, a faint grunting of water He listened intently but did not hear it again.

With his plans all shattered, with the twilight steadily deepening, he was torn with desperation. If he and Bill moved, it was sheer suicide. If they crouched much longer where they were, the bandits would certainly slip away from them in the coming dark

As he fought to think of a plan Alan heard break into deadlock. He heard a long whistle, a clear shrill whistle from Larry's direction. It was Larry signalling.

He sprang up. "Bill! They've backed away, they've slipped us, they're breaking for the lake! Larry's alone. We've got to help Larry!"

They splashed out of the pond and into the flags, in a frantic effort to reach the lake edge. The marsh reeds clutched at their triggers, tripped, tangled around their legs. Savagely they tore their way through to get into the clear in time to help Larry stop those men.

As he swung his clubbed rifle, smashing a pathway in front of him, Alan heard a long gun crash-and-bang on the lake, and heard the smart of half a dozen repeating weapons answering it like an echo. They drowned, they overwhelmed it. . . . The loon gun did not speak again.

It seemed hours to him that he fought and tore through the dense flags, to reach the open and help a comrade who was standing up against six foes. Before he broke through to the clear, the combat had ended. As he burst out to the lake edge, he had a glimpse of the police canoe drifting helplessly out in the lake, with no one aboard but Larry, he saw two long blurred objects just entering the deep water channel.

Plunging and dashed at them six men escaping, there was a moment when Alan could only realize that his patrol had failed. That those criminals had vanished into the twilight and were lost in this watery wilderness, with pursuit utterly hopeless now.

In the next moment he heard a sound, a moan like a groaning voice calling his name. It drew his eyes to the drifting police craft. What was it doing out there? Like a flash he understood what Larry had done. When the bandits started across the lake to escape, Larry must have seen he could never stop them in the semi-darkness except at point-blank range. In the police canoe he must have seen something cut at them, and This first deadly volley had got him. That groaning voice was Larry's.

Bill came bursting through to the clear, who whirled on him:

"Bill! They got Larry. He's wounded. Hard hit. Here . . . Coming Bill his bewilder and broken ride, he ran out into breast-deep water and struck out powerfully for the drifting canoe.

By a providential mercy he reached it in time. With half a dozen holes spouting water into it, the craft was filling, about to overturn.

Larry lay at the bottom of it, writhing in pain.

By heroic struggles, swimming, pushing, a deadweight ahead of him, Alan got the craft into shoal water, put his head under its boat then, and kept it afloat.

He dragged it to the bank just as Bill came splashing through the lake edge to join him.

Alan! What happened? Where'd they go?"

They got away. They're gone—gone Forget it. Help me, Bill with Larry—"

Together they beat over their bleeding, stricken comrade, and together they lifted him tenderly across.

CHAPTER V.

The Broken Sword

By the light of an electric torch Alan cut away Larry's clothing and examined his wounds. Larry had been shot twice, and both wounds were dangerous. One bullet, a ricocheting slug had struck him squarely in the knee, cruelly shattering the bones The second had pierced his chest high up, just below the shoulder, and had passed clean through his body. Binding himself to the second, Alan worked desperately with tourniquet and tiny wadding kit till he had stanched the bleeding. Before he finished, Larry was coming faintly from the bullet shock.

Half an hour later, when Alan had done all he could for Bill had managed to patch the canoe they turned their faces toward home in defiant, in sorrow, in an anguish over Larry.

Alan picked him up in his arms, gently and tenderly trying to keep that fatal bleeding from starting again. Bill following him, staggering under the weight of canoe, guns and pack, he headed back toward the Alan's branch.

For an hour they stumbled along, plowed through bog and mire, groped through the tall impending flags. It was an hour of darkness, of grim, heroic struggle. But they reached the Aloosha branch at last and set the canoe in water; and making Larry a soft bed of flags, they began their sorrowful journey.

They Refused to Stop or Rest.

With no sleep in more than fifty hours, with all that huge hard chase behind them, they were on the verge of exhaustion, and could make no speed. Their hands were raw with blisters from paddle work; their faces were blooming from insect bites; their backs ached from unbroken labor. They were muddied, wet, gaunt with hunger, heart-sick from the disgraceful failure of their patrol. But they refused to stop or rest. Larry had to be taken home quickly; the hours were a matter of life or death to him. With dogged courage they drove themselves on.

With his spirits at so low an ebb, the picture of that fur pack in Dave MacMillan's shed rose before Alan's eyes, and he foresaw the inevitable consequences to flow from that discovery. In his exhaustion, with all the buoyancy of hope drained out of him, he no longer could feel that somehow he was going to get Joyce's father off lightly. He must take Dave into Endurance and enter charge; and now, with these bandits escaped, Dave would bear the whole brunt of the law's retribution. He felt that all the rest of his life he would be haunted by the memory of Joyce's pale face, frightened and anguished, in the cold grey dawn of yesterday.

In this whole unhappy business—Jimmy Montgomery dead, Larry in the shadow of death, that tragedy hovering over innocent Joyce MacMillan, the bandits escaped and the patrol disgraced—in all this evil-starred affair, only one thought held any comfort for Alan. It was a vengeful thought, born of a savage and vengeful mood. He held a sword now over Inspector Haskell. Haskell had ordered this patrol to be split. Out of his ignorance and jealous rage, he had issued that crazy order, and it had wrecked the patrol. His grave, incompetence, which heretofore had been only a vague charge hard to prove, now stood out glaringly, in all its inescapable guilt.

(To e Continued).

THE RHYMING OPTIMIST

By Allan McDougall

THE ASTRONOMER

He deals with whirling stars and suns And countless realms of space, With unerring tide that runs His never-ceasing race. The universe bores him spins In ordered, vast array While man's little strifes and sins Unheeded, drop away.

He dwells after no regret to be In tractate that design Which flows through all infinity. Unhurried and benign. And in his wisdom he can glean Love's purpose in the whole, Which you and I have only seen Within the human soul.

Then and Now

Changed Attitude Of Americans Towards the War Debt

When, in 1918, on the invitation of our Foreign Office and an American committee, Mr. George Nilson Barnes went to the United States to preach on the "Moral Aims of the Allies," he had to address in April, along with Mr. Taft, a meeting in Cleveland, Ohio, called by the Chamber of Commerce, and attended by over 700 men of business and the professions. Mr. Taft, who was not then in office, said in the course of his address: "I hope that our government is lending very large sums of money to Great Britain. As an American citizen I trust that we shall never ask back a single penny of it. Because for three years Great Britain has been standing between us and the monster." This was loudly cheered by the whole meeting.—National Weekly

Get Rid of That

SORE THROAT!

Any little soreness in the throat grows rapidly worse if neglected. Check some tablets of Aspirin in warm water, and gargle at once. This gives you instant relief, and reduces danger from infection. One good gargle and you can feel safe. If all soreness is not gone promptly, repeat. There's usually a cold with the sore throat, so take two tablets to lessen or ward off your cold, headache, aches or other cold symptoms. Aspirin relieves neuralgia, neuritis, too. Use it freely; it does not hurt the heart.

Here and There

"The decrease in freight car loadings which began in 1929 has continued almost uninterruptedly. In 1931 up to the end of the first week of December, 164,654 less freight cars had been loaded on all Canadian Railways than for the same period of the previous year. During the same period of this year 276,014 less cars were loaded than in 1931. The decline in passenger business has been relatively the same. The resultant effect upon railway earnings has been naturally disastrous. For the first ten months of 1931 Canadian Pacific gross revenues declined 22.1 per cent. as compared with that of 1930. For the first ten months of this year now closing there was a further decline of 15.4 per cent. The decline continues, and there certainly appears to be no evidence in sight that for many years we shall see them scarcely stimulated and our railways back where they were in 1928."—E. W. Beatty, K.C., Chairman and President, Canadian Pacific Railway, in his review of 1935.

In the vanguard of the winter vacation traffic to the South Seas and the Orient, the Canadian Pacific liner "Empress of Japan" cleared the Narrows at Vancouver January 14 with a list of 411 passengers.

Recent payment by Great Britain of $96,560,000 war debt instalment, reminds old-timers of the war days when $96,000,000 in gold was shipped by Canadian Pacific Express from Ants to England via Canada, and was carried across the Dominion on a special Canadian Pacific train, having absolute right-of-way. The train was called without lights and was provided by scores of armed guards.

"Dark and uncertain as the outlook may appear to the casual observer, I still think that in this wider field the year has not been without important developments tending towards trade stabilization and encouragement."—E. W. Beatty, K.C., Chairman and President, Canadian Pacific Railway in his review of 1935.

"Through intelligent education the economic and social futility of war will eventually be recognized," in the view of Sir Norman Angell, British economist and disputer of war Humans. He called recently by Canadian Pacific liner "Montrose" after a lecture tour in the United States.

Of the 4,966,512 pounds of canned pineapple consumed in Canada between April 1 and September 30, 1935, all but 164,582 lbs. came from countries within the Empire, nearly half the total being from the Straits Settlements

Illiteracy in Canada is near the vanishing point. According to the last census in 1931, 82.24 per cent. of the population of Canada over five years of age could either read or write. Students enrolled in Canadian schools in 1931 numbered 1,643,347.

The Canadian Pacific Railway Company's tax bill for the year now almost six million dollars bringing its total contribution in Canada's tax collections since incorporation to about $114,000,000."—E. W. Beatty, K.C., Chairman and President, Canadian Pacific Railway, in his review of 1935.

Bobsleigh Club Meeting Draws Large Crowd

A large crowd attended the annual ratepayers meeting last Friday night in the Town Hall to hear the financial reports of the Town, and of the School District, which were submitted and found to be very satisfactory. Mayor G. T. Montgomery occupied the chair by request and gave an interesting outline of conditions generally in the Town. The Chairman of the various committees gave reports of the activities of their Departments during the year.

A motion was moved of appreciation for the manner in which the Council had conducted the affairs of the Town during the past year, was adopted.

Josephburg News

The Josephburg Junior U.F.A. held a meeting on January 25th, at the home of Mr. and Mrs. Adolph Bochar.

Mr. Griffin gave a brief summary of the play.

The business part of the meeting adjourned and a lovely lunch was served by the hostess.

A special meeting of the U.F.A. was called on Monday, January 30th, to discuss social activities. It was decided to hold a dance in the school on Friday, February 17th. Watch for announcement in this paper.

The next meeting will be held at the home of Mr. and Mrs. R. Hennig on Saturday, February 11th, and the Roll Call is to be answered by a motto.

HOCKEY

The Fort Senior Hockey team defeated Bruderheim at the local rink here last night by a score of 6-0.

This makes the 14th consecutive game, with the Fort winning 13 and tieing two games. The local boys have only 2 losses chalked up against them this year so far.

The game was slow, with the bunch keeping the play around the opposing goal. About half way through the first period J. Kazun scored on an assist from Earl Lane making the score 1-0. Towards the ends of the first period, Earl Lane scored on a beautiful solo to give the Fort an other one. The first period ended 2-0 for the Fort.

The second and third periods was a one sided affair with the local squad scoring 4 more goals, two going to Bill Graff and 2 to Earl Lane. Many penalties were handed out in these two periods.

The Fort Senior Hockey team climbed back into a tie with Lamont by defeating the hard working Bruderheim hockey team here on Tuesday night. Lamont's win over Chipman on Monday night had put them up two points ,but their load, was short-lived.

The Fort's win on Tuesday run up their string of successive games without a loss to 14 games.

The Fort Team plays at Chipman on Thursday evening of this week, and this game promises to be a very hard fought tussel. The local boys will be out in full force as they want to hold their one game advantage over Lamont. (They have lost four league games, whereas Lamont have dropped 4 games.)

The following is the league standing to date:—

VICTORIA HOCKEY LEAGUE STANDING
Feb. 1st, 1933

	W.	L.	Pts.
Lamont	10	4	20
Fort	10	2	20
Chipman	6	6	12
Bruderheim	0	13	0

Alberta's share of the wheat bonus paid last year by the federal government was $6,857,735.62, according to figures just released by the board of grain commissioners. The amount was paid on 117,184,766 bushels.

Red Cross Hold Annual Meeting, Elect Officers

The Annual Meeting of the Fort Saskatchewan Branch of the Red Cross Society was held at the home of Mrs. A. Carmenden on Thursday afternoon, January 19th.

The Secretary's report for the year showed that a number of needy children had been provided with shoes, rubbers and other necessary clothing. Flannelette was bought for two adult skin cases and flannelette and greenfeed for others specially in need of help.

On medical advice milk and cod liver oil were given to two children and one adult.

12 families were sent Christmas cheer parcels and letters of appreciation and thanks have been received from many of the recipients.

The receipts from the annual campaign were not as large as last year, owning partly to the depressing period of financial stringency. $205.09 was collected, but the Red Cross is greatly indebted to the Alberta Athletic Society for the generous contribution of $200.00

to the Women's Institute $10.00
to the Poppy Fats C.G.I.T. $6.00
Josephburg Ladies Aid $5.00
the U. F. A. $2.00
Mrs. Attwood $3.00

Votes of thanks were given the retiring officers, various societies and individuals, for their faithful work and contributions, which make possible the Christmas Cheer and also given of the sick and afflicted.

The following officers were elected for the current year:—

President—Mrs. Wilmerath,
1st. Vice-Pres.—Mrs. Staples,
2nd. Vice-Pres.—Mrs. D. Ramsay,
Sec.-Treas.—Mrs. C. Read,
Visiting Committee—Mrs. von Iffland, Mrs. Staples.
Management Committee—Mrs. Reburn, Mrs. White,
Buying Committee—Mrs. Staples, Mrs. A. Carmenden.

Taken from the Files

19 Years Ago Today

Thursday, Feb. 5th, 1914

Arrangements are being concluded by the department of the provincial secretary for the taking over of the R.N.W.M.P. barracks at Fort Saskatchewan together with the custody of some sixty prisoners held by the department, sixty this week.

Gordon & Dalzee have unloaded two cars of hardware this week.

Rev. W. J. Hampton of Pine Creek, last his house and effects by fire on Sunday.

J.J. Libby, G. T. Montgomery, W. A. Anderson and F. Stanley were delegates from the L.O.L. to the County lodge at Edmonton Wednesday.

Two rinks representing the Fort at Vegreville Bonspiel have both gone down to defeat in the Grand Challenge and Mercheants, but are in the running for visitors and professional competitions.

— BADMINTON NOTES —

Visitors from Fort Saskatchewan and Fawn Gibbons were guests at the Badminton Badminton club on Saturday evening for friendly games. Supper was served in the club lounge at the completion of play.

The Fort Saskatchewan party included Dr. and Mrs. T.W.E. Henry, Mr. and Mrs. J. D. Wilson, Mr. T. W. E. Henry, Mr. Stanley Rumbly, Miss Gladys Hodgins, Mrs. H. Locher, Miss A. Dickens, Dr. and Mrs. Calhoun, Mr. C. Shaw, Miss L. Bang, and Mr. H. Holt.

Those in the Gibbons party were Colonel and Mrs. Rodgers, Mr. Fraser, Mr. Goddard, Miss Goddard, Miss Gibbons, and Mr. Marshall.

School Notes

Five Questions:—

1. How many languages or dialects are spoken by the people of the earth?
2. Where are found the richest deposits of asbestos in North America?
3. What General in ancient History is given the name "Father of Strategy" by military critics?
4. What two Alberta rivers rise on practically the same source?
5. Where is Wrangel Island and by whom is it owned?

Not long ago an editorial in a well known publication contrasted the serious, purposeful stand towards problems of life, political and other, of modern European youth with what he claimed was an attitude of "Oh Yeah" in Canada and the United States.

While I suspect strongly that this is, to a great extent, a pose; nevertheless there is great danger that the shadow will, by the force of common consent, become something like the real substance.

It is doubtless very difficult to get very serious about anything whatsoever, when we realize that everything is changing, and that a stable condition of things does finally appear, more particularly in an economic sense, there can be no doubt about it that the younger generation, who have fitted themselves by a steady purpose in education, will not fall of their reward.

"The Principal"

On behalf of the High School, the editor of this column wishes to voice an appreciation of Mr. Neale's kindness in making this column possible. This favor is particularly appreciated at a time when, for reasons financial and otherwise, we find it difficult to continue the publication of our own "Wee".

The following bill was sent to a company by an undersexed truck driver:

2 comes and 2 goes at four-bits a went is $2.00.

Miss Fleming—I will now my bet to represent Mars. Any there any questions before I go on?
Murray—Yes—Is Mars inhabited?

We are glad to see Murray Gibson back after a lengthy illness.

We regret that Oliver Taylor has had to retire from the ranks of the students due to illness.

We are taking up a collection to buy Henry Basinet some bobby pins.

I Wonder What Would Happen

If Jewelle arrived ten minutes before nine o'clock.
If Ed. managed to do his sleeping at home.
If Jack would think before answering a question rather than after.
If another "volume" from Margaret G. to Muriel T. was intercepted.
If Orwell should admit that he was wrong.
If Tee failed to make the front door before 4.00012 p.m.
If George A. got silvers sliding down the banister.
If Miss Fleming failed to open the window or close the register.

In Light Vein

Orwell (lately entertained)—" But officer, I'm a student."

Stan. [illegible] is no success".

Frances H.—I like a man with a past. A man with a past is always interesting.

Norma S.—That's true, but I don't think he's nearly so interesting as a man with a future.

Chrissie T.—The man who interests me is a man with a prospect and the more expensive it is the more interest I take in him.

Rose B.— Who's that gentleman I saw you with last night?.

Colin—That wasn't no gentleman—that was Fred Taylor.

Miss Fleming (checking Session at his alphabet) "What comes after the letter "O"?
Session—"Yeah".

Answers to the Five Questions

1. Approximately—200.
2. Lower Quebec.
3. Hannibal.
4. Athabasca R. and North Saskatchewan R.
5. North of Barring Strait- Owned by Russia.

Canadian Radio Programmes.

The recently appointed Canadian Radio Commission, within whose jurisdiction has been placed control of all radio broadcasting in Canada, has inaugurated the first of its series of all-Canadian programmes to be broadcast over a Dominion-wide hook-up of stations from the Atlantic to the Pacific. This first series is in commemoration of the tercentenary celebrations, alternatively by the Toronto and Montreal Symphony orchestras each Tuesday evening. The Radio Commission has also announced a second series of broadcasts for each Friday evening consisting of contributions from the talent of the Royal Canadian Regiment, London, Ontario, and the Canadian Grenadier Guards, Montreal.

Before taking the step of nationalizing radio broadcasting in Canada, the Canadian Government appointed a Royal Commission to study the whole subject and to investigate conditions and systems in other countries. Its Great Britain all broadcasting is under the direction and control of the British Broadcasting Company, which, in a sense, acts for the Government. In the United States private companies and individual stations are responsible for the programmes, which are financed by advertising, while the Government controls the erection of stations, their power, wave lengths, etc. Canada's Royal Commission reported in favor of out-and-out control by the Government through the creation of a national Radio Commission with wide powers of control over all stations and all programmes, including the right to take over existing stations, erect new ones, and operate any or all of them.

Canada's position is a peculiar one. Being immediately adjacent to the United States with its 110,000,000 people, consequently considerable and many powerful stations with large revenues from advertising, as compared with Canada's population of only 10,000,000, much smaller financial resources, and a restricted volume of radio advertising available, and largely by reason of purely local nature, our stations are unable to compete and of low power compared with the high-powered stations across the line. As a natural and inevitable result, United States programmes largely monopolized the air in Canada. It was realized that this situation could only be overcome if at all, by the Government itself. Hence the decision in favor of a national radio system with all-embracing powers, and financed by the license fees paid by all radio possessors, including sets.

At the outset, the Radio Commission is not proceeding to acquire stations or erect new ones; rather it is devoting its attention to the development of worth-while Canadian programmes and providing the hook-up facilities whereby such programmes can be heard in every Province of the Dominion, an expensive proceeding because of our great extent of territory and our sparse population, and, therefore, beyond the capabilities of private enterprise.

There is little question but that the people of Canada desire that such all-Canadian programmes and national hook-ups should be provided. But to command the interest and support of our people such programmes must be equal in, and, where possible, excel, United States programmes. It is not only in the quality of the individual programmes that they be offered that they must successfully compete with United States programmes, but in their variety as well. The Radio Commission is making its start with symphony orchestra music. Well and good, and undoubtedly the two organizations selected to provide these programmes are just as fine as any United States organization. The fact remains that only a limited number of people possess an educated taste for symphonies. Possibly, everybody enjoys such a programme occasionally, but on a regular diet it is apt to pall. The same thing may be said with equal truth in regard to band concerts, and, indeed, of any one class of programme.

We desire to emphasize that we are not criticising, in even the mildest manner, the initial programme decisions of the Radio Commission, but we do desire to point out, and to emphasize, that in order to command the support and support of the masses of the Canadian people, who, after all, are paying for these programmes and, therefore, have the right to "call the tune," — Canadian programmes must equal in their variety those which can be heard every evening by tuning in on U.S. stations. People like good music, whether by band, orchestra or vocal, but they also like a lot of fun. They enjoy a good joke, clever repartee, a real good laugh. At times they want to be soothed and lulled by an intense dreamy; they like to listen to an eloquent speaker upon timely topics. And there is grave danger that if the Canadian Radio Commission, in their laudable desire to raise the standard of radio programmes, adopt what we may term a "high brow" attitude, thousands of Canadian listeners will simply turn their dials and continue to listen-in, as now, upon the enormously popular variety programmes emanating from the United States stations.

It is to be hoped that the members of the Radio Commission are so fully alive to this situation as to the average radio listener. It will of course, take time to develop such programmes, while it was a comparatively easy matter to conclude arrangements with symphony orchestras and magnates, and so to inaugurate initial programmes. But in order that public opinion may not develop an open antagonism to the policy of nationalized broadcasting, it is vitally important that no false impression of the policies and intentions of the Radio Commission be created.

No doubt that class of our population who are extremely fond of the highest forms of music will write their commendations to the Commission. We would offer the suggestion that listeners-in everywhere join the army of correspondents, and, while not criticising what they themselves do not particularly enjoy, present their own views as to what they would like.

Palpitation of the Heart Nerves Bad - Could Not Sleep

Mrs. Fred Hughes, Smith Corners, Sask., writes:—"I was troubled with palpitation of the heart, and my nerves were so bad I could not sleep.

I was getting desperate and decided my trouble is a blood one. I commenced to use Milburn's Heart and Nerve Pills. I persisted in their use and got such relief I would gladly recommend them to all who are troubled as I was."

Price 50 cts. at all dealers and stores, or by mail from The T. Milburn Co., Ltd., Toronto, Ont.

Debt Adjustment

Movement To Start Low To Prevent Unjust Foreclosures

Representations will be made in the Saskatchewan Government, provincial circles in hope, requesting that machinery be set up which will put the clamps on unjust foreclosures after consideration has been given to all the merits in the case.

The government will be asked to devise legislation which will protect all equities in property, no matter how great or small as it is felt there is discrimination under the provisions of the proposed Debt Adjustment Act.

This discrimination, it is alleged, by the Saskatchewan Citizens Investment Protective Association, is that inter-dependent groups in mortgages and sales agreements are not protected, and in a large number of cases hardships have been wrought through foreclosures being achieved by first mortgage holders.

The clauses of first mortgage clauses, it is contended, have been given to the inter-dependent group in the property, in creating problems which the Debt Adjustment Act is designed to solve, and which can only be met by amendments to the present Debt Adjustment Act, it is contended by this Association.

Will Not Hasten War

Government Will Only Modify Method Of Fighting

We have to face the fact that dangerous as is chemical warfare, it will only modify the method by which it can be carried on. It started with field guns three years ago to bows and arrows and swords and spears, etc., and then some one discovered gunpowder, and so on. So we are, in reality, making for the end of war age. It may be possible to arrive there some day, but how long shall we stay there, with all the resources of modern industrialism behind us, civil aircraft, railways, motor transport and the endless possibilities of science?—National Review.

HEADACHE AFTER HEADACHE

Now She's Free From Them

A woman writes:—"I would like everyone who suffers from headaches to try Kruschen Salts. Before taking Kruschen I was hardly ever free from a headache. But since I have been taking it regularly I have hardly had a headache, nor which I am very thankful, for headaches can make one feel quite ill! I have been taking that small dose of Kruschen every morning in a glass of warm water, before my breakfast, and I feel so well."—(Mrs.) A. E. D.

Headaches can generally be traced to a disordered stomach and to the accumulation of waste matter. Kruschen Salts gently stimulate the system of stagnating waste material which poisons the blood. Kruschen then gets going, prevent them forming again — and you'll never have to worry any more. And that how Kruschen Salts bring swift and lasting relief from headaches. Kruschen Salts aid Nature to cleanse your body completely of all clogging waste matter, and you'll feel fine. Get a bottle of Kruschen tomorrow. Then you will very soon have done with headaches.

Court Room Etiquette

Disrespectful Maid Wears Collar And Tie Before Burlin Judges

There was an amusing scene at a Burlin police court recently, when a number of persons charged with various offences came up for trial. The day was very hot and but the justices fined him heavily because he was not wearing a collar. His lawyer stated that he had to send his client out to get shaved before entering the court.

On hearing the fine announced a number of other defendants rushed from the court to buy collars in neighboring shops. They all returned looking very relieved but unfortunately they were assailed by the justices. They were admonished by the justices, who said that in future anyone appearing in court in his fashion would be severely dealt with.

Constructing possible bound in Canada in a record month were 20 per cent above those of a comparative month of the previous year.

Throw OFF That COLD!

Some men and women fight colds all winter long. Others enjoy the protection of Aspirin. A tablet in time, and the first symptoms of a cold are gone. Or, if you've caught your snuffles, keep on with Aspirin until the cold is gone. Aspirin can't harm you. It does not depress the heart. If your throat is sore, dissolve several tablets in water and gargle. You will get instant relief. There's danger in a cold that hangs on for days. To say nothing of the pain and discomfort Aspirin ought have spread you! All druggists sell it, with proven directions for colds, headaches, neuralgia, neuritis, rheumatism.

Class Doors On Technocracy

Columbia University Lays Plans For Survey By Its Own Engineers

Columbia University has closed its doors on Technocracy and laid plans for an energy and technology survey directed by its own engineers.

Four members of the Technocracy group, headed by Prof. Walter Rautenstrauch, of the Columbia industrial engineering department, announced they were "not in accord with some of the statements and attitudes" expressed by Howard Scott, the nominal leader, and therefore were "withdrawing from association with Technocracy."

"Technocracy ceases to exist as far as we are concerned," Rautenstrauch declared.

"Scott will not work here any longer," he said, in reply to a question.

He also disclosed that the 100 or more unemployed engineers and architects, who have been working on Technocracy's "energy survey of North America," while being paid from unemployment-relief committee funds, will work in the future for the Columbia survey and not on any work Scott and the "Technocrats" may carry on.

Looks After King's Image

Sir Edward Bacon Looks After Valuable Collection

Sir Edward Bacon, the new knight, who looks after the King's collection of stamps, has been in the service for years. Like His Majesty, he is a stamp enthusiast. He has access to the stamp room at Buckingham Palace at all times, and the King spends many hours with him examining the collection, which is one of the most valuable in the world. Owing to the skilful manner in which the stamps have been purchased, the collection has cost the King comparatively little, although it comprises practically all the rare stamps of the world. Both the King and Sir Edward are experts with the microscope for stamp collecting purposes.

Children have their own peculiar way of expressing themselves.

"Well, Peggy," said the neighbor, "and how do you like your new governess?"

Peggy thought a moment and then said: "I half like her and I half don't like her, but I think I half don't like the most."

Russia, the unmeasurable stores from which harvests are made, faces an important loss among products that enter the British West Indies daily free from Canada.

The Bank of England commenced online operations on January 7, 1925.

Japanese Statesman Sees Trouble

Criticizes Militaristic Spirit Dominant In His Country

A spokesman for one of Japan's principal political parties declared in the diet at Tokyo, Japan, that unless relations between Japan and the United States are improved they will produce renewed armaments competition and possibly a world war.

The statement was made by Hitoshi Ashida, formally chosen spokesman for the Seiyukai party, who delivered the boldest criticism of the militaristic current military domination of Japanese diplomacy heard in parliament since the Manchurian conflict began in September, 1931.

In response to Mr. Ashida's assertion that "a gloomy attention" rules relations between Japan and the United States, the foreign minister, Count Yoyuu declared that "there is no uneasiness concerning our relations with the United States."

Rising in the diet to question the government concerning its foreign policy, Mr Ashida questioned the dictatorship of the army's domination of diplomacy and asserted that the public was afraid that "we are being dragged blindly into an uncharted pitch-black abyss."

Looks Like Magic

Stock Disappears and Dollar's Rate Was Called Off

A. S. Cromarty, farmer in Essex County, Ontario, can give Thomas some lessons in magic, according to Frank Howard and Charlie Eggleston, division court bailiffs. Cromarty made two horses and two cows disappear and the court officer cannot find them.

There was a good crowd gathered for the auction which was held to satisfy a judgment against the farmer for $200, but the stock was missing so the sale was called off. Officers spent hours following hoof prints to various parts of the 15-acre farm and to adjoining property but had to give up because Cromarty would not tell where he hid the animals.

Economy a reduction in some other fellow's salary.

Uncanny Machines Known As Verifier And Tabulator Used To Check Up Census Returns

Aided by machines that count with lightning speed and which exist nowhere else in the world the compiling of Canada's 1931 census involves much more than a counting of noses and it will be some time yet before the work begun when enumerators called from house to house nearly two years ago is completed.

The census of Canada now being tabulated is the biggest job of its kind ever undertaken in this country. Were it not for two machines, invented and built by census officials, it would cost three times as much as it will to tabulate the information which will be published about. As it is, thanks to the almost uncanny mechanical devices, much more information will be compiled than it will be possible to publish.

The two machines are the verifier and the tabulator. The first detects errors and the second counts the information thus corrected. Each machine is the size of the old-style safe.

The data taken by the census enumerators is transferred to small cards by punching holes for each fact recorded. A hole is punched in the proper place to indicate the sex, age, religion, nationality, language, racial origin and other things of the person being listed.

This card is then sent to the verifying machine to check against errors. The machine throws out cards on which conflicting pieces of information are recorded. For instance if a person's age is 35 and he is listed as a non-voter, under 21, the card is thrown into the discard and sent back for checking to correct the discrepancy.

If a man gives his racial origin as Jewish and his religion as Baptist the card is rejected. If the sex is omitted the card is shot back. The machine of course cannot detect a straight error in a single fact, such as stating age, the wrong sex, or the wrong nationality.

Each card runs under a set of pins, 240 in number, as it goes each pounds hole. The pins drop through the holes into a small basin of mercury. The tip of one establishes an electric current, down through one pin across through the mercury and up through another. If one of 22 possible errors or combinations of errors facts are present the electric circuit is broken and the card is thrown out. The machine counted in the mercury bath lasts only 1-200 of second.

The tabulator is the only machine in the world which will count 240 separate facts at the same time. It, too, works with electric currents running through mercury bath by means of the pins which drop through the holes. As each card passes through a pin drops through each hole, an electric circuit is established for 1-37 of a second and each hole on the card is counted under its proper location.

A large black board with 240 apertures under 10 headings in each of which is a revolving counter with 10 wheels, stands on an automobile speedometer is attached to the machine. When all the cards for a certain district have run through and been counted the board has a record of the number of persons of each religion, each age division, each racial origin, and the whole 90 classifications marked up.

The next step is to take a photograph of the board which makes the permanent record. The totals from the photographic records are then compiled on an adding machine and figures by provinces and for the whole of Canada are announced.

But the machines does more than merely count. As the cards run through they are sorted into boxes according to the classification desired. They might first be sorted for age. Then after the run would be completed for the city of Toronto the cards would be shoved according to age. Then they could be run through that order and the next result would give the number of persons of each sex, each religion, each nationality and so on to the city of Toronto under 21, between 21 and 35 and so on. All sorts of cross-classification of this kind are being made.

The Census Bureau has three tabulating machines built especially for this job at a cost of about $15,000 each. It takes three months to run the whole of Canada on 10,000,000 odd cards through the machines.

A. E. Thornton, mechanical superintendent for the Dominion Bureau of Statistics, is the inventor of the machines and they were built in Ottawa under his direction and that of his assistant F Bellisle. The two mechanics worked for three years on their plans. They had some little difficulty persuading the government to allow them to build the machines as cost was considered prohibitive at the time, and they would never work. The machines have been working for 18 months.

The next largest machine in the world is at Washington and is used by the United States census. It, however, deals with facts at a time, compared with the 240 tabulated by the Canadian machine. The Washington machine is in the work tabulates only 30 facts and cannot be bought. It can only be rented.

The Easter System

(Premier Bennett's Name Timed In Time)

Speaking before the Toronto Board of Trade, Premier R. B. Bennett said in the early days trade was conducted by barter and "there is evidence some would like to return to this method."

There were many phases of trade. The rural population for the first time in the history of Canada was smaller at present than the urban population. "We sometimes forget how vast a market we have in our own country for our products," he said. But despite Canada's magnificent resources, her export trade had shown a great diminution for a time Eventually, however through ascertainment, Canada had come back to fifth position as an exporting country."

There was no problem so great and so little understood as the railway problem which the prime minister said was one of the greatest and shortest clouds hanging over this country.

There was a tendency among the business men to blame the railway people, but this was not right since three great agricultural provinces had guaranteed part of the transportation system.

There was also hundreds of millions of dollars invested in harbor and canal systems all under the control of Canada's trade and in the production

Fish Propagation in B.C.

Province Will Stock Rivers and Lakes With Young Fish

Marking British Columbia's first attempt to stock its streams with young fish instead of mere fry whose mortality is too great for satisfactory propagation, Bryan Williams, provincial game commissioner, has announced plans for concentration of fish propagation at three centres.

Brown trout, Rainbows and Scottish salmon will be reared in scientific ponds located at Cultus Lake, Qualicum on Vancouver Island and at Stanley Park, Vancouver. The young 5-6 will then be released into the streams and lakes of the province for the sport of fishermen. Transportation will be made by the use of a new system of oxygen tanks which make it possible for long trips without danger.

Check and Double Check

Guards Town Hall Record This Week

It cost the Town Council of Chatsworth, Ont., $275.00, and then some to check and almost silence the books of Town Hall. It was the annual check and the discovery the municipality owed that official three cents. And the corporation has now a fine suit.

J. T. Dicow, Sudbury, won his action against the town for $60 a day fee for auditing the books. The town refused to pay and called in a government auditor. Now they have a bill for $1945.80 plus $19 expenses for the second auditor.

King George Is Proud Possessor Of Finest Collection Of Postage Stamps Of The British Realm

Making Pocket Money

Small Fur Catchers Paying Fines Days In Alberta

Farm boys are finding unused trapping a profitable side line in the central Alberta district, estates being very plentiful in those parts this winter.

Boys are able to catch half a dozen or so without much trouble, setting traps within a few hundred feet of their homes These who are going into it on a larger scale are reaping some rather returns With eight traps one boy caught 51 weasels in six weeks, and hopes to go well over the hundred mark before the winter is over Another boy has a total of 30 skins to show for a month's work with traps and trick boxes.

The weasel skins are selling for 75 cents, top price according to the young trappers, who expect to average around 60 cents a pair for their entire catch.

Weasel seem to be the only game the trappers have are bothering with, the season for Coyote are somewhat scarce except in the more isolated parts Skunk were plentiful during the summer, but few have been reported caught this winter

One boy finds patriotism pays worth going after He set out a dozen snares in a hayy field a short distance from town, and has caught 12 of the large bunnies The family are considering having them stuffed and mounted for the parlor.

Muskrat is not in demand, although fish instead of mere fry whose mortality is too great for satisfactory propagation, Bryan Williams, provincial game commissioner, has announced plans for concentration of fish propagation at three centres.

Brown trout, Rainbows and Scottish salmon will be reared in scientific ponds located at Cultus Lake, Qualicum on Vancouver Island and at Stanley Park, Vancouver. The young 5-6 will then be released into the streams and lakes of the province for the sport of fishermen. Transportation will be made by the use of a new system of oxygen tanks which make it possible for long trips without danger.

An Expensive Exhibit

Elephant in Seattle Zoo Eats Ton Of Hay Weekly

Eating a ton of hay a week is the joy of Tusko, huge 7-months-old baby elephant, who is now "at home" in special quarters at Woodland Park Zoo, Seattle, Washington. About 180,000 people have seen the big fellow since he was lent to the zoo of the city by his alleged owners. He formerly had an elephant farm in Portland, Olympia, Chehalis, Centralia and Tacoma, after he was "discovered" from the big top when he became too expensive to cart around the country.

A Dangerous Job

Several readers of the London Sun are regarding spectators with a grimly stern. They had their eyes on accidents of various kinds and the beer's fitted them with glass ones. The only trouble is that every time the makes steal their skins the eyes pop out and have to be fitted back in again Try that on a bon constrictor!

ANOTHER OF THE MAPLE LEAFS' STALWARTS

Red Horner has been a tower of strength to the Toronto Maple Leafs hockey team, and enjoys the reputation of being a hard checker. Here we see him scoring the first goal on Chicago for on his return the puck in the direction of the goalkeeper.

The Royal Philatelic Family

The centennial of a magnificent upon His Edward Denny Sisson, keeper of the King's stamps, comes as a timely reminder that His Majesty is the proud possessor of what is beyond doubt the finest and most comprehensive collection of postage stamps of the British Realm.

Begun as the outcome of a casual interest in his contemporaries' hobby, the collection has been developed and extended with the years until today it occupies upwards of 300 large albums in charge of a curator, who has a special room at Buckingham Palace in which to carry out the constant work of arranging, classifying and mounting the additions that are daily being made to it.

Only a few privileged members of the Royal Philatelic Family are aware, of which the King is honorary patron, have been permitted to view the royal stamp collection in its entirety, but each year some portion of it is exhibited at the opening meeting of the society's new session. These annual displays usually reveal some original aspect of philatelic research. In days gone by, as Duke of York, and later as Prince of Wales, His Majesty used sometimes to attend the meetings in person and, on more than one occasion gave evidence of his philatelic erudition by reading informative papers.

It is difficult to single out for particular mention any one portion of the royal collection, for each covers more than adequately the whole gamut of the imperial stamp issue from almost the earliest days. Although it is planned on same no less general lines, it is highly specialized as regards a large number of colonies and possessions.

From the point of value alone the Mauritius section ranks possibly first with a pair of "Post Office" varieties (4d. and 6d.), the unused copy of the tuppenny value being the finest known example of this classic stamp. Great Britain is probably the most complete, including as it does so many unique items in the way of surcharges, perforations and varieties, which cannot possibly be duplicated.

For the beautiful and fascinating early stamps of the British West Indies the King has also arranged a sliding, dating back to the days when his first ordered those waters in H.M.S. Thrush, and his collection of these issues is especially strong, including only the unique 1 cent British Guiana of 1856. It is on record that the possessor of the record stamp once sought permission to present it to the royal collection: an offer that was firmly but courteously declined since His Majesty does not accept gifts from private collectors, albeit his philatelic treasures have been enriched from time to time by presentations of stamps made by colonial governments and native princes in the form of souvenirs of some of the royal tours.

The postal commissions of Heligo'and, Hong-Kong, India, Straits Settlements, Victoria and Kenya, Uganda, Islands are but a few of the more advanced portions of the King's collection which have been shown in public, while there is in addition a practically complete range of the scarce and historic "occupation" issues made under British military authority during the Great War, as well as an equally representative array of air post stamps of the ever-lengthening list of the most up-to-date phrase of philately.

From the first His Majesty's interest in the pursuit has been a real and active one. In a letter to a correspondent written many years ago, he wrote of stamp collecting: "It is one of the greatest pleasures of my life." Philatelists will find in the book or centered upon the curator of His Majesty's stamps a further indication of the keen and abiding interest that he still evinces in that branch of numismatology which under his inspired patronage has come to be known as the "Royal hobby."

A man in Lithuania recently exchanged his wife for a phonograph.

FOR HEAD COLDS

Rub on nose and throat at bedtime. Let vapors inhale through nostrils.

WORLD HAPPENINGS BRIEFLY TOLD

The Earl of Chesterfield, former lord steward of his majesty's household and the 10th earl of that name is dead in his 78th year.

The monthly average of employment in Canada throughout the year 1932 was 891,256 empl oyes, according to a voluntaryear report issued by the Dominion Bureau of Statistics.

Department of national defence proposes as a measure of unemployment relief to construct an additional landing field at Camp Borden in the near future.

A new organization to be known as the Canadian Society for Literature and the Arts was brought into being at a well-attended meeting of authors and educationist Toronto citizens.

The aggregate value of all field crops in 1932 is estimated at $616,- 288,000 as compared with $422,288,- 000 in 1931, and a report issued by the Dominion Bureau of Statistics.

Bistress from Alberta at the World Grain Congress in Regina next summer are expected to reach 300 and approximately half that number have already been received.

Ernest Lapointe, Ottawa, before his retirement one of the largest lumber exporters in Canada and owner of large timber tracts throughout northern Quebec and Newfoundland, is dead at Montreal, aged 56.

A non-stop flight from Moscow to Ungava, a distance of 4000 miles, has been undertaken by a crew of Russian fliers, it is announced by the Soviet government.

Jesse Jessel Robert. Mr. Jessel's name for her was also used for the world's cake. He called The Twelve to be with him, to be His friends, to learn from Him, to understand Him and His message, and to carry on His work after He was gone. He ordered them to preach, to proclaim the glad news of the Kingdom, and to cast out demons.

A Portable Rail-Van

Dominion Assembly Of Re-Loading Goods For Shipment

A new type of mobile container, named the "rail-van" designed for co-ordination of railroad and truck services in long-distance hauling of household goods and adaptable for carrying general freight, was demonstrated at New York at the Railway & Chain Motor Truck Corp.

The rail-van is a detachable body mounted on rail—if canture, which can be removed, loaded and packed to a capacity of 7,000 pounds, from the truck platform directly to a flat railroad car. On arrival at the destination, the rail-van is easily pushed to another truck platform for delivery to the door of the consignee.

The new van eliminates the necessity of unpacking the goods from the delivery truck on departure and a similar unloading of the freight from the railroad car to a moving van on arrival. This, it was declared by Henry J. Reimers, president of Reimers Vans, Inc., of Chicago, will materially lower the cost of shipping of freight, over distances above 250 miles, and thus will enable the railroads to meet the competition now being offered them by motor buses.

Among new inventions is a machine that cores cold hands and feet by fixation of a padded, leather-covered drum, the mechanism also keeping the blood circulation.

A man with two hearts has been discovered. We wish they could use him in the banking business.

SUNDAY SCHOOL LESSON

FEBRUARY 5

JESUS CROSSING THE TORRENT

Golden Text: "I chose you, and appointed you, that ye should go and bear fruit."—John 15:16.

Lesson: Mark 3:7-19.

Devotional Reading: Isaiah 50:1-11.

Backsliders and Unbelievers

The Thronging Multitudes, verses 7-12. Although Pharisees and Herodians hated Jesus and had resolved to do away with Him, they could not get rid of Him, so we now in our lesson text would have Him. Jesus' popularity was by the people grew by leaps and bounds. Stories of His miraculous cures spread rapidly, and soon with a deceptive wildfire in the sea, but a miracle must crowd the road him, intent on being cured by Him or on seeing the wonderful works of others. From the north south, east and west they came, from Galilee and Judea, and Idumea, from Peres beyond the Jordan and Tyre and Sidon in the northwest, from Jerusalem and Galilee in the Realm of the Old Testament, the land where Rome and his devils dwelt.

Jesus took the precaution of directing His disciples to have a small boat in readiness so as to make his escape thrown if necessary. He was in real danger of being crushed by the unfortunate crowd. People suffering from plagues try to touch Him, believing that the touch would cure them. Mark 5:25-34. The disciples possessed fell down in homage before Him, saying, "Thou art the Son of God," and Jesus charged them not to make Him known. For "neither was His time for Him to work openly as the preachers." As Bengel says, Depend upon Providence, and do not be weak and wise enough to do it.

Chosen Twelve, verses 13-19.

After spending the night in prayer on the hills west of Capernaum overlooking the lake (Luke 6:13), from the inner circle of His followers Jesus chose twelve men to be a group of special disciples. The number twelve naturally suggests a correspondence with the twelve tribes of Israel. It was a subtle way of suggesting to the Jews that a communities had risen. He was founding a new theocracy—the never mind the old one—to supersede and replace the old."

Jesus needed helpers. He needed them for His work also and for the work's sake He called The Twelve to be with Him, to be His friends, to learn from Him, to understand Him and His message, and to carry on His work after He was gone. He ordered them to preach, to proclaim the glad news of the Kingdom, and to cast out demons.

Of Interest To Poultrymen

Saskatchewan Poultry Division Issues Third Annual Catalogue

The third annual catalogue of Saskatchewan poultry and turkey breeders has recently been issued under the supervision of the poultry division of the provincial livestock branch. The catalogue contains a list of all promi- nent breeders in Saskatchewan together with details respecting the products which they have for sale. Articles of interest to poultrymen generally, written by experts in their field, are also included together with a brief summary of the provincial and federal services which are offered for the assistance of the industry.

A study of "written rural" held in South Carolina six years ago, and repeated to equal local conditions has required no repair attention and is still in excellent condition.

Ultra-Rapid Plane

Planned Formerly For Swift Journey From Europe To Europe

Prof. Auguste Piccard, explorer of the stratosphere, predicts that travel- low net many years hence will cross the Atlantic in "stratosphere" with less rush than in crossing a large modern city in an automobile.

He gave an imaginary description before the National Geographic Society at Washington of a flight in such a machine, several of which he said already were being built in Europe.

"Travelling a float wonder here in Washington," he said, "ilong of his breakfast table prior to removal of some new bar to the pass, when a friend telephones from Paris asking him to drop in for afternoon tea hour later. He pa'es away his grapefruit and rushes to the stratosphere, and enters a restaurant.

The stratosphere is the inevitable super-highway for future intercontinental transport."

Saved Queen Alexandra

Late Resident Of Calgary Was Once Lady-In-Waiting

Honorable Mabel Vere Fitzgerald, former lady-in-waiting to Queen Alexandra, died in the new manor in Calgary on Mrs. Fitzhardinge Bass, proprietor of a small leading library and benefactress to the poor.

Brought up in the graces of King Edward's Court and guided by her mother's parents, Lord and Lady Cecil Cheshire, her life in Alberta was a strong contrast to the brilliant one she once knew.

Following her marriage to George Fitzhardinge Bass, she settled with her husband on a ranch at Pine Lake, north of Calgary, 27 years ago, later coming to the city. For a number of years she operated her little library until illness forced her to retire.

Gerald Larkin Says Remove Trade Barriers At Salada Annual Meeting

Newspaper Advertising still Backbone Of Sales Publicity

Mr. Gerald E. Larkin, President of Salada Tea Company, in addressing the Annual Meeting of the Staff said "Meetings such as this at the end of a good year are always a source of pleasure to everyone of us. When general conditions are bad, and when even our own business has, in a measure, reflected these conditions, we sometimes find the effort to bear ourselves cheerfully more than a little difficult. Any such feeling must be fought against and defeated by everyone of us, if we are going to make the following year a success. By fighting I do not mean any foolish gestures of optimism, although under present conditions I would hardly warn any of you against that, but I do mean a reasonable faith in the future based on the past history of this country, and of the world.

There is undoubtedly a measure of deflation propaganda being carried on. I have heard it said, and within the last month or two, that every country in the world, including Canada and the United States, is headed for revolution, that things are getting steadily worse every day. This talk rumors, not as one might suppose, from extreme socialists or communists, but rather from people who are said to be moderately comfortable circumstances but who, not having enough to do, allow themselves to brood on the depressing features of present day conditions and so reach a point where their judgment is entirely warped. We are all meeting people like this and must do our part to combat their ideas.

As I see it, what the world needs is greater mutual understanding between the component parts; greater appreciation of each other's difficulties; less nationalism and more internationalism. It was exactly these features which won the war. There was real and sincere co-operation between the Allied and American Powers. Unfortunately, immediately after the war the old mistrustfulness and jealousy began to creep in and there was a return to the old methods of competition between the victors and the defeated, but also among the victorious powers themselves. Extreme nationalism supplanted what at least had been a form of partial internationalism, and all countries soon became self-sufficing. That spirit is with us to a large extent today, and still more is it built higher until international trade has to all intents and purposes ceased to exist. What this country needs, what the United States needs, what the world needs is a breaking down of the greater part of these barriers if we are to return to our normal standard of living. You are probably already convinced of this, if so, vote for it. It is sure to come, but the quicker it can be brought about the more quickly the pessimists will be confounded, and the more quickly reasonable optimism will be justified.

Your audience is great, you are in constant touch with the people who, in turn, is in touch with every individual in his community, you are also meeting other salesmen who reach other trades. Do your share, from your point of view, to help them. Politicians can only act if they feel that the people behind them, and, it is vital to the welfare of the world, to the welfare of Canada and to the welfare of this Company that they should in 1933 act liberally. Shadow nervousness and be brought to see that only by liberal international action can from the pit we have digged for ourselves.

Mr. Macdougall, Advertising Manager, mentioned that newspapers, although form the backbone of their advertising, will be used just as extensively as ever by SALADA

Cheapest and Best

Advantages Of Newspaper As Advertising Medium Again Stressed

Denton Massey of Toronto has given expression to a truth that is generally known by those familiar with such things. Newspapers, Mr. Massey tells University of Western Ontario students, "are the backbone and shoulders" above any other advertising medium. Radio advertising is not to be despised, he says, but it is essentially entertainment. On the other hand, the results of newspaper advertising are known. Its appeal is direct, its no secret as it is seen, and the advertisers knew the type of subscribers they reach through the columns of the newspaper.

No one who has devoted the slightest thought to a study of advertising campaigns can doubt the correctness of Mr. Massey's statement. There are many forms of advertising, but none can begin to approach that of the newspaper. It reaches the largest number readers and at the lowest cost. —Border Cities Star.

Vacations By Lottery

Following the success of the mystery journeys to unannounced destinations, the Austrian State Railways are preparing another feature for the next tourist season. Lotteries will be held, tickets being sold for a small sum. Winners will be given a vacation in some popular Austrian resort.

An English scientist says that fortunately for mankind not more than one egg in every 10,000 lives is to become a full-sized herring.

England had less sunshine last year than in any 12 months since 1890.

An Inelastic Law

Old Relating To Jury Duty Could Be Improved On

A short time ago in Ontario a man called for jury and it would throw 23 men, day-at-most upon him temporarily out of employment. The judge refused to excuse him. It is a common sense that at this time of all times nothing should be done to hamper employment. It is also common sense that there are thousands of men capable of discharging the duty of juror in a completely satisfactory manner, whereas there are relatively few men whose presence is necessary in order to keep 23 men in employment. A system which is not sufficiently elastic to permit to making exceptions which intelligence and goods is not good enough. The judge's decision emphasizes the necessity to make the law applicable to conditions as they are at the moment.—Calgary Albertan.

For Farm Relief

United States Senator Has New Plan To Aid Agriculture

A possibly far-reaching new element was introduced into the United States congressional farm relief drama on Senator Brookhart, of Iowa, declared in favor of a "new emergency" plan which he said William C. McAdoo, California's ex-secretary, was considering.

He described the McAdoo plan as calling for agricultural price-fixing by federal law and for governmental control of the surplus.

Because of a belief the scheme would be vetoed by President Hoover, Brookhart said it is not intended to bring it forward for action until the next congress meets in the spring.

New Treatment

United States Investigator Reports Hay Remedy For Hay Fever

Dr. Rufus H. Seiger, of the United States veterans' administration, reported discovery of new treatment for hay fever.

The treatment, a substance called "tuberculoids," has been found capable of building up immunity in individuals "within two" payments, so they are able to resist attacks of this disease which commonly would prostrate, says Dr. Seiger, in the scientific monthly medical bulletin.

Tuberculoids is produced by destroying the tubercle germ—the germ which causes consumption—and is derived from bile.

Holidays For This Year

Most Of Them Fall On Saturday Or Monday

Holidays occur in 1929 as follows: Good Friday, April 19; Easter Monday, April 22, which is only a bank holiday; Victoria Day, Wednesday, May 24; Saturday, June 3, King's birthday, which is not generally observed in Canada as yet; Saturday, July 1, Dominion Day; Labor Day, Monday, September 2; Remembrance Day, Monday, November 11; Christmas Monday, December 23. Then there will be civic holiday and Thanksgiving Day to be declared later. It will be noted that most of the holidays occur either on Saturday or Monday this year, which gives long week-ends for pudding.

Victim Of Suicide

Says Former Governor Stuart Bought Regis Stable

The stables which duplicate Pompeiian, a major Roman problem and

A new organization to be known as the Canadian Society for Literature and the Arts, and designed to exercise a cultural and educational influence has just been organized. Its object is to promote a greater knowledge of literature, history and the arts, with particular emphasis upon Canadian effort in these directions. Above are some of the leaders in this new society. The Patron is His Honor Dr. H. A. Bruce (4), Lieutenant-Governor of Ontario. President, Professor Pelham Edgar (2), of Victoria College, Toronto; Vice-President and Chairman of the Council, John M. Gibson (1), well known author, journalist and lecturer; Second Vice-president, Dr. J. J. Pratt (3), of Victoria College, well known Canadian Poet. Organizing Director, Miss Ethel W. Rogers (5), Toronto. Photo of Professor Edgar by Violet Keene of Nelson Studio, Toronto.

A Queer Hobby

Cleveland Pastor Has About 10,000 Pictures Of Lecturers

Here stoss the Rev. James H. Dana, pastor of the Brooklyn United Presbyterian Church in Cleveland, Ohio, watched Pennsylvania Railroad train No. 1 whizzing past him seven times every day when he was a little boy in Knox, Ohio, because he was building a strong foundation for him.

Nothing particularly remarkable about that, is there? Who has not felt a thrill at sight of a great snorting "iron horse" galloping with rhythmic clackety-clack over the narrow bands of steel rails?

But the Rev. Mr. Dana turned his interest into a hobby. He began back in 1905. And any thought that this is a hobby that would not last is completely dispelled by a glance at his big filing cabinet which, he says, contains between 15,000 and 10,000 locomotive pictures. All are as carefully arranged as a botanist might classify floral specimens. Rev. Mr. Dana took most of them himself. Others he acquired through trades with other collectors.

There are about 250 "specially classified men" who have been taking locomotive pictures for years, he says. They are organized into the Railway and Locomotive Historical Society. He has corresponded and traded pictures with some of the members for years and never met them. A few have visited him here, or he has gone to see them and their collections.

Almost all the members of the society have become professional men since railroading though it includes one railroad president. The collections have practically no monetary value to the possessor, but are a labor of love. All the collectors fail to find much interest in the electric locomotives, Rev. Mr. Dana said. They find it is not as picturesque or as romantic to the steam locomotive training ground days.

And the motor bus and airplane? Oh, well, locomotive fans just can't help being "agin" anything which threatens seriously to cut in on the railroads.

Popular Notion Wrong

Blood-Transfusion Results and Does Not Weaken Donor

The popular notion that blood-transfusion from a healthy human the donor of the blood was exploded at Lucerne by the revelations of F. L. Oliver, honorary secretary of the Blood Transfusion Service of the British Red Cross.

This service consists of about 1,300 men and women, ranging in age from 18 to 60, who are attending London hospitals regularly to give blood to patients requiring it. On an average certain donors per day are supplied, but more than a score have been used on a single day.

Oliver says that it is extremely rare for a donor not to be back at his or her work within an hour after the transfusion.

"So far as athletes are concerned," he stated, "some young man performing feats for trans-Channel on Friday or Saturday, as it follows such a feeling of fitness for football, hockey or rowing."

Miss Amy Gentry, who recently won the Women's Amateur Rowing championship of England in a regular dance, has been transfusion, having taken place ten days before contest.

"Dear Mr. Editor—Will you please read the enclosed short story carefully and return it to me with your candid criticism as soon as possible, as I have other irons in the fire."

"Dear Sir: Remove iron and insert short story."

Museum Is Important

Requisite Amount Of Gate Which Fails In Both

The museum, which sweeps across the Indian Ocean during the season from the end of May to September is one of the most important factors in Indian prosperity.

Nearly the whole amount of rain which falls in India during the year comes in the monsoon, and the sixty European trading companies regarded of their voyages to the East according to the monsoons.

Today sailors vary their course during the monsoon, which is really a reversal of the normal winds over the ocean.

In the Arabian Sea the normal wind is the northeast trade wind, but actually it blows only in the cool season. When the sun is overhead in the north of India a depression develops in the northwest. As a result, the northeast trade wind blows over the Equator and then circles round the centre of depression or low pressure, reaching India as a southwest wind.

Eight Pacific type locomotives in England have travelled a total of 4,388,615 miles.

Depression And Family Life

Unemployed Husbands Should Not Spend Too Much Time At Home

Unemployed husbands are warned [illegible] wives are cautioned not to punish their absence resolutely in a report on "What the Depression Is Doing To Family Life," issued by the United States Committee for Mental Hygiene

When the breadwinner loses his job, the report says, there is often seen a tendency in the other members of the family to blame him for their difficulties. Sometimes the circumstances in which they find themselves. His usually reacts in one of several ways. Sometimes he gives in and adopts a hanging air

"In this case he often develops numerous symptoms of apparent physical disease (headache, general weakness, vague pains here and there) for [illegible] Sometimes [illegible] adequate physical cause. However, this man does not deliberately and intentionally manufacture his [illegible]

"Perhaps, adds the report, "father should not spend so much time at home. There is sometimes a marked increase in hostility toward the father when, because of unemployment, he begins to function more actively in the domestic scene. His presence at home, during the day, disrupts domestic routine and to throw many of the usual daytime customs of the family out of gear."

On the other hand, the report finds evidence "there is less juvenile delinquency at present because meanwhile of failure are spending more time with their children at home."

What Pay the Fiddler

View Of United States Paper On Wizard Prohibition

The British Columbia have raised that Canadian wheat shipped through American ports cannot be given reported preference unless some scheme for a "through bill of lading" can be worked out, which nobody seems to think likely. Consequently, Canadian wheat has now turned through Baltimore, one year to the tune of 18,000,000 bushels, will avoid our elevators, Stewart Henderson, who is traffic manager of the Baltimore Chamber of Commerce, concludes from this that "here can play of the same game in the United States." This is a wise conclusion, and one too commonly ignored by our politicians, who appear to think that the operation of the law is mathematically ignore the facts of our debts and pursue a reckless economic policy generally with no fear of reprisal. Well, Ottawa is one fruit of that blind confidence, and the grain elevators of Baltimore will be another. Those who must pay the fiddler for the present time of economic nationalism.—Baltimore Sun.

History Hashed By Rain

London's Great Guns Made In Pioneer Wolverhampton Foundry

Every glamorous event in the magnificent pageant of English history has been marked by the deep booming of some great bell. The birth of kings and their coronation, martial triumphs, and the execution of traitors —all have been marked by the sounds of some bell made in the famous Whitechapel Foundry.

From it came the great cathedral bells of England—Canterbury, Winchester, Durham, Wells, Southwark, and St. Paul's. There was made the famous "Great Tom" of Lincoln, weighing 10,000 lbs.

In the fifteenth century courtyard here bells by tying in Queen Mary, which would have charmed the ears of [illegible]

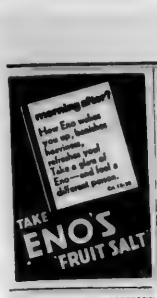
In the Whitechapel Foundry [illegible] is produced that has been made [illegible] these generations by generation, and which requires the greatest skill and experience to [illegible]

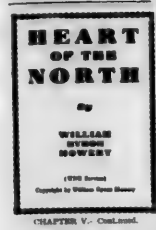
"Modern, like morning wines [illegible] I heard only a monotonous [illegible] I can't stand my back [illegible]

Lucidity: "Well, pretty a lawyer to your back, friend guy?"

Simplicity: "Why, I'm a lawyer."

W. N. U. 1979





CHAPTER V.- Continued.

Alan swore to wield this sword in Hell.

By mid-afternoon of that interminable day they came to the first straggling trees at the Thal-Annah edge. At deep twilight they reached the Alcocks Parks and the anchored launch.

Pedmenath had just returned from his useless trip up the south branch. In a few words he understood all that had happened. With one glance at his upset and staggering partners, he took their heavy burden from their shoulders.

Alan flung himself down beside Bill, driven to the limit of human endurance. His last waking thought was the grim satisfaction of knowing that he held a sword over his guilty arrogant officer and could bring him to account at last.

* * * * * * *

In his cabin Inspector Haskell sat behind his desk, waiting for Alan Baker to come in and report. He was thinking, thinking hard; and for all his self-control his nerves were jumpy.

Over in a corner Whipple sat at the table, pretending to write but in reality waiting there, as Haskell had bidden him. Something told Haskell that Haskell half an hour ago when he saw the patrol returning without the six bandits and with Constable Yeager desperately wounded. He knew the details of that patrol already; Whipple had come up and privately told him. How the bandits had headed for Thal-Annah, and Alan Baker had warned. How Baker had run these six to earth and cornered them. How Pedmenath and the other three of economic nationalism.—Bal- had come up and joined in the chase.

As he knew, this crime was the most spectacular in years along the Three Rivers. The defeat administered to the police was the most stinging in a decade. This incident would have reverberations at headquarters. Superintendent Williamson would investigate. The very questions of that veteran old officer would be:

"Why in h - l did you order Baker to divide that patrol? Splitting up his detail that way didn't you realize that neither party would be able to handle those criminals?"

Not dreaming himself, Haskell knew he was caught. He knew he had made a capital mistake in a Force where a man's first mistake is usually his last. In these thirty minutes all his prospects of promotion in service, of smashing Alan Baker, of avenging Ainsworth Spaulding to himself, had come tumbling down like a house of cards, and he was thoroughly frightened.

It would spell ruin to his career if the facts of the patrol became known. A like blame of the shameful defeat, my capacity at his door Baker surely resented that; Baker surely was going to use that record against him. it was war now, open and avowed war between them.

Step by step, logic led him to the one and only recourse he had. If Williamson ever found out he had ordered that patrol split, he was sunk. Therefore Williamson must not find out There was a way to keep him from knowing the facts.

Haskell tried to stir his conscience by thinking that Baker had wanted the patrol to fail. If that was so, then the measure was exactly what the sergeant had coming to him. He ought to be smashed, and smashed hard. . . . You've got to fight fire with fire. . . . .

* * * * * * *

Still in his muddied and torn uniform, Alan came down the slope toward Haskell's cabin, intending to have a showdown once and for all. The indulgent scene had not been at all to his liking. Haskell's callous attitude toward a defenseless, grief-stricken girl seemed to him an indent to the man's real manhood.

Still keeping his sword hidden from Haskell, he hesitated the moment of the door and in the Income. As he sketched his plan briefly, he saw that Haskell, listening to him coldly, was not even interested. An unconcern came over him. What was Haskell thinking? Didn't the man realize he had made a fatal mistake?

Alan summed up his plan: "In three weeks I want to have a patrol lying low on the Income. I'll take Hardcock and Pedmenath, and I want good "breeds on special commission—"

Haskell stopped him.

"I'm not interested in your plan, sergeant. You're merely making a long guess about what they'd do. It sounds like—"

"About as thin as my guess that they'd take the north branch into the Thal-Annah?" Alan flung back at him. "I made a mistake, I confess. Now, get this straight inspector: I'm going to make that trip. I didn't come in here to ask your permission. You've relieved me of my patrol. If Superintendent Williamson hears about that, you won't have a chance to wreck me. You'll have your hands full of this Income trip, or Williamson is going to hear d—d quick."

The threat daunted Haskell not at all. He knew he could have heard Alan's side now fought and dreamed; his through my veins the changeful blood.

Of diverse lives has streamed.

And sometimes I must ask,
As life's so strangely runs,
Which of the lives myself is I,
How much those other ones?

New Bow For Violin

German Fiddler Finds Silver Wires Give Good Tone

For centuries past the violin bow has been made of horsehair. It is perhaps a lucky thing that, just as the bass is disappearing, a German fiddler has invented a bow string with silver wires. These wires are of about the same thickness as horsehair, and as they are elegantly roughened on the surface they vibrate the strings perfectly without the use of resin. The bass, it is claimed, is far better than is given by the ordinary bow. It is not commercially available as this contingent as yet.

Little Helps For This Week

"Whatsoever ye do, do it heartily as to the Lord and not unto men."—Colossians 3:23.

"Not with eye-service as man pleasers; but with singleness of heart, fearing God."—Colossians 3:22.

Teach me my God and King,
In all things Thee to see,
And what I do in anything,
To do it as for Thee.—G. Herbert.

There is no action so slight or so mean but it may be done to a purpose, and ennobled therefore; nor is there any purpose so great but that slight actions may help it.—J. Ruskin.

Every duty involves the whole principle of obedience. And little duties make the will dutiful and prompt to obey. Little obedience lead into great. The daily round of duty is full of probation and of discipline; it trains the heart, will, and conscience. We need not be prophets or apostles, and the commonest life may be full of perfection. The duties of home are a discipline for the ministries of heaven. H. E. Manning

Sounded Like Phrase!

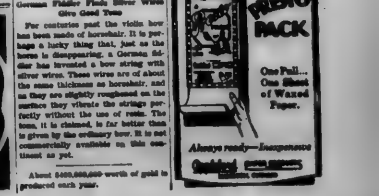
The English Alpine visitor was met in the lounge of the hotel by a Frenchman.

"Ah," exclaimed the latter, "I've heard about you. You climbed the Matterhorn. That is a feat to be proud of."

The Englishman laughed.

"Pardon me, sir," he said, "you mean "feat," do you not?"

"Ah," said the Frenchman, greatly excited, "so you climbed it more than once, eh?"



Almost $400,000,000 worth of gold is produced each year.

COMING EVENTS

The regular monthly meeting of the St. George's W. A. will be held at the home of Mrs. S. Barnett on Thursday, Feb. 2nd. Everybody welcome.

The United Church Ladies Aid will meet at the home of Mrs. Robertson on Thursday afternoon, Feb. 2nd at 2:30 p.m.

The Josephburg Junior U.F.A. will hold a DANCE on FRIDAY, FEB. 17th, in the Josephburg School.

Admission: Gent, $1.00; Lady, 50c.

The regular monthly meeting of the Fort Saskatchewan Women's Institute will be held in the Union Hall on Thursday, Feb. 9th, at 3 p.m.

Mr. Hon. Hemsley will give an address on "School Festivals". Home members welcome.

Alberta's total export of cattle during 1922 was 96,704 head, which was slightly less than the total for the previous year.

DIED

MRS. MARY ELIZABETH NELSON

The funeral service of Mary Elizabeth Nelson, widow of the late C. L. Nelson of Fort Saskatchewan, who passed away at her residence at Fort Saskatchewan on January 30, aged 77 years, was held on Saturday, afternoon at 2:30 o'clock at the Fort Saskatchewan United church. Rev Mr. Hamilton officiated and interment took place in the Fort Saskatchewan cemetery. The pallbearers were: Messrs. A. H. Rogers, S. O. Jones, J. Graham, H. Staples, T. W. Hunter and A. Truby. Beautiful floral tributes were received from: the family, Mr. and Mrs. Jennings, Mrs. Kingsley, Mr. and Mrs. T. W. Hunter, Mr. and Mrs. Harper, Mr. and Mrs. Witherspoon, the Westover family. She is survived by one son, W. H. Bonds of Offord, Alberta; one daughter, Mrs. E. E. Sunley of Fort Saskatchewan and one brother, Milton, of Parrsboro, Indiana, Howard and McBride, Several nieces.

LOCAL NEWS

On Friday evening, January 27th, the St. George's A.Y.P.A. held a most successful bridge-whist drive.

Thirteen tables were in play at the following homes:— Mrs. Reed's, Mrs. T.W.S. Henry's, Mrs. W. E. Roberts, and Mrs. Ed. Graham's.

Some twenty hands were played the honors going to Miss Lillian Bray and Mrs. Henry's and Mr. Arnold Hunt at Mrs. Reed's.

Mrs. A. H. Rogers, Secretary-Treasurer of the Alberta School Trustees' attended a session of the executive in Edmonton, on Tuesday morning. The session will open for a three day convention on Wednesday morning when 200 delegates are expected to attend.

We are glad to see Mr. A. H. Gibson up and around again after his lengthy illness.

Robert Burn's Night was celebrated by the Fort Saskatchewan on Friday night at the home of Mr. and Mrs. Harry Thomas.

On Friday morning the Beagle arrived by mail from Glasgow, Scotland to Mrs. Thoms, all packed in oatmeal and in the best of health, ready for the day. The occasion of that wonderful piece of music "The Star of Bobbie Burns" the guests sat down to a beautiful table adorned with Scotch Heaths, Currant Buns, and Scotch short bread. Everyone voted for another "Burns' Night" next year.

The guest were: Mr. and Mrs. A.M. Weir, Mr. and Mrs. J. Hargraves, Mr. and Mrs. W. E. Roberts, and Miss Betty West.

CARD OF THANKS

We wish to thank the many friends for their kindness and sympathy shown during our recent bereavement and for the beautiful floral tributes. Mr. and Mrs. W. H. Steele. Mr. and Mrs. E. H. Sunley and family.

The McEachern Family wish to thank their many friends for the kindness and sympathy shown during their recent bereavement, also for the many beautiful floral tributes received.

FORT SASKATCHEWAN RECORD

Published Every Wednesday

G. Neale, Editor and Publisher

WEDNESDAY, FEB. 1st, 1923

During the past two months "The Record" has been conducting a "Will Trade" column, which has proven a success. We might say that practically every article was disposed of, to the entire satisfaction of both parties.

For example:—Three weeks ago we ran two advertisements in this column, one—a radio and the other—Williams Sewing Machine. These advertisements appeared in this column three weeks, and were quickly disposed of. For the small sum of $1.50, only dollars worth of value was received. Last week we had a "Cow and Calf in the For Sale column to be sold at $95.00, this sale was snapped up on Friday, one day after the paper was published, and the owner said he could have sold more.

So it all goes to show "that if you have something the public wants, at the right price, you can quickly dispose of the article advertised".

Advertising through the columns of this paper is the best medium at the lowest cost.

Have you bought your ticket to the Fort Curling Club Jamboree? If not do so before Friday and your votes might be the means of putting your candidate in for Queen.

The various committees are all working smoothly and everything promises to go our big.

What with direct, tickets and radio advertising, a fine turnout is expected.

Nominations for four vacancies on the town council, and three vacancies on the school board and mayorship, will take place on Monday morning next in the town council chamber. There are obligations in connection with the above offices and every ratepayer should consider well his acceptability before accepting such a responsible position.

Will Trade

—50 Pullets to trade for Seed Barley or Oats. Or what have you.

Our charge is 25 cents per insertion, paid in advance, of not more than one (1) article. Every insertion will bear a number, when more than one advertisements appears, and interested parties may be put in touch with one another by applying at The Record. Phone 39.

FOR SALE

—Wanted few weighing 200 to 300 lbs. Apply to Geo. F. Hohr

UNITED CHURCH OF CANADA

11 a.m. Church School—Rev. R. W. Hibbert in charge.

7:30 p.m. Evening Worship—Prof. The Rev. A. D. Miller, D.D will preach.

ST. GEORGE'S CHURCH

5th Sunday after Epiphany

Holy Communion 8 a.m.
Choral Eucharist 11 a.m.
Evensong 7:00 p.m.

Sunday School 11 a.m.
Bible Class 12:15 p.m.

BORN

Born to—Mr. and Mrs. F. W. Smith of Fort Saskatchewan on Tuesday, Jan. 31st, at the Hillcrest Hospital a daughter.

Soaring prices in gasoline have caused motorists in Malaya to seek low fuel-consumption models.

Women, who are the biggest buyers of the goods you sell, are, as a class, responsive to Advertising. If you have confidence in your products . . . . if they are the right goods at the right prices . . . Advertise them.

Curling Club's Jamboree Draws Large Crowd

Dominion one of the largest events in years, the Fort Curling Club's Jamboree held here last Friday evening was a great success. The weather was cool, and everything was in fine condition, with everybody having a grand time.

All of three rounds of advance tickets, whereby the votes counted for Carnival queen, Miss Ada Truby, the third's co-ordinate was elected Queen of the Carnival.

The grand march made up of all fifteen in fancy costumes; and the Queen and Princesses to the throne of ice, where Rev. Mr. Hodgins officiated in a few words, crowned Miss Truby, Queen of the Carnival.

Judging of the fancy costume and other events took place after, with the following winners:—

Ladies' Fancy Dress, Miss Rose Truby, Ladies' Comic, Mrs. Lane.

Girls' Fancy Dress 10 to 16 years, Peggy Graham. Girls' Comic, 10 to 16 years C. Thomas. Girls' Fancy Dress, up to 10, Bernice Grumert. Girls' Comic up to 10, W. Robertson, and Misses Haines and Copeland.

Gents Fancy Dress, L. Thorne. Gents Comic, T. McNab. Boy's Fancy Dress, Bud Sutter. Boy's Comic 10 to 16, E. Truby. Boy's Fancy Dress, up to 10, D. Bacon. Boy's Comic up to 10, I. Dennis and R. Lamb.

In the speed skating events, the following were the winners: Boy's Race, up to 10 years, W. Carp. Boy's Race up to 16 years, Boy Berg, Gents Race, 220 Gaeaf.

A large number were in fancy costume and at times the judges had quite a time picking the winner.

The Judges of the fancy skating events were: Mrs. F. Rodger, Mrs. W. H. Walton, Rev. Mr. Hodgins, and Warden McLean, with Mr. A. M. Carwenden master of ceremonies.

In the Curling Rink, four rinks one of which was from Lamont, put on inaugurate games, which provided great amusement.

After the skating events, two pick-up teams played a lively game of broom ball, and a moonside dance in the Curling rink wound up the evening.

During the dance, the Carnival Queen drew the lucky number for the curling rocks, which went to Mr. Rinks of Edmonton.

Last but not least, the hot dog and coffee stand did a land office business during the evening.

Little Business Done At School Board Meeting

Minutes of a regular meeting of the Fort Saskatchewan School Board, held in the Council Chambers on Monday 6th, of February, 1923.

Present:- Mr. Atkinson, Chairman. Trustee:—Mr. R. Todd, Mr. R. A. Brown, Dr. C. H. Grumert.

The minutes of the last meeting held on the 9th January were read and adopted on motion of Mr. Todd.

Dr. Grumert appointed delegate to represent this district at the School Trustees convention held on the first three days in February, gave an interesting resume of the proceedings which, on a motion of Mr. Brown, was accepted, and the thanks of the Board extended to Dr. Grumert.

The following account was passed for payment on the motion of Mr. Brown:- G. A. Cranston, cost, $27.65.

Mr. Anderson, the Principal, was present, and discussed matters in connection with the School, with the Board.

The meeting adjourned on the motion of Dr. Grumert.

LEGISLATURE OPENS

The third session of the seventh Legislature opens on February 8th, and it is expected that the program of legislation will be light. Two new members will take their seats this session, namely, C. A. Bossenge, U.F.A. member for Camrose and Norman Hindsley, independent member for Calgary.

Municipal District Holds Busy Council Meeting

The Council of the Municipal District of Clover Bar, No. 917, held a regular monthly meeting on Tuesday, 31st, of January, with all members in attendance.

The Secretary submitted the financial statement for the year ending 31st, December.

These applications for direct relief were approved and recommended.

Mr. Jos. Brandy was appointed pound keeper for Division No 1, the pound to be kept on the N W 23-55-21-4.

Application was received from the Postmaster, Clover Bar, for the granting of a By-law by this Council, in order to enable him to close his office during the Carnival afternoon. The By-law was accordingly prepared by the Secretary and was given its first, second and final reading.

The application for Old Age Pension was approved and recommended.

The Secretary reported that seven applications had been made for farm help under the Unemployed Relief Scheme.

Considerable discussion took place over the financing of rural schools for the ensuing year. The Secretary reported that Ypres Valley had requested the erection of a rural district, and that homecroft taxes for this District would be collected by the Woodcock District.

With the passing of resumes the meeting adjourned at five thirty o'clock.

NOTICE

RATEPAYERS OF DIVISION 4 TO MEET SATURDAY

A meeting of the ratepayers of Division No. 4 will be held in Good Hope School House on Saturday, the 11th, February, commencing at 2 o'clock p.m.

Elections to be Held on Monday Next

Nominations were received on last Monday at the Town Hall for the positions of mayor, councillors, and school trustees.

Mayor G. T. Montgomery who is seeking re-election, will be opposed by J. R. Graf, whose term as councillor will expire shortly. For the four vacancies in the council, five names were put in, W. A. Graham, C. R. W. Magor, Gordon Neale, H. A. Watt, and Councillor F. D. Simmons, who seeks re-election. For the three school trustee vacancies six names were submitted, Fred Atkinson, Dr. W. P. Calhoun and R. Todd all seeking re-election, and Mrs. W. H. Walton, Dr. C. H. Turner and Rev. D. C. Ramsay. Elections takes place on February 12.

COMING EVENTS

The regular monthly meeting of the Fort Saskatchewan Women's Institute will be held in the Union Hall on Thursday, Feb. 9th, at 3 p.m.

Mr. Hon. Hemsley will give an address on "School Festivals". Home members welcome.

RADISSON CLUB DANCE

Fort Saskatchewan Club Dance

Friday, Feb. 16th, 1923

Masonic Hall Refreshments

Admission 50c

St. George's W.A. will hold a Valentine Tea and Business Man's Hot Supper on Saturday, Feb. 10th, at the home of Mrs. G. Neale. Tea from 3:30 till 6 o'clock. Business Men's supper at 6 o'clock 25 cents.

The members of the C.G.I.T Group Fort Saskatchewan will present the very amusing play "Mystery Island"

Friday, February 17th, at 8 p.m. in the Empress Theatre

Adults 35c. Children 15c

Entries to World Show From Alberta

Alberta's first entrant in the competitive classes of the World's Grain Show this summer is Harold M. Speer of Medicine, who is to show a sample of the crested wheat grass he has been developing during the past few years, and which has brought prospects of a crop per-centage of the returns. It is anticipated that there will be over 200 entries from Alberta. The provincial department of agriculture has agreed to pay half the entry fee on approved exhibits from the province.

GRASS AND CLOVER SEED

The Dominion Department of Agriculture is purchasing a considerable quantity of seed of timothy, awnless and clover for distribution to selected farmers of Alberta on contract that seed for pound will be returned from the first satisfactory crop produced. The receiver has the option in lieu of returning pound for pound, of paying for the seed in cash at one-half the net price delivered.

The distribution is under the supervision of a Provincial committee. Applications will be received until February, 25th and will be submitted to the committee immediately after that date. The committee reserves the right to reject or modify any applications. The maximum acreage allowed any applicant is twenty-five, which is reduced in the case of the less important crops.

Any farmer interested in this policy kindly get in touch with the Municipal office, and application forms will be obtained for them.

R. Roberts. Sec.

Taken from the Files

19 Years Ago Today

Thursday, Feb. 14, 1914

G. T. Montgomery was a delegate to the fair association held at Calgary last Thursday and Friday.

James Graham has just received a carload of Tofinge-Anderson Buggies for the spring business.

Mr. and Mrs. W. L. H. White and son Billy of Edmonton, spent the week-end visiting Mayor and Mrs. Jones, and renewing a few old acquaintances.

On Tuesday afternoon, Mrs. Walton was hostess of a miscellaneous shower for Miss Mabel Graham, who is to be a bride of early spring. A number of articles, both useful and ornamental, were showered into a prettily decorated basket and presented to the bride elect by Miss Marjory McIntyre and Miss Aitken Orr.

Three rinks from here are competing in the bonspiel now going on at Edmonton, the rinks are skipped by Atkinson, Fetherstonhaugh, and Bowden.

Beaver Hills

Mr. Marshmeyer had the luck to shoot a silver fox last week; two escaped.

Max Otto has succeeded for thirty two coyotes so far, with traps and rifle and one timber wolf.

HOCKEY

"Tiz" Collins and his bowling band of hockey players are creating a record this year which right now is the best in the history of a Fort Border Hockey team. They have lost but 2 games in twenty games played thus far, in their last 15 successive they have not once been defeated. To make this record more outstanding one most point out that in many of the club's games away from home, they have played short-handed.

The locals have a tough assignment ahead of them to win the league title. They have 4 games to play and 3 of them are away. With Lamont also playing bang-up hockey and these two teams running neck and neck, it remains for the locals to win all four of these games. They play Bruderheim here on Friday night and your support at this game financially and otherwise is needed. The game this year have been discouraging and it is the hope of ambition of the boys to win this league and enter the 3 out of 5 games series with another of the other teams to decide who will have the coveted MacQueen cup. Should the boys get into this play-off series, they know that the people of this town and district will turn out in full force to see the games and this will help considerably to make amends for the small 'gate' taken in so far.

STANDING	W.	L.	Pts.
Fort	11	3	22
Lamont	13	4	26
Chipman	6	8	12
Bruderheim	1	14	2

The Fort Hockey Club and all lik hockey fans in the Fort hope that "Fannie" Fitzsoff will soon be back with the team again. "Fannie" has been working right winger of the Fort team nearly last the little finger of his left hand in a circular saw accident last week-end. His doctor holds little hope as to whether or not "Fannie" will play anymore hockey this winter, but the right winger says he'll be back to take part in the play-off game in a week from now. We hope to see him back soon.

Tabulating The Census.

In this machine age, and during a period of unemployment on a scale never before experienced, there is a tendency in some quarters to lay the chief blame for the prevailing unemployment to one factor,—the machine. It is being argued that man through its great inventive genius has succeeded so well that he is putting himself out of work; that the machine is now doing what man himself ought to do. It cannot be denied that the machine has displayed semi-power in many directions and ways. But, conversely, it cannot be denied that the machine has developed or made new things and added to them accessories to masses of the people who would otherwise be denied them that, in other directions and ways, the machine has created employment for men. Many examples of this might be given.

Aside from this, however, there is another fact that is too often overlooked, and that is, hundreds of things are now being made and done by machinery which could never be done at all if we had to depend upon manpower to do them. They would be economically impossible, and but for the machine, man would simply be denied these things which the machines now do or provide for him. In such instances the machine is not depriving man of employment, but is merely adding to the sum total of the world's goods, services, conveniences, even luxuries.

Let us devote this article to a concrete illustration of this fact, gleaned from a most interesting newspaper article. Can you imagine a machine that could do 240 separate feats at the same time? Can you imagine another that detects man-made mistakes? Yet the inventive genius of a Canadian has evolved such machines which are now at work in the Census Bureau at Ottawa, and unlike anything in the world. They are not replacing men and women, because as many, or more, persons are employed in the Census Bureau as in former years, but they are making thousands of calculations now possible which otherwise would never be made.

The 1931 census of Canada now being tabulated is the biggest job of its kind ever undertaken in this country. Were it not for the two machines referred to it would cost three times as much as it will to tabulate the information which will be published, and it would, therefore, never be undertaken. In addition, much more information will be compiled than will be published, but it will be available if and when required.

The two machines are the verifier and the tabulator. The first detects errors and the second counts 240 different facts from individual cards at the rate of 245 cards a minute.

The data taken by census enumerators is transcribed to small cards by punching holes for each fact recorded. A hole is punched in the proper place to indicate the sex, age, religion, nationality, language, racial origin, and other things of the person being counted. This card is then sent to the verifying machine to check possible errors. Duplicate cards are made on which conflicting pieces of information are recorded. For instance, if a person's age is 31 and he is listed by mistake as a non-voter, under 21, the cards is thrown into the discard by the machine and punched back for checking to correct the discrepancy.

If a man gives his racial origin as Jewish and his religion as Baptist the card is thrown out and is discarded. If the age is recorded in plus sign hash. The machine, of course, cannot detect a straight error in a single fact, such as the wrong age, or the wrong sex, but it can and does detect all discrepancies of conflicting data.

The tabulator is the only machine in the world which will count 240 separate facts at the same time, and, as already mentioned, it does it at the rate of 245 cards a minute.

Just how these two uncanny, almost human, machines do their work space will not permit of a description, assuredly interesting as it would be. They were invented by A. H. Thornton, mechanical superintendent of the Dominion Bureau of Statistics, and were built under his personal direction and that of his assistant, F. Bollaie. These two men worked for three years on these machines. They had some little difficulty persuading the Government to allow them to build the machines as commercial manufacturers scoffed and said they would never work. The machines have been working for 18 months without a hitch.

The next largest machine in the world is at Washington and is used by the United States Census Bureau. It, however, handles only 40 facts at a time compared with the 240 tabulated by the Canadian machine. The largest commercial machine in the world tabulates only 80 facts and cannot be bought it can only be rented. Before the next U.S. census is taken, Mr. Thornton's machine will likely be in operation at Washington. Canada is miles ahead of the United States in this respect.

Development of the machine was an accumulation of the theory of necessity being the mother of invention. Had Mr. Thornton and Mr. Bollaie not set to work in their little machine shop it would most likely never have been invented. Private companies would scarcely devote time and expense because there is little market. The machine is of use only for census purposes and the Dominion Government is the only customer in Canada.

But to emphasize the idea mentioned at the outset of this article. Let it be repeated that these machines are not throwing people out of jobs. The tabulation of the present census will not count less than previous ones and as many or more people are employed. What the machine does is enable the Bureau to do much more work, to tabulate much more information than ever before, and which, without the machines, never would be tabulated.

By much information will be tabulated. But, it is stated, if it were all published the volumes would fill the Parliament Buildings at Ottawa and the printing costs would approach the operating costs of the Canadian National Railways. By careful selection the Bureau will decide what will be published. What figures will be of greatest use to the people of Canada as a whole. But the whole picture will be kept on file in Ottawa. The Bureau of Statistics will be a veritable gold mine for research workers and students of sociology and economics. All of this information, carefully tabulated, will be available to them.

New Tire Guarantee Announced

New Warranty Hoped To Result In More Satisfactory Service

Much of the confusion incidental to tire adjustment claims will be eliminated by a new guarantee announced by all standard-line tire manufacturers. Tire companies believe that no longer will car owners find themselves in disputes with dealers or manufacturers as to the validity of their claims.

The new guarantee, planned to remove all contentious possibilities, warrants tires against all gradual passenger car service for 9 months or 12 months, depending on the type of tire, and a guarantee certificate accompanies each tire.

All road hazards, excepting punctures and running flat, are covered by the new guarantee and provision is made for a satisfactory repair or a pro rata adjustment based on the time of the guarantee. It will be seen that, under this new warranty, allowances will be made for such injuries as stone-bruises, cuts, wheels out of line, faulty brakes, etc. not previously covered by tire guarantees. This is a new and definite advantage to the tire user.

Dealers are now selling tires under the new guarantee and motorists are warned that a certificate should be obtained with each new tire. The new guarantee covers, also, tires sold on cars passed on new passenger cars to be used by dealers as demonstrators.

Leading tire manufacturers believe the new warranty will result in more satisfactory automobile service through the elimination of disputes and the broadened coverage of the warranty.

Canadian Seeds Exchanged

Canadian Wild Flower Seeds For Planting On War Graves In Europe

A report issued by the Division of Botany of the Dominion Experimental Farms Branch show that the annual exchange list of seeds, collected by the Division, comprised some 1,500 species, and a total of 6,807 packets of seeds, 150 rooted plants and 11 cuttings were sent out in 110 boxes or other botanical institutions, the world. In return, 11,171 packets of seeds and 21 cuttings were received from foreign gardens. Special supplies were obtained, as required, for scientific work in Canada. Twenty-eight packets of seed of Canadian wild flowers were sent to the War Graves Committee for planting on the battlefields of Europe. Other activities included studies of the life history of noxious weeds, and of chemical methods of eradication.

Only One Answer

Japan's Threat To Leave League Should Be Ignored

There is only one appropriate answer for Japan's threat to withdraw from the League if the resolution censuring her proceedings in Manchuria is not withdrawn; and that is to ignore it entirely. Japan is the aggressor nation which has brought the support of Japan by a supine acquiescence in her violations of the League of Nations which is temporarily deprived of her support for refusing to do so, there cannot be a moment's hesitation.—London News-Chronicle.

To Improve Wheat Prices

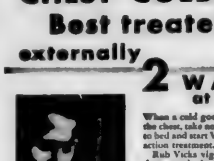
Best and Most Effective Way Is To Reduce Acreage

We have led the world in increasing wheat acreage following the disappearance of Russia and the Balkan countries from the ranks of the exporters. There is every reason why we should now set the example of reducing acreage. All the world wheat conferences which could be held, all the legislation which could be passed, would not be so effective in the direction of improving wheat prices as this one step.—Winnipeg Tribune.

It takes thirty-five men about three months to paint the dome of the Capitol at Washington and eight gallons of paint to cover one square foot of the task.

The apple tree grows more rapidly than any other fruit tree.

CHEST COLDS Best treated externally



Mother! The right couple of children can usually be relieved by one application of Vicks. Rub on freely and cover with warm flannel.

2 WAYS at once!

When a cold goes down into the chest, take no chances. Go on bed and start Vicks double-action treatment.

Rub Vicks vigorously over throat and chest and cover with warm flannel. Relief is two-fold:

(1) By stimulation—Through the skin like a plaster Vicks "draws out" tightness and soreness.

(2) By inhalation—Its medicated vapors released by the heat of the body are inhaled direct to the air-passages.

To increase the stimulative effect, redden the skin over throat and chest with hot wet towels before applying Vicks.

VICKS VAPORUB

OVER 17 MILLION JARS USED YEARLY

Foreign Crop Distribution

Policy Inaugurated Last Year Is To Be Continued

The foreign crop distribution policy inaugurated last year by the federal minister of agriculture, the Honorable Robert Weir, is to be continued in 1933. This policy was designed to encourage and stimulate the production of seed grasses and clover in order that more feed of good quality may be available for livestock and thus develop pursuits of livestock in the areas where it is possible to do so.

There has been named a provincial committee to handle this work, composed of T. M. Stevenson, agronologist, forage crop laboratory, Saskatoon, who is responsible for supplying information on varieties, methods of growing and other technical data; S. H. Vigor, field crops commissioner, provincial department of agriculture, Regina, who is responsible for the selection of growers, and will, therefore, receive all applications from farmers wishing to participate in the distribution of seed, Federal Young, district inspector, Dominion seed branch, Saskatoon, who will purchase and distribute the seed and also be responsible for the collection of sums.

Selected lots of brome, western rye grass, timothy and alfalfa will be distributed. Any farmer may apply for one kind of seed grass or clover, where the maximum acreage is 20 acres per applicant. In the case of alfalfa, need for 10 acres can be secured, and where clover seed is given as supplement for alfalfa and timothy grass. The total acreage, should this be allowed, would be 25, that is a grower may get alfalfa for 10 acres and grasses for 15.

Applicants must agree to return pound for pound of seed of equal grade from the first cutting secured the crop, or pay in cash one-half the actual cost of the seed delivered within two years. The return of seed or payment will be made to the Dominion seed branch.

A passenger on a railroad runs only one chance in 37,500,000 of getting killed, statisticians announce. And whats the chance of getting a cinder in the eye?

For Heart Ills Weak Nerves Sleepless Nights Dizziness

Mrs. Ethel Wallenberg, Ont., writes:—"I suffered from weak nerves, dizzy spells, and sleepless nights.

I saw your advertisement for Milburn's Heart and Nerve Pills and decided to try them although I did not know what they were. I got a box and finished it and as they have proved of great help to me.

I can now sleep well and again, but can nearly always get back to the land."

Price 50 cents per box, 3 boxes for $1.25, all dealers or The T. Milburn Co., Ltd., Toronto, Ont.

How Soviet Russia Trades

Demands Cash From Others But Unlimited Credit For Itself

How the barter scheme with Soviet Russia will work out we will very likely not be allowed to know, because the Canadian Government is asked to guarantee $4,000,000, but in the case of a real trade agreement we get some idea. Italy has a trading pact drawn up in 1924, which expires next August, and the Italian Government has apparently had enough of it as nation is expected to be given within the next few weeks to arrange to cancel it. Not only has the trade been very one-sided, but while the Soviet trade agency for Italian purchases, it demanded four years and four months credit for itself. Now the Soviet has put forward feelers for longer credit. That might be five years, six years, seven, or how long will you give.

Much as nations want trade, five years or more credit compared with cash "is a bit too thick."—St. Thomas Times-Journal.

Not Enough To Go Round

Farmers Soon On Getting Pure Bred Breeding Stock

Reports received by A. A. MacMillan, Chief of the Sheep and Swine Division of the Dominion Department of Agriculture, show that Saskatchewan breeders, like hog breeders all over Canada, are particularly keen on getting pure bred breeding stock. All the pure bred sows from the Experimental Farm at Moose Jaw were purchased on the account of the Federal Department for distribution under the Brood Sow policy. And while the boosted like a large order to disperse of Ontario, only to have the high quality stock that it literally sold itself; and, as a matter of fact, it has been quite impossible to service the large number of enquiries for pure bred gilts which this sale attracted.

Over 56,000 pounds of herring scales have been sold by fishermen of New Brunswick to manufacturers of artificial pearls.

According to the 1930 census South Carolina has the highest percentage of illiteracy.

Great Drive Of Reindeer From Alaska To Canada To End Early This Spring

In March or April of this year the great drive of reindeer from Alaska to Canada's North West Territories it is expected will be completed with the placing of the herd on the winter grazing range to the east of the delta of the Mackenzie River and the work of building up a new source of supply of food and clothing for the Dominion's northern natives will be begun. Department of the Interior representatives will take delivery of the herd from the men who have conducted the movement across the thousands of miles of Arctic terrain.

The most recent advice of the herd was contained in a wireless report received by the Dominion Lands Administration of the Department of the Interior to the effect that contract with the herd of approximately 2,300 animals had been effected at Icy Reef, Alaska, about twenty miles west of Demarcation Point, which is the point where the boundary between Alaska and the Yukon Territory of Canada reaches the Arctic Ocean. A party from the Canadian reindeer station had been sent out on November 22 for the purpose of getting in touch with the drive and to accompany it in the crossing of the Mackenzie. On December 4 they had effected the "contact" and joined those in charge of the movement.

Preparations for the reception of the herd were completed early this winter and the stations on both the summer grazing grounds along the coast near KING Point east of the mouth of the Mackenzie and on the winter range behind them inland along the east branch of the Mackenzie River are ready for the arrival of the reindeer. Mr. A. H. Ferrold, of the Dominion Lands Administration of the Department of the Interior, is in charge of the reindeer camps, and his staff includes three Eskimo herders.

The winter station is the larger of the two and in many ways the more important as the herd will be kept at or near part of the year on the grazing grounds in its vicinity then at KING point station. A large corral has been erected on a fairly level plain about one-quarter of a mile wide from which the Caribou hills rise to a height of about 800 feet. The plain was at one time densely timbered, but the forest was destroyed by fire about half a century ago and the new growth consists mostly of canoe birch and spruce. On a high plateau to the south of the station there are no trees but it carries a splendid cover of reindeer moss. This area and that adjoining the upper Babbage below the station will constitute the principal winter range. The station is also only suitable for winter quarters Admiral, and several by sailor by water, while the distance between the winter and summer ranges is sixty miles by winter trail and considerably more by water. The summer station at the upper station includes a two-room log house, occupied by the officer in charge; three log cabins for herders; a log building as cold-storage quarters; two two-room houses; and a workshop. The station is also equipped with a power boat for patrolling during open navigation.

The summer station near Kittigazuit has four buildings, one of which is a frame dwelling and the other three are of log construction. One mile to the north in the main corral, the height of which is 600 feet in diameter. The more northerly grazing area, which is located along the coast to the west by point in the summer, is well watered and altogether the location of the combined ranges is considered very satisfactory for the first stage of the work of introducing reindeer into the Canadian North.

Bargain For Some One

Walter Lund, 36, Winnipeg fireman, needs to end his personal depression by getting married. Any woman who will pay his $800 hospital bill, provide him with a good home and pay for a full course of guitar lessons can have him for husband, he has announced.

Alberta Sugar Beet Crop

Sugar Produced Exported To Total 65,000,000 Pounds

Final estimates on Alberta's sugar beet crop for the past season, given by the Raymond sugar factory, show that 126,000 tons of beets were harvested over the contracted acreage and the sugar run will total 65,000,000 pounds. The best growers of southern Alberta this year passed the 10-ton per acre average for the total acreage under contract. In one district the average reached almost 12 tons, while some individual crops ran 15 to 20 tons. The season yielded the heaviest crop yet known in the province. With increased capacity installed last fall, the factory at Raymond produced 450,000 bags of sugar this season, or about six times the amount turned out in 1925.

A FASHIONABLY SLENDER FIGURE BEGINS GRACEFULLY AND LOVELY IN OUTLINE.

Section Working Out Grants

Many Taking Up Northern Land Are On Relief

Ninety-five per cent of the new settlers in the north who took up and under the $300 and $600 government settlement scheme last year are on relief now, Arthur Kendall, chief executive officer of the provincial relief commission stated.

These settlers are working out their relief grants, Mr Kendall said, by clearing out brush along proposed road routes and the general work of pushing roads through the north will be continued this year. This project will provide roads that might otherwise not be started for some time to come.

Mr Kendall also stated that the situation so far as single destitute men are concerned is quite satisfactory in the organization. He declared at present there are only about a dozen men living at the immigration hall in Prince Albert.

The situation with regard to camping for the single destitute in the province is generally satisfactory, Mr Kendall stated. These are cases where men who qualified for agricultural work cannot be definitely placed in concentration camps but they are few in comparison to those taken care of in useful occupations.

One Of Perishable Foods

Eggs Should Be Kept In Clean Cool Place

Eggs belong to the same food class as meat or milk. They are almost as perishable. Just the reception should be closed in a hard shell they get rougher treatment. The egg shell is porous. Dirt and filth, mold and disease germs can pass through and spoil an egg. The water of the egg will evaporate through the egg shell almost as fast as if it were in an open pan.

Many a housewife allows eggs to grow stale in a warm pantry shelf or to take in the odors of a food locker and then blames the farmer or grocer for selling bad eggs.

It could be unfair to produce a bad egg or to produce a good egg. Most egg losses are, actually, preventable.

A Lucky Escape

One night a man in a car was run down at the railway crossing. Consequently the old gentleman in charge had to appear in court. After a grueling cross-examination he was still unshaken. He said he had been on duty there for forty years without a single accident.

The following day the superintendent of the line called him into his office.

"You did wonderfully well yesterday, Tom," he said. "I was afraid at first that you might break down."

"No, sir," replied Tom, "not as long as that lawyer didn't ask me whether my lantern was lit."

Marked Increase In The Number Of Inhabited Farms In Saskatchewan Is Noted

Shoots Elk In Alberta

Veteran Sportsman Proudly Displaying Handsome Set Of Antlers

One of the first hunters to bring down an elk in northern Alberta since the ban on shooting of them annuals was removed in certain parts of the province, George Fink, veteran sportsman of Fulun, is proudly displaying a handsome 12-point set of antlers.

The animal was shot by Mr Fink in the Brazeau district about 70 miles northwest of Edmonton, where the Brazeau River joins the Saskatchewan.

The particular elk that fell to Mr Fink was one of three feeding at a rancher's haystack close to the Saskatchewan River

The antlers measure 56 inches from tip to tip and an equal distance from the base of the head to the tip of the longest antler. This is a fairly large set, according to Mr Fink.

Some years ago Mr. Fink shot a deer that veteran hunters declared was the third largest ever shot in the province.

On another occasion he aroused much interest by shooting an albino woodpecker.

Elk are extremely plentiful in the Brazeau district the hunter claims.

Proud Of Health Record

Communicable Diseases In Alberta Last Year Lowest On Record

General health conditions in Alberta during the past year were the best on record, Dr. W. A. Cunningham, director of public health states in his annual report. Communicable diseases were concerned. The provincial department of health sums up briefly in this report, remarkable establishing a new high mark for freedom from such diseases.

Notwithstanding economic conditions which would tend to be expected to aggravate ill-health, there was a marked improvement in 1932 over any previous years.

The death rate for the year will fall somewhat below that of the previous year, which was 7.2 deaths per 1,000 population. Infant mortality in 1932 made a considerable and highly satisfactory drop, being only 59 deaths of children under one year of age, out of 1,000 births, as against 67 the year before.

Other figures that, along with the death rate of infants, are regarded as particularly significant of the general health situation are those showing the maternal mortality rate. This was 3.8 per 1,000 living births, the lowest since the department has been keeping records.

SMILING STARS AT PREMIERE

Two of moviedom's leading lights, Douglas Fairbanks, Jr., and his wife, the talented Joan Crawford, are shown as they arrived at a Hollywood theatre for the premiere of a new picture recently. The smiles that are displayed by the popular couple here seem to give the lie to rumors that have circulated lately that all is not well in the Fairbanks household.

Better Grade Barley

Production Is Being Sought, Agronomist Says

By Canadian Farmers

Production of good barley is being sought by western Canadian farmers, particularly in Saskatchewan, although there is always a healthy demand for a market for a quality barley, said George Bailey, of Winnipeg, manager of the Canadian Co-operative.

The subject was discussed at Pasqua Saskatoon between Mr Bailey, J. A. Blair, manager of the Regina Brewing Company, and C. H. Cowan, Black, president of Black and Armstrong, Winnipeg and president of the Western Breweries, Ltd.

"Why not have a reputation for good barley as well as for good wheat?" Mr Bailey argues. About 60,000,000 bushels of barley were produced in Canada last year, but much of it was poor, good only as feed.

A stocking 30 feet long hung from the roof of Albert Hall, in London, England, during a Christmas sale.

EXCESS FAT MELTS

Modern Treatment that Creates Energy

Some folks are naturally fat, but there's a lot of people who put on pounds of unhealthy fat because they don't get enough energy to move about to keep it off.

It's not laziness in most cases but a condition brought about by sluggishness of the internal organs the liver, bowels and kidneys. As a result poisons and harmful acids that kill vigor, ambition, and energy get into the blood the whole general tone of the body is lowered and fat accumulates.

Thousands of overstout men and women find in Kruschen Salts a perfectly safe, sure, and beneficial means of reducing.

The "little daily dose" of Kruschen Salts keeps the organs functioning properly every day, and fills you with that bubbling of radiant vitality and vigor that makes you know it's you and not "fatty" pulling out of your skin" with energy, instead of moping gloomy and reduction follows as a matter of course. Nature attends to that.

FREE TRIAL OFFER

If you have some kind friendly way to get Kruschen Salts into your system, you'll be glad you tried "Nature's Way" to reduce fat. Just send 10 cents (to cover postage) for a generous trial bottle. Address: Kruschen Salts, Dept. 1, 1780 Notre Dame St. W., Montreal, Que.

WORLD HAPPENINGS BRIEFLY TOLD

The ages of 128 old people entertained to a tea and concert by the Rotary Club of Sterling (Illinois) and the Woolery Child totalled 8,609 years.

Professor Agassiz Pleased said that men may fly to other planets in rocket planes in the future but they will not be able to come back.

John Galsworthy, British novelist and dramatist and 1932 Nobel prize winner, died January 31. He was 69 years old.

Building societies in England have advanced an average of $355,000,000 a year in the last three years to home builders.

Further cuts in federal appropriations for agriculture are believed inevitable in the estimates for the fiscal year beginning April 1 next.

Increased tariffs on imports to Britain has placed in a precarious condition the fish-receiving industry, started by the Free State Government in South Donegal five years ago.

Curtailment of war debts owed the United States has been approved by member organizations of the Chamber of Commerce of the United States.

Possible use of the X-ray to bring down aeroplanes was described to a group of scientists by Dr. J. W. M. Bunnaud, research fellow at the California Institute of Technology, Los Angeles.

The Italian Government accepted the offer of the United States Government for a discussion of the war debt as soon as possible after Franklin D. Roosevelt takes office as U.S. President.

Hon. Vincent Massey, former Canadian Minister to the United States, held the Central Ontario Liberal Association executive at Cobourg, Ont., that if the Liberal party succeeded in gaining power, the first step Labor would be to drop the tariff."

A correspondent says he would like to know the exact number of people in this country who don't play bridge. We start him off, we'll give him the names of the gentlemen who won our partner the other night.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile

— No Calomel needed

When you feel blue, depressed, sour on the world, with your whole body poisoned by the filth you permit to flood into your bowels.

Digestion and disinfection are being denied the food you eat because your digestive bowels are not functioning properly. Your liver is not delivering the bile which, when it flows freely into the bowels, should keep food moving, sweet and clean. Then you feel like living. You're cheerful, full of pep, and ambition.

Don't let your liver "loaf" on the job. Don't be constipated. Don't take mere temporary relief. Get at the cause of your trouble. Carter's Little Liver Pills are famous to get at the cause. They start the bile flowing freely. Ask for Carter's Little Liver Pills.

Announces New Find

Director Of Museum Believes He Has Discovered Tower Of Babel

What is believed to be the Ziggurat, or the Tower of Babel, in the ancient city of Akshak, has recently been discovered by Dr. Leroy Waterman, director of the University of Michigan-Cleveland Museum archaeological excavations in Mesopotamia.

The find is a mound about 70 feet high and 250 to 300 feet in diameter the same dimensions as a mound composed of sun-dried bricks, 30 feet thick and 15 to 20 feet high. Above the level of the wall are alternate layers of reeds and earth. The north side of the mound is a solid structure of unburned bricks.

Inscriptions in the mound appear to confirm the theory that it is the structure, which dates back to an at 4,000 B.C.

The Tower of Babel, according to legend of the Book of Genesis, was built by inhabitants of Babel with the intention of climbing to heaven. They were, however prevented through their speech being confounded.

A Profitable Occupation

Hollanders Find Valuable Articles Washed Ashore

Combing the beaches is a profitable occupation for thrifty Hollanders. When the tourists all go home from the seaside each year they make rich claims and work patiently for weeks. They go over the same patch of sand again and again, allowing for the influence of wind and waves. Some of the miners make considerable hauls, consisting of coins, gold and platinum jewellery and other articles of value.

Aerodromes are to be constructed on the Persian Gulf for the England-India line.

SUNDAY SCHOOL LESSON

FEBRUARY 12

JESUS TEACHING BY PARABLES —FOUR KINDS OF HEARERS

Golden Text: "Herein is My Father glorified that ye bear much fruit, and so shall ye be my disciples." John 15:8.

Lesson: Mark 4:1-20.
Devotional Reading: Psalm 119:9-16.

Explanation and Comments

The Scene, verses 1, 2. Last week's text told of the precaution Jesus took to have a boat in readiness in case the mass pressure of the crowds to escape from the [illegible] of Him. Now Mark tells of such an occasion. Jesus began His teaching sitting on the lake shore (Matthew 13:1); but took refuge in a boat as a great crowd bore down upon Him. From a safe distance off in the lake Jesus spoke a series of parables to the crowd that stood on the sloping beach facing Him. He sat by the water's edge and getting closer on the land, to Chrysostom's word picture the scene.

The Parable Of the Sower, verses 3-8. Very clear is the parable itself to those who have ever felt upon the hard-trodden wayside and could not enter the ground; it was devoured by the birds. Some seed fell on rocky ground where the soil was shallow. The rocks crop up everywhere in Palest ne, and the hills sleeping down to the lake have only a thin covering of soil. Seed there germinates quickly, being so near the warm surface, but the roots of the plant which quickly springs up cannot strike down deep, and it is soon withered by the sun. Some seed fell upon soil largely seen with thorns which choked the plants as they grew. And some fell upon soil so good that it yielded thirty-fold, sixty-fold, and a hundredfold. This hundredfold habit has seemed to some an exaggerated detail of the parable, but it was well within the harvest of the fertile Kedronian Valley.

The Purpose Of Parables, verse 9. Who hath ears to hear, let him hear: with these words Jesus ended His parable. Recall what Sunyan's Allegory says of Mr. Talkative. He talk-ed of prayer, of repentance, of faith, of the new birth, but he knows only in talk of them. Talking is not sufficient to prove that fruit is indeed in the heart and life.

Reasons For the Use Of Parables, verses 10-12. When the crowd had scattered, the disciples and those fellow followers of Jesus asked Him for an explanation of the parable just given. Jesus told them that they could understand in part the mystery of the Kingdom of God the deep truths of the Gospel but others could not, and therefore He uttered these truths by means of parables, illustrative stories.

The Explanation Of the Parable, verses 13-20. Jesus began His interpretation of the parable with a gentle rebuke. If they could not understand this parable, how could they expect to understand other parables?

Congress has revised the tariff 29 times.

RELIEVES COLDS WITHOUT "DOSING"

Sixth Sense For Ships

How Safety Device Will Prevent Collision In Fog

Not even a roaring boat can hide in the fog from a new safety device which will guard ships from collision at sea. The device emits an eerie, high-pitched whistle, which re-echoes so distinctly to the sending boat that it's pilot is said to be able to locate perils in any direction from one sixth to half a mile away.

If he obtained that the distance had decreased in fog a small roaring boat with two occupants 800 ft. away. A mail ing boat was spotted at 1,200 feet, a 125-ton steamship was located in thick fog at distances of 1,800 feet to 2-mile.

The apparatus consists of three large megaphones. One sounds the automatic whistle; the other two are "ears." Sounds from either side reach one "ear" a tiny fraction ahead of the other. Sounds dead ahead or astern arrive simultaneously.

Always Foots the Bill

No Call For Funds Ever Appals British Taxpayer

John Bull is used to paying. He has been paying ever since the war, and has become hardened to standing treat to the nations. The pleasing conviction prevalent abroad that whatever happens John Bull will foot the bill, so assiduously fostered by successive British Governments, is not wrong as ever. Even the staggering prospect of handing over colonial sums to the U.S.A. while getting not a penny from their own debtors does not upset the British taxpayer. Nothing appals him any more. He knows from long experience that he is "good for it" in any case.—London Truth.

Three hundred children of British soldiers from foreign stations had their first glimpses of England when their fathers arrived home at Southampton recently.

GIANT in Stanley Park, Vancouver, British Columbia, this beautiful red cedar measures twenty-four feet in diameter. Twenty men can stand within its trunk while others climb on its fallen mate. The tree's age is estimated at 1,000 years. Its top was broken off by a storm, and it is now only 175 feet high. Its bark, which can be stripped off in large sheets, is used for making baskets, rope and mats.

Winning Newspaper Slogan

By Ruth Hagen

DELIGHTFUL FOR SCHOOLGIRLS IN THIS CHARMING MODEL WITH DIPPING SLEEVES

It has such a pretty neckline. The scallop trim gives it smart sophistication the growing girl adores. At the center-front, there is an inverted pleat to give the skirt ample fullness and still retain its slim line.

The original dress was carried out in dark hyacinth-blue wool crepe, the collar be ng of light hyacinth-blue crepe. Note how the collar terminates in a jabot.

The pattern also provides for long sleeves or in small bell view.

Flannel, challies, wool jersey, wool challis and tweed-like cottons are also smart ideas.

The "smaller bust" make it of rough crepe silk in geranium red or of brown velveteen.

Style No. 864 is designed for sizes 8, 10, 12 and 14 years.

Size 8 requires 1¾ yards 39-inch with ½ yard 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

MAIN ESTIMATES FOR THIS YEAR ARE REDUCED

Ottawa, Ont. Sharpening down government expenditures, main estimates for 1933-34 show the effects of the pruning knife tabled by Hon. Edgar N Rhodes, Minister of Finance, in the House of Commons, Wednesday, February 1, the estimates total $[illegible]

In effort, the main appropriations indicate the government has cut controllable expenditures by $11,862,162 over main and supplementary estimates for the year ending March 31. The supplementaries for 1933-34 re main to be brought down.

Main estimates for this year actually show a reduction of $6,227,735 as against both mains and supplementaries for the year ending next month, because the Dominion has to pay this year, for the first time, more than $6,000,000 increased Mounted Police and increased subsidies to seven provinces as a result of the growing population shown in the recent census.

Whittled down expenditures is shown for every department of the government. With economy as the watchword, almost to the penny of much burning of the midnight oil Legislators ministers, members and senators with civil servants, continue their redoubled efforts.

The 10 per cent. cut remains for another year, but rumors around the corridors is that there might be a few decrease are without any foundation. No new avenues of expenditures appear in the main estimates

Appropriations for the various departments of government show the effect of the pruning-knife in many cases. Total estimates for the agricultural department have been cut by $981,945 from the figures for 1932-33. For the coming fiscal year the sum of $7,986,913 is requested. There is a reduction of $2,861,764 in the total appropriation for pensions while estimates of $47,822,321 necessary war pensions are placed at $48,090,000 as compared with $48,000,000 appropriated in the main estimates last session.

For the coming fiscal year the sum of $8,888,440 is appropriated for militia services in the department of national defence. This is an increase of $62,890 over the 1932-33 figures. The sum requested for the naval services of this department is $3,422,000 or $60,000 less than asked in the main estimates last session. Aviation appropriations in today's estimates show a cut of $150,000 from the appropriation of last session. In today's estimates the total amount asked for Royal Canadian Air Force and also [illegible]

Resents Attacks

Hon Agnes McPhail Objects To Criticism Of C.C.F. Movement

Ottawa. Resentment at "scurrilous attacks" directed by speakers and in the press against leaders of the Co-Operative Commonwealth Federation movement was expressed by Miss Agnes MacPhail (U.F.O., Grey South East) in the House of Commons recently. Their only effect, however, had been to assist the movement, Hie thanked the prime minister and the Conservatives particularly for their assistance. Had it not been for government announcements from time to time far fewer people would have turned out to C.C.F. meetings.

While the organization derived its first support from farmer and labor groups, Miss MacPhail said, its ranks were being augmented rapidly by business and professional men. These people were no longer secure in their livelihood and many of them were among the unemployed.

Would Like Goods Checked

London, England. Sir Charles Hipprod, director of the National Union of Manufacturers, said the union would like to see British customs officials sent to Canada to check the value of American goods consigned in Canadian factories for shipment to the United Kingdom.

Veterans Given Clean Sheet

Committee Investigating Alleged Pension Frauds Submit Report

Ottawa, Ont. What amounts to a clean sheet was given Canada's veterans by the joint committee which investigated administration of the Pension Act in connection with alleged pension frauds. While it is impossible not to have some violations in the expenditure of [illegible] $20 a year, nevertheless investigations had shown that to most cases the frauds were not committed by the men who had served the committee reported.

Brigadier-General Alex. Ross (M.C.), Dominion vice-president of the Canadian Legion and a vice-chairman of the joint committee, has this to say in his report, tabled in the House of Commons recently.

"Some of them are not really frauds at all, but untoward errors or mistakes. There are, however a number of cases of deliberate fraud but the majority of them are not in respect of pension entitlement but in respect of medical treatment.

"Some of the largest frauds are in respect to widows properly pensioned at the time, but who have remarried and by perjury have received money to which they are not entitled

"If the deceased first husband has been buried in a small roaring boat with two occupants 800 ft. away. A mail ing boat was spotted at 1,200 feet, a 125-ton steamship was located in thick fog at distances of 1,800 feet to 2-mile.

The apparatus consists of three large megaphones. One sounds the automatic whistle; the other two are "ears." Sounds from either side reach one "ear" a tiny fraction ahead of the other. Sounds dead ahead or astern arrive simultaneously.

Making New Peace Proposals

Japan Willing To Withdraw Certain Objections To Manchurian Settlement

Tokyo, Japan. An official spokesman indicated that Japan has withdrawn certain objections to the League of Nations formula for control of the Manchurian dispute, and would make new proposals for a settlement on that basis.

Members of the delegation were authorized to concede other points blocking conciliation under paragraph 3 of article 15 of the League Covenant, if the League drops its intention to enunciate non-recognition of the government of Manchukuo in connection with the settlement. The completeness of the proposed conciliation committee.

A Japanese foreign office spokesman said:

"We are not hopeful that the league will accept our terms. If they are refused, application of paragraph four is inevitable. The nature of the report under that paragraph will determine whether Japan will withdraw from the league."

The Queen's Husband

Maurice Colbourne and Barry Jones To Appear in London Comedy Hit

What is most certain to be the theatrical event of the present season, just as it has proven to be the highlight throughout Canada, will be the coming engagement of Maurice Colbourne and Barry Jones in their record breaking London comedy hit, "The Queen's Husband" at the Hush Theatre, Saskatoon, Feb. 8-9; Darke Hall, Regina, Feb 10-11; Technical Theatre, Moose Jaw, Feb. 13.

Local playgoers will recall the sensation that these young actor-managers created when last season in the midst of a successful run at the Adelaide's Theatre, London, England, they decided to come to Canada, visiting Toronto, Montreal, Hamilton, and Ottawa, which cities showed their appreciation by crowding the theatres to absolute capacity. After the brief Canadian visit, Messrs. Colbourne and Jones returned to London, England, where they remained for many months.

Being unable to visit here last season, those popular British stars are now, in response to requests from their many London friends, bringing the same company and production, thus affording lovers of the theatre an opportunity to witness the London success ennstly as presented in the British Metropolis.

Western Estimates

Some Set Aside For Public Works In Western Provinces

Ottawa, Ont. Western estimates tabled in the House of Commons include sums for public buildings in western Canada, and also for harbor and river improvements, port entry on the Pacific coast. Under the head of public buildings, the following appropriations for the fiscal year 1933-34 are made:

Dominion public buildings: Improvements and repairs, $25,000. Regina, grain exchange, instalment of purchase of armory $31,000.

Saskatoon Old post office building alterations and improvements, $4,-500.

Total, $60,500.

Under the heading of "harbors and rivers," the following appropriations are included:

Saskatchewan, Alberta and North West Territories Harbors and rivers generally for maintenance of services, no new works to be undertaken, $15,-000

Provision is made for certain telegraph and telephone lines, as follows:

Saskatchewan and Alberta, Beaverlodge to Goldfields telegraph and telephone lines: Repairs and improvements, $7,700.

Bill Aimed At Tax Dodgers

Has Been Advanced One Stage In House Of Commons

Ottawa, Ont.—Aimed at income tax dodgers and designed to plug loopholes in the act, a government bill was advanced one stage in the House of Commons. Lawyer members, particularly a group on the government side, raised vigorous against one section which would permit sequestering and collection of penalties, on say so of income tax officials.

After a two-hour discussion, the bill was reported through committee stage with the exception of one clause containing the retroactive power. The bill tightened the act in relation to personal or family corporations, a favorite legal hide-away of some tax dodgers.

During the present session a measure will be presented which is expected to prove an efficient and acceptable method by which the government may secure collection of all income tax payments due from the holders of bearer bonds.

Message From King George

Sympathy Extended To Wife Of Late John Galsworthy

London, England. Funeral services were held February 2 at Woking for John Galsworthy, who died after a long illness The body was cremated. In a message to Mrs. Galsworthy, the King said:

"His Majesty knows what a loss literature has sustained by the death of Mr Galsworthy and that it will be deeply regretted at home and abroad."

Ceremony Held In Ottawa To Unveil Memorial Tablet

Ottawa, Ont. Unveiling of a memorial tablet in the Victoria Memorial Museum here, to the memory of Canadian veterans who died in the service of their country during the Great War, was performed by Governor-General Bessborough, assisted by Lieut.-Col. Hon. Ian Mackenzie, minister of pensions and national health.

Among those present were Hon. Hugh Guthrie, minister of veterans affairs; Hon. Thomas Vien, minister of public works; Hon. Peter Heenan, minister of mines and resources; Hon. Robert Manion, minister of railways and canals; Hon. Wesley Gordon, minister of labor; Hon. Dr. Beaubien, minister without portfolio; Hon. Dr. Manion, former premier; Hon. Dr. Bruchesi, Roman Catholic archbishop of Montreal; Hon. Dr. Gouin, former premier of Quebec; Hon. Dr. Forbes Robertson, Anglican bishop of Ottawa; Hon. Dr. Fallon, Roman Catholic bishop of Ottawa; Hon. Dr. Sedgewick, former judge of the supreme court of Canada; Hon. Dr. Lafleur, former minister of customs; Hon. Dr. Roche, former minister of the interior; Hon. Dr. Lemieux, former speaker of the house of commons; Hon. Dr. Bureau, former minister of agriculture; Hon. Dr. Beland, former minister of public works; Hon. Dr. Bourassa, former minister of public works; Hon. Dr. Cardin, former minister of public works; Hon. Dr. Rinfret, former minister of public works; Hon. Dr. Lapointe, former minister of justice; Hon. Dr. Ernest Lapointe, former minister of justice; Hon. Dr. Ernest Lapointe, former minister of justice; Hon. Dr. Ernest

To Increase Power Sales

Electricity Cheap Home Rate in England For Exhibition

The completion of the national grid scheme for distributing electricity over England and the reduction of charges for current, will result in increased demand, and a desire for greater knowledge, and after reasonable discussion, the Birmingham circle of the association decided that the time was opportune to make a special effort to show the residents in and around Birmingham what was possible and likely to obtain on the domestic side. To this end it was decided to purchase a piece of land, and to erect thereon a modern electrically equipped residence, and to exhibit it until such time as interest was no longer shown.

The result is that today, people living in or near Birmingham can see a British home, at once pleasing, comfortable, and fitted with conveniences calculated to reduce labor and cost to a reasonable minimum, says The Unit.

There are no fireplaces to clean, no ashes to remove, and consequently the house is almost dustless. All rooms are automatically maintained at the correct temperature, responding to the presence of cheerful warmth throughout. Hot water is available day and night, a feature that is accomplished and maintained automatically without human or attention. All portable foods can be stored under perfect conditions.

The main entrance opens on to a hall with a barrel vault ceiling, in which electric tubular heating is installed, the left to the lounge, with bright facing the garden, while on the right are the dining room, kitchen, scullery, cloakroom and so on. The heating system in the lounge, dining room and first bedroom is from the ceiling by means of the Dufaux method.

This is a fine, flexible material, which is applied to the ceiling in a manner similar to heavy whitewash, and which employs the principle of the distribution, under thermostatic control, of radiant warmth from an extended area of the ceiling at temperatures at, or only slightly above, body warmth. In these rooms, it is arranged to maintain the temperature anywhere between 55 and 65 degrees, according to the setting of the thermostat, even when it is freezing outside.

On the first floor are five bedrooms, bathroom, just room, linen room, lavatory and a spacious landing. In these bedrooms, as in the kitchen, the heating is effected by means of tubular heaters fitted with thermostatic control to ensure even temperature and to eliminate waste of current.

In the bathroom the shaving mirror has an electrically illuminated framework, and after being used the towels are dried on a special rack.

To Buy Big Game

Duke Of Gloucester Going Shooting With Camera

The Duke of Gloucester, King George's third son, is going big-game hunting in Africa, but he is going to use a camera rather than a gun.

Both second and still pleasanter game is its natural haunts are the principal objects of his quest, although he will take one gun to shoot meat for the expedition.

No elaborate camp equipment will he taken. There will be two tents for sleeping quarters, which are more little barrier than the ordinary bivvy tent, a table, a few chairs, mosquito nets, and cooking utensils.

Views For South America

Another shipment of 35 aeroplanes has been sent from London for the air force of a South American country. The machines are two-seater day bombers and were constructed in England. They are estimated to have cost about $750,000, and have been built under the strictest secrecy in accordance with a request of the purchasing government.

Vancouver harbor has grain storage capacity of 17,850,000 bushels including additions to elevators made during 1929.

BRITAIN WORRIED OVER MR. AMERICA'S LADYBIRD

JOAN PRICE and AUBREY SALE-BARKER. AMY JOHNSON

Since Amy Johnson, Mollison, Britain's ace women flyer, performed her great lone-way flight from England to Cape Town, South Africa, and back, electioneering all previous records, her sister ladybirds of Fair Albion have shown a feverish inclination to duplicate her feat. At first this excitement was hailed as a fine thing for aviation, but now Britain authorities are wondering when these do-or-die ladies would stop and do their flying at home where the job of flyers nervously escaped death while rushing to better existing records. Miss Joan Page, daughter of the Chief Justice of Burma, and Miss Audrey Sale-Barker, were enthroned from the jungle of Kenya after their plane had crashed in wild country, and they are now in hospital at Nairobi. Mrs. Lady Bailey, wife of the London diamond merchant, was forced to descend in the Niger Colony of French West Africa, and was missing for days before being rescued. So now the popular climax in the Mother Country is for government restriction on such flights.

Settlement Should Be Easy

One Suggestion To End Latest War In Far East

If Britain can be said in favor of the new war now raging in Northern China, it at least has the merit of teaching us some geography. For it is safe to say that precisely not one out of a hundred thousand people in this country had ever heard of the new Manchu Jehol before Japan evinced a determined desire to add it to Manchukuo. If we still do not know very much about it and have a hazy impression of a mountainous country where the Mandarin emperors used to build palaces and hunt, it has nevertheless become a familiar name which we can all read with a pleasing sense of wide geographic knowledge.

What we cannot yet do, however, and what there is little chance of our ever doing, is to be present at the settlement. Not one in a million Americans ever do this correctly and in every Bible group of serious thinkers discussing the Far Eastern situation, unless there be distinguished Chinese Hagakists present, every version of the pronunciation is almost surely wrong. In reviewing the recent book of Evan Hesse, entitled "Jehol: City of Emperors," Mr. Sidney Greenbie stated that Jehol was a three-syllable word beginning with a cross between a "j" and a "z" and ending in a deep, throaty "r" sound that a puppy makes when it is worrying an old shoe. His spelling of this monstrously sounded like Jzhehrr.

All of which leads to the conclusion that settlement of the present Chinese controversy by United States should be very simple. Any one who can pronounce Jehol should be allowed to have it.

Empire Settlement

Government Can Only Improve Conditions For Overseas Colony

If all the units of the Empire recover a standard of prosperity under which requires re-definition—it is obvious that only the young and adventurous will desire to migrate. In that case the good the Government can reasonably be expected to do will be to keep lands off, to interpose no new restrictions and strengthen conditions as are consistent with ordinary safeguards of health and public safety.—Winnipeg Tribune.

We read that a single human hair will support a weight of four ounces. It is odd, however, more practical to use string.

Reveal Glories Of The Ancients

Important Discoveries Are Made In Excavations In Persia

Scientists' flashlights played recently over ruins of an ancient city that Alexander the Great burned at the whim of a starry-eyed daughter of the Magi centuries ago.

In the heart of modern Persia, where 2,000 years ago the fire-worshippers built their pyres on the Iranian plateau at the behest of Zoroaster, or comes to the light of modern science the most significant scientific discovery of the age.

Under the shovels of the Persian expedition of the University of Chicago appear bill-like stones and metal relics of a brilliant era at history's dawn during which splendid cities rose from the dust only to fade into the legends of the Arabian Nights and the ruins of Kubla Khan and Attila, the Hun.

Discovery has just been announced at the University of Chicago by Dr. James H. Breasted, director of the Oriental Institute of the University, of sculpture dating from the Golden Age of the Persians.

Sculptures unearthed at Persepolis, the Versailles of the ancient Persians, by Dr. Ernst Herzfeld, of the institute's field force, were described by Dr. Breasted as "the greatest and most important discovery in the history of archaeological research anywhere.

"The discovery," Dr. Breasted said, "not only far surpasses any archaeological disclosures ever made in Persia, but surpasses any similar finding in western Asia in recent years."

Two miles from Persepolis, the expedition has discovered a 5,000-year-old stone tablet, with human features containing the earliest windows ever found. In these rooms lived the former days of the Persians who rose to op'-pluence in history Darius, Cyrus the Great, Xerxes.

Commenting on the find, Dr. Breasted said:

"The walls of the splendid palaces which stood on the gigantic terrace of Persepolis, consisting of slightly plain were of sun-dried brick, but the ostentatious halls, the windows, and the great doors were done in black and white limestone and polished like glass.

"The friezes just uncovered by Herzfeld, reveals the Persian emperor wearing a robe embroidered with scarlet and purple, shoes of scarlet and other finery in royal hues.

"One tradition has it," said Dr. Breasted, "that Cambyses the Great in 525 B.C., settled by wine and urged on by his lady love, set fire to the roof of one of these palaces and then set up in flame and smoke a supreme expression or ancient Oriental grace.

"It was a disaster which marked the end of the evolution of Oriental civilization in western Asia, and the destruction wrought by that conflagration devastated and wrecked forever most of the works of art which made the ruins of Persepolis the great world centque of Persian and civilization under the Persian empire."

Life Before the Flood

Records Gathered By Geologists Are Most Interesting

These of us who walk the way of geology know there was a great flood which submerged as far as life was on the earth. Archaeological records also confirm this. The highest mountains were covered and there were upheavals in the surface of the earth and slippings of the crust; the bones of nature were bent out of their usual ways.

To show there was life before the flood and its ice-age just examine the Montana Glacier. This region was like our tropics with ferns and palms, but now they are in the clutch of ice. What was once a lake is now glacier containing millions of grasshoppers. These insects fly about at appointed day and night, so they must have been suddenly engulfed, if not in the "Flood of Noah" then in the "ice age."

Why are the bones of whales and sharks found in the mountain tops, and embedded in rocks thousands of feet above the sea level, fifty miles from seashore?

Previous to the Flood and its ice-age, the animals were larger; so was vegetation.

Hell, England, will construct a reservoir costing $10,000,000.

Monrovia, Africa, was named for U.S. President Monroe.

Travelling in Britain

No One Need Worry About Having To Register Age

The Travel Association of Great Britain has been asked a question which appears to be of some concern to women visiting Great Britain. It is: "Must I state my age in the hotel register?"

Visitors from other lands, if over 16 years of age, are required to register their name, nationality, date of arrival, address from which they came, date of departure, and destination. But—and this answers the question there is nothing in the regulations affecting foreign visitors which requires them to state their age. In this respect, therefore, they might travel in Great Britain and take their case to any British hotels without anxiety. The secret, if it be one, is their own.

Building Methods Ripped

James Gowan, Toronto architect, told the annual meeting of the American Society of Heating and Ventilating Engineers at Cincinnati, that present methods of building construction are little better than those of 20 years ago and can not compare with Canadian construction of pioneer times."

Creamery Butter Production

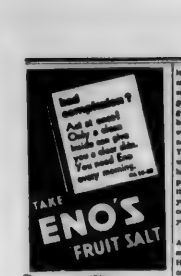
A Decrease In Skeese In Output In 1929

The production of creamery butter in 1929 was 206,987,604 pounds compared with 220,910,340 pounds in 1921, a decrease of 2.5 per cent. By provinces the production was: Ontario 72,472,054, decrease 6.5 per cent.; Quebec, 45,438,981, decrease 13.3 per cent.; Alberta, 21,135,000, decrease 8 per cent.; Manitoba, 19,057,-, 000, decrease 10.1 per cent.; Saskatchewan, 17,999,000, decrease 5.6 per cent.; Nova Scotia, 5,999,320, increase 1 per cent.; British Columbia, 8,136,626, decrease 5.7 per cent.; New Brunswick, 2,610,347, increase 7 per cent.; Prince Edward Island, 2,207,-, 000, increase 12.1 per cent.; according to the Dominion Bureau of Statistics.

A Good Policy.

A good rule for governments is to guarantee no private credits or loans that are not good enough for the business. Such a policy since Confederation would have saved Canadians at least a billion dollars, says the Financial Post.

FANCIFUL FABLES



HEART OF THE NORTH

By

WILLIAM GEORGE ROWERY

(1929 Serial)

Copyright by William George Rowery

CHAPTER V. Continued.

"Consequences?" he repeated. "Consequences for me? I warned you we shouldn't split our party. That was the cause of us failing. I predicted just what happened."

Haskell brushed the words aside. "The consequences of a blundering, botched-up patrol such as you led are usually dismissal to the ranks. That is what you'll have to take. In an important matter like this I haven't any choice but to make you a constable. Whipple, take out the papers for his demotion.

For moments Alan stared at him. Then his laughing it was incredible, a travesty. Busted! Busted because of his men's orders. Busted because he had been cast out, tied head and foot, on a patrol doomed to disaster before it started.

He snapped. "You can quit that scratching, Whipple; I'm not a constable yet. And you, inspector, if you haven't got some enough to know you're hanging onto your command by a couple of fingers, I'll tell you about it. When Williamson finds out about you ordering me to split my party he'll order such for your resignation or fire you down to the lowder where you belong. You're going to give Dave MacMillan a decent chance and I'm going to make that patrol to the Incoonan."

Across the desk Haskell surveyed him coldly. "Just a moment, Baker. You said something about my order. Beg you to split your party. You're blaming me for your failure." He met Alan's eyes without a tremor; he was able to look steadily at Alan, as he added: "I didn't order you to split your patrol. I may have suggested it, but that patrol was yours, and you're not going to hang the blame on—"

"You didn't order me to? You say you didn't order me?"

"That's exactly what I said, sergeant. I gave you no such orders."

Speechless for moments, Alan found by found words. "You're a liar. A speaking liar! You're trying to crawl out—"

Haskell jerked around to Whipple. "Make a note of that remark." He turned to Alan again, and in hard tones, with no hesitation or regret, he said: "You ordered me to have dumping you had some heavy artillery

HELP FOR TIRED WIVES

Take Lydia E. Pinkham's Vegetable Compound

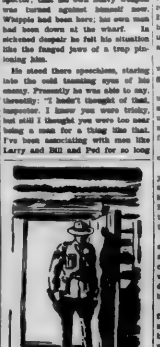
[illegible]

key against me. You meant to get me. Whether I gave orders or merely suggested, isn't the question now, sergeant. The question is: How are you going to prove your charge? Do you happen to possess any documentary evidence, or can you produce any witness, that I gave you that order? You can't! Haskell looked and Yeager were down at the wharf. On the other hand Constable Whipple here was present and heard what you said. So it is the word of two patrol members against yours, and one of them your officer commanding. What do you think of your heavy artillery now?"

He smiled sardonically, in triumph. Alan stood mute, thunderstruck. A moment ago he had thought that Haskell had seriously forgotten their enmity orders. But now, with the meaning of these words dawning upon him, he realized that Haskell had deliberately planned this perfidy. By a brazen, incredibly brazen lie, he intended to capture out of any and all responsibility for the unwise patrol.

The very effrontery of the denial staggered Alan. In a dazed manner he sought to find a way out of what Haskell had just said. But after a little space it was borne in upon him that Haskell had beaten him; that he no longer held a sword over the inspector; that his own heavy weapon was turned against himself now. Whipple had been here; his own men had been down at the wharf. In sickened despair he felt his situation like the hanged jaws of a trap pinning him.

His stood there speechless, staring into the cold teasing eyes of his enemy. Presently he was able to say, hoarsely: "I hadn't thought of that, inspector. I knew you were tricky, but still I thought you were too near being a man for a thing like that. I've been associating with men like Larry and Bill and Pod for so long



Mr. Vincent was Trudged Out the Door.

that I'd forgotten your kind exists. As for a damnable have-dened like you on officer—in that uniform . . . by God G—d! If you hadn't said it, I wouldn't have believed."

"Is that all, constable?" Haskell inquired, with a faint sneer on his mouth.

"Yes, that's all. You've got me."

He turned and trudged out the door.

His thoughts were all a confused tumult. Baffled, unutterable—he was filled with the whole blame of that disgraceful patrol—the ground cut out from under him by that heavy liar! Now he realized to the full how unscrupulous Haskell could be in a show-down fight. When reputation and standing, liberty and even life itself sound here were at stake, Haskell was as cunning as a stinker wolf and as malign as a cancerjaw. The inspector had been out to get him, and had got him. He stood on a level now with Whipple and Ferguson—he, once the proud leader of a picked command. One fact came home to him, hard and inexorable: his Incoonan trip was smashed. To make that patrol he had to have Haskells' backing. But to hope for any co-operation from the inspector would be a fool's wishful thinking. Haskell was out to get him, not these criminals. That Incoonan plan was dead.

Alan felt the terrible hopelessness of his situation. He was bound hand and foot. There was nothing on earth he could do—nothing except forget the aching vision of running those sable-gown murderers to

Did he dare forget? . . . Dimly through the creeping mist he saw the candle light of the tiny hospital where Larry, his nine other comrade on many a patrol, lay tossing in pain and fever; where Larry, so strong of body, so proud of his physical powers was having the black realization that he would never again go out on patrol with other men, and would never age.n follow a Strong-Woods trail. Jutting out from the barracks he could see the massive outlines of the cement cell where Dave MacMillan, helpless to prove his innocence, awaited the full vengeance of the law. He felt a responsibility toward Dave MacMillan, all made from Dave being Joyce's father. If it had been his duty to arrest MacMillan and bring him in, it was a higher duty now to fight for him, to clear a man whom he knew in his heart to be innocent.

Thinking in hard practical terms, Alan saw that no help to Haskell had power over him, he could not stir a hand. If he was ever to get those criminals, he had to be free. Removal paths lay open to him. One by one he studied and rejected them, till only the last remained.

For minutes he weighed that possibility act. Its cost to him was a terrible cost. It would wipe out his brilliant reputation, his whole future record. It would kill his last chance of ever bringing Haskell to account. It would uproot him and take him for good and all out of this North country.

Turn by doubt and indecision, he wavered. The price seemed too staggering.

Presently he heard some one come up the terrace and glide past him and go on toward his cabin. The figure was Joyce's father, Bill Mac-Millan, but Alan recognized that light foot step.

He called softly: "Joyce! You want to see me?"

"Alan! I've been wondering where you . . . Your cabin was all dark. I couldn't find you." In eager hope she asked him: "Alan, what did Haskell say about Dad? He's going to release Dad on bail, as you thought?"

Alan shook his head, sorry for her, sorry for all the heartaches that lay ahead of her. "No, Joyce. Haskell can be brutal and inhuman. He wouldn't connect even to letting your father go pending his hearing to send him outside to Edmonton."

It was on his lips to add, "Your father is being sacrificed to Haskell's love of victim." But he could not bring himself to tell Joyce that. The news had stricken her cruelly enough.

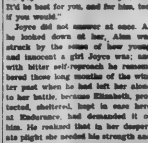
If only she could be near her father, if only she could stand by him. Her deal might be lightened for her. The lonely waiting weeks of suspense would be over. If her father was in the thousand miles away, amazing strategies, with no one to lift a hand for him.

He offered gently: "Joyce, if you want to go along and be near him, I'll pay—I'll see to it that you can. I'll be best for you, and for him, too, if you would."

Joyce did not answer at once. As he looked down at her, Alan was struck by the sense of her youth and innocent a girl Joyce was; and with bitter self-reproach he remembered those long months of the winter past when he had left her alone to her battle, because Elizabeth, protected, sheltered. Kept in cozy home in Kenmore had demanded it of him. He realized that in her desperate plight she needed his strength and protection far more than Elizabeth did. Except for him Joyce was alone in the world, without friends, relatives, money, and with her father in the shadow of the gallows.

Presently, with the spirited courage he had always loved in her, Joyce answered:

"Alan, I'm going back home. The Dogribs are bringing in their furs next week. I'll send several of their



best an decoime to the Hoose and Lauchean and get their furs, too. I'll explain all our trade goods and raise money for Dad's defense. It'll be a true way of fighting for Dad if I go back home. I don't mind being alone. I can take care of myself. It'll be lonesome, but all the time I'll be knowing that I'm doing the right thing and being a real help to Dad."

Alan acquiesced reluctantly, against his better judgment. A tender girl alone, scarcely out of her "teens, going back to that isolated post. . . . A white girl, winsome, pretty, of famous body, alone there, with Indians wooing and gowing, with half-breeds coming and going. . . .

Joyce asked him: "What happened between you and Haskell, Alan?"

Briefly Alan told her what had taken place down there in the cabin.

His account left Joyce speechless in a state of fury, her little fists clenched, her lips parted in astonishment.

"But he can't demote you, Alan!" she cried. "He can't blame you for his mistake."

"He can't! He's already done it! If I try to fight him, it will make the slightest insubordinate move, he's actually got the power to jail me!"

"But the Incoonan patrol—he'll let you go on that, Alan?"

(To Be Continued.)

Working Under Handicap

Britain's Mercantile Marine Does Not Receive Any Subsidies

Great Britain stands almost alone among the nations in possessing a mercantile marine which is worked on ordinary economic lines. . . .

Every penny trade in which it is engaged, it has to face the competition of foreign vessels built and assisted by the aid of large Exchequer subsidies supplied by the Governments of the countries whose flag they fly. Unless some change is made the final result is inevitable. Sooner or later the ship-owners of the country handicapped by this system of inequality in the fierce competition for the trade of the world must go to the wall.—London Times.

More Fish Licenses

During 1921 fish production showed a decrease for every Canadian province except Saskatchewan and the Yukon. On December 30, 1922, there had been an increase of domestic fishing licenses to the extent of 946 over the corresponding period of the previous year. This is an indication that the residents of the province are making greater use then hitherto of the fish of our own waters.

An American company is blasting the channel of the Canton River in China.

Get Rid of That

SORE THROAT!

Any little soreness in the throat goes quickly when it's swabbed with Campana's Cresolo. Cresolo makes throat clean, and gargle at once. This gives you instant relief, and reduces danger from infection. One good gargle and you can feel safe. If all soreness is not gone promptly, repeat. There's usually a cold with the sore throat, so take two tablets to throw off your cold, headache, stiffness or other cold symptoms. Aspirin relieves neuralgia, trouble, too. Use it freely; it does not hurt the heart.

ASPIRIN

WINDSOR, ONTARIO, CANADA

Little Helps For This Week

"Tribulation worketh patience, and patience, experience, and experience, hope."—Romans 5:3.

"I waited patiently for the Lord; and He inclined unto me and heard my cry." Psalm 40:1.

Lord, we have wandered forth through doubt and sorrow,
And Thou hast made each step an experience.
And we will ever trust each unknown morrow,
Then will sustain us till to work is done.

It is possible, with all the failures to date still to cling to the conviction of God's merciful purpose towards His creatures, of His parental goodness even in suffering, still to feel the pain of duty, though trodden with a heavy heart, leads to peace, still to be true to conscience. In this patient, though unchastened obedience, we become prepared for light. The soul gathers force —Wm. E. Channing.

Passengers Were Lucky

First Made Perfect Landing On Sea Since 1919

With One Hit

Piloting his heavy plane with marvellous skill and daring, Ronald George made an almost perfect landing on one side on the ice of Chapleau Lake at Chapleau, Ontario. And not until the big plane had bumped to a stop did its seven passengers realize how closely they had come to death.

George took off with a party of mining notables for a trip to the Kenty Gold Mines property at Swayne Lake. A ski struck a piece of cedar-wood hidden in the snow and broke just as the machine lifted.

With his car and hand cut by flying glass, George said nothing to his passengers, but appeared to be contemplating on his way. Actually, however, he circled over the town, signalling groundmen to stand by for a forced landing.

LETTER TO EDITOR

A Friend

The Editor,
Fort Saskatchewan Record
Dear Sir:—

There is a persistent rumour circulating to the effect that I am in favour of discontinuing the teaching of the High School grades in our school, more particularly grade 12. I wish to deny emphatically that I have never advocated such a policy. On the contrary it has always been my firm belief that our young people, particularly the boys, should have every opportunity of receiving as high a standard of education as possible.

Yours,
Fred Atkinson.

VOL. 11 NO. 41. FORT SASKATCHEWAN, ALBERTA WEDNESDAY, FEB. 15th, 1933 $1.00 PER YEAR IN ADVANCE

G. T. Montgomery Elected Mayor by Large Majority

The following is the result of the elections held last Monday, Feb. 13, for Mayor, Councillors and School Trustees.—

For Mayor

G. T. Montgomery, 186 votes elected
J. B. Gosnell, 104 votes.

For Councillors

C. R. W. Magor, 265 votes elected
H. A. Watt, 259 votes elected
W. A. Graham, 266 votes elected
G. Neale, 159 votes elected.
F. D. Simmons, 126 votes.

For School Trustees

Dr. G. H. Turner 198 votes elected
F. J. Atkinson 176 votes elected.
Dr. W. F. Calhoun 142 votes elected.
Rev. D. C. Ramsay 140 votes.
R. Todd 102 votes.
Mrs. K. B. Walker 98 votes.

A group of French farmers has solved the depression. They are going to pay their representatives, not in currency, but in wheat. That would stir up governments to action about as quickly as anything.

Farm Young People's Week

Dates for the annual farm young people's week at the Alberta University have been set for June 7 to 13.

CARD OF THANKS

I the undersigned desire to express my appreciation for the splendid support given by the large majority of the Ratepayers in Electing me.

I shall deem it my duty to see that the confidence imposed on me is not misplaced and will continue in the future, as in the past, to the utmost of my ability to further the interests of Fort Saskatchewan, first, last and all the time, without fear, favour or affection.

G. T. Montgomery, Mayor.

CARD OF THANKS

I am glad of this opportunity of thanking those who supported my candidature in the recent election. I am grateful for your confidence. I believe that the education of our young people is the most important endeavor in which we in Fort Saskatchewan are engaged. I purpose co-operating with the other members of the School Board in seeking to promote the best interests of pupils, ratepayers and teachers.

George H. Turner.

LETTER OF THANKS

I wish to extend my heartiest thanks to all those who kindly helped me with their votes at the election for School Trustees last Monday, to assure them that their confidence will not be misplaced and that I shall continue to work for their interest, and that of the Town generally, as I have done in the past.

Fred. J. Atkinson.

LETTER OF THANKS

I am very grateful to all those who kindly supported me at the Election for School Trustees on Monday.

W. F. Calhoun.

TO THE CITIZENS OF FORT SASKATCHEWAN

We, the undersigned, extend to all those who supported us in the election for Councillors our sincere appreciation. It will be our aim during our term of office to work in the best interests of the Citizens of the Town.

C. R. W. Magor.
A. H. Watt.
W. A. Graham.
G. Neale.

CARD OF THANKS

I take this opportunity of thanking the Citizens of Fort Saskatchewan, who so kindly supported me at the Elections on Monday.

J. B. Gosnell.

Legislature News

As Seen From the Gallery of Alberta Legislature

To the Editor.

Yesterday we witnessed the brilliant spectacle of another opening of the Legislature. Despite the unfavorable weather which somewhat hindered the outside demonstrations, the interior of the buildings presented a [illegible]

Many leading citizens including prominent clergy, jurists, educationists, legal lights, and business men, accompanied by beautifully gowned ladies graced the large assembly room. The galleries were filled to [illegible]

At the customary booming of the cannon, the arrival of the Lieutenant-Governor in Windsor uniform accompanied by his staff of well-groomed and highly decorated officers completed the most impressive scene of the year. For an hour, at least, we forgot the ever present spectre of depression.

Then the governor read the speech from the throne, the contents of which sounded as the news usually does things of life, stripped of all the glitter and while it was hopeful and brief it carried an undertone of [illegible]

The premier, who has been ill, was not in attendance. We are pleased, however, to report that he will be in his usual place next Monday.

Nearly all the members have arrived and seem hopeful of the outcome of this, the fourth session, since the beginning of the Depression.

Today saw the formal moving and seconding of the address from the throne accompanied by two rousing speeches from the mover, Mr. Prosser of Acadia, and the seconder, Mr. C. A. Rensing, of Camrose.

Mr. Rensing was the recipient of congratulations from every section of the house. It being his maiden speech and was a most splendid effort.

W. R. Howson the Liberal Leader also spoke in the debate.

The opening formalities are ended and as we say at the races. "They're IN!". The next few days will likely see the usual bickering for position and by the end of the week they should get down to the real business of the session.

Let us hope they will forget personalities and petty bickering and devote the next few weeks to accomplishing something for Alberta. The road was never so great; the opportunity was never better.

Until next week "au revoir".

Thedoreus.

UNEMPLOYED MEN ON FARMS

More than 500 unemployed single men have been placed in farm work by the Alberta Relief Commission under the arrangements recently announced, according to A. A. MacIntosh, chairman of the commission. The work is being carried steadily forward and it is expected that in the near future more than 600 will be taken care of in this way. An effort is now being made by the commission to place on vacant farms (married families now on relief in the cities. Something has already been accomplished this way.

These families are being placed on farms with buildings which are at present unoccupied through arrangements with the owners. Ordinary relief is supplied to these families but they will be expected to grow a certain amount of foodstuffs through the summer and the head of the family will be expected to work out amongst the neighbors whenever the opportunity occurs. The commission is anxious to learn of vacant farms which can be made available for this purpose.

The commission pay rent for the property on a monthly basis to the extent of the annual taxes due.

Reduced Examination Fees

A reduction of $1.50 in fees for high school and matriculation examinations is announced by the Provincial Department of Education.

School Notes

The High School went on a coasting party on Saturday, last week, followed by a short social evening.

Coasting on Jim's hill proved a real success, though for a while events took a tragic turn. It seems that three of our girls tried with doubtful success to oppose their puny strength to a fully loaded "bob", which was rapidly obeying the law of gravity. One of these on foot, Louise Lamoureux, had her face bumped and her foot run-over by the "bobs", and was removed from the scene by Hazel Lawrence who acted the part of an ambulance. Gladys Wilmoreth, on the "bob", had the misfortune of losing part of a tooth while the pilot, Sarelie Oxley, when found in the adjacent brush by a search party, was badly dazed. A Brisk performer in this, Bobby Graham took a bad dive over a upsetting "bob", suffering however, no great damage.

In spite of their misadventures, the function was happily concluded at the school by games, contests, and finally, the delicious refreshments.

The Way Out.

The whole world is looking for a way out of the terribly complicated financial and economic mess into which it has been plunged as a direct result of the Great War. Whatever may be the contributory causes to the intensity and widespread character of the present depression, the main root cause of the deep unrest was the war and the terms stipulated in the peace treaties. This is now universally recognized. No one seeks to deny it unless they have some particular end to serve by attributing the world's present troubles to something else.

One of the results of the Great War, and the treaties by which it was ended, has been the development of an intensely narrow nationalism, with often as much, and in the adoption of those policies which today are strangling the trade of the world and causing all nations to seek ways and means of making themselves self-contained economic units. This policy has caused the break-down of monetary systems and adoption of unsound policies by which all nations are endeavoring to produce both primary and manufactured products which are not natural to their particular resources. It is one of the calamities of the war that every nation is desirous of promoting exports while at the same time shutting out imports,—an undertaking which even the dullest schoolboy understands to be impossible.

More and more, thinking men and women are coming to realize that there are only two ways whereby the world can be brought out of the impasse in which it now finds itself. One is through the instrumentality of another great war; the other is through the medium of the world getting together in conference to make as far as may be possible the blunders made following the last war and to remedy the mistakes which have been, and still are, persisted in by practically all nations.

There may be some lukewarm creatures who would welcome the first way out, but they are few and far between. Another war would create a huge demand for products and commodities of all kinds, with a consequent enormous increase in prices, because it must be admitted that war, more than any other agency, creates a large demand for almost everything, except pure literature. But apart from the horrors of war, the first result would be,—as it always has been throughout history,—a huge increase in the world's population, appearing in its intensity and duration even the one through which we are now passing. War would be no cure for our financial and economic ills; it would merely temporarily raise the depression, only to plunge us back into it in more intensified form.

God forbid there should be another war, but there will be unless the nations of the world come to their senses, get together in conference, abandon their narrow nationalisms, and work together in unison for the common good of all, instead of at cross purposes, each seeking to advance itself at the expense of the others.

Yet there are people today so utterly blind or selfish that they go about decrying every effort that is put forth to bring the nations into conference and, let us hope, ultimate agreement and co-operation. These people take the position that conferences are useless; they scout at them; they predict failure for each and every one of them in advance of their meeting. The world's only salvation is not to be found through the medium of conference, then its final destruction will be brought about by war, because inevitably, financial and economic warfare, in which the nations are now engaged, will, unless stopped, end in physical war.

These people go at us in the many conferences already held, and they ask: "What good has come out of them?" They say the Washington Conference was a failure, yet at that conference the nations of Europe agreed to cut the naval expenditures down from many billions of dollars to a few hundreds of millions. True, that decision is dependent upon further action yet to be taken, but it was a long step forward toward a solution of the war reparations and war debts problem. The same people say the Genoa Economic Conference was a failure. Well, that depends upon a person's viewpoint. Some very able statesmen and publicists in many countries regard it as a successful stepping-stone to other policies to follow, while others, it is true, consider that nothing was made in that it did not accomplish much more in the direction of framing trade from the artificial restrictions now imposed upon it.

Another world conference is to be held this year, called specifically to deal with world financial and economic problems. All the principal nations of the world will be represented. But already those prophets of despair are crying about holding people back if it will prove a failure. Well, it will be time enough to say so after the event, but no good, only harm is done by condemning it in advance. People who adopt such an attitude are not patriots nor friends of their fellow men, but trouble-making pessimists who are utterly and selfish purpose to serve.

No conference will accomplish all that everybody expects of it or desires it should accomplish. Any conference, if it is to achieve anything, must proceed along the path of compromise. There must be give and take all round. A spirit of co-operation rather than antagonism must be in evidence. Even the smallest thing accomplished is so much gain, and every such gain is spurs the only way for further gains, just as every brick lends to the erection of a house.

Those who decry and condemn world conferences in advance are, in fact, rejecting the world's only alternative to war as a means of settling differences between nations. There are more ruinous wars than conferences in the world's history. Why? Because the real and far-seeing leaders of world thought are striving as never before to prevent war. In just again war result, and because the nations did not try to get together and settle their differences and compose their rival interests. And if they do not do so now, war will be the only alternative, the laser table round.

Those who go about decrying, criticizing and condemning such conferences in advance are assisting more now than ever before the forces of international bloodshed and revolution, spurious of the doctrine of physical force, rather than orderly methods of compromise and evolution, slow though it may sometimes be, whereby reform is achieved and mankind moves forward to better things.

Nerves—Could Not Sleep Tired Out All The Time

Mrs. George Serbeau, Maryjgrouch, N.B., writes:—"I was so very nervous I could not sleep at night, and felt tired out all the time.

A neighbor told me about Milburn's Heart and Nerve Pills, and as she was using them at the time she gave me some to try. I found they were doing me so much good I procured two boxes and they proved of wonderful help to me."

Put up in all sizes and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Has Seen Canada Grow

Montreal Woman Completes Years of Residence at 97 Years

Five years before Queen Victoria became Queen of England, Sarah Dewey was born in Lowell, Vermont. Eighty-seven years later, when Queen Victoria Lincoln was assassinated, she came to Canada where she has remained ever since.

Mrs. Ryder, as she now is, celebrated her 100th birthday, at her home in Montreal. Short and gray, she managed spinning at her web to hear—but that needs no lace cap to hide the wear of time—Mrs. Ryder told of the Canada of 1825.

"I expected Canada would be very young," she said, "and it was! We lived in Shefford. It's nearly 50 years and all my children were born there. Times were good days. In winter we had long sleigh drives and in summer we went over the country roads over many more count y. real cousins in our horse-driven buggy. There try roads then. Hamill and the surround ng country is very different now. And the winters were over so much colder."

Mrs. Ryder didn't worry about her meals. "She eats three good meals a day," her daughter said, "and has a glass of wine every night before she goes to bed."

The old body is not out of sympathy with the present generation, it seems. "I like to see the girls enjoying themselves," she said, "but I don't think mothers should allow them to stay out all hours of the night as if they weren't of a light."

Extraordinary Discovery

Ordinary Magnet Said To Extract Coils From Body

Discovery that an ordinary magnet can be used to obtain from the organs where they live the immensely important coils believed to be responsible for the immunity of salmon to disease, is announced by two wo kers of the Rockefeller Institute at Research at New York.

Harmless particles of highly-magnetic iron are introduced into the body in a manner that the potent coils pick up the metal and gravitate like lodestones to the magnet. It has been impossible heretofore to separate them from the chemical mixture of millions of other body cells. Unharmed by their iron meal, they are returned "alive," that is, they continue to live and grow in glass dishes. There they are now under observation at the institute for learning more about their functions.

Ceylon Trade Throne Back

Has Been At Windsor Castle For Over Hundred Years

A request that the ancient throne of the Kandyan kings, Ceylon, has been at Windsor Castle for more than 100 years, should be returned to Ceylon, the traditional home of the throne, was made at the Ceylon state council to the secretary of state for the colonies.

The throne was used by British governors at the installation of knights of the Garter until 1926, when it was removed by the King's command. It was found to be too large the grand vestibule because it was considered out of keeping with the Gothic surroundings.

The throne, which is an imposing structure of silver gilt, supporting dragons of cut crystal with sandalwood upon, is ornamented with floral decorations. The plating is not with guns.

A New Home Fuel

Substitute For Coal Developed In Ireland Is Proving Success

The new creosote oil substitute for gasoline which was discovered and developed by the municipal gas department of Belfast, Ireland, is proving a success, and is gaining recognition in other parts of the world. For the last 12 months, 13 Belfast municipal buses on different routes have used the new fuel with great success according to reports. Many of these vehicles are to be converted to use of the fuel at once, and a five-year plan for changing all buses has been outlined. J. D. Spaith, the gas works manager, has, in response to inquiries sent the formula to all parts of the world.

Throw OFF That COLD!

Some men and women fight colds all winter long. Others enjoy the protection of Aspirin. A tablet in time, and the first symptoms of a cold are further. If a cold has caught you unaware, keep on with Aspirin until the cold is gone. Aspirin can't harm you. It does not depress the heart. Women find it safe, dissolve several tablets in water and gargle. You will get instant relief. There's danger in a cold; don't neglect it. To say nothing of pain and discomfort Aspirin might have spared you! All druggists; with proven directions for colds, headaches, neurralgia, neuritis, rheumatism.

ASPIRIN

Plan Is Developing

Non-Air Service Would Make Base At Galway, Ireland, Necessary

A combined sea and air passenger service, that would reduce the travelling time between New York and London to three and a half days, has attracted the interest of influential New York bankers.

The project calls for establishment of a large base at Galway, on the west coast of Ireland, for aeroplanes operating in conjunction with fast trans-Atlantic liners and for a modern, well-equipped harbor to accommodate the liners themselves.

C. H. Clendening, president of the Irish Trans-Atlantic Corporation, Ltd., which is developing the scheme, is in confer with New York bankers, who have indicated their willingness to back the project. Dutch and Canadian interests, it is learned, also are watching the development closely.

Galway is ideally situated for the plan. A fall day or more could be saved in the New York-London route over if the fast boats put in there and the passengers made the rest of the trip by air.

The scheme already is so far advanced that it has drawn the interest of the Canadian, British, and Dutch governments, which see in it immense commercial and other possibilities.

Professor Sees New Age

Says People Now Willing To Sacrifice For Worthy Ends

The end of the present age of cynicism, which he sees as the aftermath of the world war, is envisioned by Dr. Jesse Holmes, professor of philosophy at Swarthmore College, Philadelphia.

"We have passed through three ages," he said. "The age of ruthless war was followed by the age of sentimentality. Since the war cynicism has been the ruling spirit. Now I believe we are entering upon an age of genuine faith and willingness to sacrifice for great and worthy ends."

Delicacy From China

Ten-Year-Old Egg Exhibited At "Chinese Evening" In Boston

An exhibition of curios including a ten-year-old egg which was brought from China by Mrs. H. W. Dunning of Brooklyn, featured the "Chinese evening," conducted in Jacob Sleeper Hall by the Boston University Women Graduates Club.

The egg was preserved according to Chinese custom in quicklime, which makes it very hard-boiled. Eggs of this sort are considered a delicacy in China, according to Mrs. Dunning.

Win Progress Prize

Mennonite Farmers Given Second Award by C.N.R. Competition

The community of Hanover, centering on the town of Steinbach, east of Winnipeg was awarded first prize in the Canadian National Railways community progress competitions for communities of European origin in Manitoba, according to information received from Dr. W. J. Black, director of colonization and agriculture, for the competition. This is the third year's operation of these competitions.

The first prize community in Manitoba consists of six school districts, centering on the town of Steinbach. This is a Mennonite settlement, started more than 50 years ago. In the first few years of settlement they had no capital for equipment, but gradually established themselves as farmers of the first class, by their initiative and endeavor. Today this community is one of the finest from an agricultural standpoint in Manitoba.

The board of judges, composed of Principal John Mackay, Manitoba College; Mrs. David Watt, Birtle, and Brother Joseph Pink, principal of Provencher school, awarded second place to Vita, a Ukrainian community in southeastern Manitoba, and third place to Sifton, which comprises the north half of the Dauphin municipality, a Ukrainian community north of the town of Dauphin.

A Privileged Character

Dog's Name Appears In Colorado Fraternity House Directory

Hedgel Peter is listed in the University of Colorado student directory. His address is the Sigma Alpha Epsilon fraternity house.

Hedgel Peter is a police dog and is the fraternity mascot. When the Sig Alph officers were preparing their pledge list for the school directory the name of Hedgel Peter was slipped into the list and as a result Hedgel Peter has been at the Sig Alph house.

"He's the most obedient pledge we have," said Gilbert Perkins, president of the fraternity.

A Delicate Operation

Doctor Stops Women's Heart and Removes Blood Clot

Dr. Clarence Crafoord, of Stockholm, Sweden, announced a successful operation on a woman patient whose heart he stopped for four minutes while he removed a blood clot from the organ.

The patient regained her health. It was claimed to have been the eighth such operation in medical history three of which were by Dr. Crafoord. Two others were in Sweden and three in Berlin.

W. N. U. 1981

National Radium Commission Chairman Draws Attention To Dangerous Nature Of Substance

Radium, the rarest and costliest of minerals, commonly regarded as a valuable servant of surgery in the fight against cancer, can be the most lethal and dangerous of poisons in the hands of the unscrupulous and the ignorant.

In making this statement to a conference of experts, Viscount Leo of Fareham, chairman of the national radium commission, drew a startling picture of the potentialities for evil if the substance were put to a criminal use, says a London newspaper.

"A tiny flask containing one gramme," he declared, "would be sufficient to murder your neighbor sleeping on the other side of the wall of a semi-detached house, without arousing suspicion in the minds of his family or the police."

Urging the immediate control of radium, Lord Lee gave alarming examples of the terrible effects of certain patent remedies and cosmetics containing radio-active substances, some of which, he stated, were so deadly that their preparation for sale should be "sternly suppressed."

Lord Lee's pronouncement was made while delivering the Silvanus Thompson lecture to the conference of the British Institute of Radiology at Central Hall, Westminster.

While there was doubt about the curative value of radium, he declared, there was none about its palliative effect and its power to relieve pain. On that ground it could claim to be of benefit to mankind. Its greatest foes were ignorance and overconfidence.

It was the conviction of the national radium commission that "radium in the hands of the skilled, and dangerous of poisons. It should be prohibited from importation or sale, except under special licence."

Under existing conditions the extreme costliness of radium was perhaps the public's best safeguard. At £15,000 a gramme there was not much risk of its becoming a "best seller."

As an example of the perils of carelessness in the use of radium, Lord Lee described the case of the New Jersey girls who while painting luminous watch dials with a preparation containing minute quantities of radium or mesothorium, pointed the brushes at intervals with their tongues.

In many cases the consequences did not become apparent until more than four years after the girls had left their employment.

How many girls perished as a result of this careless use of radium is not ascertainable, added Lord Lee, "but 10 have certainly died and some 30 more are regarded as doomed."

Referring to patent remedies, cosmetic preparations and the like, containing or professing to contain radium or radio-active substances, Lord Lee stated that in some cases these were harmless. They were merely fraudulent because they contained no radium at all, or only a negligible trace.

On the other hand some commercial preparations containing radium were potentially deadly that their preparation or sale should be sternly suppressed by law and even made a criminal offence.

"I refer particularly," Lord Lee went on, "to the so-called 'radium waters.' This deadly beverage really contains an appreciable amount of radium, and its first effect is undoubtedly agreeable and stimulating.

"So much so that one of its prominent victims, a Pittsburg iron-master and an amateur golf champion, not only drank large quantities himself, because it seemed to 'improve his game,' but being wealthy and generous he sent cases of it as gifts to his sporting friends. What because of them I do not know, but he himself died recently from neurosis of the jaw, acute anaemia and abscess of the brain.

"The autopsy revealed the largest amount of radium ever found in a human body some thirty micrograms enough to kill three men or women.

"That was perhaps an extreme case, but a credulous public in this country is being flooded with advertisements of quack radium remedies.

"Some of these, I am informed, can have the slightest therapeutic value and to such extent, if any, as they contain radium they must be harmful and potentially dangerous.

"In my view the preparation or sale of radio-active preparations designed for either internal or external use should be absolutely prohibited."

IT'S SO UTTERLY DELIGHT TO FASHION AND SO SMART AND PRACTICAL WHEN PUTTOGETHER

The dropped shoulder of the jumper performs double work. Besides being the newest idea of Paris, they also cover the shoulders, so when the warm weather arrives, a sleeveless jumper belongs with this cute little jumper.

The puffed sleeved guimpe is a darling vogue of spring.

Today's model is carried out in a lovely cotton in blue and brown mixture. The separate guimpe is yellow batiste. The pert new tie is brown etz satin ribbon.

Blue linen is attractive with a sheer blue and white plaided dimity guimpe. A yellow organdie guimpe would also be very fetching with either style.

Style No. 453 is designed for sizes 8, 10, 12 and 14 years.

Size 8 requires 2¼ yards 35-inch, with 1¼ yards 36-inch for guimpe.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Over Hundred Trains Daily

Electric Service Between London and Brighton Cost £3,750,000

The new electrified service from London to Brighton, Hove, Shoreham, and Worthing six trains an hour each way and refreshments all the time was opened on a recent morning by the Lord Mayor of London, Sir Percy Greenaway.

He and his party, accompanied by newspapermen, left Victoria station at 11 12 and reached Worthing in an hour and 12 minutes, where they were greeted by T. W. Hawkins.

At Brighton a few minutes later Mayor Frank G. Beal and council entertained the party to luncheon. This took place in the burgeoning hall of that stra ge exotic structure in Brighton which was a royal palace more than a century ago.

One hundred years ago the first steam coach arrived in Brighton by road from London. Three passengers, too, had lunched. They needed it. The journey had taken them seven hours.

Then there was the once famous Red Rover coach that broke all speed records with horses on the Brighton Road with a time of 7 hours 24 minutes.

Someone else had an idea of taking passengers to Brighton on a frame-rail propelled by sails, but gave it up.

On September 20, 1841, the first steam train arrived in Brighton on rails.

The electric service now inaugurated has cost about £3,750,000. On week days it will provide 104 trains and 25,130 seats daily between Brighton and London. An increase of at least 4,000 passengers a week over existing traffic is expected.

Has Peculiar Hobby

English Architect Shows Spiders the Sun Of His House

The Marquess of Tavistock, only son of the Duke of Bedford has a new hobby—spiders.

The marquess, who is a well-known ornithologist, not only studies the spiders in his new cottage, Chenies, but even allows them the run of his house at Peasmarsh, Sussex.

Miss Muffet need be frightened no longer, the marquess says, for as far as he can ascertain all the alarming propensities attributed to spiders are mythical. They possess considerable intelligence and the mazes are pert masters in fact when it comes to dealing with their own insects, he says. For instance, if Mrs. Spider is peeved by her husband will soothe her by pulling and shaking the web, proceeding which she seems to like

Old Bet Need Finding

Bobby did not seem to be paying much attention to the house, so his mother thought she would question him just to see if he had been listening.

"Now, Bobby Jones!" she cried "Where are cooseberries found?"

"Oh, mum," cried Bobby, "they are so big they aren't very often lost!"

Lady Member Of French Secret Service Had Record of Notable Accomplishments During War

A New Narcotic

Believed To Be More Effective Than Morphine, and Non-Habit Forming

Medical science is expected to announce soon the perfection of a narcotic derivative said to be more effective in relieving pain than morphine or heroin. This sedative dilaudid is now being studied in the United States Public Health Service and leading clinics through-out the country.

German and Swiss scientists already have made remarkable claims for dilaudid. Several high ranking German doctors assert that dilaudid is not habit-forming.

Recent experiments at the Mayo Brothers clinic are understood to have shown that dilaudid is especially valuable in obstetrical cases and in cerebral treatments.

A report received by Marry J. Anglaniger Commissioner of the Federal Bureau of Narcotics from the Mayo clinic stated that "dilaudid in one-sixth the dose of morphine proves as effective."

Dilaudid is a cousin of heroin. Chemically it is di-hydromorphine hydrochloride.

Winter Is Less Severe

U.S. Weather Chiefs Show Spring Is Closer Behind

Charts covering a period of 113 years offered an answer to the old query, If winter comes, can spring be far behind?"

Spring, the United States weather bureau decided after long study of the charts, is not so far behind winter as it used to be—but there is no telling about the future.

H. Kinney, chief of the climatological section of the bureau finds that the most severe winters developed in a cool century occurred after the time of the civil war, that since winters have been a little shorter and less intense.

Old Bet Need Finding

Bobby did not seem to be paying much attention to the house, so his mother thought she would question him just to see if he had been listening.

"Now, Bobby Jones!" she cried "Where are cooseberries found?"

"Oh, mum," cried Bobby, "they are so big they aren't very often lost!"

BOAST the highest paid employee in the lumbering industry on the Pacific coast is the high-rigger whose job it is to climb the giant trees, carry up the branches as he goes and finally to cut off the top of the tree so that no one can be placed the cap and parley which is later used to move the logs as they are cut? His job requires more courage and is more dangerous than that of a structural steel worker. The photograph shows a high rigger nearing the top of a giant fir tree in British Columbia.

Grossland Route Best

Turnsol Safest Way By Air From America To Europe

Fast air travel between America and Europe over a route not on any regular schedule was the passport held out to an audience in Convocation Hall, Toronto, by one whose pioneer investigations have done much to make such an airway, possible. The speaker was Dr W. R. Bolton, geological explorer of the University of Michigan, who delivered the weekly, Royal Canadian Institute lecture, telling what recent expeditions he had made about Greenland. The better route will use Labrador, Greenland and Iceland as stepping points. Dr Bolton stated: "The longest water jump will be 600 miles, he said. The climatic promises the greatest freedom from fog, differs little from that encountered which can always be flown in safety in the closest to great circle sailings of all projected courses.

An Afterthought

A neighbor called on the Hoskins. After a short talk he rose to go to the door.

"Well, well," he said. "I suppose I must be going. I'm on my way to the club."

Hoskins rose, too.

"I quit. I'll go, too. I'm sick."

"What's got in Mrs. Hoskins, going at her husband out of the clear, of her eyes.

"Bed!" finished Hoskins miserably

WORLD HAPPENINGS BRIEFLY TOLD

A thirteen unknown epitaphs is regarded to have been unearthed near the second pyramid.

A centenary note issued and signed by General Gordon during the siege of Khartoum in 1884 was sold in London recently for $7.30.

The two-way trade between Canada and United States during 1932 declined by more than $220,000,000 as compared with the previous year.

Net volume in the Okanagan Valley is a new industry of much promise and a display from grower of the valley will be shipped to the World's Grain Fair in Regina.

Completing a month's tour of Canada, in the course of which he gave more than 30 addresses before various organizations, mainly on Indian questions, the Marquess of Reading sailed for home on the "Montcalm."

Convinced the "submarine is the only safe vessel for polar explored on," Sir Hubert Wilkins said he not only is planning a second trip under the Arctic ice, but expects to take his wife along.

Only one state employee President Albert Lebrun volunteered a cut in his salary during the recent attempt to balance the French budget. He next went to the premier to cut his salary 10 per cent.

Industry, Hon. R. J. Manion, Minister of Railways and Canals, told an audience at Port William, has no right to expect labor as a pool from which men could be drawn in good times and to which they could be unmoved in bad times.

A $100,000 research foundation has been organized to further the cancer serum investigation started by Dr. W. T. Gilmore. A firm of scientific testing chem sts is now behind the research. Dr. Galbraith is the chairman of the foundation.

Oranges From Palestine

Shipments Are Transported To Halifax In Fairer Condition

The second shipment of Jaffa oranges to reach Halifax this season arrived on the S.S. City of Oran. The modern facilities with which the vessel is equipped enabled it to land some thousands of cases of these Palestine oranges at Port Said, transporting them in prime condition the entire distance to Halifax.

Already this year the quantity of Jaffa oranges reaching the port of Halifax is considerably in excess of all Canadian importations of this fruit during 1932. The fiscal year ending March 31, 1932, showed a total of 4,792 cases of Jaffa oranges entering Canada. This was the first real development of the trade with Palestine, previous shipments being 170 cases in 1931 and 301 cases in 1930.

France's New Super Liner

"La Normandie" Has Large Be Co Through Passenger Cabins

And now France has proved the pride of the United States again. She has built a great new super-liner, the world's maritime giant. That could be passed over, perhaps, but it won't go through the Panama Canal. "La Normandie" is too large to go through the locks. The present lock chambers of the canal are 1,000 feet in length and 110 feet wide. The Normandie is 1,029 feet long and has a beam of 117 feet, they talk of building a larger lock at the Panama but present estimates of the third set only call for a length of 1,200 feet with a spread of 135. But even that an immense of width, will allow only four feet room on each side of a vessel of the Normandie's proportions, certainly never too great a margin for safe handling of so gigantic a structure. However, present maritime trade and financial conditions are such as to render likely an increase even of the standard steamer in the canal's leading capacity for a considerable time in the future. It will be strange if the Panama Canal is outgrown by greater feats of engineering skill.—Brandon Sun.

Fashion Showpiece Hats
JayKay
By Sheila Hayter

SAGE LINEN AND SILK KNITTING

It's amazingly simple to copy! Today's model is beautifully carried out in a dark and light grey crinkly crepe silk.

The soft neckline is extremely becoming and youthful.

There is the important suspension about the hips but not carried too low to make strain across the thighs. The front of the shirt cuts in line with the hip yoke, creating a panel which tends to give the figure height. The rest of the skirt is slightly shaped for ease of movement.

Why not have it? You can copy it exactly for a very small sum.

It's a dress you can wear now and all through the spring.

Style No. 400 is designed for sizes 34, 36, 38, 42, 44 and 46 inch bust. Size 36 requires 3¼ yards of 39-inch material with 1½ yards 39-inch contrasting.

Price of pattern 20 cents in silver or coin (coin is preferred). Wrap coin carefully.

FREE TRIAL OFFER OF KRUSCHEN

If you have never tried Kruschen try it now at our expense. We have distributed a great many packets of "GIANT" packages which make 3 times the quantity, and we will send you a free sample. Ask your druggist for the "GIANT" 75c. size. Or, if you prefer it, send 10c. (to cover postage and packing) to Kruschen (Dept. 34), 4 Bow Lane, London, E.C.4, and we will send you a sample bottle by return. Don't forget to say whether Mr., Mrs., Miss or Master. Only one sample to a family. Sold in Canada by Canadian Druggists, Ltd., Toronto.

Canada's Wheat Crop

Final Estimate For 1932 Places Yield At 283,514,000 Bushels

The total production of wheat in Canada for the year 1932 was 283,514,000 bushels according to the final official estimate issued by the Canadian Government Bureau of Statistics. The yield was from 27,162,100 acres, or an average production of 15.6 bushels per acre. The 1932 crop was 107,189,200 bushels greater than that of 1931, which totalled 201,235,000 bushels from 26,200,975 acres, or 12.3 bushels per acre. Of the whole of last year's wheat crop the three Provinces, Manitoba, Saskatchewan and Alberta accounted for 269,600,000 bushels from 26,200,000 acres.

The 1932 total yield of oats for the Dominion was 397,541,000 bushels from 13,146,600 acres, from a yield of 39.8 bushels per acre. Barley returned an aggregate crop of 80,712,000 bushels from 3,757,000 acres, equal to 21.5 bushels per acre. Both the oats and barley crops were larger in 1932 than in 1931 and, as in the case of wheat, the Prairie Provinces were the principal producers of oats and barley.

The aggregate value of all Canadian field crops in 1932 is estimated at $416,588,900, as compared with $482,353,600 in 1931. The total area under field crops in 1932 was 41,-639,500 acres, as compared with 38,-674,800 acres in the previous year.

Recipes For This Week

(By Betty Barclay)

STUFFED SPICED PRUNES

½ pound prunes
½ cup water
½ cup corn syrup
½ cup water
2 to 3 cloves
½ teaspoon grated nutmeg
½ teaspoon cinnamon
3 allspice berries
½ teaspoon maple flavoring.
Chopped nut meats.

Boil prunes in enough water to cover, or use one half hour. Drain off liquid and add sugar, corn syrup, water and spices. Simmer slowly until the syrup is all absorbed into the prunes. Remove from carefully, leaving prunes whole as possible. Fill the cavities with chopped nut meats moistened with a little corn syrup or cream in which flavoring has been added. Roll in confectioner's sugar.

BACON SALAD SANDWICH

Cook the bacon until it is crisp. Butter slices of bread and spread lightly with salad dressing. Add a little more dressing to the chopped tomato which has been seasoned with salt and pepper. Add crisp bacon, and put on the remaining slice of bread.

After two weeks' trial of traffic signals in London without the yellow caution light, the light has been restored as being useful.

By an ancient law churches built on Crown lands in Britain may not ring bells.

SUNDAY SCHOOL LESSON

FEBRUARY 19

JESUS TEACHES IN PARABLES
—THE GROWTH OF THE KINGDOM

Golden Text: "The earth shall be full of the knowledge of Jehovah, as the waters cover the sea." Isaiah 11:9.

Lesson: Mark 4:1-34.

Devotional Reading: Psalm 119:33-40.

Explanations and Comments

Responsibilities Of Disciples, verses 21-25. "Unto you is given the mystery of the Kingdom of God." Jesus said to the disciples as He began to explain to them the parable of the "sower" (verse 13), and now He goes on to tell them that privileges (attended with responsibility). If their insight into great truth was greater than that of the multitudes theirs was the responsibility of making use of it for the common benefit.

"Is the lamp brought to be put under the bushel, or under the bed, and not to be put on the stand?" The use of a light is to shine, therefore the lamp is not to be hid but is to be put where it can be seen. Knowledge is not for oneself it is to be shared. "We are back here at a principle which runs right through the New Testament, namely this, that every gift conferred upon us by God is conferred upon us for use; not for our own enjoyment, or enrichment, but for service. The word of the Lord is not a thing to be hoarded, it is a thing to be shared. We hear it in order that we may proclaim it. We receive it that we may spread it. 'Let your light so shine before men.' said Jesus, 'that they may see your good works.'

"Heaven doth with us, as we with torches do,
Not light them for themselves, for if our virtues
Did not go forth from us, 'twere all alike
As though we had them not."

What you get from listening depends upon the manner in which you listen. If you are inattentive to what is being said, or if your mind is already occupied with other things, you hear the words you do not "sense" them, then you are nothing profited by your hearing. What you get from any service depends upon what you bring to it. If you bring an attentive and and a receptive heart, then you receive your reward.

The Power Of Growth Inherent In Spiritual Things, the Parable Of Seed Growing Secretly, verses 26-29. The seed is the Word of God, we learned in the parable immediately preceding these verses. Now we are told of the secret, mysterious growth of the seed, of its orderly growth first the blade, then the ear, then the full corn in the ear—and then of the fruit-bearing power of the earth and of the time of full harvest.

No Good Unless Spread

Value Of Gold Lessened When Supply Used Up

It rested very much in the hands of the present gold standard and creditor countries whether gold was to become so rare in relation to other commodities that its full use as a backing for currency was a luxury that only one or two could enjoy, or whether they were hoarded unreasonably that gold was very much like the large cake the schoolboy mistakenly kept to himself until it "went stale."

So we came back to the old proverb. "Money, like much, is no good unless spread." That was true of gold then any other form of money, and gold could only justify its extraordinary intrusion into the world's affairs if it added—and always added interchange of goods. The moment we became frightened of that interchange, the value of gold was a delusion.

British common sense, backed by bitter experience, ought to take to little the councils of the nations better equipped to solve the problems that confronted us, and meanwhile it behooved everyone to try individually to master the problems.—Sir Josiah Stamp.

Taking a Holiday

He was standing at the corner paying absolutely no attention to a woman. He should his head and motioned to himself: "No, no—no, no, no!" He paid no attention to the crowd that gathered, but just kept saying: "No, no, no!"

An officer shook him by the arm and said: "What's the matter, my friend?"

"Nothing at all," came the reply. "I'm just a 'yes man' taking a day off!"—Railroad Trainman.

BRITISH SET NEW LONG DISTANCE AIR RECORD

Wildish Hop, Scott Action. Two English officers of the Royal Air Force stepped down, trim and smiling from a giant monoplane here, after travelling 5,309 miles from England without a stop and setting the United Kingdom supremacy

The brilliant flight of Squadron Leader O. R. Clayford and Flight Lieut. G. R. Nicholetts brought the long-distance non-stop flight record to Great Britain alongside the ultimate and speed records that other much airmen of the Royal Air Force had won. Britain became the first nation in history to hold all three major air records.

Fresh-shaven, showing little signs of fatigue, they quietly explained they would have gone further, attempting to reach Cape Town without a stop, if they had had any fuel left.

Cape Town is 6,196 miles from Cranwell aerodrome, England, where the flyers took off.

A perfect landing marked the end of the roaring trip over Hungary, Czechoslovakia, the Balkans, France and the Mediterranean, the desert, jungle and hills of Africa. The officers had been in the air for 57 hours and 38 minutes.

When they came down, Clayford and Nicholetts cheerily greeted the hundreds of persons who were waiting personally attended to their machine, pushing it to a pace of safety, and then went to a hotel where they were soon fast asleep.

Clayford and Nicholetts travelled 365 miles further than the former long-distance holders, Russell Boarfman and John Polando of the United States, who flew from the United States to Turkey in 1931.

May Attend Conference

Three British Ministers Provisionally Selected To Go To Washington

London, Eng. It was understood in Whitehall that a provisional arrangement has been made for Prime Minister Ramsay MacDonald and Walter Runciman, president of the Board of Trade and subject to regovernment of the April budget of Chancellor of the Exchequer Neville Chamberlain to go to Washington for debt conversations with the incoming United States administration.

If all three are able to go, the three principal ministers in the National government would be represented. National Labor, Liberal and Conservative.

Four Aviators Killed

Members Of Royal Air Force Crash During Practice Flight

Salisbury, Eng. Four men of the Royal Air Force were killed when their bombing plane crashed during a practice flight and burst into flames.

A fifth man aboard escaped with burns.

Those killed were: Flying Officer T. F. Priest; Sergt. A. R. Allen; Corporal Cyril Smith, and Second Class Aircraftsman E. G. Schell. Leading Aircraftsman J. W. B. Higwell escaped from the crash with only minor burns.

Prisoners To Face Trial

Kingston, Ont.—Twenty-five prisoners from Portsmouth penitentiary will appear in police court as a result of the rioting of last October, the Canadian Press was informed officially. More than 300 other prisoners, however, will be punished for their share in the disturbances, most of them coming before prison court and not having to face criminal charges.

Hope For British Taxpayers

London, Eng. British taxpayers are breathing more easily. While Neville Chamberlain, Chancellor of the Exchequer, would make no promise of reduced taxes, he did not think, he told an inquisitive House of Commons that increased taxation will be necessary this year.

Ottawa Discusses Wage Cuts

Hamm Takes Floor Stop In $5,000,000 Postal Commotion

Ottawa, Ont.—The government has taken the initial step toward $5,000,000 from the national payroll. Resolutions were introduced, prefacing submissions of bills cutting 10 per cent. from sessional indemnities of members and senators and the salaries of civil servants. It is proposed to levy an additional 10 per cent income tax against judges, Royal Canadian Mounted Police and army and navy officers.

For three hours the House discussed the resolutions which in effect extends for another year the salary cuts already in effect. The debate was adjourned to make way for departmental estimates.

Five members rose from opposition benches to oppose the salary slash.

J. S. Woodsworth leader of the C.C. Co-operative Commonwealth Federation, F. H. H. Cherrier Ottawa; Dr. J. A. Denis St. Denis, Montreal, William Duff, Ottawa, Dr. Donald Black, Montreal, and J. F. Pouliot, Temiscouata.

Hon. E. N. Rhodes, Minister of Finance, piloted the resolution in the House.

Peace Movement

French League Spokesman Makes Appeal To Nations To Lead the Way

Geneva, Switzerland. Former Premier Joseph Paul-Boncour closed general debate on the French armament plan with an appeal to European countries to create Europe's own security through regional pacts like the Locarno treaty as an accompaniment to arms reduction.

The French spokesman, in discussing the problem of conciliating universal guarantee of security, made an implied appeal to the United States to take the lead in measures to implement the Briand-Kellogg pact.

Awards For Spring Show

$2,000 In Cash Prizes For Annual Event In Regina

Regina, Sask. The sum of $3,000 will constitute the cash prize list for the forthcoming spring show held under the direction of the Regina Exhibition Association.

Announcement to this effect has been made and the show will be held at the exhibition grounds March 21 to 26 inclusive.

Publication of the prize list will be made shortly.

The year's spring show will be confined to exhibitors resident in Saskatchewan.

Lower Bank Interest

Cut Should To Some Slight Accordance Gibbons

Toronto, Ont.—"Interest rates will be cut in the near future," the Toronto Telegram says. "It is bound to come," representative bands of banking and trust corporations informed the Telegram. They base their forecast on the tightening interest rates on deposits in government savings will be reduced. J. A. McLeod, general manager of the Bank of Nova Scotia and president of the Canadian Bankers' Association, has intimated the banks are waiting for a lead from the government.

Would Raise Standards

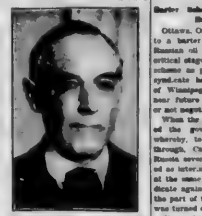
Ottawa, Ont.—Convinced of the need of a careful study of the educational standards of the engineers' profession, the annual meeting of the Engineers' Institute of Canada concluded with a special meeting of the council in Montreal to discuss the report of the development committee. The latter recommended a drastic raising of the standards.

Tide Of Progress With Canada

Sydney, Ont.—"The tide of progress is with Canada. This country has the things the world wants that to bring it out of its depression," Carl C. Conway, president of Consolidated Can. Limited, one of a party of United States financiers inspecting Ontario's northern mineral belt, said at the conclusion of the tour.

One of Greenland's two wireless stations, that at Scoresby, has burned down.

THE FIRST SEA LORD



Admiral Sir Ernle Chatfield, photographed in the Admiralty on his first day after succeeding Admiral Sir Frederick Field as First British Sea Lord

Use Canadian Ports

Senate Railway Committee Approves Policy Of Use Of Canadian Route

Ottawa, Ont.—The senate railway committee set the stamp of its approval on the public owning Canadian goods for export over Canadian railways to Canadian seaports. More than a mere declaration of principle the senate committee by inserting an amendment in the present railway bill, gave a specific direction to the trustees of the Canadian National Railways that, unless a shipper indicates otherwise, goods consigned within Canada for carriage by the Canadian National and intended for export must be so exported out of Canadian ports.

This, in the opinion of Hon. Senator Arthur Meighen, sent to the full limit of the demands sought by the delegates from the Maritime provinces who had appeared before the senate committee March 4 to urge that in line with Canadian policy it had been included in the agreements under which the transcontinental railway was constructed.

Parliament had not the authority to enact such a provision in relation to the Canadian Pacific, but it had the power to do so for the government-owned road, said Senator Meighen.

Railway Independents

Ottawa, Ont. Subsidiary forms of transportation must not be allowed to put the railways out of business, Sir Henry Thornton, president, declared.

Sir Arthur Meighen, government leader, stated in the senate. The railways were independents and the lower utility must yield to the more important one.

Coal Ranking Critical Stage

Barter Scheme With Russia Now Being Discussed

Ottawa, Ont. Negotiations looking to a barter of Canadian cattle for Russian oil and coal are reaching a critical stage, it is believed here. The scheme as proposed by the western syndicate headed by G. G. Serbin of Winnipeg, is still afloat but the Soviet Union may determine whether or not negotiations will be dropped.

When the syndicate first approached the government with a plan whereby, to ensure the deal going through, Canada would guarantee Russia seven per cent bonds accepted as interim payment for cattle and at the same time guarantee the syndicate against breach of contract on the part of the Soviet government, it was turned down.

Since then sponsors of the idea have learned they may be able to raise sufficient capital to finance the undertaking without government assistance but before putting money into it they want to be sure they will be able to bring the necessary quantity of Russian products into Canada and dispose of them.

Toronto Bank Robbery

Two Armed Men Escape With Large Sum Of Money

Toronto, Ont. Two armed men walked coolly into the Bank of Toronto branch at Queen and Kenilworth Streets here and a few moments later had made their escape with between $2,000 and $3,000 in cash.

It was the second bank robbery in the city this week. A few days ago, two men robbed the Royal Bank at Wellesley and Church Streets, one escaping with $3,200 and a man alleged to be the other being shot in the shoulder after a gun battle on a busy street with a policeman.

Two clerks and the manager were in the cut end bank today when the bandits stalled in. All three employees were locked in the vault.

Mining Boom

Activity In Mining Stocks Gives Employment To Many Men

Toronto, Ont. Jobs have been restored to more than 100 former brokerage house employees in Toronto as a result of the recent activity in mining stocks. Started several weeks ago, it was not until this week that brokers' offices were compelled to send out hurry-up calls for floormen, telephone operators, accountants, stenographers and telegraph operators.

Mining men state if the inflow of foreign and Canadian money continues, thousands of field workers will gain employment in exploration work and actual mining.

READY TO TAKE THE "ROAD BACK"

With the Nazi Servee, of which he son is a prominent member, riding the crest of the wave in Germany, following the appointment of Adolf Hitler as Chancellor, the former Kaiser Wilhelm is reported to be preparing to leave his exile at Doorn, Holland, to return to Germany. Above are two pictures of the ex-Emperor. The main photo shows Wilhelm as he is today, leading the life of a country gentleman at his Doorn castle. The picture in the oval shows the former monarch when he was the "All-Highest," Germany's Emperor and war lord.

SAYS DIVERSIFIED FARMING WILL ASSIST THE WEST

Regina, Sask. During the past years farmers of western Canada have realized they must get into diversified farming, states H. O. Powell, general manager of the Dominion Agricultural Credits Company, Limited. Many have taken to livestock, to poultry, and changed from grain growing to wheat to wheat and other grain.

Included in the activities of the company, Mr. Powell cites the purchase and distribution of 4,250 sheep and 1,500 head of cattle during the past year. The sheep are all purchased in the prairie provinces and dozens of new flocks have been started in districts where sheep were never before seen. The total cost of the sheep distributed in the prairie provinces is $63,151 and per cattle, $31,750.

Selkirk, Oxford, Shropshire and Hampshire sheep are the breeds taken up by the farmers and the cattle are mostly Hereford and Aberdeen-Angus animals of the best types.

Not a single case of failure has been reported to the company, during the past year, Mr. Powell believes. This record is due to the supervision the company provides through its corps of experts, who are kept busy practically all the time.

Big development is expected in central Saskatchewan, northeast Saskatchewan and northwest Manitoba, in the Swan River district, also in the districts between Clarenbois and Shellbrook and from Edmonton west to the Rockies.

One of the problems in districts where feed is scarce has been partly solved by using straw, which was formerly considered one of the worst weeds in the country Russian thistle. At the present time Mr. Powell is busy preparing a circular on the use of Russian thistle as food. He has secured much information and is inviting farmers who have been using this weed to write their experience and forward them to the company.

Mr. Powell expressed great satisfaction at what had been accomplished by the Agricultural Credit Company's deals and believed that despite all talk of depression the farmers were reconstructing their methods and within a short time would be out of trouble.

Receives New Appointment

Winnipeg Man Now Chief Secretary To Prime Minister

Ottawa, Ont. Appointment of R. H. "Ted" Finlayson, of Winnipeg, as chief secretary to the Prime Minister, is a public recognition of services he has been coming to Ottawa. Finlayson has become the right hand of the leader of the government. He does not function as a private secretary. One could frequent Mr. Bennett's suite of offices indefinitely and never see him. He does not meet the public, but works in a little office tucked out of the way in the East block 20 paces from his chief.

Not Guilty Of Libel

Toronto, Ont. Written verdict of the jury found F. P. Gisborne, publisher of The Ottawa Journal, not guilty of libelling W. T. R. Preston of Port Hope, in the $25,000 damage suit brought by the latter. The verdict also said, "We find that Mr. Preston has had an honorable public career." The jury deliberated two hours before returning a verdict.

Hugo Pyramid Of Rubber

Toronto, Ont. A 9,454-pound pyramid of rubber, all from the trees of one acre, now on display during the Holstein Friesian Association's annual meeting held here, February 9. At the convention banquet Premier George S. Henry presented a gold watch to the owner of the cow, T. F. Dunn, Woodstock.

Unsolicited Bank Balances

Ottawa, Ont.—The report of unclaimed bank balances tabled in the House of Commons by Hon. E. N. Rhodes, Minister of Finance, reveals that there is $1,080,189.76 of unclaimed money in the banks throughout Canada.

The Child Problem

Great Care Should Be Exercised in Administering Punishment

Punishment of a child should not be lightly undertaken. Punishment is ineffective unless the child understands why it is administered. It is self-defeating if it breeds disrespect in the child's mind. Its corrective purpose is instituted if it is converted into disproportionate to the offense. Moreover, what is a proper punishment for one child to ordinary impropriety, and hence sharply undesirable, for another. Some children are so constituted physically, nervously and mentally that they never should be whipped, others never should be "isolated," even if that word be used to mean the least humiliating form which the penalty it describes can take, others should not be deprived of favorite playthings, others should not be compelled to go without an article of food of which they are particularly fond.

Each child is a problem by itself. The ideal treatment of a child is that which by punishment or reward, praise or censure, awakens its understanding. The worst treatment is that which brings down on a child suffering, mental or physical, for innocent errors, for misunderstandings due to ignorance, for stupidity, bad temper or short-sightedness of parents and others in authority over it, and unfortunately inflicted for the purpose of which the child does not comprehend.—New York Sun.

Two Speedy For Test

New Aeroplane Cannot Be Sent in Action

Anyone possessing a huge building, say three miles square, and hermetically sealed to prevent her air density, will be welcomed with open arms by the aeronautic experts of California Institute of Technology.

These experts have designed an airplane capable of a speed of 1,000 miles an hour—but they cannot test it on a large scale in the heavy air of her altitudes.

"The airplane, Dr. Klein said, is correct theoretically. Its speed of 1,000 miles an hour, more than twice as fast as present planes, would fly at an altitude of between 15 and 20 miles in the rarified atmosphere far above the clouds, fog and prevailing winds.

This super-plane, as proposed by Dr. Klein, would be propelled by the burning of gasoline in long, open-end tubes. An engine of great power would be necessary to speed the airship at great speeds before the rocket-like apparatus would begin to function.

As top speeds were attained through the use of internal combustion engines, explosion of gases from the tubes would increase the flying speed tremendously, Dr. Klein believes.

Each tube would take the form of a long tunnel, open at both ends, extending the length of the fuselage. The central channel of the tubes would be larger than the ends. Dr. Klein explained. The air, at high speeds, would rush into the tubes with such force that the compression would heat the air, causing it to expand.

Jets of burning gasoline in the central portions of the tube would cause additional expansion, causing the air to burst from the vent with terrific force.

Theoretically, Dr. Klein says, the exhaust from these tubes would more than equal the air blast from a dozen propellers.

Keeps "Throats" Inn

An Hingham inn with a double personality is called the Castle of Gastofield, and only after the first few drinks in the barroom do you realize the innkeeper is a priest-collector. Hanging discreetly beneath a huge clock is "the three bells," the symbol of the collector.

Violin Seems Of Gilt Job

When John Marshall, past bursar of England, visited New York recently he looked over the site of an old cabin where he "bached on bay" many years ago. The old hut was located at Christopher and Washington Sts., Greenwich Village, section.

W. N. U. 1931

A scene outside the plant of the Briggs Body Manufacturing Company, at Detroit, Mich., as hundreds of strikers gathered the plant to prevent strike-breaking. The factory is running with a skeleton force of new workers in an attempt to supply the Ford Company with enough bodies to enable production of new cars which was stopped by the Briggs strike. A large force of police is on hand to quell possible disorders. Inset is Edvahrov Benet, a would-be strike-breaker, who was slugged as he was going to the Briggs plant to apply for work in defiance of the pickets, being aided by police.

Old Logging Centre Loses Its Railroad

Craigsville the Centre Where Men Become "Timed Down"

"Ghost" towns, mere relics of the days when Minnesota's northland was one big pine forest, dot the big woods, but Craigsville is first among the liferemnants of the once thriving industry.

Its frame shacks sagging and crashing in the stinging north wind, the mirth, laughter and song of the gay old frontier days seeming to echo from the wooded hillside, Craigsville today has just absorbed the meanest blow.

The 35-mile rail connection linking the old logging centre with the outside world since 1899 has been removed.

Built just south of the Canadian border, Craigsville in the early eighties was the last outpost of civilization the lumberjacks were hurtling through vast stretches of tall timber to gold and fame.

Here was a genuine frontier life centering around a heterogeneous assortment of humanity—French-Canadian trappers of the old Hudson Bay Company, gnarly lumber jacks, tough teamsters who swapped wicked wisecracks over ear-tone logging regs, professional gamblers, petty crooks, lying hardshakers and the other habitues that made the place the means of the Minnesota folk.

Then the forests dwindled; Craigsville withered and now the story on Main St., once agleam with the light of barroom lamps, glaring through frosted windows, is trumped under the feed of moose and deer, crossing from the lumberjack trails of Craigsville to the swamp beyond.

Ellen's Downhill Period

Dog Attempts Published and True Under All Circumstances

The one absolutely unselfish friend a man may have in this selfish world is the one that never proves ungrateful or treacherous, is the dog. A man's dog stands by him in prosperity or poverty, in health or in sickness. He will kiss the hand that has no food to offer. He will lick the sores that come from unclean living. He will guard the sleep of his pauper master as if he were a prince.

When all other friends desert, he remains. When others take wings and reputation fails to please, he is no constant to his love as the sun is to his journey through the heavens. If fortune drives the master forth in rags and shame, he trots hungry and barefoot by his side, glorying in the privilege then that of accompanying him. And when the last scene of all that ends this strange, eventful history is in embrace and the body is laid away in the cold ground, no matter if all other friends prove fair-weather, by the graveside will the dog be found faithful and true, even unto death.—Gunter West, U.S.A.

Show Stand Is Tested

Engineers Subconscious Handling Stress By Use Of Soap Bubbles

By mapping the contour of a Sinsoy soap film over the cut-out model of a new section of machine or skyscraper beam, engineers can determine quickly just how much twisting or bending strain will affect the original of the model. The apparatus, described in Popular Mechanics by Dr. F. Alleton Cushman, of the college of engineering at the University of Michigan, consists of a square box halfway down in which is a brass frame seated with a portion of the metal cut out in copy of the cross section of the article to be tested. Topping the box is a glass plate, inset with a depth gauge.

A film of soap solution is drawn across the cut-out design, and water is forced into the lower part of the box, causing the combined air beneath the plate to push up the film, and with the depth gauge the varying level of the film is measured from the glass top.

Many readings are taken, curves are plotted between points, and a contour map results, which locates stress points easily interpreted by the designer of metal work.

Death's Cave Is Rigid

According To Theory Of University Of California Geologist

The earth loses its former motion once long enough to establish an inertia center. At least it does so in the new theory of Prof W. J. Miller, geologist of the University of California, who declares the core is probably a solid as rigid as steel. The old notion about the molten centre Professor Miller explains by stating that when a break occurs in the earth's crust the pressure at depth melts the rock and makes it act as a lubricant. The theory may start a war among the geologists. Christian Science Monitor.

New Type Air Raid

Radio Direction and Gyroscopic "Robot" Pilots Are Foreseen

Formations of twenty to thirty radio-controlled airplanes, carrying tons of explosives, will attack the cities of enemy countries in future wars, in the opinion of Brigadier-General William Mitchell, former chief of the U S Army Air Service.

General Mitchell drew a graphic picture of an invading aerial armada.

Radio beams and gyroscopic "robot" pilots will hold the "planes on their course," he said. . . . The "planes will fly 20,000 feet above the land or ocean."

The former air chief said the "robot" flyers would drop winged bombs equipped with gyroscopic directional control. The bombs will be aimed with a high degree of accuracy by automatic range-finding equipment, he declared.

Expressing the opinion that such an attack would be almost immune from a counter-attack, General Mitchell said defensive "planes would not be able to locate the attacking formation at such high altitude.

A single department of national defense would enable the United States to prepare for such attacks, the former Army official believes. He advocated a revised method of supervising civilian aeronautics.

Tip For Employers

Chicago Typists Have Work Checked By Hidden Camera

Feverish work is being done by some typists in an office in Chicago. Hidden cameras have been installed for an experiment to take moving pictures of unsuspecting workers, and when the pictures are shown in slow motion any slackness can be detected.

Employers are not to be told that the typist can be sure whether her employer has decided to make the experiment or not.

Technocracy On The Farm

Does Not Furnish Market For Produce Or Lift Mortgage

Although labor is available now at lower cost than for years, and movements are under way to assist farmers to utilize it experts are still devoting time and ingenuity to still greater mechanization of agriculture. New developments recently announced by manufacturers include

A sugar beet topper, that pares the beets out of the ground grabs the entire beet plant and carries it to the chopping knives

A new type of tractor that weighs little more than a draft horse, but has the sustained pulling power of four draft horses. It costs no more than the average small motor car, does belt work and supplies power for binders or other machines hitched to it

A machine which brushes, grades and polishes 1,000 bushels of potatoes a day, being somewhat similar to a coin-operated shoe shine which brushes the fuzz from peaches.

A combine milker with which the milk is never exposed to the air from the time it leaves the cow until it enters the bottle

A new balloon-type of tractor tire which is said to increase the rate of plowing by 27 per cent and to make a saving of 35 per cent in fuel costs.

All-steel barns which are shipped in parts from the factory and erected on the farm in units designed for 24 or 33 cows or any other standard sized herd or flock. . . .

Thus, the mechanical experts have it all figured out how a farmer can cut labor costs and increase production at the same time. So far, however, none of these engineer-ing wizards has invented a machine which will enable the farmer to find a market for surplus crops on hand, or a machine that will lift a mortgage. Until somebody invents machines of that nature, it seems that the others might just as well wait. Woodstock Sentinel-Review.

Height, Depth and Distance

Have Been Conquered By Piccard, Auguste Piccard and Lindbergh

Prof. Auguste Piccard, explorer of the stratosphere, dines with Mrs. Amelia Earhart Putnam and Col. Charles A. Lindbergh. He tells his fellow aerial trail-breakers he planned to go down long before he planned to go up. His idea is to explore ocean depths from a glass-windowed gondola and a balloon inflated with air instead of helium. Helium would carry him down, throwing it out would allow the oil balloon to bring him up. Amazingly they talk these three, who have reduced to practical negotiables the ancient theoretical of height, depth and distance. Countless generations have man's world as having only length and breadth—One generation has lifted its thickness too. —Christian Science Monitor.

British Get the Business

Trade In Fuel and Captured Air Over the World

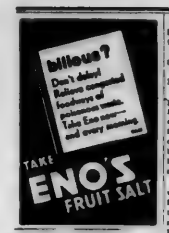
Marvelously the British rule power trade all over the world. Photographs show a great crane lifting an entire 150-ton locomotive onto a ship at the Manchester dock. It is one of eight engines "British built" on the way to China.

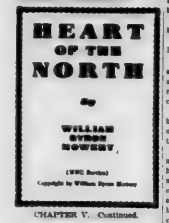
Yesterday you read that the first concession granted by Turkey to anybody allows Britain to build a ferry to carry freight passenger cars and automobiles across the Bosphorus, from Istanbul to Sikerji, establishing continuous connections between Asiatic and European markets.

Our Lindbergs, "flying business" has had things a little too easy and in some cases has preferred to make money by printing more stock, instead of going out and looking for more business.—By Arthur Brisbane.

Pine Loss Was Low

Nineteen, 35 miles southwest of Saskatoon, is putting itself on the map. Its 1930 fire loss totalled $61.30. Fire Chief John McDougald reported at the council's final meeting. Inspection work was carried on throughout the year and citizens instructed in matter of fire prevention.





CHAPTER V. Continued.

"And capture those men and get the credit? Not Haskell! He's too wise. Getting those bandits convicted with him. So long as he saves his face, he doesn't really care whether he gets them or not. That lacrosse patrol is dead. It was our best hope, but now it can't ever be. I could stir up trouble for him. I could bring on an investigation; but that would take months. It'd be too late then; those bandits'll be gone."

She repeated, brokenly: "Gone, gone you, it'll be too late then, Alan, that means—means Dad will be found guilty . . . and sent to prison—or worse . . . ."

For the second time in the years he had known her, Joyce broke down and cried. It hurt Alan as few things in his life had ever done. As he felt her sobbing against him, as he thought of this tragedy looming over her, his last hesitancy about his plan was swept away. With those bandits safe in the watery wilderness of the Thal-Azuak, Dave MacMillan would be convicted; he would be sent up for life. It would break Joyce, break her spiritual courage, her wild-born nature. When he thought of the terrible stigma upon a girl so innocent and brave, he swore silently:

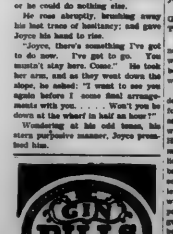
"I'll never see her brought down to that. I'll get these men, I'll bring the truth into court."

He realized fully that he was starting on a long trail, a trail never to be retraced. He was committing himself to a staggering self-sacrifice. But he had to traverse that path; in honor he could do nothing else.

He rose abruptly, brushing away his last trace of hesitancy; and gave Joyce his hand to rise.

"Joyce, there's something I've got to do now. I've got to go. You mustn't stay here. Come!" He took her arm, and as they went down the slope, he added: "I want to see you again before I some final arrangements with you. . . . Won't you be down at the wharf in half an hour?"

Wondering at his cold tone, his stern purposive manner, Joyce promised him.



W. N. U. 1931

At Mrs. Drummond's house he left her and started out along the terrace to Haskell's cabin.

Across the dusk he demanded, with no preamble:

"I want to buy out. Tonight! Hear? Now!"

Haskell's eyes narrowed in surprise. He could hardly believe it. He knew how deeply Baker was rooted in his work and friendships and life in the northern country, and he could scarcely conceive of a man deliberately throwing away a long brilliant police record at one tremendous step.

But there was no doubting Baker's words, no doubting his grim manner. Baker was demanding to buy out to get out for good. As he studied the sergeant, Haskell drew back warily. Baker might be laying some trap for him.

He refused. "I'm too short-handed here as it is now."

"I don't give a d—n about that. I'm buying out."

Haskell's confidence was returning as he saw that Alan intended no payroll violence. "If you buy out, there's record ends. You'll have to start all over."

"I'm buying out for good. There'll be no starting over again. I'm getting out of the Mounted, out of the country."

Haskell debated swiftly. He was not averse to Baker cutting his own head off, and he now saw there was no trap laid for him. But there were other things to be considered. In sober judgment, casting back over the last nine months, recalled the score of times Baker had corrected the mistakes of his and kept the post running smoothly. Wisdom whispered to him that he needed that man, needed him desperately. And Elizabeth Spaulding . . . . Was she going away with Baker? Was Baker taking her with him?

If she went his act in busting the sergeant would prove a boomerang against himself. He tried to temporize.

"I haven't the authority to let you. You'll have to make out application and wait for permission from headquarters."

"That's the rule for close-in detachments. Down north here where a communication may take months, months, it's understood that an officer can accept a buy out on his own responsibility."

"But it's not the official rule. Under the circumstances I don't choose to accept your papers."

"You will choose! I'll make you choose! You've busted me, all right; you've saddled the blame and shame of this business on me, and I'm through your lie and you've got a stool pigeon there to back you up. But I can bring on an investigation just the same. And I'll have witnesses to testify to things that you can't lie out of. Williamson is coming down here next month. He knows enough to make you the devil now. If I'm here when he comes, what I'll tell him won't help your standing any."

Haskell lit a cigarette to hide his nervousness. He asked, "Where are you going if you get out of service?"

"That's my look-out. Will you buy, God! I'm having here. Tonight. That's all you need to know."

Haskell started a little. Tonight—he had coming feed—it seemed Baker was going by himself! Mount Elizabeth would not go with him but would stay here at Drummond's.

Very thoughtful, he looked away, debating. Baker's motives, his reasons for this precipitate move, were dark and puzzling. But he saw no way in which they could possibly harm him. Hardcock, an experienced northern man, would still be available. If Constable veteran to turn to, especially if baited by the hope of this vacated sergeancy. Hardcock would be easier to manage, too. Since Elizabeth was going to stay here, at least temporarily, why shouldn't he let Baker go? The farther away he was, the better!

The more he studied the situation, the more it seemed too good to be true that Baker was deliberately cutting his head off, buying out, getting out of the country, leaving Elizabeth here alone, letting any possibility of the investigation fall he secretly dreaded.

"I'll consent on one condition if your buying out. Otherwise you'll have to wait for official and regular approval."

"What's the condition?"

"Your resignation." Haskell paid stodgy, with the ability to look Alan squarely in the eyes, "to be a difference of opinion between us about the responsibility of this Akosaba patrol. If you'll sign a statement to the effect that you had complete charge of the detail and upon your party on your initiative. If you'll do that you can buy out. Otherwise you can't."

Alan wavered. Signing a lesson lie; taking all the stinging disgrace upon himself, strengthening Haskell's guilty hand . . . But then his thoughts leaped to Jimmy and Larry and Dave MacMillan and to Joyce, pausing her last hope to him. What did it matter his signing a lie? would change one jot or tittle of God's truth. What did a sheaf of paper matter on his long life-long hunt for those murderers, clearing his partners, shielding Joyce?

He said: "I'll sign. I said it as heavy as you like But don't knock Hardcock or Pedmanuit or Youngo."

Haskell wrote out the declaration of responsibility. Alan read it. As he wrote his name, he snarled:

"If I were you, I'd frame that, inspector, and hang it on the wall. It's a certificate of your dishonour."

Not answering, Haskell went on looking up the remaining enlistment period and figuring the amount. Whipped brought over the forms and filled in the data. Both Alan and Haskell, with the constable as witness, signed the numerous official sheets of the procedure.

Folding his copy of it, Alan walked out of the door, out of service, out of the Mounted Police . . . .

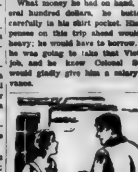
CHAPTER VI.

The Dark Hour

In his cabin Alan took off his uniform and changed to civilian clothes.

It seemed to him he was purging off his foot-free adventuresome life with that uniform.

What money he had on hand, several hundred dollars, he buttoned carefully in his shirt pocket. His surgeon on that trip down would be heavy; he would have to borrow. But he was going to take that Victoria job, and he knew Colonel Steele would gladly give him a salary advance.



Then he made up a sizable pack, a single blanket, a change of clothes, food for a week or ten days. That was all. No camping outfit, no weapons, no equipment for wilderness travel.

As he was buckling his pack together, Elizabeth unexpectedly came into the cabin. As she stepped into the light, she exclaimed: "Alan! That MacMillan girl told Mrs. Drummond that Haskell dismissed you! That you're a constable! That he put all the blame of this patrol on you!"

"That's what he did," Alan answered, straightening up, facing her. "I didn't believe he was capable of it.

Miss Ann Adam bakes her famous Muffins with Magic Baking Powder

"When selecting ingredients for my recipes," says Miss Ann Adam, cookery authority of the Canadian Home Journal, "I consider them points — economy, health value, and successful performance.

"Magic Baking Powder meets them all. I use and approve Magic, because I know it is pure, and free from harmful ingredients, and because experience has taught me that I can count upon successful results with Magic every time."

Magic Baking Powder is used exclusively by the majority of cookery experts, dietitians, and housewives throughout Canada. In fact, Magic outsells all other baking powders combined

"CONTAINS NO ALUM." This means that Magic is made from cream of tartar. Most Magic Baking Powder tins bear the label "Contains no alum."

Miss Ann Adam's Recipe for Bran Muffins

½ cup bran
½ cup flour
½ teaspoonful salt
1 tablespoonful sugar
1 egg
1 cup milk
1 tablespoonful melted shortening
2 teaspoonfuls Magic Baking Powder
